Letter to Shareholders

Dear Shareholder,

We are pleased to provide you with the annual report for Franklin Templeton Global Funds Plc (the "Company") for the 12-months ended 28 February 2026. In this report, we highlight the key drivers behind the performance of bond and equity markets over the period.

Global Economic Review

The global economy overcame several headwinds and continued to expand during the reporting period. In its January 2026 *World Economic Outlook Update*, the International Monetary Fund ("IMF") said, "Global growth is projected to remain resilient at 3.3 percent in 2026 and at 3.2 percent in 2027: rates similar to the estimated 3.3 percent outturn in 2025. The forecast marks a small upward revision for 2026 and no change for 2027 compared with that in the October 2025 World Economic Outlook (WEO). This steady performance on the surface results from the balancing of divergent forces. Headwinds from shifting trade policies are offset by tailwinds from surging investment related to technology, including artificial intelligence (AI), more so in North America and Asia than in other regions, as well as fiscal and monetary support, broadly accommodative financial conditions, and adaptability of the private sector." From a regional perspective, the IMF projects U.S. GDP will be 2.4% in 2026, versus 2.1% in 2025. Elsewhere, the IMF expects 2026 GDP of 1.3% in the Eurozone (from 1.4% in 2025), 1.3% in the U.K. (from 1.4% in 2025) and 0.7% in Japan (versus 1.1% in 2025).

Market Review – Fixed Income[i]

The overall global fixed income market experienced periods of volatility but posted a positive return during the reporting period. Looking back, the US Federal Reserve ("Fed") remained on hold at its first five meetings in 2025, as it weighed the impact of President Trump's tariffs on the economy and inflation. The Fed then lowered rates at its September, October and December 2025 meetings, citing concerns over the labor market. The Fed then remained on hold at its January 2026 meeting. Elsewhere, the European Central Bank cut interest rates four times from January 2025 through June 2025 but then remained on hold during the reminder of the reporting period. The Bank of England lowered rates three times during the reporting period (in May, August and December 2025). All told, the global bond, as measured by the Bloomberg Global Aggregate Bond Index, returned 8.23% over the 12 months ended 28 February 2026. Meanwhile, lower-rated US corporate bonds and US dollar-denominated emerging market sovereign debt generated stronger returns during the reporting period.

Market Review – Global Equities[ii]

The global equity market posted very strong results during the reporting period. The market was supported by overall solid corporate results, strong investor demand, and the resilient global economy. For the 12-months ended 28 February 2026, the S&P 500 Index returned 16.99%. Outside the US, international developed equities, as measured by the MSCI EAFE Index (net), gained 34.63%, whereas emerging markets equities, as measured by the MSCI Emerging Markets Index (net), returned 49.96%.

We thank you for your continued support.

Yours sincerely,

Franklin Templeton International Services S.à r.l

March 2026

Past performance is no guarantee of future results. The information is not intended to be a forecast of future events, a guarantee of future results or investment advice.

All data as at 28 February 2026 unless otherwise stated.

Franklin Templeton Global Funds plc is an umbrella fund with segregated liability between sub-funds, established as an open-ended investment company with variable capital, authorised in Ireland by the Central Bank of Ireland as an undertaking for collective investment in transferable securities.

All investments involve risk, including the possible loss of principal. Past performance is no guide to future returns and may not be repeated.

This information has been prepared from sources believed reliable but is not guaranteed by Franklin Resources, Inc. company or affiliate (together "Franklin Templeton") and is not a complete summary or statement of all available data.

Opinions expressed are subject to change without notice and do not take into account the particular investment objectives, financial situation or needs of individual investors.

Before investing you should read the key investor information document and the prospectus, which describe the sub-funds' full objectives and risk factors. These and other relevant documents may be obtained in a number of languages at BNY Mellon Fund Services (Ireland) Designated Activity Company, One Dockland Central, Guild Street, IFSC, Dublin 1, Ireland, www.franklinresources.com and the registered office.

Directors' Report

The directors of the Company (the ''Directors'') submit their annual report together with the audited financial statements for the financial year ended 28 February 2026.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the directors' report and the financial statements in accordance with Irish law.

Irish company law requires the Directors to prepare financial statements for each financial year that give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and of the profit or loss of the Company for the financial year. The Directors have prepared the financial statements in accordance with the accounting standards generally accepted in Ireland, including Financial Reporting Standard ("FRS") 102: "The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland" ("FRS 102").

Under Irish company law, the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and the profit or loss of the Company for the financial year.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for ensuring that adequate accounting records are kept that are sufficient to:

- correctly record and explain the transactions of the Company;
- enable, at any time, the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy; and
- enable the Directors to ensure that the financial statements comply with the requirements of the Companies Act 2014 and enable those financial statements to be audited.

To achieve this, the Directors have appointed an experienced administrator, BNY Mellon Fund Services (Ireland) Designated Activity Company, to maintain the accounting records and perform additional administrative duties.

The Directors are also responsible for safeguarding the assets of the Company. In fulfilment of this responsibility, they have appointed The Bank of New York Mellon SA/NV, Dublin Branch, to safekeep the Company's assets in accordance with the constitution of the Company. In addition, the Directors are responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the financial statements of the Company included on the website of Franklin Templeton affiliates that distribute the Funds. Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Review of Business and Future Developments

The Letter to Shareholders on page 15 contains a review of the factors which contributed to the performance of the Funds for the year. The Directors do not anticipate any changes to the investment objectives of the existing Funds.

For details of each active Fund's share class performance, refer to Supplemental Information - Fund Performance Data (unaudited).

Financial assets and financial liabilities held at fair value through profit or loss at the financial year end are disclosed in the Portfolios of Investments of the Funds.

As at 28 February 2026, the Company has 43 active Funds (28 February 2025: 40 Funds) in operation. Details of their net asset values as at the financial year ends are disclosed in the Statement of Financial Position on pages 152 to 172.

Effective 14 March 2025, FTGF Putnam US Large Cap Value Fund^ commenced trading.

Effective 24 March 2025, FTGF Brandywine Global Opportunistic Equity Fund^ commenced trading.

Effective 4 April 2025, FTGF Franklin Ultra Short Duration Income Fund^, FTGF Franklin Global High Yield Bond Fund^ and FTGF Putnam US Large Cap Growth Fund^ commenced trading.

Effective 30 May 2025, FTGF Putnam Global Healthcare Fund^ commenced trading.

Effective 7 July 2025, FTGF Martin Currie Improving Society Fund^ ceased trading.

Effective 4 August 2025, FTGF Brandywine Global Credit Opportunities Fund^ ceased trading.

Effective 18 August 2025, FTGF Franklin European Unconstrained Fund^ ceased trading.

Effective 31 October 2025, FTGF ClearBridge US Aggressive Growth Fund^ merged into FTGF ClearBridge Global Growth Leaders Fund.

Effective 12 January 2026, FTGF Franklin Global Long Term Unconstrained Fund^ ceased trading.

Effective 17 February 2026, FTGF Franklin Responsible Income 2031 Fund^ commenced trading.

For details of Fund name changes and mergers, refer to Note 14.

Risk Management Objectives and Policies

Information in relation to the Company's risk management objectives and policies is included in Note 12 to financial statements.

^ *Not authorised for sale to the public in Hong Kong.*

Directors' Report – *(continued)*

Results for the Year and State of Affairs at the Year End

The Statement of Financial Position as at 28 February 2026 and 28 February 2025 and the Statement of Comprehensive Income for the financial years ended 28 February 2026 and 28 February 2025 are set out on pages 152 to 172 and 174 to 183, respectively.

Distributions to Holders of Redeemable Participating Shares

The distributions to holders of Redeemable Participating Shares for the financial years ended 28 February 2026 and 28 February 2025 are set out in the Statement of Comprehensive Income.

Significant Events

See Note 14 for details of significant events during the year.

Subsequent Events

See Note 16 for details of significant events subsequent to the year end.

Directors

The names of the persons who are currently Directors or who served as a Director at any time during the financial year are set out below.

Joseph Carrier (United States)
Fionnuala Doris (Ireland) (Independent)
Joseph Keane (Ireland) (Independent)
Joseph LaRocque (United States)
Elinor Murray (United Kingdom)
Jaspal Sagger (United Kingdom)
Craig Tyle (United States)

Directors' and Secretary's Interests

The Directors and secretary and their families had no interests in the shares of the Company as at 28 February 2026 and 28 February 2025. No Director had at any time during the financial year, a material interest in any contract of significance, subsisting during or at the end of the financial year, in relation to the business of the Company.

Corporate Governance Statement

The Board of Directors of the Company (the ''Board'') has assessed all measures included in the voluntary Corporate Governance Code for Collective Investment Schemes and Management Companies as published by the Irish Funds in December 2011 (the "Irish Funds Code"). The Board has adopted all corporate governance practices and procedures in the Irish Funds Code.

Director's Compliance Statement

It is the policy of the Company to comply with its relevant obligations (as defined in the Companies Act 2014). As required by Section 225(2) of the Companies Act 2014, the Directors acknowledge that they are responsible for securing the Company's compliance with the relevant obligations. The Directors have drawn up a compliance policy statement as defined in Section 225(3)(a) of the Companies Act 2014 and a compliance policy which refers to the arrangements and structures that are in place and which are, in the Directors' opinion, designed to secure material compliance with the Company's relevant obligations. In discharging their responsibilities under Section 225, the Directors relied upon, among other things, the services provided, advice and/or representations from third parties whom the Directors believe have the requisite knowledge and experience in order to secure material compliance with the Company's relevant obligations.

Relevant Audit Information

So far as the Directors are aware, there is no relevant audit information of which the Company's auditors are unaware and the Directors have taken all the steps that ought to have been taken as Directors in order to make themselves aware of any relevant audit information and to establish that the Company's auditors are aware of that information.

Connected Person Transactions

Regulation 43(1) of the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") states that a "responsible person shall ensure that any transaction between a UCITS and a connected person is (a) conducted at arm's length; and (b) in the best interests of the unit-holders of the UCITS".

As required under Regulation 81(4) of the Central Bank UCITS Regulations, the Board is satisfied that (a) there are arrangements in place, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with connected persons; and (b) all transactions with connected persons that were entered into during the financial year complied with the obligations that are prescribed by Regulation 43(1).

Independent Auditors

PricewaterhouseCoopers have indicated their willingness to remain in office in accordance with Section 383(2) of the Companies Act 2014.

Investment Objectives and Investment Policies

All active Funds, except FTGF Western Asset Global Bond Fund^, FTGF Western Asset Global Credit Fund^, FTGF Western Asset Multi-Asset Credit Fund^, FTGF Western Asset Structured Opportunities Fund^, FTGF Western Asset US Mortgage-Backed Securities Fund^, Western Asset UCITS SMASh Series Core Plus Completion Fund^, FTGF Brandywine Global Fixed Income Absolute Return Fund^, FTGF Brandywine Global High Yield Fund^, FTGF Brandywine Global Opportunistic Fixed Income Fund^, FTGF Brandywine Global – US Fixed Income Fund^, FTGF Brandywine Global Opportunistic Equity Fund^, FTGF ClearBridge Infrastructure Value Fund^, FTGF ClearBridge Global Value Improvers Fund^, FTGF Royce Global Small Cap Premier Fund^, FTGF ClearBridge Emerging Markets Fund^, Franklin Responsible Income 2028 Fund^, Franklin Responsible Income 2029 Fund^, FTGF Franklin Ultra Short Duration Income Fund^, FTGF Franklin Global High Yield Bond Fund^, FTGF Putnam US Large Cap Growth Fund^, FTGF Putnam US Large Cap Value Fund^ and FTGF Putnam Balanced Fund^, have been authorised by the Securities and Futures Commission in Hong Kong. Therefore, the Funds noted above are not authorised for sale to the public in Hong Kong. The authorisation by the Securities and Futures Commission of Hong Kong does not imply recommendation for investment into the Funds.

The principal investment objective and policies of all Funds are set out in the applicable Fund supplement to the prospectus. There can be no assurance that any Fund will achieve its objective and there is no guarantee that an investment strategy will succeed or attain any particular results or level of profitability (defined terms are as defined in the prospectus for the relevant Fund (the "Prospectus'').

Directors' Report – *(continued)*

Periodic Reporting for Article 8 and Article 9 SFDR Products only

Transparency of the promotion of environmental or social characteristics and of sustainable investments in periodic reports

The Sustainable Finance Disclosure Regulation ((EU) 2019/2088), (the "SFDR") requires the Company to include a description in its periodic reports of the extent to which any Fund classified pursuant to Article 8 of the SFDR (an "Article 8 Fund") or Article 9 of the SFDR (an "Article 9 Fund") has met its environmental or social characteristics. The SFDR also empowered the European Banking Authority, the European Insurance and Occupational Pensions Authority and the European Securities and Markets Authority (collectively "ESAs") to develop draft regulatory technical standards ("RTS") to specify the information and presentation format in the periodic reports. The following disclosures have been prepared using the common set of sustainability disclosures or reporting requirements of the RTS which came into effect on 1 January 2023.

More information is available in the Appendix to this Annual Report - Sustainability Finance Disclosure Regulation (unaudited).

Taxonomy

Transparency of environmentally sustainable investments in period reports

In line with its ESG investment methodology, an Article 8 Fund may hold investments that contribute to climate change mitigation and climate change adaptation. Due to the lack of reliable, timely and verifiable data, it is, however, currently not possible to determine how and to what extent the activities of the underlying investments are in economic activities that qualify as environmentally sustainable under Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, and amending Regulation (EU) 2019/2088, as may be amended from time to time (the "Taxonomy Regulation") and so it is not possible to commit to a minimum proportion of an Article 8 Fund's underlying investments which take into account the EU criteria for environmentally sustainable economic activities, including enabling or transitional activities, within the meaning of the Taxonomy Regulation.

The investments underlying the Funds in scope of the present "RTS" periodic reporting do not or did not (up to the date when they ceased trading) take into account the EU criteria for environmentally sustainable economic activities, including enabling or transitional activities, within the meaning of the Regulation (EU 2020/852) (the "Taxonomy Regulation") at this time, therefore, there may be zero investments whose economic activities qualify as environmentally sustainable economic activities under the Taxonomy Regulation (please refer to the below RTS periodic reports' EU Taxonomy dedicated sections). However, in line with its ESG investment methodology, an Article 8 Fund may hold investments that contribute to climate change mitigation and climate change adaptation. Investors should note that the "do no significant harm" principle under Taxonomy Regulation applies only to those investments underlying the Article 8 Fund that take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. The investments underlying the remaining portion of an Article 8 Fund do not take into account the EU criteria for environmentally sustainable economic activities under the Taxonomy Regulation. The above statement applies or applied (up to the date when the relevant Fund ceased trading) in relation to the following Article 8 Funds: FTGF Western Asset US Core Bond Fund, FTGF Western Asset US Core Plus Bond Fund, FTGF Western Asset Global Multi Strategy Fund, FTGF Western Asset US High Yield Fund, FTGF Western Asset Global High Yield Fund, FTGF Western Asset Short Duration Blue Chip Bond Fund, FTGF Western Asset Global Bond Fund^, FTGF Brandywine Global Fixed Income Fund, FTGF Brandywine Global Income Optimiser Fund, FTGF ClearBridge US Value Fund, FTGF Putnam US Research Fund, FTGF ClearBridge US Large Cap Growth Fund, FTGF ClearBridge US Aggressive Growth Fund^, FTGF ClearBridge US Equity Sustainability Leaders Fund, FTGF ClearBridge Global Growth Leaders Fund, FTGF ClearBridge Infrastructure Value Fund^, FTGF ClearBridge Global Infrastructure Income Fund, FTGF ClearBridge Global Value Improvers Fund^, FTGF Franklin Global Long Term Unconstrained Fund^, FTGF ClearBridge Emerging Markets Fund^, FTGF Franklin European Unconstrained Fund^, Franklin Responsible Income 2028 Fund^, Franklin Responsible Income 2029 Fund^, FTGF Franklin Responsible Income 2031 Fund^, FTGF Putnam US Large Cap Growth Fund^ and FTGF Putnam Global Healthcare Fund.

FTGF Martin Currie Improving Society Fund^ was a Sustainable Fund (up to the date when it ceased trading), as per the requirements of Article 9 of the SFDR.

The investments underlying the remaining Funds, not listed above, do not or did not (up to the date when they ceased trading) consider the EU criteria for environmentally sustainable economic activities.

On behalf of the Board

Fionnuala Doris Director	Joseph Keane Director

16 June 2026

Depositary's Report

Report from the Depositary to the Shareholders Dated 16 June 2026

For the period from 1 March 2025 to 28 February 2026 (the "Period")

The Bank of New York Mellon SA/NV, Dublin Branch (the "**Depositary**" "**us**", "**we**", or "**our**") has enquired into the conduct of Franklin Templeton Global Funds plc (the "Company") for the Period, in its capacity as depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company, in accordance with our role as depositary to the Company and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34 of the of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No 352 of 2011), as amended (the "Regulations").

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's constitutional documentation and the Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not been so managed, we as depositary must state in what respects it has not been so managed and the steps which we have taken in respect thereof.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the Period, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the constitutional documentation and the Regulations; and

(ii) otherwise in accordance with the provisions of the constitutional documentation and the Regulations.

Independent Auditors' Report

Independent auditors' report to the members of Franklin Templeton Global Funds Plc

Report on the audit of the financial statements

Opinion

In our opinion, Franklin Templeton Global Funds Plc's financial statements:

- give a true and fair view of the Company's and sub-funds' assets, liabilities and financial position as at 28 February 2026 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Statement of Financial Position as at 28 February 2026;
- the Statement of Comprehensive Income for the year then ended;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares for the year then ended;
- the Portfolio of Investments for each of the sub-funds as at 28 February 2026; and
- the notes to the financial statements for the Company and for each of its sub-funds, which include a description of the accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Emphasis of matter - financial statements prepared on a basis other than going concern

In forming our opinion on the financial statements, which is not modified, we draw attention to note 2 to the financial statements which describes the reasons why the financial statements of FTGF Western Asset Euro Core Plus Bond Fund^, Legg Mason Western Asset Short Duration High Income Bond Fund^, Legg Mason Western Asset Emerging Markets Total Return Bond Fund^, Legg Mason Western Asset US Short-Term Government Fund^, Legg Mason Western Asset US Adjustable Rate Fund^, Legg Mason Western Asset Global Inflation Management Fund^, FTGF Western Asset Macro Opportunities Bond Fund^, FTGF Western Asset UK Investment Grade Credit Fund^, FTGF Western Asset US Corporate Bond Fund^, FTGF Western Asset Sustainable Global Corporate Bond Fund^, FTGF Brandywine Global Credit Opportunities Fund^, FTGF Brandywine Global Defensive High Yield Fund^, FTGF Brandywine Global - US High Yield Fund^, FTGF Brandywine Global Enhanced Absolute Return Fund^, FTGF Brandywine Global Multi-Sector Impact Fund^, FTGF Brandywine Global Dynamic US Equity Fund^, FTGF Brandywine Global Opportunistic Equity Fund^, Legg Mason ClearBridge Growth Fund^, FTGF ClearBridge US Aggressive Growth Fund^, FTGF ClearBridge Tactical Dividend Income Fund, Legg Mason US Equity Fund^, Franklin MV European Equity Growth and Income Fund^, FTGF Franklin MV Asia Pacific Ex Japan Equity Growth and Income Fund^, Legg Mason Batterymarch International Large Cap Fund^, Legg Mason QS Emerging Markets Equity Fund^, Franklin MV Global Equity Growth and Income Fund^, Legg Mason Japan Equity Fund^, FTGF Martin Currie Asia Long-Term Unconstrained Fund^, Legg Mason Martin Currie Asia Pacific Fund^, Legg Mason Martin Currie Global Resources Fund^, Legg Mason Martin Currie Greater China Fund^, FTGF Franklin Global Long Term Unconstrained Fund^, FTGF Martin Currie Asia Pacific Urban Trends Income Fund^, FTGF Franklin European Unconstrained Fund^ and FTGF Martin Currie Improving Society Fund^ have been prepared on a basis other than going concern.

Conclusions relating to going concern

With the exception of FTGF Western Asset Euro Core Plus Bond Fund^, Legg Mason Western Asset Short Duration High Income Bond Fund^, Legg Mason Western Asset Emerging Markets Total Return Bond Fund^, Legg Mason Western Asset US Short-Term Government Fund^, Legg Mason Western Asset US Adjustable Rate Fund^, Legg Mason Western Asset Global Inflation Management Fund^, FTGF Western Asset Macro Opportunities Bond Fund^, FTGF Western Asset UK Investment Grade Credit Fund^, FTGF Western Asset US Corporate Bond Fund^, FTGF Western Asset Sustainable Global Corporate Bond Fund^, FTGF Brandywine Global Credit Opportunities Fund^, FTGF Brandywine Global Defensive High Yield Fund^, FTGF Brandywine Global - US High Yield Fund^, FTGF Brandywine Global Enhanced Absolute Return Fund^, FTGF Brandywine Global Multi-Sector Impact Fund^, FTGF Brandywine Global Dynamic US Equity Fund^, FTGF Brandywine Global Opportunistic Equity Fund^, Legg Mason ClearBridge Growth Fund^, FTGF ClearBridge US Aggressive Growth Fund^, FTGF ClearBridge Tactical Dividend Income Fund, Legg Mason US Equity Fund^, Franklin MV European Equity Growth and Income Fund^, FTGF Franklin MV Asia Pacific Ex Japan Equity Growth and Income Fund^, Legg Mason Batterymarch International Large Cap Fund^, Legg Mason QS Emerging Markets Equity Fund^, Franklin MV Global Equity Growth and Income Fund^, Legg Mason Japan Equity Fund^, FTGF Martin Currie Asia Long-Term Unconstrained Fund^, Legg Mason Martin Currie Asia Pacific Fund^, Legg Mason Martin Currie Global Resources Fund^, Legg Mason Martin Currie Greater China Fund^, FTGF Franklin Global Long Term Unconstrained Fund^, FTGF Martin Currie Asia Pacific Urban Trends Income Fund^, FTGF Franklin European Unconstrained Fund^ and FTGF Martin Currie Improving Society Fund^ where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's and sub-funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

With the exception of FTGF Western Asset Euro Core Plus Bond Fund^, Legg Mason Western Asset Short Duration High Income Bond Fund^, Legg Mason Western Asset Emerging Markets Total Return Bond Fund^, Legg Mason Western Asset US Short-Term Government Fund^, Legg Mason Western Asset US Adjustable Rate Fund^, Legg Mason Western Asset Global Inflation Management Fund^, FTGF Western Asset Macro Opportunities Bond Fund^, FTGF Western Asset UK Investment Grade Credit Fund^, FTGF Western Asset US Corporate Bond Fund^, FTGF Western Asset Sustainable Global Corporate Bond Fund^, FTGF Brandywine Global Credit Opportunities Fund^, FTGF Brandywine Global Defensive High Yield Fund^, FTGF Brandywine Global - US High Yield Fund^, FTGF Brandywine Global Enhanced Absolute Return Fund^, FTGF Brandywine Global Multi-Sector Impact Fund^, FTGF Brandywine Global Dynamic US Equity Fund^, FTGF Brandywine Global Opportunistic Equity Fund^, Legg Mason ClearBridge Growth Fund^, FTGF ClearBridge US Aggressive Growth Fund^, FTGF ClearBridge Tactical Dividend Income Fund, Legg Mason US Equity Fund^, Franklin MV European Equity Growth and Income Fund^, FTGF Franklin MV Asia Pacific Ex Japan Equity Growth and Income Fund^, Legg Mason Batterymarch International Large Cap Fund^, Legg Mason QS Emerging Markets Equity Fund^, Franklin MV Global Equity Growth and Income Fund^, Legg Mason Japan Equity Fund^, FTGF Martin Currie Asia Long-Term Unconstrained Fund^, Legg Mason Martin Currie Asia Pacific Fund^, Legg Mason Martin Currie Global Resources Fund^, Legg Mason Martin Currie Greater China Fund^, FTGF Franklin Global Long Term Unconstrained Fund^, FTGF Martin Currie Asia Pacific Urban Trends Income Fund^, FTGF Franklin European Unconstrained Fund^ and FTGF Martin Currie Improving Society Fund^ where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, in auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Independent Auditors' Report – *(continued)*

Conclusions relating to going concern – (continued)

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's and sub-funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Directors' Report, we also considered whether the disclosures required by the Companies Act 2014 have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (Ireland) and the Companies Act 2014 require us to also report certain opinions and matters as described below:

- In our opinion, based on the work undertaken in the course of the audit, the information given in the Directors' Report for the year ended 28 February 2026 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.
- Based on our knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified any material misstatements in the Directors' Report.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of Directors' Responsibilities, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's and sub-funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf.

This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with section 391 of the Companies Act 2014 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2014 opinions on other matters

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

Companies Act 2014 exception reporting

Directors' remuneration and transactions

Under the Companies Act 2014 we are required to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by sections 305 to 312 of that Act have not been made. We have no exceptions to report arising from this responsibility.

144A Securities exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These securities may only be resold, in transactions exempt from registration, to qualified institutional buyers. As at 28 February 2026, these securities amounted to $14,595,000 or 18.65% of net assets.

* Variable rate security. The interest rate shown reflects the rate in effect at 28 February 2026.

† Illiquid.

± Securities purchased on a to-be-announced basis.

β The rate of interest on this type of security is tied to the Consumer Price Index (CPI)/Retail Price Index (RPI). The coupon rate is the rate as of 28 February 2026.

144A Securities exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These securities may only be resold, in transactions exempt from registration, to qualified institutional buyers. As at 28 February 2026, these securities amounted to $41,699,000 or 23.59% of net assets.

* Variable rate security. The interest rate shown reflects the rate in effect at 28 February 2026.

† Illiquid.

∞ Security is valued in good faith at fair value by or at the discretion of the Valuation Committee.

ε Security is in default as at 28 February 2026 (principal and / or interest).

≠ Security (in whole or part) pledged as collateral for derivatives trading as at 28 February 2026.

± Securities purchased on a to-be-announced basis.

β The rate of interest on this type of security is tied to the Consumer Price Index (CPI)/Retail Price Index (RPI). The coupon rate is the rate as of 28 February 2026.

ABBREVIATIONS:

Perpetual – A bond with no maturity date. Perpetual bonds are not redeemable but pay a steady stream of interest.
REMIC – Real Estate Mortgage Investment Conduit.
TBA – To Be Announced.
BRL – Brazilian Real
CLP – Chilean Peso
CZK – Czech Koruna
INR – Indian Rupee
MYR – Malaysian Ringgit
PEN – Peruvian New Sol
UYU – Uruguayan Peso
ZAR – South Africa Rand

144A Securities exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These securities may only be resold, in transactions exempt from registration, to qualified institutional buyers. As at 28 February 2026, these securities amounted to $63,569,000 or 79.79% of net assets.

* Variable rate security. The interest rate shown reflects the rate in effect at 28 February 2026.

† Illiquid.

∞ Security is valued in good faith at fair value by or at the discretion of the Valuation Committee.

ε Security is in default as at 28 February 2026 (principal and / or interest).

ABBREVIATIONS:

Perpetual – A bond with no maturity date. Perpetual bonds are not redeemable but pay a steady stream of interest.

EUR – Euro

144A Securities exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These securities may only be resold, in transactions exempt from registration, to qualified institutional buyers. As at 28 February 2026, these securities amounted to $1,072,000 or 10.24% of net assets.

* Variable rate security. The interest rate shown reflects the rate in effect at 28 February 2026.

† Illiquid.

∞ Security is valued in good faith at fair value by or at the discretion of the Valuation Committee.

ABBREVIATIONS:

Perpetual – A bond with no maturity date. Perpetual bonds are not redeemable but pay a steady stream of interest.

EUR – Euro

GBP – British Pound

JPY – Japanese Yen

Total Financial Liabilities at fair value through profit or loss		(1,362)	(0.25)
Total Financial Assets and Financial Liabilities at fair value through profit or loss		529,140	100.08
Liabilities in Excess of Other Assets		(360)	(0.08)
Total Net Assets		$528,780	100.00

– Amounts designated as "–" are either $0, less than $1,000, less than 1,000 shares or less than 0.01%.

144A Securities exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These securities may only be resold, in transactions exempt from registration, to qualified institutional buyers. As at 28 February 2026, these securities amounted to $397,112,000 or 75.10% of net assets.

* Variable rate security. The interest rate shown reflects the rate in effect at 28 February 2026.

† Illiquid.

∞ Security is valued in good faith at fair value by or at the discretion of the Valuation Committee.

ABBREVIATIONS:

Perpetual – A bond with no maturity date. Perpetual bonds are not redeemable but pay a steady stream of interest.

REMIC – Real Estate Mortgage Investment Conduit.

Analysis of Total Assets	% of Total Assets

144A Securities exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These securities may only be resold, in transactions exempt from registration, to qualified institutional buyers. As at 28 February 2026, these securities amounted to $7,088,000 or 3.23% of net assets.

* Variable rate security. The interest rate shown reflects the rate in effect at 28 February 2026.

≠ Security (in whole or part) pledged as collateral for derivatives trading as at 28 February 2026.

± Securities purchased on a to-be-announced basis.

ABBREVIATIONS:

Perpetual – A bond with no maturity date. Perpetual bonds are not redeemable but pay a steady stream of interest.

TBA – To Be Announced.

CAD – Canadian Dollar

EUR – Euro

GBP – British Pound

Notes to Financial Statements

1. General

Franklin Templeton Global Funds plc (the ``Company'') is an open-ended investment company with variable capital incorporated under the laws of Ireland as a public limited company pursuant to the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations") and the Central Bank UCITS Regulations. It was incorporated on 13 January 1998 with registration number 278601.

Its objective, as set out in its constitutional documents is the collective investment in transferable securities and other liquid financial assets of capital raised from the public and which operate on the principle of risk spreading. The Company is organised in the form of an umbrella fund. The constitutional documents of the Company provide that the Company may offer separate classes of shares, each representing interests in a sub-fund (the "Fund" or the "Funds" collectively) comprising a distinct portfolio of investments. A separate portfolio of assets shall not be maintained for a class. The Funds established by the Company are included in the General Information section of this report. The principal investment objective and policies of all Funds are set out in the applicable Fund supplement to the Prospectus.

2. Significant Accounting Policies

The significant accounting policies and estimation techniques adopted by the Company in the preparation of these financial statements are set out below.

Statement of Compliance

The financial statements for the financial year ended 28 February 2026 have been prepared in accordance with the accounting standards generally accepted in Ireland, including Financial Reporting Standard ("FRS") 102: "The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland" ("FRS 102") and Irish statute comprising the Companies Act 2014, the UCITS Regulations and the Central Bank UCITS Regulations. These policies are consistent with the policies applied in the financial statements for the financial year ended 28 February 2025.

Basis of Preparation

The financial statements have been prepared on a going concern basis for the Company under the historical cost convention as modified by the revaluation of financial assets and liabilities held at fair value through the profit or loss. The financial statements of the following Funds have been prepared on a basis other than going concern as these Funds were closed during the current and previous financial years or subsequent to the Statement of Financial Position date:

Fund	Date of closure
FTGF Western Asset Euro Core Plus Bond Fund^	29 July 2024

FTGF Franklin European Unconstrained Fund^	18 August 2025
FTGF Martin Currie Improving Society Fund^	7 July 2025

* *Effective 31 October 2025, merged into FTGF ClearBridge Global Growth Leaders Fund.*

π *Authorisation was revoked, at the request of the Company, by the Central Bank on 7 May 2026.*

** *Effective 8 May 2026, merged into FTGF ClearBridge Global Infrastructure Income Fund.*

The format and certain wordings of the financial statements have been adapted from those contained in the Companies Act 2014 so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company's business as an investment fund.

The Company has availed of the exemption available to open-ended investment funds under Section 7 "Statement of Cash Flows" of FRS 102 not to prepare a cash flow statement on the basis that substantially all of the Company's investments are highly liquid and carried at fair value, and the Company provides a statement of changes in net assets attributable to holders of redeemable participating shares.

(a) Investments at Fair Value

The Company classified all financial instruments, including its investments in debt and equity securities, and securities sold short, and related derivatives, as financial assets or financial liabilities at fair value through profit or loss. These financial assets and financial liabilities are classified as held for trading at fair value through profit or loss. Financial assets or financial liabilities held for trading are acquired or incurred principally for the purpose of selling or repurchasing in the short term. Derivatives are also categorised as held for trading, as the Company does not classify any derivatives as hedges in a hedging relationship.

Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed in the Statement of Comprehensive Income. Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in the Statement of Comprehensive Income in the financial year in which they arise.

The fair value of financial instruments traded in active markets (such as publicly traded derivatives and trading securities) is based on quoted market prices at the Statement of Financial Position date. Financial instruments (including bonds) held by the Funds, which are listed or traded on a regulated market, are valued on the basis of the latest available mid-price on the dealing day. The fair value of collective investment schemes is based on the traded net asset value of the relevant fund at the Statement of Financial Position date as provided by the fund's administrator.

The Company may from time to time invest in financial instruments that are not traded in an active market (for example in over-the-counter derivatives). The fair value is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each Statement of Financial Position date. Valuation techniques used include the use of comparable recent arm's length transactions, discounted cash flow analysis and other valuation techniques commonly used by market participants. The values assigned to these instruments are based upon the best available information and because of the uncertainty of the valuation, these values may differ significantly from the values that would have been realised had a ready market for these instruments existed and the differences could be material. Entering into these agreements involves, to varying degrees, elements of credit, legal, market and documentation risk in excess of amounts recognised in the Statement of Comprehensive Income. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparties to the agreements may default on their obligations to perform or disagree as to the meaning of contractual terms in the agreements, or that there may be unfavourable changes in interest rates or the price of the index or security underlying these transactions. The prices used at the year end which have been sourced from a single broker source or based upon valuation techniques are the best estimate of fair value as at the year end date. However, there is a degree of uncertainty in respect of these prices. It may not always be possible to close out the positions at the stated market value with the given counterparty.

(b) Recognition/Derecognition

Regular-way purchases and sales of investments are recognised on trade date plus one – the date on which the Company commits to purchase or sell the asset. Investments are initially recognised at fair value and transaction costs for all financial assets carried at fair value through profit or loss are expensed as incurred. Investments cease to be recognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

^ *Not authorised for sale to the public in Hong Kong.*

Notes to Financial Statements – *(continued)*

2. Significant Accounting Policies – (continued)

(c) Single Broker Pricing

The prices used at the year end which have been sourced from a single broker source are the best estimate of fair value as at the year end date. However, there is a degree of uncertainty in respect of these prices. It may not always be possible to close out the positions at the stated mark with the given counterparty. Values of securities for each Fund which have been priced using single broker sources as at 28 February 2026 and 28 February 2025 are disclosed in Note 12.1 (d).

(d) Accounting for Investments

Security transactions are accounted for on trade date plus one. Investments are initially recognised at fair value and transaction costs for all ''fair-valued-through profit or loss'' securities are expensed as incurred. Gains or losses on the sale of securities are calculated by using the First-In-First-Out (''FIFO'') basis.

(e) Income from Investments

Interest income and expense are recognised in the Statement of Comprehensive Income for all debt instruments using the effective interest method. The Investment Managers monitor interest income receivable for any delinquent interest receivable amounts. The accounts have been reviewed for delinquent interest receivable and as at 28 February 2026 and 28 February 2025 all amounts were deemed to be recoverable.

Dividends are reported in the Statement of Comprehensive Income on the dates on which the relevant securities are listed as ''ex-dividend''. Dividend income is shown gross of any non-recoverable withholding taxes, which is disclosed separately in the Statement of Comprehensive Income.

(f) Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously. There are no offsetting financial instruments as at 28 February 2026 and 28 February 2025.

(g) Critical Accounting Estimates and Assumptions

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are outlined below.

Fair Value of Derivative Financial Instruments

The Company may, from time to time, hold financial instruments that are not quoted in active markets, such as over-the-counter derivatives. Fair values of such instruments are determined by using valuation techniques as discussed in Note 2(a). Where valuation techniques (for example, models) are used to determine fair values, they are validated and periodically reviewed and compared to the price provided by an independent pricing service provider, where available.

Models use observable data, to the extent practicable. However, areas such as credit risk (both own and counterparty), volatilities and correlations require management to make estimates. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

The values assigned to these instruments are based upon the best available information and because of the uncertainty of the valuation, these values may differ significantly from the values that would have been realised had a ready market for these instruments existed and the differences could be material. Entering into these agreements involves, to varying degrees, elements of credit, legal, market and documentation risk in excess of the amounts recognised in the Statement of Comprehensive Income. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparties to the agreements may default on their obligations to perform or disagree as to the meaning of contractual terms in the agreements, or that there may be unfavourable changes in interest rates or the price of the index or security underlying these transactions.

(h) Lending of Securities

Certain Funds may lend securities to brokers, dealers and other financial organisations to earn additional income. Each security loan is collateralised with collateral assets in an amount equal to or greater than the current market value of the loaned securities. There is a risk of delay in receiving collateral or in recovering the securities loaned or even a loss of rights in collateral should the borrower fail financially.

As at 28 February 2026 and 28 February 2025, no Funds were engaged in securities lending.

(i) Equalisation

An equalisation account is maintained so that the amount distributed is the same for all shares of the same type notwithstanding different dates of issue. Equalisation income and expense are recorded in the Statement of Comprehensive Income.

Equalisation Income

A sum equal to that part of the issued price of a share which reflects income (if any) accrued but undistributed up to the date of issue will be deemed to be an equalisation payment and treated as repaid by shareholders in the first dividend to which the shareholder was entitled in the same accounting period as that in which the shares are issued.

Equalisation Expense

A sum equal to that part of the issued price of a share which reflects expense (if any) accrued but undistributed up to the date of issue will be deemed to be an equalisation receipt and treated as repaid to shareholders to the first dividend to which the shareholder was entitled in the same accounting period as that in which the shares are issued.

(j) Expenses

Expenses are accounted for on an accruals basis. Certain expenses are share class specific expenses and are charged directly to the share class. General Fund expenses are allocated to the various share classes on the basis of relative net asset value.

(k) Transaction Costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value with transaction costs for such instruments being recognised directly in the Statement of Comprehensive Income.

Transaction costs charged by the Depositary on the settlement of purchases and sales of investments are disclosed within administrator and depositary fees in the Statement of Comprehensive Income for each Fund.

Transaction costs on purchases and sales of equities, collective investment schemes, futures contracts and options are disclosed in Note 4 for each Fund.

Transaction costs on the purchase and sale of bonds and other derivative instruments are included in the purchase and sale price of the investment. These costs cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed.

(l) Foreign Exchange Translation

(a) Functional and presentation currency: Items included in the Company's financial statements are measured using the currency of the primary economic environment in which it operates (the ''functional currency''). This is US Dollars (United States Dollars) for all Funds except FTGF Western Asset Euro Core Plus Bond Fund^, FTGF ClearBridge Infrastructure Value Fund^, Franklin MV European Equity Growth and Income Fund^, FTGF Martin Currie European Unconstrained Fund^, Franklin Responsible Income 2028 Fund^, Franklin Responsible Income 2029 Fund^ and FTGF Franklin Responsible Income 2031 Fund^ for which the functional currency is Euro, FTGF Western Asset UK Investment Grade Credit Fund^ for which the functional currency is Pound Sterling (British Pound), and Legg Mason Japan Equity Fund^ for which the functional currency is Japanese Yen. The Company has adopted the functional currency of each Fund as the presentation currency for these financial statements. The financial statements of the Company are presented in US Dollars.

(b) Purchases and sales of securities, and income and expenses are translated at the rate of exchange quoted on the respective date that such transactions are recorded. Assets and liabilities are translated at the foreign exchange rate at the end of the financial year. Differences between income and expense amounts recorded and collected or paid are recorded as foreign exchange gains/losses in the Statement of Comprehensive Income under net gain/(loss) on financial assets and liabilities at fair value through profit or loss.

(m) Forward and Spot Foreign Currency Contracts

A forward foreign currency contract (''forward contract'') is a commitment to purchase or sell a foreign currency at a future date, at a negotiated rate. Forward contracts are used to seek to manage foreign currency risks and to tactically shift portfolio currency risk. Forward contracts are generally entered into as a hedge upon the purchase or sale of a security denominated in a foreign currency. The Fund will realise a gain or loss upon the closing or settlement of the forward transaction. Unrealised appreciation or depreciation on forward contracts is reported in the Statement of Financial Position and Statement of Comprehensive Income. Realised gains and losses are reported with all other foreign currency gains and losses in the Statement of Comprehensive Income. Risks relating to forward contracts include the potential inability of the counterparty to meet the terms of the contract and unanticipated movements in the value of a foreign currency relative to the base currency of the Fund. Forward contracts are fair valued by an independent price source by reference to the price at which a new forward contract of the same size and maturity could be undertaken. For each relevant Fund, gains or losses on open spot foreign currency contracts are included in cash in the Statement of Financial Position.

^ *Not authorised for sale to the public in Hong Kong.*

Notes to Financial Statements – *(continued)*

2. Significant Accounting Policies – (continued)

(n) Futures Contracts

Initial margin deposits are made upon entering into futures contracts and are generally made in cash. Futures contracts are fair valued based upon their quoted daily settlement prices. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised as a realised gain or loss and included in net gain/(loss) on financial assets and liabilities at fair value through profit and loss in the Statement of Comprehensive Income. Unrealised appreciation or depreciation on futures contracts are shown in the Statement of Financial Position. Realised gains and losses not yet delivered are shown within margin accounts and restricted cash in the Statement of Financial Position.

(o) Option Contracts

The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is added to the cost of the securities or foreign currency purchased. Premiums paid from the purchase of options, which expire unexercised, are treated as realised losses. The unrealised gain or loss on open option positions is calculated and recorded as the fair value of the option less the premium paid on that option. Unrealised gains or losses on open option positions are reflected as assets or liabilities in the Statement of Financial Position.

The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is subtracted from the cost of the securities or foreign currencies purchased. Premiums received from written options, which expire unexercised, are treated as realised gains.

(p) Swap Instruments

Swap Instruments are recognised at fair value on the date on which the derivative contract is entered into and are subsequently remeasured at their fair value. Fair values are obtained from quoted market prices in active markets, including recent market transactions, and valuation techniques, including discounted cash flow models and options pricing models, as appropriate. All derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative. Movement in the fair value of the swap instruments and interest paid and earned from the swap instruments are recognised in the Statement of Comprehensive Income under net gain/(loss) on financial assets and liabilities at fair value through profit or loss.

Credit Default Swaps

Certain Funds of the Company (as indicated in the relevant Supplement to the Prospectus) may enter into credit default swap agreements, provided that (i) the credit default swap agreement must be subject to daily valuation by the Funds and independently verified at least weekly, and (ii) the risks attached to the credit default swap must be independently assessed on a half-yearly basis and the report must be submitted to the Directors for review. A Fund may be either the buyer or seller in a credit default swap transaction. The ''buyer'' in a credit default contract is obligated to pay the counterparty a periodic stream of payments over the term of the contract provided that no event of default on an underlying reference obligation has occurred. If a Fund is a buyer and no event of default occurs, the Fund will lose its investment and recover nothing. On the other hand, if the Fund is a buyer and an event of default does occur, the Fund (the buyer) will receive the full notional value of the reference obligation that may have little or no value. Conversely, if the Fund is a seller and an event of default occurs, the Fund (the seller) must pay the counterparty the full notional value, or ''par value'', of the reference obligation in exchange for the reference obligation. As a seller, a Fund receives a fixed rate of income throughout the term of the contract, which typically is between six months and three years, provided that there is no default event.

The Funds purchase credit default swap contracts in order to hedge against the risk of a fall in the capital price, or default, of debt securities they hold. The Funds sell credit default swap contracts in order to get exposure to the rise in the capital price, and the risk of default is transferred from the purchaser of credit default contracts to the Fund as a seller of the credit default swap contract. This involves the risk that the swap may expire worthless and the credit risk that the seller may fail to satisfy its payment obligations to the Funds in the event of a default. The Funds may only enter into such transactions with counterparties rated A- or higher.

Interest Rate Swaps

An interest rate swap or cross currency interest rate swap involves the exchange by a Fund with another party of their respective commitments to pay or receive cash flows e.g., an exchange of floating rate payments for fixed-rate payments in base or foreign currencies. The purchase of a cap entitles the purchaser, to the extent that a specified index exceeds a predetermined value, to receive payments on a notional principal amount from the party selling the cap. The purchase of a floor entitles the purchaser, to the extent that a specified index falls below a predetermined value, to receive payments on a notional principal amount from the party selling the floor. A collar combines elements of buying a cap and selling a floor. Spread locks are contracts that guarantee the ability to enter into an interest rate swap at a predetermined rate above some benchmark rate.

Equity Swaps

Equity swaps are agreements between a Fund and third parties, which allow the Funds to acquire an exposure to the price movement of specific securities without actually purchasing the securities. The changes in contract values are recorded as unrealised gains or losses and the Funds recognise a realised gain or loss when the contract is closed.

Total Return Swaps

Certain of the Funds may invest in total return swaps to reduce their long-term exposure to market risk and credit risk. Total return swaps are contracts in which a Fund pays or receives a series of cash flows based upon the total return of a specified asset in return for paying or receiving, respectively, a fixed or floating rate of interest based upon that same specified asset. Total return swaps are fair valued by an independent pricing vendor. If the price is not available they are fair valued by the Franklin Templeton Global Valuation Committee (the "Valuation Committee"). These positions are reconciled to the counterparty price on a monthly basis.

Cross Currency Swaps

Cross currency swaps involve the exchange of two different currencies with an agreement to reverse the exchange at a later date at specified exchange rates. The exchange of currencies at the inception date of the contract takes place at the current spot rate. The re-exchange at maturity may take place at the same exchange rate, a specified rate, or the then current spot rate. Interest payments, if applicable, are made between the parties based on interest rates available in the two currencies at the inception of the contract.

Inflation Swaps

Inflation swaps involve an exchange of a fixed rate on a notional principal amount and a floating rate linked to an inflation index. The party paying the floating rate pays the inflation adjusted rate multiplied by the notional principal amount.

Index Swaps

An index swap refers to a hedging contract in which a party exchanges a predetermined cash flow with a counterparty on a specified date. A debt, equity, or other price index is used as the agreed exchange for one side of this swap. An overnight index swap applies an overnight rate index such as the federal funds or London Interbank Offered Rate (LIBOR) rates. The overnight index swap denotes an interest rate swap involving the overnight rate being exchanged for a fixed interest rate.

(q) Contracts for Difference

A contract for difference is an arrangement between two parties to exchange the difference between the opening price and closing price of a contract. In a long contracts for difference contract, the counterparty agrees to pay the Fund the amount, if any, by which the notional amount of the contract would have increased in value had it been invested in the underlying security or securities, plus any dividends that would have been received on those stocks. In a short contracts for difference contract, the counterparty agrees to pay the Fund the amount, if any, by which the notional amount of the contract would have decreased in value had it been invested in the underlying security or securities. The Fund must also pay the counterparty the value of any dividends that would have been received on those stocks.

(r) Securities Traded on a ''To-Be-Announced'' Basis

The Funds may trade securities on a ''to-be-announced'' (''TBA'') basis. In a TBA transaction, a Fund commits to purchase or sell securities for which specific information is not yet known at the time of the trade. Securities purchased on a TBA basis are not settled until they are delivered to or from the relevant Fund, normally 15 to 45 days later. These transactions are subject to market fluctuations and their current value is determined in the same manner as for other securities.

(s) Short-Term Investments

Time deposits are measured at face value. The fair value of certificates of deposit and commercial paper is estimated by reference to "evaluated mid" prices provided by an independent pricing service, which approximates fair value at the reporting date.

(t) Repurchase and Reverse Repurchase Agreements

Repurchase agreement means any agreement pursuant to which a Fund transfers securities, or any rights related to a title or security, to a counterparty subject to a commitment to repurchase them at a specified price on a future date specified or to be specified. Reverse repurchase agreement means any agreement pursuant to which a Fund receives securities, or any rights related to a title or security, from a counterparty subject to a commitment to sell them back at a specific price on a future date specified or to be specified.

Notes to Financial Statements – *(continued)*

2. Significant Accounting Policies – (continued)

(t) Repurchase and Reverse Repurchase Agreements – (continued)

Securities purchased under agreements to resell are fair valued at their face value and adjusted for any movements in foreign exchange rates. Interest rates vary for each agreement and are set at the initiation of the agreement. It is the Company's policy to take custody of securities purchased under reverse repurchase agreements and to value the securities on a daily basis to protect the Company in the event the securities are not repurchased by the counterparty. The Company will generally obtain additional collateral if the market value of the underlying securities is less than the face value of the reverse repurchase agreement plus any accrued interest. In the event of default on the obligation to repurchase, the Company has the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation. In the event of default or bankruptcy by the counterparty to the agreement, realisation and/or retention of the collateral or proceeds may be subject to legal proceedings. Reverse repurchase agreements have been used during the financial year for the purpose of efficient portfolio management.

(u) Exchange Traded Funds

The Funds may invest in exchange traded funds (''ETFs''). ETFs are securities that track an index, a commodity or a basket of assets like an index fund, but trade like a stock on an exchange. These securities are subject to market fluctuations and their current value is determined in the same manner as for other securities.

(v) Shares in Collective Investment Schemes

The fair value of investments in open-ended investment funds is based upon the unaudited net asset value per share as supplied by the respective funds' administrator.

(w) Swaptions

Certain of the Funds may invest in swaptions for the purposes of hedging against adverse movements in interest rates. Such instruments combine the features of two other financial instruments namely an option and an interest rate swap. The Funds record an unrealised gain/(loss) (fair value) for the amount expected to be received or paid under the agreement if such amount was terminated on valuation. The fair value is provided on a daily basis by Markit as the vendor. The unrealised gain/(loss) are reflected as a financial asset or financial liability in the Statement of Financial Position.

(x) Treasury Inflationary Index Obligations (TIPS)

Certain of the Funds may invest in indexed securities. Indexed securities are securities whose prices are indexed to the prices of securities indices, currencies, or other financial statistics. Indexed securities typically are debt securities or deposits whose value at maturity and/or coupon rate is determined by reference to a specific instrument or statistic. The performance of indexed securities fluctuates (either directly or inversely, depending upon the instrument) with the performance of the index, security or currency. The securities are fair valued daily by the relevant vendor and the change in fair value is recorded by the Funds as an unrealised gain or loss.

(y) Loan Notes & Loan Participations

Loan notes & loan participations are fixed and floating rate loans arranged through private negotiations between a corporation or other type of entity and one or more financial institution. Such investments are expected to be in the form of participations in, or assignment of, the loans, which may or may not be securitised. Loan notes & loan participations are classified by the Company as financial assets at fair value through profit or loss, and are initially recognised at fair value. Gains and losses arising from changes in the fair value of the financial assets are presented in the Statement of Comprehensive Income, in the financial year in which they arise.

(z) Master-Limited Partnership

Certain Funds may invest in master-limited partnerships (MLPs) by purchasing units issued to limited partners of the MLP that are publically traded on regulated markets. MLPs are limited partnerships or limited liability companies that typically derive income and gains from the exploration, development, storage, gathering, mining, production, processing, refining, transportation (including pipelines transporting gas, oil or products thereof) or marketing of any mineral or natural resources. MLPs generally have two classes of owners, the general partner and the limited partners. Limited partners own the remainder of the partnership, through ownership of common units, and have a limited role in the operations and management.

The fair value of an investment in MLP is determined in the same manner as for other securities. The changes in the fair value is recorded as an unrealised gain or loss.

(aa) Interest income and interest expense

Interest income and interest expense include interest income and interest expense on cash, cash equivalents, time deposits and margin cash. Interest income and interest expense are disclosed in the Statement of Comprehensive Income.

(ab) Margin accounts and restricted cash

"Margin accounts and restricted cash" in the Statement of Financial Position represent margin deposits, cash collateral and realised gains and losses on futures contracts not yet delivered.

Margin deposits are held or pledged with / to brokers in respect of open exchange-traded and over-the-counter derivative contracts. Cash collateral provided or received by the Funds for derivatives trading are likewise identified in the Statement of Financial Position within margin accounts and restricted cash and are not included as components of cash and cash equivalents. Cash collateral balances are amounts relating to derivatives trading and are held at the year end with brokers. Cash collateral balances received in relation to derivatives trading are held with The Bank of New York Mellon SA/NV, Dublin Branch and any sub-custodians and are payable to brokers at the year end.

(ac) Receivable for investments / redeemable participating shares sold and payable for investments purchased / redeemable participating shares reacquired

Receivable for investments / redeemable participating shares sold represents receivables for securities / redeemable participating shares sold that have been contracted for but not yet settled or delivered on the Statement of Financial Position date. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

Payable for investments purchased / redeemable participating shares reacquired represents payables for securities purchased / redeemable participating shares reacquired that have been contracted for but not yet settled or delivered on the Statement of Financial Position date. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

(ad) Distributions to holders of redeemable participating shares

Distributions to holders of redeemable participating shares are recognised on an ex-dividend date and presented as "finance costs" in the Statement of Comprehensive Income.

(ae) Securities sold short

Certain Funds of the Company may engage in selling securities short. The Company makes short sales in which a borrowed security is sold in anticipation of a decline in the market value of that security, or it may use short sales for various arbitrage transactions. Short sales are held for trading and are consequently classified as financial liabilities at fair value through profit or loss.

3. Efficient Portfolio Management

Subject to the conditions and within the limits from time to time laid down by the Central Bank of Ireland (the "Central Bank"), and except as otherwise stated in the investment objective and policies of a Fund, the Investment Managers and/or the Sub-Investment Managers may employ investment techniques and instruments such as futures, options, forward foreign currency contracts and other derivatives for efficient portfolio management purposes. Furthermore, new techniques and instruments may be developed which may be suitable for use by a Fund in the future and a Fund may employ such techniques and instruments subject to the prior approval of, and any restrictions imposed by, the Central Bank.

For UCITS which have engaged in efficient portfolio management techniques and instruments, disclosures are required under the Central Bank UCITS Regulations. A UCITS is required to disclose the revenues arising from efficient portfolio management techniques and instruments for the entire reporting year together with the direct and indirect operational costs and fees incurred. Please refer to the table below.

Details of open financial derivative instruments at the financial year end are disclosed in the Portfolio of Investments of the Funds. All realised gains and losses arising from the use of derivative contracts for efficient portfolio management purposes are included in net gains/(losses) on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

Reverse repurchase agreements

A portion of each Fund's assets may be held in ancillary liquid assets. For efficient portfolio management purposes, each Fund may enter into repurchase agreements and reverse repurchase agreements. Details of all reverse repurchase agreements at the financial year end are disclosed in the Portfolio of Investments.

The table below shows the revenue earned from reverse repurchase agreements during the financial years ended 28 February 2026 and 28 February 2025:

Fund name	28 February 2026 (000's)	28 February 2025 (000's)
FTGF Western Asset US Government Liquidity Fund	$21,370	$19,764

There have been no transaction costs on the purchases and sales of reverse repurchase agreements.

Stocklending transactions

Certain Funds may also utilise stocklending agreements for efficient portfolio management purposes as described above. In such transactions the Fund may temporarily transfer its securities to a borrower, with agreement by the borrower to return equivalent securities to the Fund at a pre-agreed time. In entering into such transactions the Fund will endeavour to increase the returns on its portfolio of securities by receiving a fee for making its securities available to the borrower. There were no stocklending transactions on any of the Funds for the financial years ended 28 February 2026 and 28 February 2025.

4. Operating Expenses and Other Related Party Transactions

Pursuant to the management agreement between Franklin Templeton International Services S.à r.l (the "Manager" or "FTIS") and the Company (the "Management Agreement"), the Manager shall be entitled to receive a management fee out of the assets of the relevant Fund for its investment management and distribution services, which shall accrue on each dealing day and be payable monthly in arrears (the "Management Fees"). The Manager shall also be entitled to receive a supplemental fee out of the assets of the Class T and Class K shares offered by certain Funds for distributing these Class T and Class K shares (the "Annual Supplemental Distribution Fee"). The Company shall also be responsible for the prompt payment or reimbursement to the Manager of any commissions, transfer fees, registration fees, taxes and similar liabilities, costs and out-of-pocket expenses properly payable or incurred by FTIS.

Notes to Financial Statements – *(continued)*

In the tables above, the Management Fees provided for each Fund apply to any of the share classes listed in the relevant column that are offered by the Fund. Not all share classes are offered by each Fund and not all share classes were in issue as at current and prior financial year end. The Prospectus, as it may be amended or supplemented from time to time, indicates which share classes are offered by each Fund.

Pursuant to each Investment Management Agreement, the Manager shall be responsible for paying the fees and out-of-pocket expenses of the relevant Investment Manager.

The Manager has voluntarily agreed to waive a portion of their fees and/or reimburse for certain expenses so that the total expenses would not exceed certain voluntary expense limitations established for the Funds. The Manager, at its discretion, may revise or discontinue the voluntary waivers and/or expense reimbursements at any time.

For the financial years ended 28 February 2026 and 28 February 2025, the Management Fees waived, reimbursed and other expenses recouped were as follows:

	For the year ended 28 February 2026 in (000's)		For the year ended 28 February 2025 in (000's)

Amounts designated as "–" are either $0/€0 or less than $1,000/€1,000.

Pursuant to each Investment Management Agreement, each Investment Manager is entitled to receive an investment management fee and each Investment Manager shall be responsible for paying the fees and out-of-pocket expenses of any Sub-Investment Managers out of its own Investment Management Fee (which may include "performance fees").

Under the terms of the Master Distribution Agreement between the Manager, the Company and Franklin Distributors, LLC (the "Master Distributor"), the Master Distributor is authorised to market, promote, offer and arrange for the sale and redemption of Shares of the Company (collectively, "distribution services"). In addition, the Master Distributor is authorised at its own costs and expenses to engage one or more distributors for the purpose of assisting it with carrying out in duties and responsibilities, provided the appointments of such other firms are made in accordance with the requirements of the Central Bank Rules. Under the terms of the Master Distribution Agreement between the Manager, the Company and the Master Distributor, the Master Distributor in such instances shall remain responsible to the Manager for the performance of its obligations under such agreement. The Master Distributor, in accordance with the requirements of the Central Bank, has appointed Franklin Templeton Investments (Asia) Limited ("FTIA") and Templeton Asset Management Ltd. ("TAM") as additional Distributors of the Funds. The Manager has also appointed itself and Franklin Templeton Securities Investment Consulting (SinoAm) Inc to provide certain distribution services.

The Company shall also be responsible for the prompt payment or reimbursement to the Manager of any commissions, transfer fees, registration fees, taxes and similar liabilities, costs and out-of-pocket expenses properly payable or incurred by the Manager.

Shareholder Services Fee

Pursuant to the Management Agreement between the Company and the Manager, the Manager shall be entitled to receive a shareholder services fee out of the assets of the relevant Funds for its services, which shall accrue on each dealing day and be payable monthly in arrears (the "Shareholder Services Fees"). Under the Master Shareholder Servicing Agreement between the Manager, the Company and Franklin Distributors, LLC (the "Master Shareholder Servicing Agent"), the Master Shareholder Servicing Agent shall be entitled to receive from the Manager a shareholder services fee from certain of the share classes for their services as Shareholder Servicing Agent.

Under the terms of the Master Shareholder Servicing Agent Agreement, the Master Shareholder Servicing Agent is authorised at its own costs and expenses to engage one or more parties for the purpose of assisting it with carrying out in duties under the agreement, provided that the Master Shareholder Servicing Agent shall remain responsible to the Manager for the performance of its obligations under such agreement. Pursuant to this, the Master Shareholder Servicing Agent has appointed FTIA and TAM as additional Shareholder Servicing Agents of the Company. The Manager has authorised Franklin Templeton Securities Investment Consulting (SinoAm) Inc to provide shareholder services in respect of Taiwan.

The aggregate amount of Shareholder Services Fees paid by each share class shall be or has been equal to the following:

(i) 0.15 per cent, per annum of the net asset value of FTGF Western Asset US Core Bond Fund, FTGF Western Asset US Core Plus Bond Fund, FTGF Western Asset Global Multi Strategy Fund, FTGF Western Asset US High Yield Fund, FTGF Western Asset Global High Yield Fund, FTGF Western Asset Asian Opportunities Fund, FTGF Western Asset Short Duration Blue Chip Bond Fund, FTGF Western Asset Global Bond Fund^, FTGF Western Asset Global Credit Fund^, FTGF Western Asset Multi-Asset Credit Fund^, FTGF Western Asset Structured Opportunities Fund^, FTGF Western Asset US Mortgage-Backed Securities Fund^, FTGF Brandywine Global Fixed Income Fund, FTGF Brandywine Global Fixed Income Absolute Return Fund^, FTGF Brandywine Global High Yield Fund^, FTGF Brandywine Global Opportunistic Fixed Income Fund, FTGF Brandywine Global Income Optimiser Fund, FTGF Brandywine Global Credit Opportunities Fund^, FTGF Brandywine Global – US Fixed Income Fund^ and FTGF Franklin Global High Yield Bond Fund;

(ii) 0.35 per cent, per annum, of the net asset value of FTGF Brandywine Global Opportunistic Equity Fund, FTGF ClearBridge US Value Fund, FTGF Putnam US Research Fund, FTGF ClearBridge US Large Cap Growth Fund, FTGF ClearBridge US Aggressive Growth Fund, FTGF ClearBridge Tactical Dividend Income Fund, FTGF ClearBridge US Equity Sustainability Leaders Fund^, FTGF ClearBridge Global Growth Leaders Fund^, FTGF ClearBridge Infrastructure Value Fund^, FTGF ClearBridge Global Infrastructure Income Fund, FTGF ClearBridge Global Value Improvers Fund^, FTGF Royce US Small Cap Opportunity Fund, FTGF Royce US Smaller Companies Fund, FTGF Royce Global Small Cap Premier Fund^, FTGF Franklin Global Long Term Unconstrained Fund^, FTGF ClearBridge Emerging Markets Fund^, FTGF Franklin European Unconstrained Fund^, FTGF Martin Currie Improving Society Fund^, FTGF Putnam US Large Cap Growth Fund, FTGF Putnam US Large Cap Value Fund and FTGF Putnam Global Healthcare Fund; and

(iii) 0.25 per cent, per annum, of the net asset value of FTGF Putnam Balanced Fund.

Shareholder Services Fees are payable on all classes except Class AX Shares, Class D1 and D2 Shares of FTGF Putnam US Research Fund, Class F Share Classes, Class J Share Classes, Class P1 and Class P2 Shares, Class Y Share Classes, Premier Share Classes, S Class Shares, LM Share Classes and Grandfathered Share Classes (each as defined in the Prospectus), nor these are payable on all share classes offered by FTGF Western Asset US Government Liquidity Fund, Western Asset UCITS SMASh Series Core Plus Completion Fund^, Franklin Responsible Income 2028 Fund^, Franklin Responsible Income 2029 Fund^, FTGF Franklin Responsible Income 2031 Fund^ and FTGF Franklin Ultra Short Duration Income Fund.

During the financial years ended 28 February 2026 and 28 February 2025, the Shareholder Services Fees waived were as follows:

Fund name	For the year ended 28 February 2026 in (000's) Shareholder Services Fee Waived	For the year ended 28 February 2025 in (000's) Shareholder Services Fee Waived

Additionally, certain operating expenses, including but not limited to, fees payable to subsidiaries of Franklin Templeton for the provision of governance support and reporting to the Board, insurance services to the Board and ongoing registration services for jurisdictions where the Funds are publicly offered. For the financial year ended 28 February 2026, these expenses amounted to $1,050,476 (28 February 2025: $1,019,558).

Related Parties

Directors' fees are not payable in respect of Jaspal Sagger, Craig Tyle and Elinor Murray who are employees of the Manager, the Investment Managers or their affiliates. Save as disclosed above, none of the Directors has or has had any interest, direct or indirect, in any contract or arrangement subsisting at the date hereof which is significant in relation to the business of the Company.

As at 28 February 2026 and 28 February 2025, the Funds in the table below held investments in collective investment schemes which have appointed the same Manager, Investment Managers, or Sub-Investment Managers as the Fund, or have appointed a related party of that Manager, Investment Managers or Sub-Investment Managers.

Below is a table that shows the percentage ownership of such collective investment schemes held by the Company:

Fund	Underlying Collective Investment Scheme	28 February 2026 %	28 February 2026 Value (000's)	28 February 2025 %	28 February 2025 Value (000's)

Amounts designated as "–" are either $0/€0/£0 or less than $1,000/€1,000/£1,000.

Performance Fee

In addition to the Investment Management Fees described above, the Investment Manager may be entitled to receive a fee (a ''Performance Fee'') depending on the performance of the PF Class Shares (Performance Fee Classes, as indicated by "(PF)" in the name of the share class).

There have been no Performance Fees charged during the financial years ended 28 February 2026 and 28 February 2025, as there have been no active (PF) share classes in issue.

Administrator and Depositary Fees

The Bank of New York Mellon SA/NV, Dublin Branch acts as depositary (the "Depositary") and BNY Mellon Fund Services (Ireland) Designated Activity Company acts as administrator (the "Administrator") to all Funds in the Company. For administration, accounting, shareholder, trustee and depositary services, they collectively receive from the Funds a fee of up to 0.15% of the net asset value of each Fund.

Directors' Remuneration

Directors' fees and out-of-pocket expenses charged through profit and loss in the Statement of Comprehensive Income and which pertain to the financial year ended 28 February 2026 were $187,000 (28 February 2025: $170,000).

Directors' fees are not payable in respect of Jaspal Sagger, Craig Tyle and Elinor Murray who are employees of the Manager, the Investment Managers or their affiliates.

Auditors' Remuneration

Fees paid to the auditors, PricewaterhouseCoopers of €967,256 (excluding VAT), in respect of the financial year, relate to statutory audit of the financial statements of the Company (28 February 2025: €1,019,700 (excluding VAT)). The total audit fee for the Company as detailed within the Statement of Comprehensive Income on page 183 is inclusive of VAT at 23% and is presented in the presentational currency of the Company (US Dollar).

For the financial year ended 28 February 2026, out-of-pocket expenses paid to the auditors amounted to €12,600 (28 February 2025: €12,600).

Other Related Party Transactions

Below is a table that shows the percentage ownership of the significant shareholders that hold more than 20% of the issued share capital of the Fund:

Amounts designated as "–" are 0.

5. Distributions to Holders of Redeemable Participating Shares

Distributing Share Classes

The letter in parentheses at the end of the name of each Distributing Share Class indicates a particular frequency of dividend declarations and dividend payments, as detailed in the following table.

Distributing Share Class Designation	Frequency of Dividend Declarations	Frequency of Dividend Payments
(D)	Daily	Monthly
(M)	Monthly	Monthly
(Q)	Quarterly	Quarterly (March, June, September, December)
(S)	Semi-Annually	Semi-Annually (March, September)
(A)	Annually	Annually (March)

For each Distributing Share Class of each Fixed Income Fund (Fixed Income Fund as defined on page 14), at the time of each dividend declaration: (1) all, or some portion of, net investment income, if any, will be declared as a dividend; and (2) all, or some portion, of realised and unrealised capital gains net of realised and unrealised capital losses may be, but is not required to be, declared as a dividend.

For each Distributing Share Class of each Equity Fund (Equity Fund as defined on page 14), at the time of each dividend declaration: all, or some portion of, net investment income, if any, will be declared as a dividend. For each Shareholder of each Distributing Share Class, distributions will be made in the currency in which the Shareholder subscribed for shares, unless the Shareholder requests otherwise.

For each Distributing Share Class of each Multi-Asset Fund (Multi-Asset Fund as defined on page 14), at the time of each dividend declaration, all, or some portion of, net investment income, if any, will be declared as a dividend. For each Shareholder of each Distributing Share Class, distributions will be made in the currency in which the Shareholder subscribed for shares, unless the Shareholder requests otherwise.

The Distributing Plus Share Classes may declare and pay distributions out of capital. Investors in these share classes should be aware that payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or of capital gains attributable to that original investment, and such distributions will result in a corresponding immediate decrease in the net asset value per share of the share class. The payment of distributions out of capital will accordingly lead to capital erosion and may be achieved by forgoing the potential for future capital growth.

During the financial year, the following Funds have paid distributions out of capital on Distributing Plus Share Classes:

	Distributions out of capital for the year ended 28 February 2026 (000's)	Distributions out of capital for the year ended 28 February 2025 (000's)
FTGF Western Asset US Core Plus Bond Fund – Class A US$ Distributing (M) Plus	$52	$59

The Distributing Plus (e) and Distributing Plus (u) Share Classes offered by certain of the Funds may charge certain fees and expenses to capital rather than income. Charging all or part of the fees and expenses to capital will result in income being increased for distribution; however, the capital that these Distributing Plus (e) and Distributing Plus (u) Share Classes have available for investment in the future, and capital growth, may be reduced. Shareholders should note that there is an increased risk that on the redemption of shares of Distributing Plus (e) and Distributing Plus (u) Share Classes, shareholders may not receive back the full amount invested. For investors in Distributing Plus (e) and Distributing Plus (u) Share Classes, this may result in the erosion of investors' capital investment notwithstanding the performance of the relevant Fund, or capital gains attributable to that original investment, which will likely diminish the value of future returns. The increased dividend payout as a result of charging fees and expenses to capital effectively amounts to a return or withdrawal of an investor's original capital investment or of capital gains attributable to that original investment. The higher level of dividend payout under this charging mechanism will result in a corresponding immediate decrease in the net asset value of the share classes on the ex-dividend date. Shareholders should note that to the extent expenses are charged to capital, some or all of the distributions made by the Distributing Plus (e) and Distributing Plus (u) Share Classes should be considered to be a form of capital reimbursement. All expenses of the Distributing Plus (e) Share Classes have been charged to capital.

During the financial year, the following Funds have charged fees and expenses to capital on Distributing Plus (e) Share Classes:

	Fees and expenses charged to capital for the year ended 28 February 2026 (000's)	Fees and expenses charged to capital for the year ended 28 February 2025 (000's)

Amounts designated as "–" are either $0/€0 or less than $1,000/€1,000.

Accumulating Share Classes

With respect to Accumulating Share Classes, it is intended that, in the normal course of business, distributions will not be declared and that any net investment income attributable to each Accumulating Share Class will be accumulated daily in the respective net asset value per share of each respective share class.

6. Share Capital and Redeemable Participating Shares

Share Capital

The Company was incorporated with an initial share capital of Euro 39,000 represented by 39,000 subscriber shares of no par value. All but three of the subscriber shares have been repurchased by the Company. Shareholders of these three subscriber shares are entitled to attend and vote at all of the meetings of the Company, but are not entitled to participate in the dividends or net assets of any Fund or of the Company.

Redeemable Participating Shares

The share capital of the Company shall at all times equal the net asset value. The Directors are empowered to issue up to five hundred billion shares of no par value in the Company at the net asset value per share on such terms as they may see fit. There are no rights of pre-emption upon the issue of shares in the Company.

Each of the shares entitles the Shareholder to participate equally on a pro rata basis in the dividends, where applicable, and net assets of the Fund in respect of which they are issued, save in the case of dividends declared prior to becoming a shareholder.

The proceeds from the issue of shares shall be applied in the books of the Company to the relevant Fund and shall be used in the acquisition on behalf of the relevant Fund of assets in which the Fund may invest. The records and accounts of each Fund shall be maintained separately.

Each Fund has different share classes offered as indicated in the Company's Prospectus. These different classes of shares differ principally in terms of their sales charges, fees, rates of expenses, distribution policy, and currency denomination. Investors are thus able to choose a share class that best suits their investment needs, considering the amount of investment and anticipated holding period.

Each share class is designated as a Distributing Share Class or an Accumulating Share Class. Accumulating Share Classes do not distribute net income, net realised or net unrealised capital gains whereas Distributing Share Classes will distribute at certain intervals, which will vary depending on the letter in parentheses at the end of the name of the Distributing Share Class, as explained under Note 5 - Distributions to Holders of Redeemable Participating Shares. In addition, the Company has subscriber shares outstanding. The subscriber shares do not entitle the holders to participate in the assets of any Fund.

Each Fund may offer share classes designated in currencies other than the base currency of the Fund. For each such share class, unless indicated by ''(Hedged)'' in the name of the share class, the relevant Investment Manager and Sub-Investment Manager will not employ any techniques to hedge the share class's exposure to changes in exchange rates between the base currency of the Fund and the currency of the share class.

Class A and Class A1 Shares are available to all investors. Commission/rebate payments may be made by distributors to dealers or other investors who have an agreement with a distributor with respect to such shares. Class AX Shares are available to all investors. Following the relevant initial offer period, the subscription price per share shall be the NAV per share next determined plus an initial charge of up to 1.5%. Class B, C, D, E and K Shares are available to all investors who are clients of dealers appointed by a distributor with respect to such shares. Commission payments may be made by distributors to dealers or other investors who have an agreement with a distributor with respect to such shares. Class D1 and Class D2 Shares are available to all investors who are clients of dealers appointed by a distributor with respect to such shares. Commission payments may be made by distributors to dealers or other investors who have an agreement with a distributor with respect to such shares. Class F Shares are available to professional investors and investors with a discretionary investment agreement with a dealer appointed by the distributor with respect to such shares. Commission/rebate payments may be made by distributors to dealers or other investors who have an agreement with the distributor with respect to such shares. Class J Shares are for Japanese distribution, at the discretion of the Directors or distributors. For the FTGF Western Asset Structured Opportunities Fund, Class M Shares are available to professional Investors and investors with a discretionary investment agreement with a dealer or other entity appointed by a Distributor with respect to such shares. For all other Funds, Class M Shares are available to professional investors, platforms which are not allowed to accept and retain trail commissions, and investors with a discretionary investment agreement with a Dealer or other entity appointed by a Distributor with respect to such shares. Class R Shares are available to all investors who have a fee-based arrangement with an intermediary from whom they have received a personal recommendation in relation to their investment in the Funds. S Class Shares are available to an investor who makes a minimum initial investment of at least US$50,000,000 in the relevant sub-fund, unless the investor satisfies either of the following criteria: (i) at least US$1,000,000,000 (or equivalent in other currency), in aggregate, invested in, or committed to (by way of a letter of intent), Franklin Templeton's EU domiciled collective investment schemes; and/or (ii) at least US$5,000,000,000 (or equivalent in other currency), in aggregate, of assets under, or committed to (by way of a letter of intent), the management of Franklin Templeton globally; provided that any such eligible institutional investor in (i) or (ii) above may not receive and retain any trail, commission, rebate, or other similar fees (referred to as inducements). Class T Shares are for Taiwanese distribution, at the discretion of the Directors or Distributors. Class T2 Shares are also available for European distribution at the discretion of the Directors. Class T0 Shares are available for Italian distributors at the discretion of the Directors. Class T Shares in the Fund are available for investors who receive investment advice from an intermediary and have agreed that intermediary may receive commission, rebates or retrocessions. A placement fee will be payable with respect to certain Share Classes. The placement fee is used to remunerate the Distributor. Upon issuance, an amount corresponding to the applicable placement fee is set aside (levied on the amount of the investment) and is amortised over a 3-year period via daily deductions that use straight-line amortisation. Class X Shares are available to dealers, portfolio managers or platforms which, according to regulatory requirements or based on fee arrangements with their clients, are not allowed to accept and retain trail commissions; and institutional investors (for investors in the European Union, this means "Eligible Counterparties" as defined under MIFID II) investing for their own account. Class Y Shares are available to institutional investors at the discretion of the Directors or distributors. BW LM Share Classes are available at the discretion of the Directors or distributors to qualifying investors who are members of the Franklin Templeton group or clients of such members. LM Share Classes are available at the discretion of the Directors or distributors to qualifying investors who are members of the Franklin Templeton group, retirement schemes and schemes of similar nature sponsored by members of the Franklin Templeton group, or clients of such members. For investors based in the European Union, BW Premier Share Classes are available at the discretion of the Directors or distributors to "Eligible Counterparties" as defined under MIFID II; for investors based outside the European Union, BW Premier Share Classes are available to institutional investors at the discretion of the Directors or distributors or to qualifying investors who are members of the Franklin Templeton group or clients of such members. For investors based in the European Union, Premier Share Classes are available to "Eligible Counterparties" as defined under MIFID II; for investors based outside the European Union, Premier Share Classes are available to institutional investors.

For Class P1, unless otherwise indicated in the relevant Supplement, it is intended that the Directors will accept applications from institutional investors investing a minimum of US$10,000,000 in Class P1 Shares for a limited time until the total net asset value of the relevant Share Class(es) of the Fund (excluding seed capital) reaches US$100,000,000 (or equivalent in other currency), or such other amounts as specifically determined by the Manager and disclosed on the Franklin Templeton website. For Class P2, unless otherwise indicated in the relevant Supplement, it is intended that the Directors will accept applications from institutional investors, intermediaries, distributors, platforms and/or brokers/dealers investing a minimum of US$5,000,000 in Class P2 Shares for a limited time until the total net asset value of the relevant Share Class(es) of the Fund (excluding seed capital) reaches US$200,000,000 (or equivalent in other currency), or such other amounts as specifically determined by the Manager and disclosed on the Franklin Templeton website.

A contingent deferred sales charge ("CDSC") may be imposed on a redemption proceeds paid to a shareholder that redeems Class AX Shares, Class B Shares, Class C Shares, Class B (G) US$ distributing (D), Class B (G) US$ Distributing (A), Class B (G) US$ Accumulating Shares, Class L (G) US$ Distributing (D), Class L (G) US$ Distributing (A), Class L (G) US$ Accumulating Shares, Class T Shares or Class K Shares.

^ *Not authorised for sale to the public in Hong Kong.*

Notes to Financial Statements – *(continued)*

6. Share Capital and Redeemable Participating Shares – (continued)

For share classes that include "(Hedged)" in their name after the currency denomination, it is intended that such share classes will be hedged against movements in exchange rates between the currency of the share class and the base currency of the relevant Fund. Certain share classes in Funds managed by Brandywine Global Investment Management, LLC are hedged relative to an index, as indicated by the inclusion of an "(IH)" in the Share Class name. The Funds managed by Brandywine Global Investment Management, LLC and the FTGF ClearBridge Infrastructure Value Fund managed by ClearBridge Investments (North America) Pty Limited offer portfolio hedged share classes, as indicated by the inclusion of a "(PH)" in the share class name. Certain Funds offer share classes that may pay a performance fee, as indicated by "(PF)" in the name of the share class. A selective hedged share class version, as indicated by the inclusion of a "(SH)" in the share class name, is available in respect of certain share classes of FTGF Brandywine Global Income Optimiser Fund.

Certain Funds also have issued shares of Grandfathered Share Classes, as indicated by the inclusion of "GA", "GE", "GP" or "(G)" in the name of the share class. The Grandfathered Share Classes are available only to unitholders of the affiliated funds. The Grandfathered Class Shares are closed to any subsequent subscriptions, both by existing shareholders in the share class and by new investors, except that shares may continue to be acquired through (1) dividend reinvestment; (2) automatic conversions from a Class B (G) Share Class of the Fund to a Class A (G) Share Class of the same Fund; and (3) exchanges of shares of a Grandfathered Share Class with the same letter designation. Notwithstanding the foregoing, as indicated in the Fund Supplements, certain Grandfathered Share Classes for certain Funds may be made available for subsequent subscriptions by existing shareholders in the share class at the sole discretion of the Directors.

7. Taxation

Under current Irish law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997 (as amended). On that basis, the Company will not generally be liable to Irish tax in respect of its income and gains, other than on the occurrence of a chargeable event. Generally a chargeable event arises on any distribution, redemption, repurchase, cancellation, transfer of shares or on the ending of a 'Relevant Period', a 'Relevant Period' being an eight year period beginning with the acquisition of the shares by the Shareholders and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

(i) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided an appropriate valid declaration is in place, or the Company has been authorised by Irish Revenue to make gross payments in the absence of appropriate declarations; and

(ii) certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations.

In addition, any transaction (which might otherwise be a chargeable event) in relation to shares held in a recognised clearing system as designated by order of the Irish Revenue Commissioners will not constitute a chargeable event.

In the absence of an appropriate declaration, the Company will be liable to Irish tax on the occurrence of a chargeable event.

Capital gains, dividends and interest received may be subject to taxes, including withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Fund or its shareholders.

8. Cash and Cash Equivalents and Margin Accounts

Cash and cash equivalents are valued at their face value with interest accrued, where applicable. The cash and cash equivalents and cash overdraft balances of any Fund are held with the Depositary. "Margin accounts and restricted cash" in the Statement of Financial Position represent margin deposits, cash collateral and realised gains and losses on futures contracts not yet delivered. As at 28 February 2026, margin deposits and cash collateral, held in relation to OTCs and exchange traded derivatives trading, were held with the following brokers: Bank of America Merrill Lynch, BNP Paribas, Citi, Goldman Sachs, JP Morgan, Morgan Stanley and UBS (28 February 2025: Bank of America Merrill Lynch, Barclays, BNY, Citi, Goldman Sachs, HSBC, JP Morgan, Morgan Stanley and UBS).

9. Commitments and Contingent Liabilities

There were no significant commitments or contingent liabilities as at 28 February 2026 and 28 February 2025.

10. Soft Commission Arrangements

The Company has policies designed to ensure that its service providers act in the Funds' best interests when executing decisions to deal on behalf of those Funds in the context of managing the Funds' portfolios. For these purposes, all reasonable steps must be taken to obtain the best possible result for the Funds, taking into account price, costs, speed, likelihood of execution and settlement, order size and nature, or any other consideration relevant to the execution of the order. Any cash rebates received from a broker or dealer in consideration of Fund brokerage transactions directed to that broker or dealer will not be retained by the Investment Manager, the Sub-Investment Manager or any of their connected persons. The Company will not bear the costs of external research obtained by the Investment Managers and the Sub-Investment Managers. Such costs will be borne by the relevant Investment Manager or Sub-Investment Manager. Information about the Funds' execution policies is available to Shareholders at no charge upon request.

During the financial year ended 28 February 2026, Royce & Associates, LP ("Royce") and The Putnam Advisory Company, LLC ("Putnam") entered into soft commission arrangements with brokers, but reimbursed the relevant Funds for any research costs incurred as part of such arrangements (28 February 2025: Royce).

11. Exchange Rates

12. Risk Exposure and Risk Management

Following its appointment as the UCITS management company of the Company, with responsibility for managing the Company and for certain investment management, administration and distribution functions in respect of the Company as set out in the UCITS Regulations, FTIS (the "Manager") has made the decision to delegate some, but not all investment management activities to relevant Investment Managers and/or Sub-Investment Managers, provided that the Manager remains responsible to the Funds for the performance of their agreed upon obligations (please refer to the General Information pages for the line-up of Investment Managers and Sub-Investment Managers for each Fund, as applicable, as per the Prospectus).

The Company, in conjunction with the Manager and the Investment Managers, has determined that certain of its material risks are market risk, credit risk and liquidity risk. In respect of the use of financial derivative instruments, the risks are counterparty risk, credit risk, increased margin calls and unlimited risk of loss. Further details of these and other risks are set out below and in the Prospectus under ''Risk Factors''.

Market risk includes market price risk, foreign currency risk, interest rate risk and other price risk.

Market price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. The maximum price risk resulting from the ownership of financial instruments is determined by the fair value of financial instruments. The Investment Managers or Sub-Investment Managers may consider the asset allocation of the portfolios in order to minimise the risk associated with particular countries, industry sectors or securities while continuing to follow each Fund's investment objective as outlined in the applicable Fund supplement to the Prospectus. Risk is managed by each Investment Manager or Sub-Investment Manager, as applicable, through careful selection of securities and other financial instruments within specified limits and investment mandates. Details of each Fund's investment policies are outlined in the applicable Fund supplement to the Prospectus. Details of each Fund's financial assets and financial liabilities are presented on the Statement of Financial Position.

Foreign currency risk is the risk that the value of a financial instrument will fluctuate because of changes in the rate of exchange between the currency in which the financial asset or financial liability is denominated and the functional currency of the Funds. The value of the investments of a Fund denominated in a currency other than the functional currency may rise and fall due to exchange rate fluctuations by the relevant currencies. There is a risk that large exchange rate fluctuations may have a significant impact on the performance of the Funds.

Where a Fund holds investments in a currency other than that Fund's functional currency, the relevant Investment Manager or Sub-Investment Manager may manage foreign currency risk by either hedging foreign currency into the functional currency of the Fund or alternatively by diversifying investments across multiple currencies using a multi-bank foreign exchange trading network.

Interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rate. The Funds which hold fixed interest rate debt securities and overdraft positions are exposed to interest rate risk where the value of these securities or loans may fluctuate as a result of a change in interest rates. Holdings in floating and variable rate securities may also be subject to interest rate risk although to a lesser degree. Cash assets held via the Depositary have the potential to yield interest income, the level of which will fluctuate according to the prevailing level of market interest rates.

The Equity Funds generally do not invest in any interest bearing securities other than cash balances held with the Depositary. Cash assets yield interest income, the level of which will fluctuate according to the prevailing level of market interest rates. As a result, the Equity Funds are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates on its financial assets and financial liabilities.

The Fixed Income Funds and the Multi-Asset Funds invest in interest bearing financial assets and financial liabilities which expose them to risks associated with the effects of fluctuations in the prevailing levels of market interest rates on their financial positions and cash flows. The value of investments in fixed rate interest bearing securities may be subject to price volatility due to changes in interest rates. Fluctuations in market interest rates will impact upon the level of interest received by a Fund.

An increase in interest rates will generally reduce the value of debt securities that are issued and outstanding, while a decline in interest rates will generally increase the value of debt securities that are issued and outstanding. The magnitude of these price fluctuations will be greater when the maturity of the outstanding securities is longer. Changes in the value of securities held by a Fund when interest rates change mean that a Fund's net asset value per share can go up or down because of the effect on the value of the Fund's portfolio of debt securities.

The Manager to each Fixed Income Fund monitors the interest-rate environment and evaluates risks on major strategies. Interest rate risk is controlled by monitoring maturities and duration relative to the Funds' benchmarks. Techniques such as key rate duration measurement are used to evaluate portfolio curve exposures.

Details of each Fixed Income Fund's weighted average yield, weighted average years to maturity and an analysis of fixed and non-interest bearing securities are set out in Notes 12.1(b) and 12.1(c) below.

The risks involved with investing in Equity Funds include changing economic conditions, industry and company conditions and security selection. Fixed Income Funds and Multi-Asset Funds are also subject to interest rate risk, credit risk, maturity risk and market risk. International securities are subject to changing exchange rates, less liquid markets and political and economic instability depending on the country. Developing markets are subject to these same risks however it may be to a greater degree. For the purpose of efficient portfolio management, the Funds may enter into exchange traded or over-the-counter (''OTC'') derivatives, including but not limited to, futures, swaps, forwards, options and warrants and may enter into stock lending agreements.

The Investment Management and Portfolio Oversight Committee ("IMPOC" or the "Committee") has been established within Franklin Templeton to oversee the delegation of investment management responsibilities for all Funds. The Committee is comprised of members who, as a group, have experience and specialised knowledge in such areas as investment management including equity, fixed income and derivatives; investment analysis and reporting; risk management; and compliance. The Committee, on behalf of the Manager, has been responsible for overseeing that the Funds are managed within the terms of the Funds' investment guidelines and limits set out in the Prospectus and the UCITS Regulations as well as the relevant Investment Manager's or Sub-Investment Manager's own internal investment guidelines and limits. The Committee generally meets once a month to oversee that the Funds are being managed in accordance with these limits and regulatory requirements. The respective Investment Managers and/or Sub-Investment Managers, as applicable, report to the Committee matters arising in relation to the monitoring of certain material risks arising from a Fund's investments in financial instruments.

12.1 Market Risk

Each Fund using financial derivative instruments (''FDI''s) seeks to limit the market risk and leverage created through the use of derivatives by using either the commitment approach or by using a sophisticated risk measurement technique known as ''value-at-risk'' (the ''VaR approach''). Each Fund using FDI (other than FTGF Western Asset Multi-Asset Credit Fund^, FTGF Western Asset Structured Opportunities Fund^, Western Asset UCITS SMASh Series Core Plus Completion Fund^, FTGF Brandywine Global Fixed Income Absolute Return Fund^, FTGF Brandywine Global Income Optimiser Fund, FTGF Brandywine Global Credit Opportunities Fund^ and FTGF Putnam Global Healthcare Fund) use the commitment approach. FTGF Western Asset Multi-Asset Credit Fund^, FTGF Western Asset Structured Opportunities Fund^, Western Asset UCITS SMASh Series Core Plus Completion Fund^, FTGF Brandywine Global Fixed Income Absolute Return Fund^, FTGF Brandywine Global Income Optimiser Fund and FTGF Putnam Global Healthcare Fund use the VaR approach. FTGF Brandywine Global Credit Opportunities Fund^ used the VaR approach up to the date when it ceased trading on 4 August 2025.

The Manager employs a risk management process to enable it to accurately measure, monitor and manage the risks attached to FDI positions.

The commitment approach calculates leverage by measuring the market value of the underlying exposures of derivatives relative to the relevant Fund's Net Asset Value. VaR is a statistical methodology that seeks to predict, using historical data, the likely maximum loss that a Fund could suffer, calculated to a specific (e.g., ''one tailed'' 99 per cent) confidence level. FTGF Western Asset Multi-Asset Credit Fund^, FTGF Western Asset Structured Opportunities Fund^, Western Asset UCITS SMASh Series Core Plus Completion Fund^, FTGF Brandywine Global Fixed Income Absolute Return Fund^, FTGF Brandywine Global Income Optimiser Fund, and FTGF Putnam Global Healthcare Fund use, and FTGF Brandywine Global Credit Opportunities Fund^ (up to the date of its termination) used, respectively, an ''absolute'' VaR model where the measurement of VaR is relative to the Net Asset Value of the Fund. A VaR model has certain inherent limitations, and it cannot be relied upon to predict or guarantee that the size or frequency of losses incurred by a Fund will be limited to any extent. As the VaR model relies on historical market data as one of its key inputs, if current market conditions differ from those during the historical observation period, the effectiveness of the VaR model in predicting the VaR of a Fund may be materially impaired. Investors may suffer serious financial consequences under abnormal market conditions.

The effectiveness of the VaR model could be impaired in a similar fashion if other assumptions or components comprised in the VaR model prove to be inadequate or incorrect.

Notes to Financial Statements – *(continued)*

12. Risk Exposure and Risk Management – (continued)

12.1 Market Risk – (continued)

Western Asset Management Company Limited and Western Asset Management Company, LLC ("Western Asset") calculate VaR at a 99% confidence level for a 1 day time horizon using an appropriate sample of historical data. The table below indicates the absolute VaR for the Funds:

Fund	As at 28 February 2026	As at 28 February 2025
FTGF Western Asset Multi-Asset Credit Fund^	0.55%	0.71%
FTGF Western Asset Structured Opportunities Fund^	0.18%	0.30%
Western Asset UCITS SMASh Series Core Plus Completion Fund^	0.17%	0.96%

Brandywine Global Investment Management, LLC ("Brandywine") calculates VaR at a 95% confidence level for a 1 day time horizon using 2 years of historical data. The table below indicates the absolute VaR for the Funds:

Fund	As at 28 February 2026	As at 28 February 2025
FTGF Brandywine Global Fixed Income Absolute Return Fund^	0.50%	0.55%
FTGF Brandywine Global Income Optimiser Fund	0.32%	0.48%
FTGF Brandywine Global Credit Opportunities Fund^	n/a	0.30%

The Putnam Advisory Company, LLC ("Putnam") calculates VaR at a 99% confidence level for a 1-day time horizon using an appropriate sample of historical data. The table below indicates the absolute VaR for the Fund:

Fund	As at 28 February 2026	As at 28 February 2025
FTGF Putnam Global Healthcare Fund	1.93%	n/a

Where FTGF Western Asset Multi-Asset Credit Fund^, FTGF Western Asset Structured Opportunities Fund^, Western Asset UCITS SMASh Series Core Plus Completion Fund^, FTGF Brandywine Global Fixed Income Absolute Return Fund^, FTGF Brandywine Global Income Optimiser Fund, and FTGF Putnam Global Healthcare Fund use, and FTGF Brandywine Global Credit Opportunities Fund^ (up to the date of its termination) used, respectively, an absolute VaR model, in accordance with the requirements of the Central Bank, each of these Funds has been subject to an absolute VaR limit of 20% of the Fund's Net Asset Value. However, each of these Funds may from time-to-time experience or may have experienced a change in Net Asset Value over a 20-day holding period greater than 20% of Net Asset Value.

In addition to using the VaR approach, the Manager of FTGF Western Asset Multi-Asset Credit Fund^, FTGF Western Asset Structured Opportunities Fund^, Western Asset UCITS SMASh Series Core Plus Completion Fund^, FTGF Brandywine Global Fixed Income Absolute Return Fund^, FTGF Brandywine Global Income Optimiser Fund, and FTGF Putnam Global Healthcare Fund screen the leverage levels on a daily basis, and screened (up to its termination date) those of FTGF Brandywine Global Credit Opportunities Fund^, to monitor changes due to market movements.

In addition, the respective Investment Managers and/or Sub-Investment Managers of each of these Funds shall carry out pre-trade testing to consider the impact that the trade would have on the relevant Fund's overall leverage and to consider the risk/reward levels of the trade.

The lowest, average and highest VaR levels, at a 99% confidence level for a 20-day time horizon, for relevant Western Asset, Brandywine and Putnam Funds, were as follows:

For the year ended 28 February 2026

Fund	Minimum	Average	Maximum
FTGF Western Asset Multi-Asset Credit Fund^	3.07%	4.10%	5.32%
FTGF Western Asset Structured Opportunities Fund^	1.14%	1.54%	2.19%
Western Asset UCITS SMASh Series Core Plus Completion Fund^	2.65%	4.02%	5.64%
FTGF Brandywine Global Fixed Income Absolute Return Fund^	2.46%	3.76%	5.31%
FTGF Brandywine Global Income Optimiser Fund	2.04%	2.82%	3.54%
FTGF Brandywine Global Credit Opportunities Fund^*	0.05%	5.07%	7.39%
FTGF Putnam Global Healthcare Fund	8.57%	9.16%	9.78%

For the year ended 28 February 2025

Fund	Minimum	Average	Maximum
FTGF Western Asset Macro Opportunities Bond Fund^	3.15%	9.21%	12.58%
FTGF Western Asset Multi-Asset Credit Fund^	3.24%	4.12%	5.26%
FTGF Western Asset Structured Opportunities Fund^	1.34%	2.19%	3.96%
Western Asset UCITS SMASh Series Core Plus Completion Fund^	4.52%	5.89%	7.24%
FTGF Brandywine Global Fixed Income Absolute Return Fund^	2.66%	4.28%	6.89%
FTGF Brandywine Global Income Optimiser Fund	2.85%	3.54%	4.70%
FTGF Brandywine Global Credit Opportunities Fund^	1.89%	2.58%	3.79%
FTGF Brandywine Global Enhanced Absolute Return Fund^	0.94%	7.90%	8.83%
FTGF Brandywine Global Multi-Sector Impact Fund^	0.04%	3.43%	4.48%

For Funds using VaR, leverage is calculated as the sum of the notionals of the derivatives used.

Average levels of leverage employed were as follows:

Fund	For the year ended 28 February 2026	For the year ended 28 February 2025
FTGF Western Asset Macro Opportunities Bond Fund^	n/a	966.85%
FTGF Western Asset Multi-Asset Credit Fund^	36.09%	58.36%
FTGF Western Asset Structured Opportunities Fund^	15.59%	23.06%
Western Asset UCITS SMASh Series Core Plus Completion Fund^	289.73%	277.34%
FTGF Brandywine Global Fixed Income Absolute Return Fund^	191.35%	153.57%
FTGF Brandywine Global Income Optimiser Fund	33.06%	31.71%
FTGF Brandywine Global Credit Opportunities Fund^*	3.71%	6.86%
FTGF Brandywine Global Enhanced Absolute Return Fund^	n/a	104.95%
FTGF Brandywine Global Multi-Sector Impact Fund^	n/a	36.42%
FTGF Putnam Global Healthcare Fund	0.00%	n/a

* up to the date when respective Fund ceased trading.

Stress testing is the examination of the potential effects on a Fund's financial condition of a set of specific changes in risk factors, relating to exceptional but possible events. Western Asset take a conservative approach by applying stress tests that are beyond the range of reasonably likely occurrences. Western Asset expect (although there is no assurance) that if FTGF Western Asset US Government Liquidity Fund is able to withstand stress tests that are beyond the range of reasonably likely occurrences, that the Net Asset Value per share (or any particular class of share) of this Fund, would remain stable in the event of reasonable negative market events.

A scenario based stress test can be used to meet the sensitivity analysis requirement of FRS 102. FRS 102 does not prescribe a specific basis point movement or percentage movement for sensitivity analyses. Accordingly for the purposes of this annual report, the monetary impact on FTGF Western Asset US Government Liquidity Fund of an instantaneous 25 basis points increase in short-term interest rates is shown:

	FTGF Western Asset US Government Liquidity Fund
As at 28 February 2026	($414,548)
As at 28 February 2025	($379,240)

Notes to Financial Statements – *(continued)*

12. Risk Exposure and Risk Management – (continued)

12.1 Market Risk – (continued)

(a) Market Price Risk

Each Fund's market price risk is monitored, but not managed, relative to an index. The indices as at 28 February 2026 and 28 February 2025 are outlined below.

The following tables set out the index for each Fund, except for FTGF Western Asset Multi-Asset Credit Fund^, FTGF Western Asset Structured Opportunities Fund^, Western Asset UCITS SMASh Series Core Plus Completion Fund^, FTGF Brandywine Global Fixed Income Absolute Return Fund^, FTGF Brandywine Global Income Optimiser Fund, FTGF Brandywine Global Credit Opportunities Fund^ and FTGF Putnam Global Healthcare Fund, and quantify the probable impact to the value of the net asset value for each Fund based on positive and negative movement in the index, including one year beta for each Fund. Beta is a measure of a Fund's holdings' volatility in relation to the market or index. While beta offers a clear, quantifiable measure, it does not incorporate new information, and past price movements are not accurate predictors of the future.

* The most probable outcome is based on a +5% outperformance or -5% underperformance against the actual current year benchmark performance.

** Benchmark - N/A, therefore beta history not available for the Fund.

*** Fund does not have an index as a benchmark, therefore a substitute Index was used as an indicator for the beta calculation.

**** Fund does not have 1-year of performance; therefore, beta is not available for the Fund.

The sensitivity analysis set out above should not be used as an indication of future performance.

The market price risk sensitivity analysis for FTGF Western Asset Multi-Asset Credit Fund^, FTGF Western Asset Structured Opportunities Fund^, Western Asset UCITS SMASh Series Core Plus Completion Fund^, FTGF Brandywine Global Fixed Income Absolute Return Fund^, FTGF Brandywine Global Income Optimiser Fund, FTGF Brandywine Global Credit Opportunities Fund^ (as of the year ended 28 February 2025, as it ceased trading during the financial year ended 28 February 2026) and FTGF Putnam Global Healthcare Fund has been incorporated into the calculation of the market risk using the VaR approach (Note 12.1 above).

(b) Foreign Currency Risk

A portion of the financial assets of the Funds are denominated in currencies other than the US Dollar or Euro (the functional currencies of the Funds) with the effect that the Statement of Financial Position and total return can be significantly affected by currency movements.

The following tables set out the Funds' net exposure to foreign currency as at 28 February 2026 and 28 February 2025.

Amounts represented below primarily are monetary assets and monetary liabilities, except for investments in non-interest-bearing securities, which are non-monetary assets and include equities, exchange-traded funds, and collective investment schemes. Amounts noted below for forward foreign currency contracts represent the values to be received under the currency contracts and include foreign exchange hedging transactions. Whilst amounts noted for other derivatives represent the unrealised appreciation/(depreciation) at year end.

As at 28 February 2026

Certain Funds also have share classes issued in foreign currencies. Certain Funds (as indicated in the relevant Supplement to the Prospectus) may enter into forward foreign currency contracts, both deliverable and non-deliverable, to hedge against exchange risk, to increase exposure to a currency, to shift exposure to currency fluctuations from one currency to another, or to enhance return. Each Fixed Income Fund may also enter into options on forward foreign currency contracts, both deliverable and non-deliverable, which in exchange for a premium gives the Fund the option, but not the obligation, to enter into such a contract at some time before a specified date.

The following table sets out a sensitivity analysis in relation to foreign currency risk and its effect on the net asset value of the Funds where foreign currency risk is deemed significant. A snapshot of the underlying positions for all Funds was taken as at 28 February 2026 and 28 February 2025. Exchange rates were appreciated/depreciated by +/- 5% (given the nature of the markets that the Funds are invested in a 5% increase/decrease has been applied); the corresponding impact was estimated for the total net asset value. All other market parameters are also assumed unchanged.

		Impact on net asset value due to movement in foreign exchange rates* (Amount in Fund Base Currency) (000's)

Analysis is shown where significant foreign currency exposure is held on the Fund. Significant exposure is deemed to be in excess of 10% of net assets. Movements in all foreign currency exchange rates will have a direct impact on the net asset value. The foreign currency exchange rates as at 28 February 2026 and 28 February 2025 are listed in Note 11. This sensitivity analysis should not be used as a prediction of future performance.

The foreign currency risk sensitivity analysis for FTGF Western Asset Multi-Asset Credit Fund^, FTGF Western Asset Structured Opportunities Fund^, Western Asset UCITS SMASh Series Core Plus Completion Fund^, FTGF Brandywine Global Fixed Income Absolute Return Fund^, FTGF Brandywine Global Income Optimiser Fund, FTGF Brandywine Global Credit Opportunities Fund^ (as of the year ended 28 February 2025, as it ceased trading during the financial year ended 28 February 2026) and FTGF Putnam Global Healthcare Fund has been incorporated into the calculation of the market risk using the VaR approach (Note 12.1 above).

(c) Interest Rate Risk

A sensitivity analysis for the Equity Funds has not been prepared as the majority of the Equity Funds' assets are non-interest bearing assets and therefore the risk is not sufficiently material.

As at 28 February 2026 and 28 February 2025, all of the cash held by the Funds is held with the Depositary or other brokers and have the potential to yield interest income, the level of which will fluctuate according to the prevailing level of market interest rates.

The analysis of fixed, variable and non-interest bearing securities is disclosed in Note 12.1(b) above.

The weighted average yield and weighted average years to maturity of each Fund on its fixed rate instruments per currency as at 28 February 2026 and 28 February 2025 are as follows:

(d) Other Price Risk – Fair Value of Financial Assets and Financial Liabilities

In addition to the Committee, Franklin Templeton has established the Valuation Committee to oversee the implementation of the valuation policies and procedures adopted by the Board of Directors (the ''Board''). The Valuation Committee, including the Chairperson, is comprised of no fewer than four members and no more than ten members. Representatives of Franklin Templeton Legal and Compliance will serve the Valuation Committee in an advisory capacity. The Valuation Committee meets on a monthly basis to review all securities which are manually priced, broker priced, matrix priced, fair valued, illiquid or stale. A Valuation Committee meeting, however, may be called at any time to consider any question or issue that falls under their procedures. Valuation Committee meetings can be in person, or via email or other writing.

Some Funds entered into derivative contracts during the year. The value of derivatives is based on certain underlying stocks or bonds, interest rates, currencies or indices and includes futures, options, options on futures, contracts for difference and swap agreements. Derivatives may be hard to sell at an advantageous price or time and are sensitive to changes in the underlying security, interest rate, currency or index. Therefore, derivatives can be highly volatile and could result in a loss to the Fund. Refer to the respective Funds' Portfolio of Investments for details of open derivative positions as at the financial year end.

Fair Value Estimation

In accordance with FRS 102, the Company has elected to apply the recognition and measurement provisions of International Accounting Standards ("IAS") 39 "Financial Instruments: Recognition and Measurement" ("IAS 39") as adopted for use in the European Union and the disclosure requirements of Sections 11 and 12 of FRS 102.

The fair value of financial instruments traded in active markets (such as publicly traded derivatives and trading securities) is based on quoted market prices at the Statement of Financial Position date. When a ''readily available market quotation'' for a security is not available, the Company employs ''fair value'' methodologies to price securities. As a general principle, fair value is the price that the Fund might reasonably expect to receive upon a current sale. The fair valuation process requires the Valuation Committee to make a determination in good faith as to the value of a particular security or group of securities depending on the particular facts and circumstances involved.

Circumstances in which a market quotation is not readily available may include, trading suspensions prior to the close of the relevant market; events that unexpectedly close entire markets such as natural disasters, power blackouts, or similar major events; market holidays; or volume of trading in a security.

When determining the fair value of a portfolio security, the Valuation Committee may consider all relevant methods, including but not limited to any one or all of the following pricing methods:

(i) A multiple of earnings;

(ii) A discount from market of a similar freely traded security;

(iii) A discounted cash-flow analysis;

(iv) The book value or a multiple thereof;

(v) A risk premium/yield analysis;

(vi) Yield to maturity; and/or

(vii) Fundamental investment analysis.

The Valuation Committee reviews the appropriateness and accuracy of the methods used in fair valuing securities on a monthly basis including a comparison of fair values against the last market price and the next available market price, such as the next-day opening price.

The Company has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 inputs are unadjusted quoted prices in an active market for identical assets or liabilities that the entity can access at the measurement date.

Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.

Level 3 inputs are unobservable inputs (i.e. for which market data is unavailable) for the asset or liability.

An investment is always categorised as level 1, 2 or 3 in its entirety. In certain cases, the fair value measurement for an investment may use a number of different inputs that fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement requires judgement and is specific to the investment.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in these securities.

Securities which are fair valued by the Manager or the respective Investment Manager as at the financial year end are noted on the Portfolio of Investments. In the event a price is not available from a Pricing Service, the Valuation Committee may obtain one or more indicative quotes from approved broker-dealers.

Matrix pricing is used for Funds when the Valuation Committee is unable to obtain one or more broker-dealer quotes for a security for which there is no price available from a pricing service. Matrix pricing estimates a US Dollar-denominated security's current market value by using the most recent quote received from a broker-dealer and adjusting the price by the change in the yield of the US treasury security most similar in duration to the security being valued.

The following tables set out the value of securities for each Fund which have been priced using single broker sources and fair valued by the Valuation Committee as at 28 February 2026 and 28 February 2025:

As at 28 February 2026	Single Broker Priced (in 000's)	Fair Valued by Valuation Committee (in 000's)
FTGF Western Asset US Core Plus Bond Fund	$109	$11
FTGF Western Asset Global Multi Strategy Fund	–	$14
FTGF Western Asset US High Yield Fund	$812	$532
FTGF Western Asset Global High Yield Fund	–	$6
FTGF Western Asset Multi-Asset Credit Fund^	$1,445	$1,055
FTGF Western Asset Structured Opportunities Fund^	–	$12,599
Western Asset UCITS SMASh Series Core Plus Completion Fund^	–	$1

Amounts designated as "–" are either $0 or less than $1,000.

For details of derivative assets and liabilities held for trading which were fair valued as at 28 February 2026, please refer to the Portfolio of Investments.

In certain circumstances the Company employs ICE Data Services ("ICE") adjusted pricing in the valuation of non-US equities. ICE calculates and supplies an adjusted closing price to use as a fair value price.

As at 28 February 2026, ICE adjusted pricing was applied to FTGF Brandywine Global Income Optimiser Fund, FTGF Brandywine Global Opportunistic Equity Fund^, FTGF ClearBridge US Value Fund, FTGF Putnam US Research Fund, FTGF ClearBridge US Large Cap Growth Fund, FTGF ClearBridge Tactical Dividend Income Fund, FTGF ClearBridge US Equity Sustainability Leaders Fund, FTGF ClearBridge Global Growth Leaders Fund, FTGF ClearBridge Infrastructure Value Fund^, FTGF ClearBridge Global Infrastructure Income Fund, FTGF ClearBridge Global Value Improvers Fund^, FTGF Royce US Small Cap Opportunity Fund, FTGF Royce US Smaller Companies Fund, FTGF Royce Global Small Cap Premier Fund^, FTGF Martin Currie Asia Long-Term Unconstrained Fund^, FTGF ClearBridge Emerging Markets Fund^, FTGF Putnam US Large Cap Growth Fund^, FTGF Putnam US Large Cap Value Fund^, FTGF Putnam Balanced Fund^ and FTGF Putnam Global Healthcare Fund (28 February 2025: FTGF Brandywine Global Income Optimiser Fund, FTGF ClearBridge US Value Fund, FTGF ClearBridge US Appreciation Fund, FTGF ClearBridge US Large Cap Growth Fund, FTGF ClearBridge US Aggressive Growth Fund, FTGF ClearBridge Tactical Dividend Income Fund, FTGF ClearBridge US Equity Sustainability Leaders Fund, FTGF ClearBridge Global Growth Leaders Fund, FTGF ClearBridge Infrastructure Value Fund^, FTGF ClearBridge Global Infrastructure Income Fund, FTGF ClearBridge Global Sustainability Improvers Fund^, FTGF Royce US Small Cap Opportunity Fund, FTGF Royce US Smaller Companies Fund, FTGF Royce Global Small Cap Premier Fund^, FTGF Martin Currie Asia Long-Term Unconstrained Fund^, Legg Mason Martin Currie European Absolute Alpha Fund^, FTGF Martin Currie Global Long-Term Unconstrained Fund^, FTGF Martin Currie Global Emerging Markets Fund^, FTGF Martin Currie European Unconstrained Fund^ and FTGF Martin Currie Improving Society Fund^).

12.2 Credit Risk

Credit risk is the risk that a counterparty to or issuer of a financial instrument will fail to discharge an obligation or commitment that it has entered into with a Fund. The Company will be exposed to credit risk on parties with whom it trades and will also bear the risk of settlement default. The relevant Investment Manager and/or Sub-Investment Managers minimise concentrations of credit risk by undertaking transactions with a large number of brokers and counterparties on recognised and reputable exchanges. All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

Each Fund will be exposed to credit risk on the counterparties with whom it trades in relation to options, forward contracts and other derivative financial instruments that are not traded on a recognized exchange. Such instruments are not afforded the same protections as may apply to participants trading swaps, futures or options on organised exchanges, such as the performance guarantee of an exchange clearing house. The Funds will be subject to the possibility of the insolvency, bankruptcy or default of a counterparty with whom the Funds trade such instruments, which could result in substantial losses to the Funds.

The Company is exposed to credit risk on the OTC counterparties with whom it trades. All OTC counterparties must meet the following criteria as set out in the Regulations namely:

(i) Be a credit institution in accordance with Regulation 7 of the Central Bank UCITS Regulations, or an investment firm authorised in accordance with the Markets in Financial Instruments Directive in an EEA Member State, or is an entity subject to regulation as a Consolidated Supervised Entity by the Securities and Exchange Commission, or

(ii) Have a minimum credit rating of A2 or equivalent, or in the opinion of the relevant Investment Manager and/or Sub-Investment Managers, an implied credit minimum rating of A2 or equivalent.

Exposures to individual counterparties are normally limited to 10% of net asset value in the case of authorised credit institutions and 5% of net asset value in the case of other counterparties.

Transactions involving derivative financial instruments are usually with counterparties with whom the Company has signed master netting agreements. Master netting agreements provide for the net settlement of contracts for a particular Fund with the same counterparty in the event of default. The credit risk associated with derivative financial assets subject to a master netting arrangement is eliminated only to the extent that financial liabilities due to the same counterparty will be settled after the assets are realised.

Transactions resulting in large unrealised gains to a Fund may require a Fund to hold collateral received from a broker. In these instances, the credit risk to the Fund is reduced by the value of the collateral held. In the event a broker files for bankruptcy, in the U.S. (though regulations may vary by jurisdiction), collateral posted in connection with certain derivative financial instruments is exempt from the automatic stay implemented at the inception of a bankruptcy proceeding. This derivative financial instruments exemption would allow a Fund to immediately foreclose on collateral posted by the insolvent party in order to satisfy claims against such insolvent party.

The value of securities received as collateral in relation to derivatives trading held by the following Funds as at 28 February 2026 and 28 February 2025 was as follows:

Fund	Broker	As at 28 February 2026 Market Value of Collateral 000's	As at 28 February 2025 Market Value of Collateral 000's
FTGF Western Asset Global Multi Strategy Fund	Morgan Stanley	$13	$–
FTGF Western Asset Global Bond Fund^	JP Morgan	$–	$47
FTGF Western Asset US Mortgage-Backed Securities Fund^	BNP Paribas	$317	$–
FTGF Western Asset US Mortgage-Backed Securities Fund^	Goldman Sachs	$307	$272
FTGF Western Asset US Mortgage-Backed Securities Fund^	JP Morgan	$395	$18
FTGF Western Asset US Mortgage-Backed Securities Fund^	Morgan Stanley	$703	$–

Amounts designated as "–" are either $0 or less than $1,000.

The Company monitors its risk by periodically considering the credit quality and financial positions of the counterparties which the Funds use. The Funds may only trade with approved counterparties. A list of approved counterparties is maintained and the Funds may only trade with these approved counterparties. Additions to this list are reviewed quarterly and a thorough re-evaluation of all counterparties is conducted annually. The review includes analysis of the counterparty's capital adequacy, profitability, liquidity and other factors as may be appropriate.

For efficient portfolio management purposes, each Fund may enter into repurchase agreements, reverse repurchase agreements and stock lending agreements subject to the conditions and limits set out in the Central Bank UCITS Regulations.

Until the expiry of the repurchase agreements, reverse repurchase agreements and the stock lending transactions, collateral obtained under such contracts or transactions:

(i) must be marked to market daily;

(ii) must equal or exceed, in value, at all times the value of the amount invested or securities loaned;

(iii) must be transferred to the trustee, or its agent; and

(iv) must be immediately available to the scheme, without recourse to the counterparty, in the event of a default by that entity.

^ *Not authorised for sale to the public in Hong Kong.*

Notes to Financial Statements – *(continued)*

12. Risk Exposure and Risk Management – (continued)

12.2 Credit Risk – (continued)

Any non-cash collateral received by the Company cannot be sold or repledged; must be held at the credit risk of the counterparty; and must be issued by an entity independent of the counterparty. Credit risk is addressed through diversified use of counterparties and issuers, and through minimum security ratings and average portfolio ratings. The respective Investment Manager and/or Sub-Investment Managers may set portfolio limits and may invest based on internal parameters with mutually agreed limits set at a Fund's inception, including issue and issuer limitations, credit minimums, and an average credit quality, and the account is monitored on an ongoing basis to ensure it continues to meet these parameters. Rigorous independent analysis of all credit securities before purchase, including financial modeling, scenario analysis, and monitoring changes in risk profile may also be performed. Generally no more than 5% of the portfolio may be invested in any single corporate issuer at the time of purchase.

The Valuation Committee meets at least monthly and whenever the circumstances so require, to review and deliberate on valuation concerns including credit risk. The respective Investment Manager and/or Sub-Investment Managers provide risk analysis to the Board and the Committee on a semi-annual basis.

Substantially all of the cash and securities held by the Funds are held via the Depositary, who has a credit rating of AA- (28 February 2025: AA-). Bankruptcy or insolvency by the Depositary may cause the Funds' rights with respect to the cash held by the Depositary to be delayed or limited. The credit rating of the Depositary is highly rated by prominent rating agencies. If the credit quality or financial position of the Depositary deteriorates significantly, the respective Investment Manager and/or Sub-Investment Managers may move the cash holdings to another bank.

Any securities placed as collateral are disclosed on the Portfolio of Investments. Cash and cash equivalents held at the Depositary and margin accounts and restricted cash are disclosed in the Statement of Financial Position.

If a Fund has posted collateral to a counterparty, in a counterparty insolvency, that Fund may have the right under trading agreements with the counterparty to recall such posted collateral. In practice, however, the Fund may seek to reduce any amounts owed to the counterparty to settle any open transactions by setting off the amounts owed against the posted collateral. If the Fund was due back any collateral after setting off against the amounts owed (e.g., the Fund's position was over collateralised), it is likely the Fund would have an unsecured claim against the counterparty in the insolvency proceeding for the excess amount due to it.

To mitigate counterparty credit risk, certain over-the-counter derivatives are cleared through central clearing houses. Under this arrangement, trades entered with counterparties are given up to clearing houses, which after acceptance effectively replace the counterparty for the risk aspects of the trade.

The following table represents the market value of the securities which have been placed as collateral with brokers as at 28 February 2026 and 28 February 2025 in relation to derivatives trading:

Fund	Broker	As at 28 February 2026 Market Value of Collateral 000's	As at 28 February 2025 Market Value of Collateral 000's
FTGF Western Asset US Core Plus Bond Fund	Bank of America Merrill Lynch	$193	$–
FTGF Western Asset US Core Plus Bond Fund	Citi	$–	$14

β The portfolio is constructed on a bottom-up basis using Western Asset's fundamental value process. The investment team does not rely on rating agencies research; however, it evaluates their work and enhancement levels in securities. For securities that are not rated by a nationally recognized statistical rating organisation (NRSRO), the investment team assigns an internal credit rating based on the investment team's fundamental analysis.

12.3 Liquidity Risk

The Company's Prospectus provides for the daily creation and cancellation of shares and the Company is therefore exposed to the liquidity risk of meeting shareholder redemptions at any time.

The Administrator monitors subscription and redemption volumes on a daily basis and notifies the relevant Investment Manager or Sub-Investment Managers of significant movements and unusual trends as appropriate. If redemption requests on any dealing day (as defined in the Prospectus) exceed 10% of the shares in issue in respect of any Fund, the Company may elect to restrict the total number of shares redeemed on that dealing day to 10% of the outstanding shares of the Fund, in which case all the relevant redemption requests shall be scaled down pro rata. The Company shall defer the excess redemption requests, and shall treat the deferred requests as if they were received for each subsequent dealing day (in relation to which the Company has the same power of deferral at the then prevailing limit) until all the shares to which the original request relates have been redeemed. In such cases, the Company may reduce requests pro rata on the next and following dealing days so as to give effect to the above limitation.

The Company may temporarily suspend the determination of the net asset value and the sale or redemptions of shares in any Fund during any period:

(i) when any market is closed which is the main market for a significant part of the Fund's investments, or when trading thereon is restricted or suspended;

(ii) when any emergency exists as a result of which disposal by the Company of investments which constitute a substantial portion of the assets of the Fund is not practically feasible;

(iii) when for any reason the prices of any investments of the Fund cannot be reasonably, promptly or accurately ascertained by the Fund;

(iv) when remittance of monies which will, or may be, involved in the realisation of, or in the payment for, investments of the Fund cannot, in the opinion of the Directors, be carried out at normal rates of exchange; or

(v) when proceeds of the sale or redemption of the shares cannot be transmitted to or from the Fund's accounts.

The Company has the ability to borrow in the short term to ensure settlement. In accordance with the UCITS Regulations a Fund may borrow money only as follows:

(a) a Fund may acquire foreign currency by means of a ''back-to-back'' loan; and

(b) a Fund may borrow:

(i) up to 10% of its net asset value provided that such borrowing is on a temporary basis; and

(ii) up to 10% of its net asset value provided that the borrowing is to make possible the acquisition of real property required for the purpose of its business;

provided that such borrowing referred to in subparagraph b (i) and b (ii) may not in total exceed 15% of the borrower's assets.

Global Credit Facility

The Company together with other European and U.S. registered investment funds managed by Franklin Templeton Investments (individually, "Borrower", collectively, "Borrowers"), entered into a joint syndicated senior unsecured credit facility totalling US$2,675 million (in effect until 30 January 2026; increased to US$2,995 million effective 30 January 2026, the "Global Credit Facility") to provide a source of funds to the Borrowers for temporary and emergency purposes, including the ability to meet future unanticipated or unusually large redemption requests.

^ *Not authorised for sale to the public in Hong Kong.*

Notes to Financial Statements – *(continued)*

12. Risk Exposure and Risk Management – (continued)

12.3 Liquidity Risk – (continued)

Under the terms of the Global Credit Facility, the Company will, in addition to interest charged on any borrowings made by the Company and other costs incurred by the Company, pay its share of fees and expenses incurred in connected with the implementation and maintenance of the Global Credit Facility, based upon its relative share of the aggregate net assets of all of the Borrowers, including an annual commitment fee based upon the unused portion of the Global Credit Facility.

All of the Funds of the Company, with the exception of FTGF Western Asset US Government Liquidity Fund, are within the scope of the Global Credit Facility.

One of the responsibilities of the Valuation Committee is to review and deliberate on valuation concerns, including illiquid securities. The Company may from time to time invest in derivative contracts traded over-the-counter, which are not traded in an organised public market and may be illiquid. As a result, the Company may not be able to liquidate quickly its investments in these instruments at an amount close to their fair value in order to meet its liquidity requirements or to respond to specific events such as deterioration in the creditworthiness of any particular issuer.

The tables overleaf have been prepared based on the undiscounted gross cash outflows relating to respective financial liabilities. The forward foreign currency contracts included in the tables below settle on a gross basis. Please refer to the relevant Portfolio of Investment for details of gross settlement amounts on these contracts.

13. Disclosure for Cross Investments by Funds within the Company

Certain Funds may invest in other Funds of the Company. These cross investments are eliminated in the financial statements of the Company, as follows:

- the market values of the underlying collective investment schemes are eliminated in the total Company amounts in the Statement of Financial Position;
- the realised gains and losses, including movements in unrealised gains and losses, and the relevant dividend income and distributions on the cross investments are eliminated in the total Company amounts disclosed in the Statement of Comprehensive Income; and
- the monetary amounts of purchases and sales of units in such collective investment schemes are eliminated from the net proceeds from sales of shares and cost of shares reacquired, respectively, in the total Company amounts disclosed in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares.

FTGF Brandywine Global Enhanced Absolute Return Fund^

FTGF Brandywine Global Enhanced Absolute Return Fund^ held Nil (2025: Nil) shares in FTGF Brandywine Global Credit Opportunities Fund^ at the financial year end. Transactions involving the underlying Fund's shares and the related gains during the preceding financial year were as follows:

	FTGF Brandywine Global Credit Opportunities Fund^ For the year ended 28 February 2026 (in 000's)	FTGF Brandywine Global Credit Opportunities Fund^ For the year ended 28 February 2025 (in 000's)

Effective 17 February 2026, FTGF Franklin Responsible Income 2031 Fund^ commenced trading.

There have been no other significant events during the financial year ended 28 February 2026.

15. Segregated Liability

The Company is an umbrella fund with segregated liability between its Funds. As such, as matter of Irish law the assets of each of the Funds will not be exposed to the liabilities of the Company's other Funds. Notwithstanding the foregoing there can be no assurance that, should an action be brought against the Company in the court of another jurisdiction, the segregated nature of the Funds would necessarily be upheld.

16. Subsequent Events

Effective 9 March 2026, a Supplemental Prospectus for Franklin Templeton Global Funds plc and a Supplement for FTGF Putnam Global Convertibles Fund^ were issued by the Company and noted by the Central Bank.

Effective 6 March 2026, FTGF Pathway to Putnam US Research Fund commenced trading.

On 7 May 2026, authorisations for FTGF Western Asset Sustainable Global Corporate Bond Fund^, FTGF Brandywine Global Defensive High Yield Fund^ and FTGF Brandywine Global Dynamic US Equity Fund^ were revoked, at the request of the Company, by the Central Bank.

Effective 8 May 2026, FTGF ClearBridge Tactical Dividend Income Fund merged into FTGF ClearBridge Global Infrastructure Income Fund.

Effective 15 June 2026, FTGF Brandywine Global Opportunistic Equity Fund^ ceased trading.

Western Asset Management Company, LLC ("Western Asset"), a wholly-owned subsidiary of Franklin Resources, Inc., who acts as a discretionary Investment Manager and/ or Sub-Investment manager to certain sub-funds of the Company received notifications of investigation by the U.S. Department of Justice (the "DOJ") and the U.S. Securities and Exchange Commission (the "SEC") regarding alleged violations of certain laws related to trade allocations by Ken Leech, the former co-Chief Investment Officer of Western Asset. The DOJ has notified Western Asset that it is no longer a subject of its investigation and will take no further action. On 4 June 2026, Western Asset reached a settlement with the SEC, resolving the SEC's investigation in its entirety (the "Settlement"). Under the terms of the Settlement, Western Asset, without admitting any wrongdoing, has agreed to pay a civil penalty of $100 million.

There were no other material events subsequent to the Statement of Financial Position date which require disclosure in the financial statements.

17. Approval of the Annual Report and Audited Financial Statements

The Directors approved the Annual Report and Audited Financial Statements on 16 June 2026.

^ Not authorised for sale to the public in Hong Kong.

The method of calculation of the Total Expense Ratios (TER) is described on the website of the Asset Management Association Switzerland (AMAS) (www.am-switzerland.ch).

(1) CU = Currency units in the Fund's accounting currency.

** Annualised for periods less than one year.

Statement of Major Portfolio Changes (unaudited)

For the year ended 28 February 2026

In accordance with the UCITS Regulations, a statement of significant changes in the composition of each Fund's Portfolio of Investments during the reporting year is provided to ensure that shareholders can identify changes in the investments held by each of the Funds. These are defined as the aggregate purchases and sales of an investment (including maturities but excluding financial derivative instruments) exceeding 1.00% of the total value of purchases and sales for the year. At a minimum the largest twenty purchases and twenty sales are listed. If a Fund entered into less than twenty purchases or sales during the reporting year, then all transactions are presented.

UCITS V Remuneration Policy (unaudited)

Remuneration

Franklin Templeton International Services S.à.r.l. ("FTIS"), as UCITS licensed management company (the "Management Company") has a remuneration policy (the "Policy") in place which applies to all UCITS funds (each a "UCITS" and together the "UCITS") under its management. The Policy has been designed to discourage excessive risk taking, integrating in its performance management systems risk criteria specific to the business units it covers. The policy has a governance structure aimed at preventing internal conflicts of interest.

There are defined procedures in place for the creation, update, review and approval of the Policy as well as for communication and implementation of the Policy. Senior Management, Human Resources, Compliance and other functions are all involved in this process and the Policy is approved by Senior Management and the Board of Directors of the Management Company.

Fixed remuneration is defined as base salary plus other benefits which may include pension contributions, life assurance premiums or private medical insurance premiums. Levels of fixed remuneration are set with reference to job complexity, level of responsibility, performance and market benchmarking data. These levels are reviewed on a regular basis.

Variable remuneration is defined as annual bonuses, long term awards in the form of performance share grants or sales bonus payments. Levels of variable remuneration are set with reference to overall corporate and business unit performance as well as individual performance.

The full Policy is available at the registered office of the Management Company. Quantitative information relevant to the Funds is outlined below:

Total amount of fixed remuneration paid by FTIS and its delegates during the year ended 30 September 2025*,**,***	€7,614,692
Total amount of variable remuneration paid by FTIS and its delegates during the year ended 30 September 2025*,**,***	€7,503,165
Number of staff of FTIS and in its delegates as at 30 September 2025	508
Total amount of compensation paid by FTIS and its delegates to Senior managers during the year ended 30 September 2025*,**,***	€4,401,983
Total amount paid by FTIS and its delegates to other members of staff who have a material impact on the profile of UCITS during year ended 30 September 2025*,**,***	€Nil

* The total amount of compensation paid by FTIS has been allocated to each UCITS based on their pro rata share of the average month end total net assets of FTIS for the year ended 30 September 2025.

** The total amount of compensation paid by the FTIS delegates has been allocated to each UCITS based on their pro rata share of the average month end total net assets of the FTIS delegates for the year ended 30 September 2025.

*** Delegates are Investment Management entities which are subject to regulatory requirements that are equally as effective as those under Article 69(3)(a) of the UCITS Directive.

Appendix: Securities Financing Transactions Regulation (SFTR) (unaudited)

The following tables detail the gross aggregate notional value for Reverse Repurchase Agreements as well as the absolute fair value as a proportion of each Fund's net asset value, analysed by counterparty, as at 28 February 2026:

Reverse Repurchase Agreements

FTGF Western Asset US Government Liquidity Fund

Counterparty	Country of Incorporation	Gross Aggregate Notional Value ('000) $	Absolute Fair Value ('000) $	% of Net Asset Value
Canadian Imperial Bank of Commerce	Canada	175,000	175,000	8.46%
HSBC Bank (USA)	United Kingdom	140,000	140,000	6.77%
JP Morgan Securities LLC	United States	150,000	150,000	7.26%
Royal Bank of Canada	Canada	50,000	50,000	2.42%
TD Securities (USA) LLC	Canada	111,087	111,087	5.37%
		626,087	626,087	30.28%

The following table lists the ten largest collateral issuers based on the value of non-cash collateral received and the currency of non-cash collateral received as at 28 February 2026:

Fund	Collateral Issuer*	Currency	Aggregate value of collateral held (000's)
FTGF Western Asset US Government Liquidity Fund	United States**	US Dollar	$638,753

* Where there are less than ten collateral issuers as at the financial year end, all issuers have been included.

** Underlying bonds & notes held as collateral are issued by the United States Treasury.

The following table provides an analysis of the type and quality of non-cash collateral received as at 28 February 2026:

Fund	Type of collateral	Quality of collateral	Aggregate value of collateral held (000's)
FTGF Western Asset US Government Liquidity Fund	Government Bonds and Notes	Investment Grade	$638,753

The below maturity tenor analysis has been based on the contractual maturity date of the Reverse Repurchase Agreements and the associated collateral received/(provided) as at 28 February 2026:

Fund	Type of derivative/collateral	Less than 1 day (000's)	1 day to 1 week (000's)	1 week to 1 month (000's)	1 month to 3 months (000's)	3 months to 1 year (000's)	Above 1 year (000's)	Open maturity (000's)	Total (000's)
FTGF Western Asset US Government Liquidity Fund	Reverse Repurchase Agreements	—	$626,087	—	—	—	—	—	$626,087
	Non-Cash Collateral Received	—	—	—	$30,981	$56,639	$551,133	—	$638,753

Reverse Repurchase Agreements held on FTGF Western Asset US Government Liquidity Fund are tri-party agreements. Collaterals received by the Fund, in respect of the open Reverse Repurchase Agreements as at 28 February 2026, are held with The Bank of New York Mellon, in segregated accounts in the name of the Company. Collateral received is not reused.

All costs and returns on Reverse Repurchase Agreements accrue to the Fund in full.

Appendix: Connected Persons Disclosure (unaudited)

During the financial year ended 28 February 2026, Pershing Limited, a subsidiary of The Bank of New York Mellon Corporation and a connected person of the Depositary, provided brokerage services in relation to securities trading to the Hong Kong registered Funds, enacted via the Sub-Investment Managers of the respective Funds. The total aggregate value of transactions with the connected persons of the Depositary in regard securities trading amounted to US$334 million which represents 0.09% of the total value of such transactions entered into by these Funds. Brokerage fees and commissions paid by the Funds to Pershing Limited in relation to such securities trading for the financial year ended 28 February 2026 amounted to US$62,191 with an average commission rate of 2 bps. These have been included within the transaction costs on purchases and sales of relevant securities and are disclosed in Note 4 of these Financial Statements.

During the financial year ended 28 February 2026, The Bank of New York Mellon (Institutional Bank) and The Bank of New York Mellon SA/NV, both connected persons of the Depositary, acted in custody foreign exchange transactions and in Currency Administration / Hedging programmes, respectively, for the Hong Kong registered Funds. Total commissions paid in relation to these transactions amounted to US$788,998 with an average commission rate of 0.23 bps. The total aggregate value of transactions with the connected persons of the Depositary in that regard amounted to US$34,896 million which represents 7.86% of the total value of such transactions entered into by the Funds.

All transactions with the connected persons of the Depositary were entered into the ordinary course of business and on normal commercial terms.

Appendix: Sustainability Finance Disclosure Regulation (unaudited)

The Sustainable Finance Disclosure Regulation ((EU) 2019/2088), (the "SFDR") requires the Company to include a description in its periodic reports of the extent to which any Fund classified pursuant to Article 8 of the SFDR (an "Article 8 Fund") or Article 9 of the SFDR (an "Article 9 Fund") has met its environmental or social characteristics. The SFDR also empowered the European Banking Authority, the European Insurance and Occupational Pensions Authority and the European Securities and Markets Authority (collectively "ESAs") to develop draft regulatory technical standards ("RTS") to specify the information and presentation format in the periodic reports.

The following Appendix includes each SFDR Article 8 and Article 9 Fund's periodic disclosure, which have been prepared using the common set of sustainability disclosures or reporting requirements of the RTS which came into effect on 1 January 2023. The asset classifications in the following disclosures are based upon MSCI and may differ to the classification of the securities in the Portfolios of Investments.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 4.95% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and/or social characteristics:

- alignment with one or more UN Sustainable Development Goals ("SDGs") through investment in green, social, sustainable and sustainability-linked bonds and through best-in-class investments;

- alignment with the following PAI indicators:

· GHG Intensity (PAI #3 and PAI #15);

· Social and Employee Matters (PAI #10); and

· Controversial Weapons (PAI #14).

Derivative instruments have not been used to attain the environmental and/or social characteristics promoted by the Fund.

No index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund were:

- The PAI indicators mentioned in the answer above. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators during the reference period.

- the allocation to green, social, sustainable and sustainability-linked bonds was at 4.47% % as of 28 February 2026.

		PAI historical comparison							
		2026		2025		2024		2023	
PAI indicators	Unit of measurement	Value	Coverage	Value	Coverage	Value	Coverage	Value	Coverage
GHG Intensity USD	tCO2e/M$ revenue	134.44	97.50%	121.92	96.00%	109.18	64.62%	121.00	95.90%
GHG Intensity of investee countries USD	tCO2e/M$ revenue	175.99	100.00%	188.33	100.00%	203.33	100.00%	235.40	100.00%
Violations of UNGC principles and OECD Guidelines	Percentage of Fund invested	0.00%	98.50%	0.00%	19.72%	0.00%	65.42%	0.00%	95.00%
Exposure to controversial weapons	Percentage of Fund invested	0.00%	98.50%	0.00%	69.22%	0.00%	65.42%	0.00%	95.00%

… And compared to previous periods?

The general sustainability indicators are in line with those in the previous period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments were in green, social, sustainable and sustainability-linked bonds which were achieved through a minimum allocation of 20% to issuers aligned with one or several of the UN SDGs and issuers that met best-in-class thresholds set by the Investment Manager. Such bonds had sustainability-linked KPIs, or had proceeds which were used for projects which included, but were not limited to:

· Green Projects: renewable energy, energy efficiency, pollution prevention and control, environmentally sustainable management of living natural resources and land use, biodiversity, clean transportation, sustainable water and wastewater management, climate change adaptation, circular economy and green buildings; and

· Social Projects: affordable housing, affordable infrastructure (clean drinking water, sanitation), employment programmes and socio-economic advancement such as, but not restricted to, education, diversity, equality and inclusion to name a few.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used proprietary research and PAIs to ensure that sustainable investments did not cause significant harm to any material environmental and/or social sustainable investment objective. Proprietary research, along with the use of inhouse developed tools, including but not limited to negative screening , enabled portfolio managers to identify issuers that the Investment Manager does not believe cause significant harm.

As a result, the Investment Manager was able to invest in issuers which aligned with the PAI indicators while avoiding issuers which did not. As part of the Fund's investment in green, social, sustainable and sustainability-linked bonds, the Investment Manager applied this approach to determine whether a bond met sustainability criteria.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

When deploying funds to sustainable investments, especially the minimum 1% of the Fund committed towards environmental objectives, where relevant, the Investment Manager utilised additional qualitative assessment (based on internal research or on external third-party opinion) of the issuers and of the projects "do no significant harm" eligibility.

Further, a number of exclusions were applied to the Fund to preclude issuers that may cause significant harm, as detailed further below.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager developed a proprietary PAI tool which took into account material PAIs and which helped measure the Fund's alignment with respect to PAI indicators that were deemed to be material to the Fund.

PAIs served as a useful barometer to gauge which issuers to seek to invest in. More specifically, PAI #3 was utilised for assessment of corporate GHG intensity and PAI #15 for sovereign GHG intensity respectively; PAI #10 was utilised to identify issuers that fail as per UNGC Principles and OECD Guidelines; and PAI #14 was utilised to identify issuers that fail controversial weapons screens across the whole Fund compared to those in the investable universe.

While the Fund did not commit to having a PAI average better than its Benchmark, the difference between the two metrics helped to inform how successful the Fund was at managing adverse impacts.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund adhered to explicit guidelines which excluded issuers that failed as per UNGC Principles and OECD Guidelines. The Investment Manager's engagement with issuers was built on the principles of UNGC Principles and OECD Guidelines. Issuers that were deemed to fail as per UNGC Principles and OECD Guidelines were added to the Investment Manager's ESG Red List which was then utilised to exclude issuers from being an eligible investment in the Fund. Where relevant and where it had concerns, the Investment Manager sought to engage with issuers which may or may not have explicitly failed as per the underlying guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The manner in which PAIs were considered and taken into account is set out in further detail above.

PAI metrics provided are based on the average calculation of quarterly snapshots during the reference period. The relevant metric calculation relates to the investments for which the underlying ESG data is available rather than all investments held by the Fund. Please note that this information is subject to change and should be used for informational purposes only.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

Largest investments	Sector	% of Assets	Country
Fannie Mae Pool	Financials	11.74%	United States

What was the proportion of sustainability-related investments?

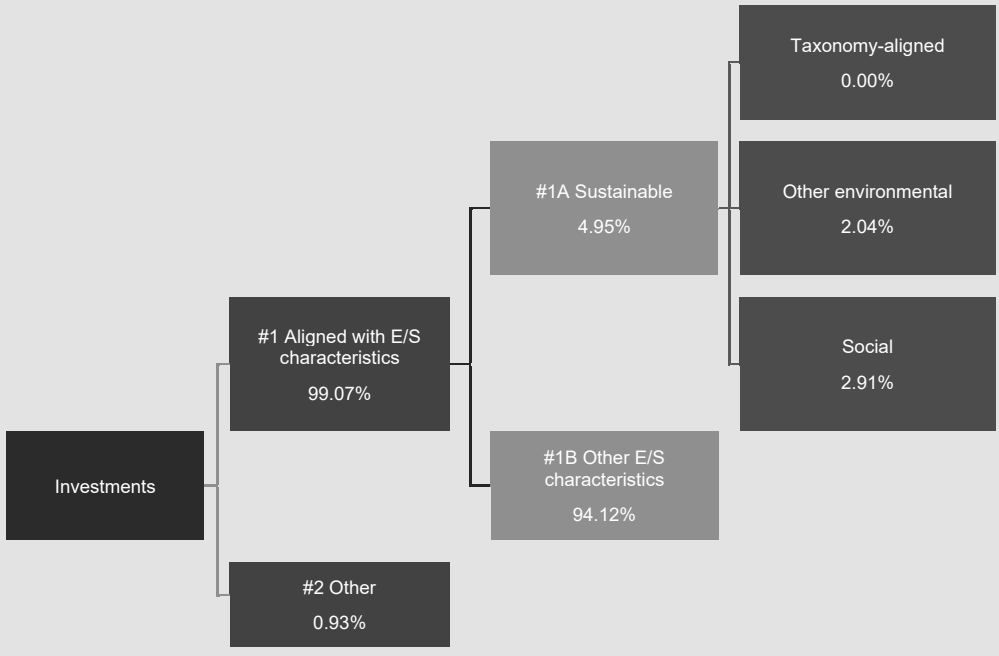
The proportion of sustainability-related investments was 4.95%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.07% of the Fund was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (0.93%) was not aligned with the promoted characteristics and consisted primarily of liquid assets or issuers for which no ESG rating was available.

Out of the Fund's segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 4.95% of its assets in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison

Software	0.68%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

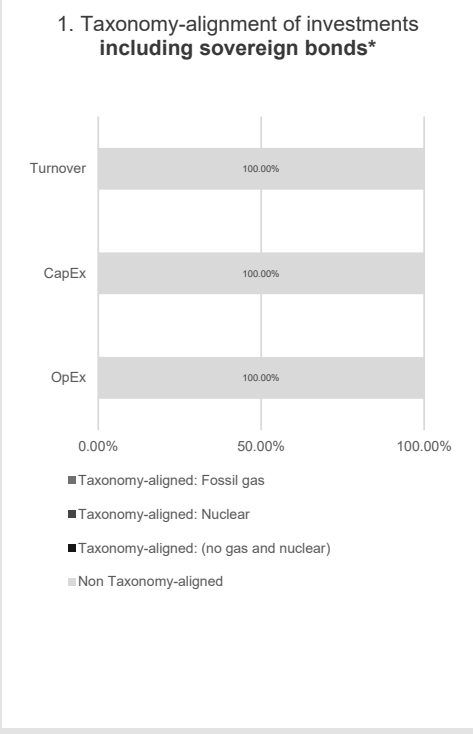
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

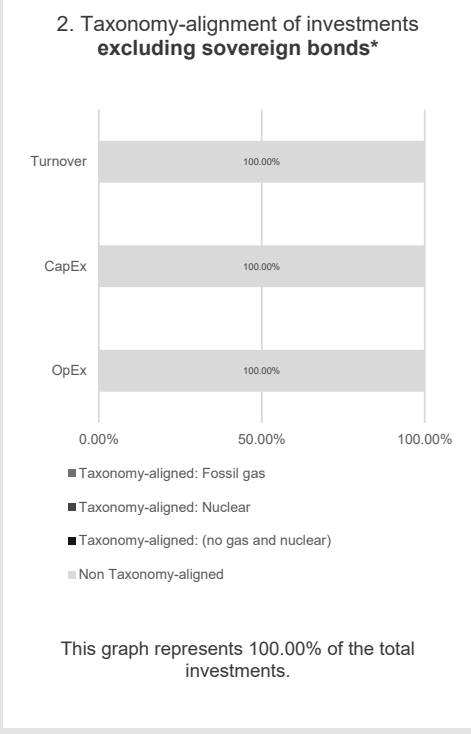
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

In line with its investment strategy, namely, the Fund's commitment to maintain a minimum exposure to 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy Regulation, 2.04% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 0.93% and included cash and derivatives or other issuers for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Western Asset believes that financially material ESG factors can affect the creditworthiness of fixed-income issuers’ securities and therefore impact the performance of fixed-income investment portfolios. These factors are wholly consistent with the Firm's long-term, fundamental value-oriented investment philosophy. Western Asset’s research analysts were responsible for providing fundamental analysis at the industry and issuer levels and for opining on industry and issuer risk/reward characteristics by incorporating financially material ESG considerations. Supported by this broader approach, the Fund aimed to meet its environmental and social characteristics by seeking to invest in issuers such that the overall portfolio met minimum ESG ratings, achieved its decarbonisation and SDG alignment, as well as avoided issuers which were identified through application of SRI exclusions, allocated to sectors and invested in issuers targeting.

In order to meet the environmental and/or social characteristics during the reference period:

A. The Fund sought an average MSCI ESG rating of BBB or better.

B. The Fund sought an overall Weighted Average Carbon Intensity ("WACI") that was at least 20% below the Benchmark. This helped the Fund align with PAI #3 and PAI #15 (GHG Intensity).

C. The Fund sought to align at least 20% of its Net Asset Value in securities of issuers whose activities contributed to at least 1 of 8 selected United Nations Sustainable Development Goals ("UNSDGs").

D. The Fund excluded issuers that failed on a range of SRI goals such as outlined below:

a. Issuers deriving over 5% of revenue from tobacco production and/or distribution and from the production of nuclear weapons;

b. Issuers deriving over 10% of revenue from civilian firearms (manufacture or supply), conventional weapons or thermal coal mining (production or distribution);

c. Issuers that manufacture controversial weapons (anti-personnel landmines, biochemical weapons, blinding laser weapons, depleted uranium, incendiary weapons, and non-detectable fragments), own a controversial weapons company, or are owned by a controversial weapons company, aligning with PAI indicator #14 (Controversial Weapons);

d. Issuers that ‘Fail’ UNGC and OECD principles based on internal research which seeks to identify gaps in issuers meeting their goals, aligning with PAI indicator #10 (Social and Employee Matters).

As part of the minimum 1% investment in sustainable investments (defined to be green, social, sustainable and sustainability-linked bonds), the Fund had 4.47% invested by market value % as of 28 February 2026.

The Fund met its environmental and/or sustainable guidelines as highlighted below:

A. The Fund was rated A as per MSCI ESG.

B. The Fund's overall WACI was 72.6% of the Benchmark.

C. The Fund's allocation to issuers and issues aligned with SDGs was 30.3%

D. The Fund had 4,47 % invested in sustainable investments by market value % as of 28 February 2026.

E. The Fund did not hold any issuers that were in breach of SRI guidelines.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF Western Asset US Core Plus Bond Fund (the "Fund")

Legal Entity Identifier: 472PNIHDHJOEBNUD0P21

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 7.05% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and/or social characteristics:

- alignment with one or more UN Sustainable Development Goals ("SDGs") through investment in green, social, sustainable and sustainability-linked bonds and through best-in-class investments;

- alignment with the following PAI indicators:

  - GHG Intensity (PAI #3 and PAI #15);
  - Social and Employee Matters (PAI #10); and
  - Controversial Weapons (PAI #14).

Derivative instruments have not been used to attain the environmental and/or social characteristics promoted by the Fund.

No index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund were:

- The PAI indicators mentioned in the answer above. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators during the reference period.

- the allocation to green, social, sustainable and sustainability-linked bonds was at 4.99% as of 28 February 2026.

		PAI historical comparison							
		2026		2025		2024		2023

Exposure to controversial weapons	Percentage of Fund invested	0.00%	96.75%	0.00%	62.90%	0.00%	72.52%	0.00%	92.00%

… And compared to previous periods?

The general sustainability indicators are in line with those in the previous period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments were in green, social, sustainable and sustainability-linked bonds which were achieved through a minimum allocation of 20% to issuers aligned with the SDGs and issuers that met best-in-class thresholds set by the Investment Manager. Such bonds had sustainability-linked KPIs, or had proceeds which were used for projects which included, but were not limited to:

· Green Projects: renewable energy, energy efficiency, pollution prevention and control, environmentally sustainable management of living natural resources and land use, biodiversity, clean transportation, sustainable water and wastewater management, climate change adaptation, circular economy and green buildings; and

· Social Projects: affordable housing, affordable infrastructure (clean drinking water, sanitation), employment programmes and socio-economic advancement such as, but not restricted to, education, diversity, equality and inclusion to name a few.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used proprietary research and PAIs to ensure that sustainable investments did not cause significant harm to any material environmental and/or social sustainable investment objective. Proprietary research, along with the use of inhouse developed tools, including but not limited to screening, enabled portfolio managers to identify issuers that the Investment Manager does not believe cause significant harm.

As a result, the Investment Manager was able to invest in issuers which aligned with the PAI indicators while avoiding issuers which do not. As part of the Fund's investment in green, social, sustainable and sustainability-linked bonds, the Investment Manager applies this approach to determine whether a bond met sustainability criteria.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

When deploying funds to sustainable investments, especially the minimum 1% of the Fund committed towards environmental objectives, where relevant, the Investment Manager utilised additional qualitative assessment (based on internal research or on external third-party opinion) of the issuers and of the projects "do no significant harm" eligibility.

Further, a number of exclusions were applied to the Fund to preclude issuers that may cause significant harm, as detailed further below.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager developed a proprietary PAI tool which took into account material PAIs and which helped measure the Fund's alignment with respect to PAI indicators that were deemed to be material to the Fund.

PAIs served as a useful barometer to gauge which issuers to seek to invest in. More specifically, PAI #3 was utilised for assessment of corporate GHG intensity and PAI #15 for sovereign GHG intensity respectively; PAI #10 was utilised to identify issuers that fail as per UNGC Principles and OECD Guidelines; and PAI #14 was utilised to identify issuers that fail controversial weapons screens across the whole Fund compared to those in the investable universe.

While the Fund did not commit to having a PAI average better than its benchmark, the difference between the two metrics helped to inform how successful the Fund was at managing adverse impacts.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund adhered to explicit guidelines which excluded issuers that failed as per UNGC Principles and OECD Guidelines. The Investment Manager's engagement with issuers was built on the principles of UNGC Principles and OECD Guidelines. Issuers that were deemed to fail as per UNGC Principles and OECD Guidelines were added to the Investment Manager's ESG Red List which was then utilised to exclude issuers from being an eligible investment in the Fund. Where relevant, the Investment Manager sought to engage with issuers where it had concerns, which may or may not have explicitly failed as per the underlying guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The manner in which PAIs were considered and taken into account is set out in further detail above.

PAI metrics provided are based on the average calculation of quarterly snapshots during the reference period. The relevant metric calculation relates to the investments for which the underlying ESG data is available rather than all investments held by the Fund. Please note that this information is subject to change and should be used for informational purposes only.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

Largest investments	Sector	% of Assets	Country

What was the proportion of sustainability-related investments?

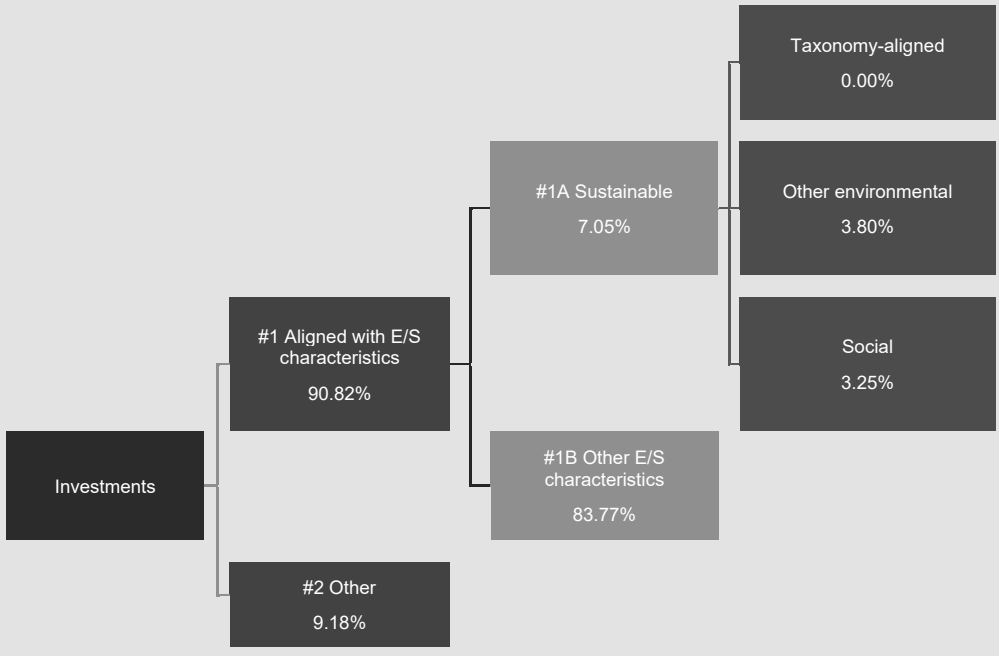
The proportion of sustainability-related investments was 7.05%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

90.82% of the Fund was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (9.18%) was not aligned with the promoted characteristics and consisted primarily of liquid assets or issuers for which there was no ESG Rating.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 7.05% of its assets in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

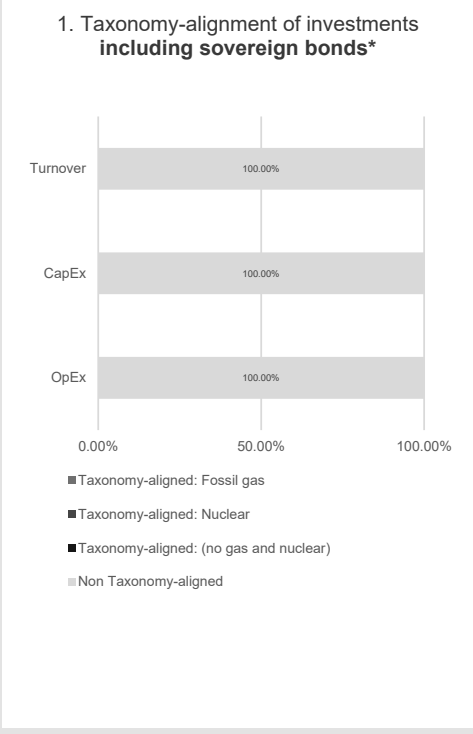
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

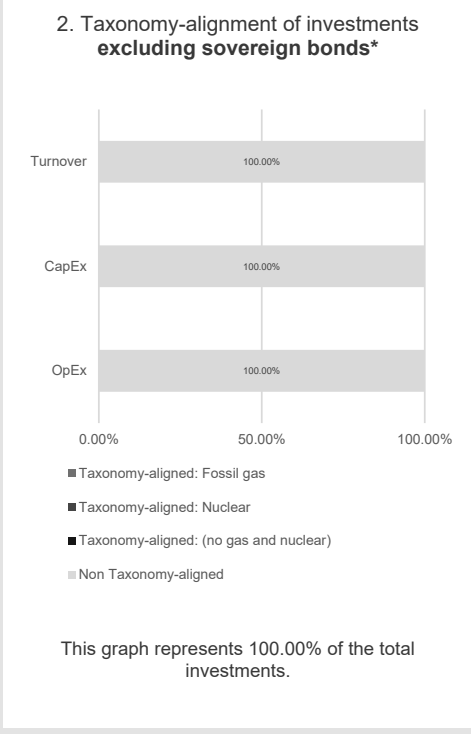
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

In line with its investment strategy, namely, the Fund's commitment to maintain a minimum exposure to 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy Regulation, 3.80% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 9.18% and included cash and derivatives or issuers for which there were no ESG Ratings for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Western Asset believes that financially material ESG factors can affect the creditworthiness of fixed-income issuers' securities and therefore impact the performance of fixed-income investment portfolios. These factors are wholly consistent with the Firm's long-term, fundamental value-oriented investment philosophy. Western Asset's research analysts were responsible for providing fundamental analysis at the industry and issuer levels and for opining on industry and issuer risk/reward characteristics by incorporating material ESG considerations. Supported by this broader approach, the Fund aimed to meet its environmental and social characteristics by seeking to invest in issuers such that the overall portfolio met minimum ESG ratings, achieved its decarbonisation and SDG alignment, as well as avoided issuers which were identified through application of SRI exclusions, allocated to sectors and invested in issuers targeting.

In order to meet the environmental and/or social characteristics during the reference period:

A. The Fund sought an average MSCI ESG rating of BBB or better.

B. The Fund sought an overall Weighted Average Carbon Intensity ("WACI") that was at least 20% below the Benchmark. This helped the Fund align with PAI #3 and PAI #15 (GHG Intensity).

C. The Fund sought to invest at least 20% of its Net Asset Value in securities of issuers whose activities contributed to at least 1 of 8 selected United Nations Sustainable Development Goals ("UNSDGs").

D. The Fund excluded issuers that failed on a range of SRI goals such as outlined below:

a. Issuers deriving over 5% of revenue from tobacco production and/or distribution and from the production of nuclear weapons;

b. Issuers deriving over 10% of revenue from civilian firearms (manufacture or supply), conventional weapons or thermal coal mining (production or distribution);

c. Issuers that manufacture controversial weapons (anti-personnel landmines, biochemical weapons, blinding laser weapons, depleted uranium, incendiary weapons, and non-detectable fragments), own a controversial weapons company, or are owned by a controversial weapons company, aligning with PAI indicator #14 (Controversial Weapons);

d. Issuers that 'Fail' UNGC and OECD principles based on internal research which seeks to identify gaps in issuers meeting their goals, aligning with PAI indicator #10 (Social and Employee Matter).

As part of the minimum 1% investment in sustainable investments (defined to be green, social, sustainable and sustainability-linked bonds), the Fund had 4.99% invested by market value % as of 28 February 2026.

The Fund met its environmental and/or sustainable guidelines as highlighted below:

A. The Fund was rated A as per MSCI ESG.

B. The Fund's overall WACI was 76.2% of the Benchmark.

C. The Fund's allocation to issuers and issues aligned with SDGs was 32.5%.

D. The Fund had 4.99 % invested in sustainable investments by market value % as of 28 February 2026.

E. The Fund did not hold any issuers that were in breach of SRI guidelines.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF Western Asset Global Multi Strategy Fund (the "Fund")

Legal Entity Identifier: 5493004ZO0T2R3JB1A61

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 10.01% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and/or social characteristics:

- alignment with one or more UN Sustainable Development Goals ("SDGs) through investment in green, social, sustainable and sustainability-linked bonds and through best-in-class investments;

- alignment with the following PAI indicators:

· GHG Intensity (PAI #3 and PAI #15);

· Social and Employee Matters (PAI #10); and

· Controversial Weapons (PAI #14).

Derivative instruments have not been used to attain the environmental and/or social characteristics promoted by the Fund.

No index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund were:

- The PAI indicators mentioned in the answer above. Please refer to the values below which represent the performance of the indicators during the reference period.

- the allocation to green, social, sustainable and sustainability-linked bonds was at 7.31% as of 28 February 2026.

		PAI historical comparison							
		2026		2025		2024		2023

Violations of UNGC principles and OECD Guidelines	Percentage of Fund invested	0.00%	92.00%	0.00%	49.53%	0.00%	50.04%	0.00%	83.00%
Exposure to controversial weapons	Percentage of Fund invested	0.00%	93.00%	0.00%	43.31%	0.00%	50.04%	0.00%	83.00%

… And compared to previous periods?

The general sustainability indicators are in line with those in the previous period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments were in green, social, sustainable and sustainability-linked bonds which were achieved through a minimum 20% allocation to issuers aligned with the SDGs and issuers that met best-in-class thresholds set by the Investment Manager. Such bonds had sustainability-linked KPIs, or had proceeds which were used for projects which included, but were not limited to:

· Green Projects: renewable energy, energy efficiency, pollution prevention and control, environmentally sustainable management of living natural resources and land use, biodiversity, clean transportation, sustainable water and wastewater management, climate change adaptation, circular economy and green buildings; and

· Social Projects: affordable housing, affordable infrastructure (clean drinking water, sanitation), employment programmes and socio-economic advancement such as, but not restricted to, education, diversity, equality and inclusion to name a few.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used proprietary research and PAIs to ensure that sustainable investments did not cause significant harm to any environmental or social sustainable investment objective. Proprietary research, along with the use of inhouse developed tools, including but not limited to screening, enabled portfolio managers to identify issuers that the Investment Manager does not believe cause significant harm.

As a result, the Investment Manager was able to invest in issuers which aligned with the PAI indicators while avoiding issuers which did not. As part of the Fund's investment in green, social, sustainable and sustainability-linked bonds, the Investment Manager applied this approach to determine whether a bond met sustainability criteria.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

When deploying funds to sustainable investments, especially the minimum 1% of portfolio of the Fund committed towards environmental objectives, where relevant, the Investment Manager utilised additional qualitative assessment (based on internal research or on external third-party opinion) of the issuers and of the projects "do no significant harm" eligibility.

Further, a number of exclusions were applied to the Fund to preclude issuers that may cause significant harm, as detailed further below.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager developed a proprietary PAI tool which took into account material PAIs and which helped measure the Fund's alignment with respect to PAI indicators that were deemed to be material to the Fund.

PAIs served as a useful barometer to gauge which issuers to seek to invest in. More specifically, PAI #3 was utilised for assessment of corporate GHG intensity and PAI #15 for sovereign GHG intensity respectively; PAI #10 was utilised to identify issuers that fail as per UNGC Principles and OECD Guidelines; and PAI #14 was utilised to identify issuers that fail controversial weapons screens across the whole Fund compared to those in the investable universe.

While the Fund did not commit to having a PAI average better than its Benchmark, the difference between the two metrics helped to inform how successful the Fund was at managing adverse impacts.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund adhered to explicit guidelines which excluded issuers that failed as per UNGC Principles and OECD Guidelines. The Investment Manager's engagement with issuers was built on the principles of UNGC Principles and OECD Guidelines. Issuers that were deemed to fail as per UNGC Principles and OECD Guidelines were added to the Investment Manager's ESG Red List which was then utilised to exclude issuers from being an eligible investment in the Fund. Where relevant, the Investment Manager sought to engage with issuers where it had concerns, which may or may not have explicitly failed as per the underlying guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The manner in which PAIs were considered and taken into account is set out in further detail above.

PAI metrics provided above are based on the average calculation of quarterly snapshots during the reference period. The relevant metric calculation relates to the investments for which the underlying ESG data is available rather than all investments held by the Fund. Please note that this information is subject to change and should be used for informational purposes only.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

What was the proportion of sustainability-related investments?

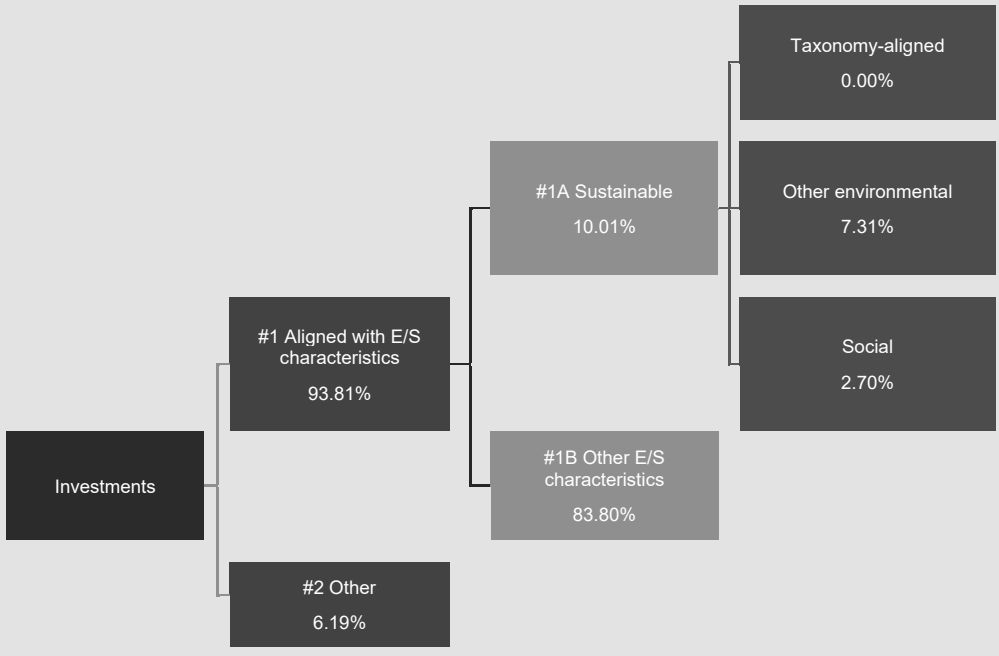
The proportion of sustainability-related investments was 10.01%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

93.81% of the Fund was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (6.19%) was not aligned with the promoted characteristics and consisted primarily of liquid assets or issuers without an ESG rating.

Out of the Fund's segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 10.01% of its assets in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

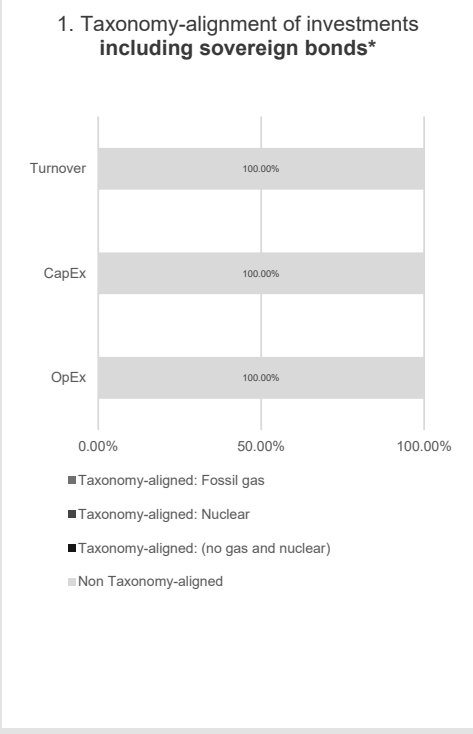
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

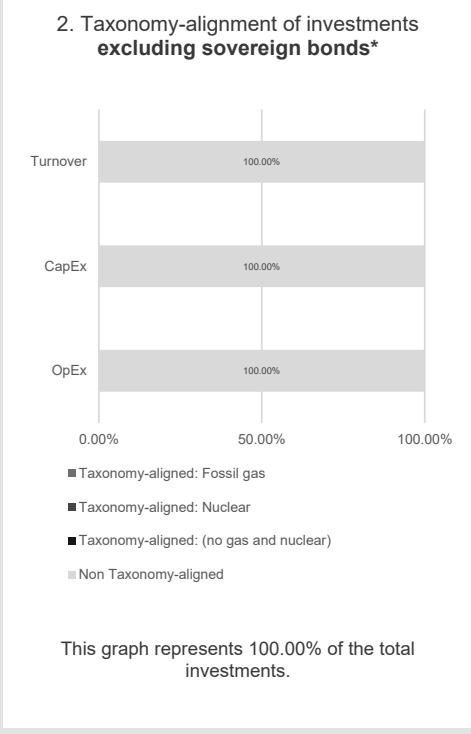
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

In line with its investment strategy, namely, the Fund's commitment to maintain a minimum exposure to 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy Regulation, 7.31% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 6.19% and included cash and derivatives or issuers without an ESG rating for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Western Asset believes that financially material ESG factors can affect the creditworthiness of fixed-income issuers' securities and therefore impact the performance of fixed-income investment portfolios. These factors are wholly consistent with the Firm's long-term, fundamental value-oriented investment philosophy. Western Asset's research analysts were responsible for providing fundamental analysis at the industry and issuer levels and for opining on industry and issuer risk/reward characteristics by incorporating material ESG considerations. Supported by this broader approach, the Fund aimed to meet its environmental and social characteristics by seeking to invest in issuers such that the overall portfolio met minimum ESG ratings, achieved its decarbonisation and SDG alignment, as well as avoided issuers which were identified through application of SRI exclusions, allocated to sectors and invested in issuers targeting.

In order to meet the environmental and/or social characteristics during the reference period:

A. The Fund sought an average MSCI ESG rating of BBB or better.

B. The Fund sought an overall Weighted Average Carbon Intensity ("WACI") that is at least 20% below the proxy Benchmark. This helped the Fund align with PAI #3 and PAI #15 (GHG Intensity).

C. The Fund sought to invest a minimum of 20% in investments in securities of issuers whose activities contribute to at least 1 of 8 selected SDGs.

D. The Fund excluded issuers that failed on a range of SRI goals such as outlined below:

a. Issuers deriving over 5% of revenue from tobacco production and/or distribution and from the production of nuclear weapons;

b. Issuers deriving over 10% of revenue from civilian firearms (manufacture or supply), conventional weapons or thermal coal mining (production or distribution);

c. Issuers that manufacture controversial weapons (anti-personnel landmines, biochemical weapons, blinding laser weapons, depleted uranium, incendiary weapons, and non-detectable fragments), own a controversial weapons company, or are owned by a controversial weapons company, aligning with PAI indicator #14 (Controversial Weapons);

d. Issuers that 'Fail' UNGC and OECD principles based on internal research which seeks to identify gaps in issuers meeting their goals, aligning with PAI indicator #10 (Social and Employee Matters).

As part of the minimum 1% investment in sustainable investments (defined to be green, social, sustainable and sustainability-linked bonds), the Fund had 7.31% invested by Market Value % as of 28 February 2026.

The Fund met its environmental and/or sustainable guidelines as highlighted below:

A. The Fund was rated A as per MSCI ESG.

B. The Fund's overall WACI was 79.2% of the Benchmark.

C. The Fund's allocation to issuers and issues aligned with SDGs was 35.6% by Market Value %.

D. The Fund did not hold any issuers that were in breach of SRI guidelines.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF Western Asset US High Yield Fund (the "Fund")

Legal Entity Identifier: 5493005YY2WWVLYH2080

FRANKLIN TEMPLETON

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 4.37% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and/or social characteristics:

- alignment with one or more UN Sustainable Development Goals ("SDGs") through investment in green, social, sustainable and sustainability-linked bonds and through best-in-class investments;

- alignment with the following PAI indicators:

· GHG Intensity (PAI #3 and PAI #15);

· Social and Employee Matters (PAI #10);

· Controversial Weapons (PAI #14); and

· Investee Countries subject to Social Violations (PAI #16).

Derivative instruments have not been used to attain the environmental and/or social characteristics promoted by the Fund.

No index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund were:

- The PAI indicators mentioned in the answer above. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators during the reference period. PAI #16 did not have materiality, given that during the reporting year, the Fund did not invest in any Sovereigns.

- The allocation to green, social, sustainable and sustainability-linked bonds was at 2.74% as of 28 February 2026.

		PAI historical comparison							
		2026		2025		2024		2023

… And compared to previous periods?

The general sustainability indicators are in line with those in the previous period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments were in green, social, sustainable and sustainability-linked bonds which were achieved through a minimum allocation of 20% by MV% to issuers aligned with the SDGs and issuers that met best-in-class thresholds set by the Investment Manager. Such bonds had sustainability-linked KPIs, or had proceeds which were used for projects which included, but were not limited to:

· Green Projects: renewable energy, energy efficiency, pollution prevention and control, environmentally sustainable management of living natural resources and land use, biodiversity, clean transportation, sustainable water and wastewater management, climate change adaptation, circular economy and green buildings; and

· Social Projects: affordable housing, affordable infrastructure (clean drinking water, sanitation), employment programmes and socio-economic advancement such as, but not restricted to, education, diversity, equality and inclusion to name a few.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used proprietary research and PAIs to ensure that sustainable investments did not cause significant harm to any environmental or social sustainable investment objective. Proprietary research, along with the use of inhouse developed tools, including but not limited to screening, enabled portfolio managers to identify issuers that the Investment Manager does not believe cause significant harm.

As a result, the Investment Manager was able to invest in issuers which aligned with the PAI indicators while avoiding issuers which did not. As part of the Fund's investment in green, social, sustainable and sustainability-linked bonds, the Investment Manager applied this approach to determine whether a bond met sustainability criteria.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

When deploying funds to sustainable investments, especially the minimum 1% of portfolio of the Fund committed towards environmental objectives, where relevant the Investment Manager utilised additional qualitative assessment (based on internal research or on external third-party opinion) of the issuers and of the projects "do no significant harm" eligibility.

Further, a number of exclusions were applied to the Fund to preclude issuers that may cause significant harm, as detailed further below.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager developed a proprietary PAI tool which took into account material PAIs and which helped measure the Fund's alignment with respect to PAI indicators that were deemed to be material to the Fund.

PAIs served as a useful barometer to gauge which issuers to seek to invest in. More specifically, PAI #3 was utilised for assessment of corporate GHG intensity and PAI #15 for sovereign GHG intensity, respectively; PAI #10 was utilised to identify issuers that failed as per UNGC Principles and OECD Guidelines; PAI #14 was utilised to identify issuers that failed controversial weapons screens across the whole Fund compared to those in the investable universe; and PAI #16 was utilised to identify investee countries that failed at being designated as free by the Freedom House.

While the Fund did not commit to having a PAI average better than its benchmark, the difference between the two metrics helped to inform how successful the Fund was in managing adverse impacts.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund adhered to explicit guidelines which excluded issuers that failed as per UNGC Principles and OECD Guidelines. The Investment Manager's engagement with issuers was built on the principles of UNGC Principles and OECD Guidelines. Issuers that were deemed to fail as per UNGC Principles and OECD Guidelines were added to the Investment Manager's ESG Red List which was then utilised to exclude issuers from being an eligible investment in the Fund. Where relevant, the Investment Manager sought to engage with issuers where it had concerns, which may or may not have explicitly failed as per the underlying guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The manner in which PAIs were considered and taken into account is set out in further detail above.

PAI metrics provided are based on the average calculation of quarterly snapshots during the reference period. The relevant metric calculation relates to the investments for which the underlying ESG data is available rather than all investments held by the Fund. Please note that this information is subject to change and should be used for informational purposes only.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

Largest investments	Sector	% of Assets	Country

What was the proportion of sustainability-related investments?

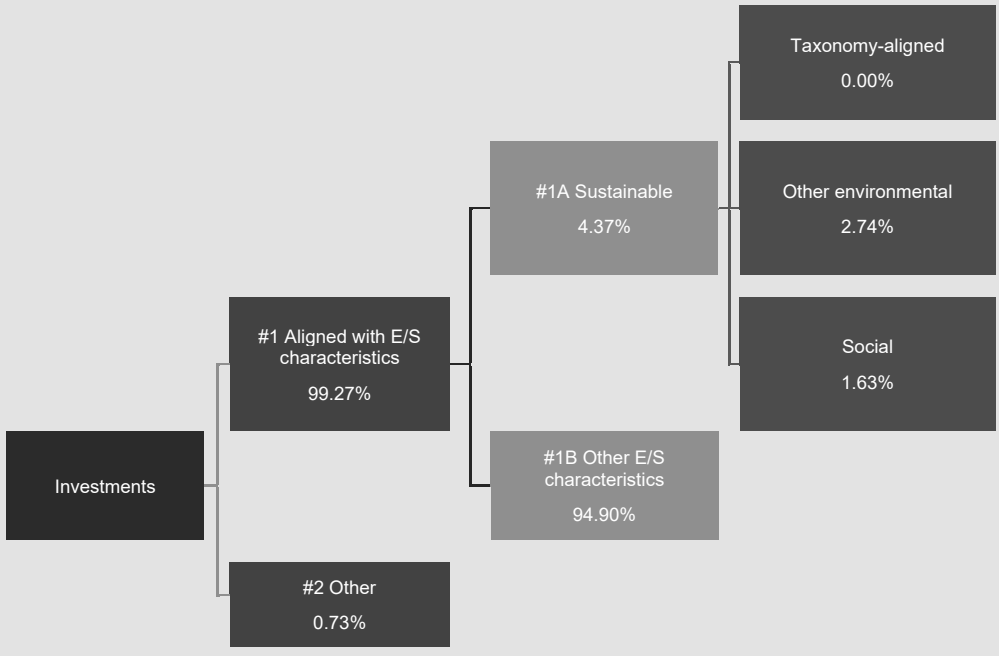
The proportion of sustainability-related investments was 4.37%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.27% of the Fund was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (0.73%) was not aligned with the promoted characteristics and consisted primarily of liquid assets or issuers for which there was no ESG rating.

Out of the Fund's segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 4.37% of its assets in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

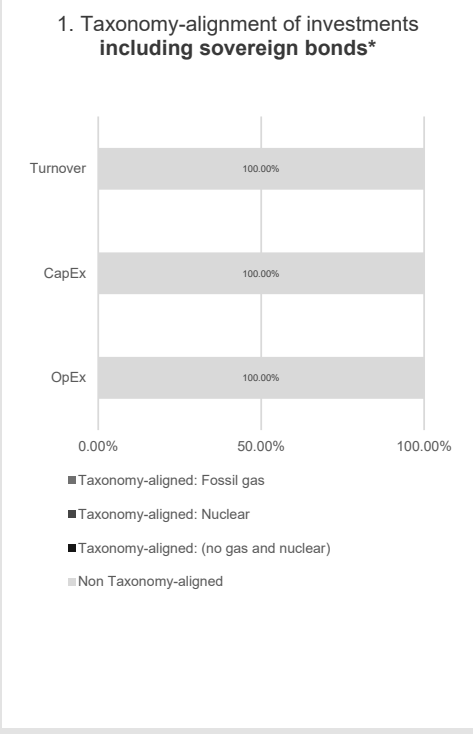
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

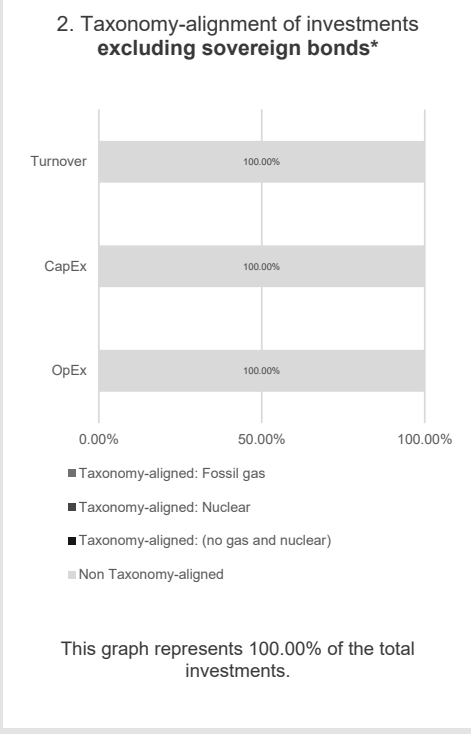
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

In line with its investment strategy, namely, the Fund's commitment to maintain a minimum exposure to 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy Regulation, 2.74% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 0.73% and included cash and derivatives or other issuers for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Western Asset believes that financially material ESG factors can affect the creditworthiness of fixed-income issuers' securities and therefore impact the performance of fixed-income investment portfolios. These factors are wholly consistent with the Firm's long-term, fundamental value-oriented investment philosophy. Western Asset's research analysts were responsible for providing fundamental analysis at the industry and issuer levels and for opining on industry and issuer risk/reward characteristics by incorporating material ESG considerations. Supported by this broader approach, the Fund aimed to meet its environmental and social characteristics by seeking to invest in issuers such that the overall portfolio met minimum ESG ratings, achieved its decarbonisation and SDG alignment, as well as avoided issuers which were identified through application of SRI exclusions, allocated to sectors and invested in issuers targeting.

In order to meet the environmental and/or social characteristics during the reference period:

A. The Fund sought an overall Weighted Average Carbon Intensity ("WACI") that was at least 20% below the Benchmark. This helped the Fund align with PAI #3 and PAI #15 (GHG Intensity).

B. The Fund sought to align, better than the Benchmark, with regards to investments in securities of issuers whose activities contributed to at least 1 of 8 selected SDGs.

C. The Fund excluded issuers that failed on a range of SRI goals such as outlined below:

a. Issuers deriving over 5% of revenue from tobacco production and/or distribution and from the production of nuclear weapons;

b. Issuers deriving over 10% of revenue from civilian firearms (manufacture or supply), conventional weapons or thermal coal mining (production or distribution);

c. Issuers that manufacture controversial weapons (anti-personnel landmines, biochemical weapons, blinding laser weapons, depleted uranium, incendiary weapons, and non-detectable fragments), own a controversial weapons company, or are owned by a controversial weapons company, aligning with PAI indicator #14 (Controversial Weapons);

d. Issuers that 'Fail' UNGC and OECD principles based on internal research which seeks to identify gaps in issuers meeting their goals, aligning with PAI indicator #10 (Social and Employee Matters);

e. State and/or sovereign issuers that fail to be designated as "free" by the Freedom House Index, aligning with PAI indicator #16 (Investee Countries subject to Social Violations).

As part of the minimum 1% investment in sustainable investments (defined to be green, social, sustainable and sustainability-linked bonds), the Fund had 2.74% invested by Market Value % as of 28 February 2026.

The Fund met its environmental and/or sustainable guidelines as highlighted below:

A. The Fund's overall WACI was 75.9% of the Benchmark.

B. The Fund's allocation to issuers and issues aligned with SDGs was 28.9% by Market Value%. C. The Fund did not invest in any issuer that was in breach of SRI guidelines.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF Western Asset Global High Yield Fund (the "Fund")

FRANKLIN TEMPLETON

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 7.93% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and/or social characteristics:

- alignment with one or more UN Sustainable Development Goals ("SDGs") through investment in green, social, sustainable and sustainability-linked bonds and through best-in-class investments;

- alignment with the following PAI indicators:

· GHG Intensity (PAI #3 and PAI #15);

· Social and Employee Matters (PAI #10); and

· Controversial Weapons (PAI #14).

Derivative instruments have not been used to attain the environmental and/or social characteristics promoted by the Fund.

No index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund were:

- The PAI indicators mentioned in the answer above. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators during the reference period.

- The allocation to green, social, sustainable and sustainability-linked bonds was at 4.79% as of 28 February 2026.

… And compared to previous periods?

The general sustainability indicators are in line with those in the previous period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments were in green, social, sustainable and sustainability-linked bonds which were achieved through a minimum allocation to issuers aligned with the SDGs and issuers that met best-in-class thresholds set by the Investment Manager. Such bonds had sustainability-linked KPIs, or had proceeds which were used for projects which included, but were not limited to:

· Green Projects: renewable energy, energy efficiency, pollution prevention and control, environmentally sustainable management of living natural resources and land use, biodiversity, clean transportation, sustainable water and wastewater management, climate change adaptation, circular economy and green buildings; and

· Social Projects: affordable housing, affordable infrastructure (clean drinking water, sanitation), employment programmes and socio-economic advancement such as, but not restricted to, education, diversity, equality and inclusion to name a few.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used proprietary research and PAIs to ensure that sustainable investments did not cause significant harm to any environmental or social sustainable investment objective. Proprietary research, along with the use of inhouse developed tools, including but not limited to screening, enabled portfolio managers to identify issuers that the Investment Manager does not believe cause significant harm.

As a result, the Investment Manager was able to invest in issuers which aligned with the PAI indicators while avoiding issuers which did not. As part of the Fund's investment in green, social, sustainable and sustainability-linked bonds, the Investment Manager applied this approach to determine whether a bond met sustainability criteria.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

When deploying funds to sustainable investments, especially the minimum 1% of portfolio of the Fund committed towards environmental objectives, where relevant the Investment Manager utilised additional qualitative assessment (based on internal research or on external third-party opinion) of the issuers and of the projects "do no significant harm" eligibility.

Further, a number of exclusions were applied to the Fund to preclude issuers that may cause significant harm, as detailed further below.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager developed a proprietary PAI tool which took into account material PAIs and which helped measure the Fund's alignment with respect to PAI indicators that were deemed to be material to the Fund.

PAIs served as a useful barometer to gauge which issuers to seek to invest in. More specifically, PAI #3 was utilised for assessment of corporate GHG intensity and PAI #15 for sovereign GHG intensity, respectively; PAI #10 was utilised to identify issuers that failed as per UNGC Principles and OECD Guidelines; and PAI #14 was utilised to identify issuers that failed controversial weapons screens across the whole Fund compared to those in the investable universe.

While the Fund did not commit to having a PAI average better than its Benchmark, the difference between the two metrics helped to inform how successful the Fund was at managing adverse impacts.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund adhered to explicit guidelines which excluded issuers that failed as per UNGC Principles and OECD Guidelines. The Investment Manager's engagement with issuers was built on the principles of UNGC Principles and OECD Guidelines. Issuers that were deemed to fail as per UNGC Principles and OECD Guidelines were added to the Investment Manager's ESG Red List which was then utilised to exclude issuers from being an eligible investment in the Fund. Where relevant, the Investment Manager sought to engage with issuers where it had concerns, which may or may not have explicitly failed as per the underlying guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The manner in which PAIs were considered and taken into account is set out in further detail above.

PAI metrics provided are based on the average calculation of quarterly snapshots during the reference period. The relevant metric calculation relates to the investments for which the underlying ESG data is available rather than all investments held by the Fund. Please note that this information is subject to change and should be used for informational purposes only.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

Largest investments	Sector	% of Assets	Country
ECHOSTAR CORP	Communication Services	1.94%	United States

What was the proportion of sustainability-related investments?

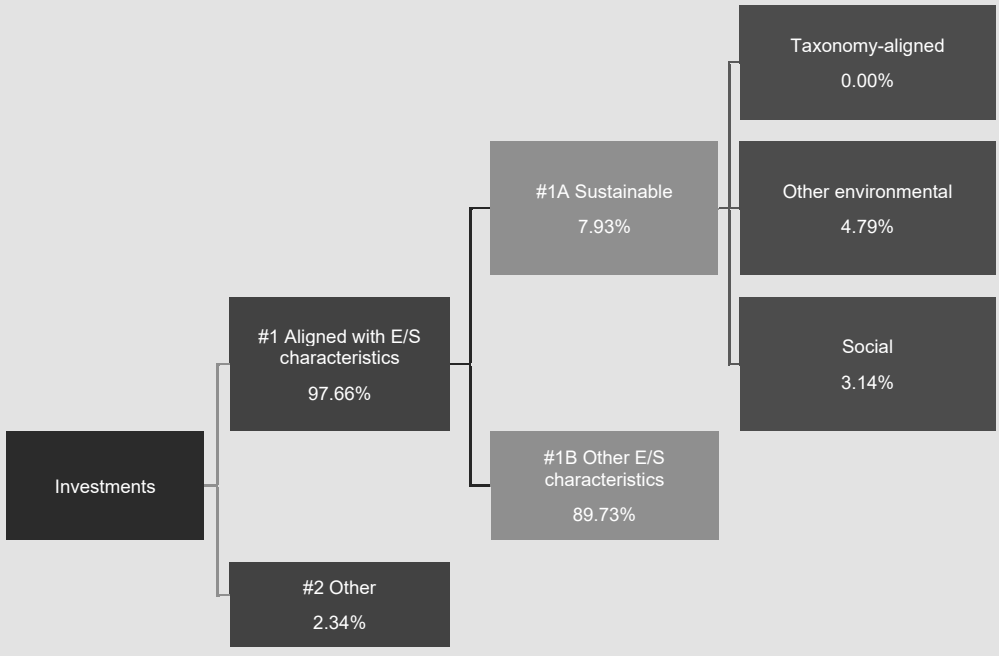
The proportion of sustainability-related investments was 7.93%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

97.66% of the Fund was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (2.34%) was not aligned with the promoted characteristics and consisted primarily of liquid assets or issuers for which no ESG rating was available.

Out of the Fund's segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 7.93% of its assets in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison			
	2026	2025	2024	2023

Broadline Retail	2.17%
Metals & Mining	2.06%
Specialty Retail	1.84%
Software	1.72%
Construction & Engineering	1.67%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

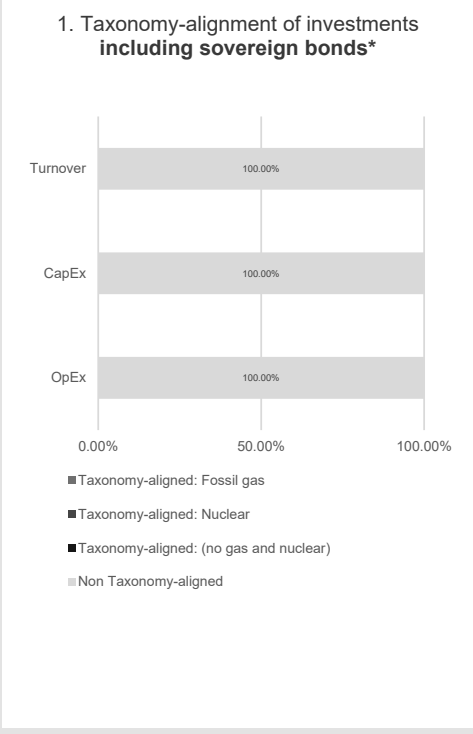
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

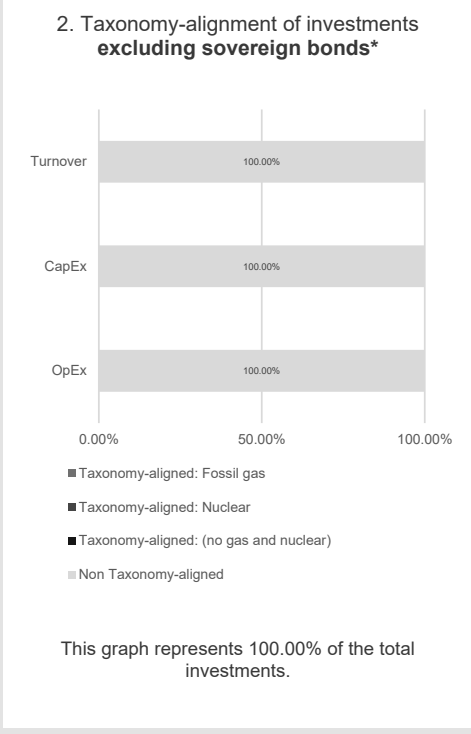
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

In line with its investment strategy, namely, the Fund's commitment to maintain a minimum exposure to 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy Regulation, 4.79% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 2.34% and included cash and derivatives or issuers for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Western Asset believes that financially material ESG factors can affect the creditworthiness of fixed-income issuers' securities and therefore impact the performance of fixed-income investment portfolios. These factors are wholly consistent with the Firm's long-term, fundamental value-oriented investment philosophy. Western Asset's research analysts were responsible for providing fundamental analysis at the industry and issuer levels and for opining on industry and issuer risk/reward characteristics by incorporating material ESG considerations. Supported by this broader approach, the Fund aimed to meet its environmental and social characteristics by seeking to invest in issuers such that the overall portfolio met minimum ESG ratings, achieved its decarbonisation and SDG alignment, as well as avoided issuers which were identified through application of SRI exclusions, allocated to sectors and invested in issuers targeting.

In order to meet the environmental and/or social characteristics during the reference period:

A. The Fund sought an overall Weighted Average Carbon Intensity ("WACI") that was at least 20% below the Benchmark. This helped the Fund align with PAI #3 and PAI #15 (GHG Intensity).

B. The Fund sought to have at least 20% of its net assets invested in securities of issuers whose activities contributed to at least 1 of 8 selected SDGs .

C. The Fund excluded issuers that failed on a range of SRI goals such as outlined below:

a. Issuers deriving over 5% of revenue from tobacco production and/or distribution and from the production of nuclear weapons;

b. Issuers deriving over 10% of revenue from civilian firearms (manufacture or supply), conventional weapons or thermal coal mining (production or distribution);

c. Issuers that manufacture controversial weapons (anti-personnel landmines, biochemical weapons, blinding laser weapons, depleted uranium, incendiary weapons, and non-detectable fragments), own a controversial weapons company, or are owned by a controversial weapons company, aligning with PAI indicator #14 (Controversial Weapons);

d. Issuers that 'Fail' UNGC and OECD principles based on internal research which seeks to identify gaps in issuers meeting their goals, aligning with PAI indicator #10 (Social and Employee matters).

As part of the minimum 1% investment in sustainable investments (defined to be green, social, sustainable and sustainability-linked bonds), the Fund had 4.79% invested by Market Value % as of 28 February 2026.

The Fund met its environmental and/or sustainable guidelines as highlighted below:

A. The Fund's overall WACI was 69.7% of the Benchmark.

B. The Fund's allocation to issuers and issues aligned with SDGs was 28.7% by Market Value %.

C. The Fund had 4.79% invested by market value % in sustainable investments as of 28 February 2026.

D. The Fund did not invest in any issuer that was in breach of SRI guidelines.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF Western Asset Short Duration Blue Chip Bond Fund (the "Fund")

Legal Entity Identifier: 5493000382HJNRHILX42

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 13.43% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and/or social characteristics:

- alignment with one or more UN Sustainable Development Goals ("SDGs") through investment in green, social, sustainable and sustainability-linked bonds and through best-in-class investments;

- alignment with the following PAI indicators:

· GHG Intensity (PAI #3 and PAI #15);

· Social and Employee Matters (PAI #10);

· Controversial Weapons (PAI #14); and

· Investee Countries subject to Social Violations (PAI #16).

Derivative instruments have not been used to attain the environmental and/or social characteristics promoted by the Fund.

No index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund were:

- The PAI indicators mentioned in the answer above. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators during the reference period.

- the allocation to green, social, sustainable and sustainability-linked bonds was at 12.16% as of 28 February 2026.

		PAI historical comparison							
		2026		2025		2024		2023	
PAI indicators	Unit of measurement	Value	Coverage	Value	Coverage	Value	Coverage	Value	Coverage

… And compared to previous periods?

The general sustainability indicators are in line with those in the previous period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments were in green, social, sustainable and sustainability-linked bonds which were achieved through a minimum allocation to issuers aligned with the SDGs and issuers that met best-in-class thresholds set by the Investment Manager. The proceeds of such bonds were used for projects, or had sustainability-linked KPIs, including, but not limited to:

· Green Projects: renewable energy, energy efficiency, pollution prevention and control, environmentally sustainable management of living natural resources and land use, biodiversity, clean transportation, sustainable water and wastewater management, climate change adaptation, circular economy and green buildings; and

· Social Projects: affordable housing, affordable infrastructure (clean drinking water, sanitation), employment programmes and socio-economic advancement such as, but not restricted to, education, diversity, equality and inclusion to name a few.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used proprietary research and PAIs to ensure that sustainable investments did not cause significant harm to any environmental or social sustainable investment objective. Proprietary research, along with the use of inhouse developed tools, including but not limited to screening, enabled portfolio managers to identify issuers that the Investment Manager does not believe cause significant harm.

As a result, the Investment Manager was able to invest in issuers which aligned with the PAI indicators while avoiding issuers which did not. As part of the Fund's investment in green, social, sustainable and sustainability-linked bonds, the Investment Manager applied this approach to determine whether a bond met sustainability criteria.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

When deploying funds to sustainable investments, especially the minimum 1% of the Fund committed towards environmental objectives, where relevant, the Investment Manager utilised additional qualitative assessment (based on internal research or on external third-party opinion) of the issuers and of the projects "do no significant harm" eligibility.

Further, a number of exclusions were applied to the Fund to preclude issuers that may cause significant harm, as detailed further below.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager developed a proprietary PAI tool which took into account material PAIs and which helped measure the Fund's alignment with respect to PAI indicators that were deemed to be material to the Fund.

More specifically, PAI #3 was utilised for assessment of corporate GHG intensity and PAI #15 for sovereign GHG intensity respectively; PAI #10 was utilised to identify issuers that failed as per UNGC Principles and OECD Guidelines; PAI #14 was utilised to identify issuers that failed on controversial weapons screens across the whole Fund compared to those in the investable universe; and PAI #16 was utilised to identify investee countries that failed at being designated as free by the Freedom House.

While the Fund did not commit to having a PAI average better than its Benchmark, the difference between the two metrics helped to inform how successful the Fund was in managing adverse impacts.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund adhered to explicit guidelines which excluded issuers that failed as per UNGC Principles and OECD Guidelines. The Investment Manager's engagement with issuers was built on the principles of UNGC Principles and OECD Guidelines. Issuers that were deemed to fail as per UNGC Principles and OECD Guidelines were added to the Investment Manager's ESG Red List which was then utilised to exclude issuers from being an eligible investment in the Fund. Where relevant, the Investment Manager sought to engage with issuers where it had concerns, which may or may not have explicitly failed as per the underlying guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The manner in which PAIs were considered and taken into account is set out in further detail above.

PAI metrics provided below are based on the average calculation of quarterly snapshots during the reference period. The relevant metric calculation relates to the investments for which the underlying ESG data is available rather than all investments held by the Fund. Please note that this information is subject to change and should be used for informational purposes only.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

Largest investments	Sector	% of Assets	Country
CREDIT AGRICOLE SA	Financials	1.85%	France

What was the proportion of sustainability-related investments?

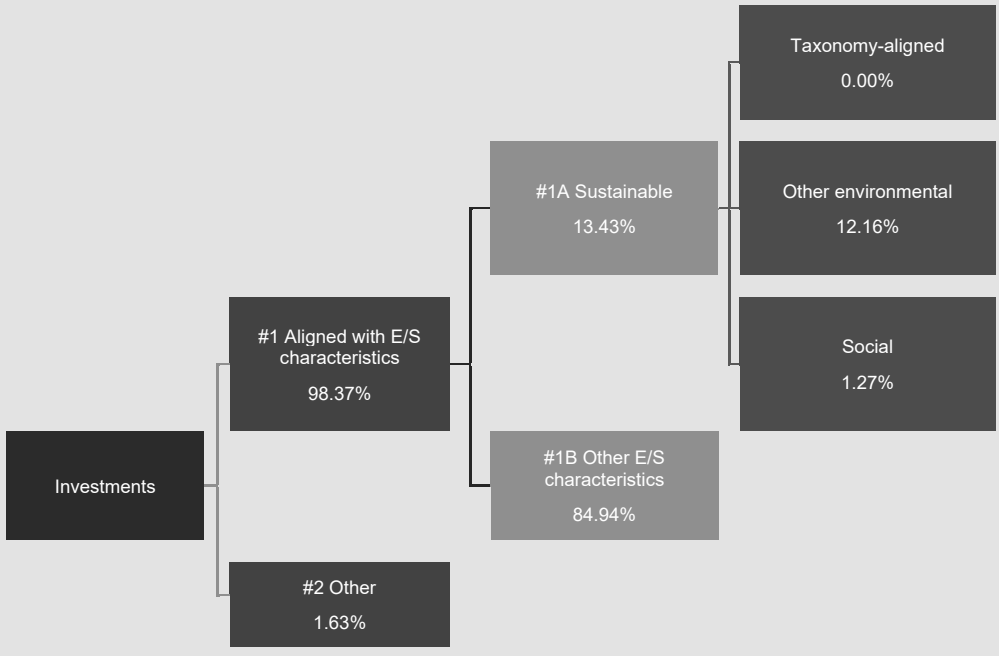
The proportion of sustainability-related investments was 13.43%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

98.37% of the Fund was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (1.63%) was not aligned with the promoted characteristics and consisted primarily of cash or derivatives for which there was no ESG rating.

Out of the Fund's segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 13.43% of its assets in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

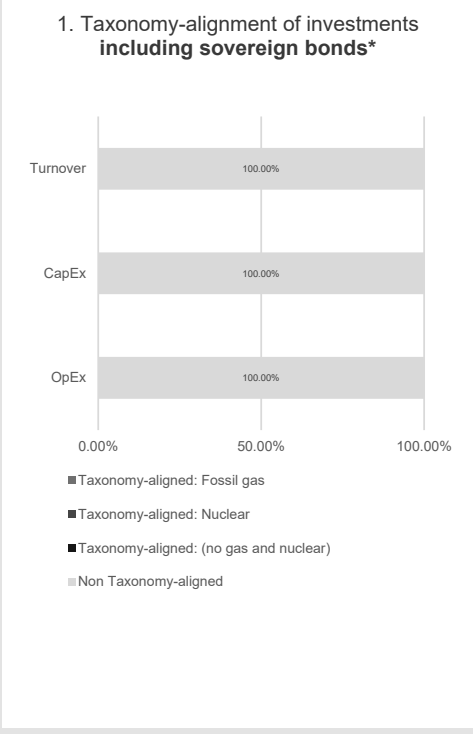
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

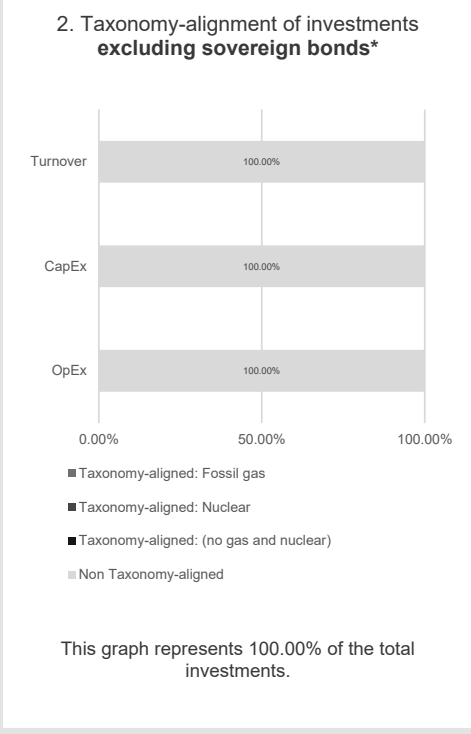
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

In line with its investment strategy, namely, the Fund's commitment to maintain a minimum exposure to 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy Regulation, 12.16% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 1.63% and included cash and derivatives for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Western Asset believes that financially material ESG factors can affect the creditworthiness of fixed-income issuers’ securities and therefore impact the performance of fixed-income investment portfolios. These factors are wholly consistent with the Firm's long-term, fundamental value-oriented investment philosophy. Western Asset’s research analysts were responsible for providing fundamental analysis at the industry and issuer levels and for opining on industry and issuer risk/reward characteristics by incorporating material ESG considerations. Supported by this broader approach, the Fund aimed to meet its environmental and/or social characteristics by seeking to invest in issuers such that the overall portfolio met minimum ESG ratings, achieved its decarbonisation and SDG alignment, as well as avoided issuers which were identified through application of SRI exclusions, allocated to sectors and invested in issuers targeting.

In order to meet the environmental and/or social characteristics during the reference period:

A. The Fund sought an average MSCI ESG rating of BBB or better.

B. The Fund sought an overall Weighted Average Carbon Intensity ("WACI") that was at least 20% below the proxy Benchmark. This helped the Fund align with PAI #3 and PAI #15 (GHG Intensity).

C. The Fund sought to invest a minimum of 20% in investments in securities of issuers whose activities contribute to at least 1 of 8 selected SDGs.

D. The Fund excluded issuers that failed on a range of SRI goals such as outlined below:

a. Issuers deriving over 5% of revenue from tobacco production and/or distribution and from the production of nuclear weapons;

b. Issuers deriving over 10% of revenue from civilian firearms (manufacture or supply), conventional weapons or thermal coal mining (production or distribution);

c. Issuers that manufacture controversial weapons (anti-personnel landmines, biochemical weapons, blinding laser weapons, depleted uranium, incendiary weapons, and non-detectable fragments), own a controversial weapons company, or are owned by a controversial weapons company, aligning with PAI indicator #14 (Controversial Weapons);

d. Issuers that ‘Fail’ UNGC and OECD principles based on internal research which seeks to identify gaps in issuers meeting their goals, aligning with PAI indicator #10 (Social and Employee Matters);

e. State and/or sovereign issuers that fail to be designated as "free" by the Freedom House Index, aligning with PAI indicator #16 (Investee Countries subject to Social violation).

As part of the minimum 1% investment in sustainable investments (defined to be green, social, sustainable and sustainability-linked bonds), the Fund had 12.16% invested by market value % as of 28 February 2026.

The Fund promoted environmental and/or sustainable by demonstrated guidelines above as highlighted below:

A. The Fund was rated A as per MSCI ESG.

B. The Fund's overall WACI was 30.9% of the proxy Benchmark.

C. The Fund's allocation to issuers and issues aligned with SDGs was 86.2% by Market Value % as of 28 February 2026.

D. The Fund did not hold any issuers that were in breach of SRI guidelines.

E. The Fund maintained a portfolio ESG rating higher than that of the investment universe.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF Western Asset Global Bond Fund (the "Fund")

Legal Entity Identifier: 54930030VHR7UP4BBZ30

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 6.26% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and/or social characteristics:

- alignment with one or more UN Sustainable Development Goals ("SDGs") through investment in green, social, sustainable and sustainability-linked bonds and through best-in-class investments;

- alignment with the following PAI indicators:

· GHG Intensity (PAI #3 and PAI #15);

· Social and Employee Matters (PAI #10); and

· Controversial Weapons (PAI #14).

Derivative instruments have not been used to attain the environmental and/or social characteristics promoted by the Fund.

No index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund were:

- The PAI indicators mentioned in the answer above. Please refer to the values displayed below, which represent the performance of the indicators during the reference period.

- the allocation to green, social, sustainable and sustainability-linked bonds was 5.96% as of 28 February 2026.

		PAI historical comparison							
		2026		2025		2024		2023	
PAI indicators	Unit of measurement	Value	Coverage	Value	Coverage	Value	Coverage	Value	Coverage
GHG Intensity USD	tCO2e/M$ revenue	49.41	86.00%	322.38	38.90%	64.51	30.03%	67.50	88.80%

Exposure to controversial weapons	Percentage of Fund invested	0.00%	95.25%	0.00%	38.56%	0.00%	30.89%	0.00%	87.00%

… And compared to previous periods?

The general sustainability indicators are in line with those in the previous period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the Fund's sustainable investments was to reduce GHG emissions as measured through weighted average carbon intensity. The Fund's sustainable investments were in green, social, sustainable and sustainability-linked bonds which were achieved through a minimum allocation to issuers aligned with the SDGs and issuers that met best-in-class thresholds set by the Investment Manager. Such bonds had sustainability-linked KPIs, or had proceeds which were used for projects which included, but were not limited to:

· Green Projects: renewable energy, energy efficiency, pollution prevention and control, environmentally sustainable management of living natural resources and land use, biodiversity, clean transportation, sustainable water and wastewater management, climate change adaptation, circular economy and green buildings; and

· Social Projects: affordable housing, affordable infrastructure (clean drinking water, sanitation), employment programmes and socio-economic advancement such as, but not restricted to, education, diversity, equality and inclusion to name a few.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used proprietary research and PAIs to ensure that sustainable investments did not cause significant harm to any environmental or social sustainable investment objective. Proprietary research, along with the use of inhouse developed tools, including but not limited to screening, enabled portfolio managers to identify issuers that the Investment Manager does not believe cause significant harm.

As a result, the Investment Manager was able to invest in issuers which aligned with the PAI indicators while avoiding issuers which did not. As part of the Fund's investment in green, social, sustainable and sustainability-linked bonds, the Investment Manager applied this approach to determine whether a bond met sustainability criteria.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

When deploying funds to sustainable investments, especially the minimum 1% of portfolio of the Fund committed towards environmental objectives, where relevant, the Investment Manager utilised additional qualitative assessment (based on internal research or on external third-party opinion) of the issuers and of the projects "do no significant harm" eligibility.

Further, a number of exclusions were applied to the Fund to preclude issuers that may cause significant harm, as detailed further below.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager developed a proprietary PAI tool which took into account material PAIs and which helped measure the Fund's alignment with respect to PAI indicators that were deemed to be material to the Fund.

PAIs served as a useful barometer to gauge which issuers to seek to invest in. More specifically, PAI #3 was utilised for assessment of corporate GHG intensity and PAI #15 for sovereign GHG intensity respectively; PAI #10 was utilised to identify issuers that fail as per UNGC Principles and OECD Guidelines; and PAI #14 was utilised to identify issuers that fail controversial weapons screens across the whole Fund compared to those in the investable universe.

While the Fund did not commit to having a PAI average better than its benchmark, the difference between the two metrics helped to inform how successful the Fund was at managing adverse impacts.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund adhered to explicit guidelines which excluded issuers that failed as per UNGC Principles and OECD Guidelines. The Investment Manager's engagement with issuers was built on the principles of UNGC Principles and OECD Guidelines. Issuers that were deemed to fail as per UNGC Principles and OECD Guidelines were added to the Investment Manager's ESG Red List which was then utilised to exclude issuers from being an eligible investment in the Fund. Where relevant, the Investment Manager sought to engage with issuers where it had concerns, which may or may not have explicitly failed as per the underlying guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The manner in which PAIs were considered and taken into account is set out in further detail above.

PAI metrics provided below are based on the average calculation of quarterly snapshots during the reference period. The relevant metric calculation relates to the investments for which the underlying ESG data is available rather than all investments held by the Fund. Please note that this information is subject to change and should be used for informational purposes only.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

What was the proportion of sustainability-related investments?

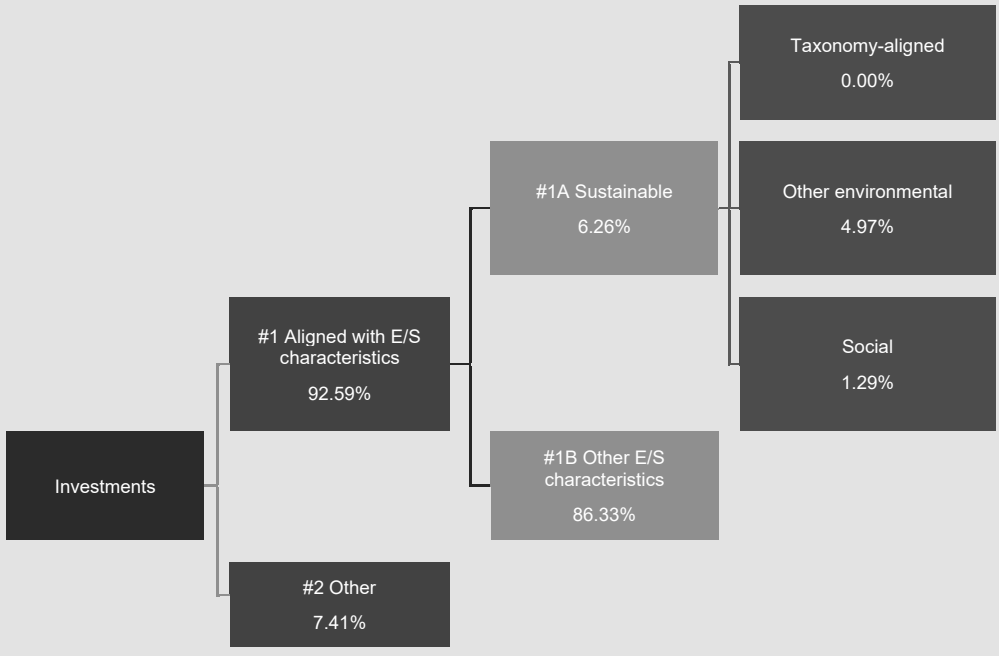
The proportion of sustainability-related investments was 6.26%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

92.59% of the Fund was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (7.41%) was not aligned with the promoted characteristics and consisted primarily of liquid assets or issuers without an ESG rating.

Out of the Fund's segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 6.26% of its assets in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

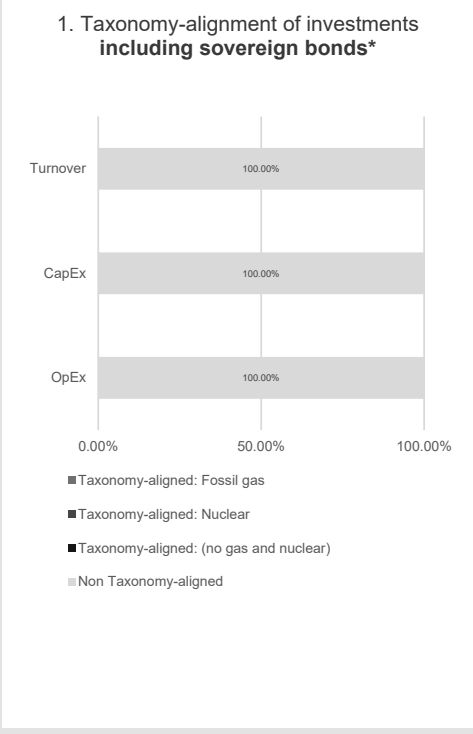
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

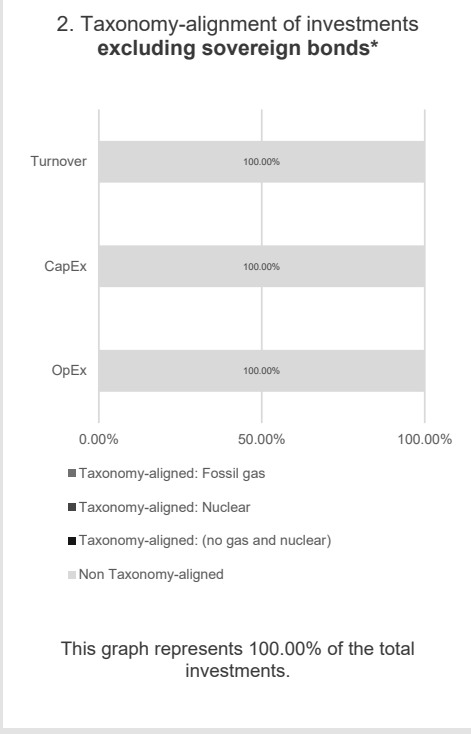
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

In line with its investment strategy, namely, the Fund's commitment to maintain a minimum exposure to 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy Regulation, 4.97% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 7.41% and included cash and derivatives or issuers without an ESG rating for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Western Asset believes that financially material ESG factors can affect the creditworthiness of fixed-income issuers' securities and therefore impact the performance of fixed-income investment portfolios. These factors are wholly consistent with the Firm's long-term, fundamental value-oriented investment philosophy. Western Asset's research analysts were responsible for providing fundamental analysis at the industry and issuer levels and for opining on industry and issuer risk/reward characteristics by incorporating material ESG considerations. Supported by this broader approach, the Fund aimed to meet its environmental and social characteristics by seeking to invest in issuers such that the overall portfolio met minimum ESG ratings, achieved its decarbonisation and SDG alignment, as well as avoided issuers which were identified through application of SRI exclusions, allocated to sectors and invested in issuers targeting.

In order to meet the environmental and/or social characteristics during the reference period:

A. The Fund sought an average MSCI ESG rating of BBB or better.

B. The Fund sought an overall Weighted Average Carbon Intensity ("WACI") that was at least 20% below the Benchmark. This helped the Fund align with PAI #3 and PAI #15 (GHG Intensity).

C. The Fund sough to have at least 20%, with regards to investments in securities of issuers whose activities contribute to at least 1 of 8 selected SDGs.

D. The Fund excluded issuers that fail on a range of SRI goals such as outlined below:

a. Issuers deriving over 5% of revenue from tobacco production and/or distribution and from the production of nuclear weapons;

b. Issuers deriving over 10% of revenue from civilian firearms (manufacture or supply), conventional weapons or thermal coal mining (production or distribution);

c. Issuers that manufacture controversial weapons (anti-personnel landmines, biochemical weapons, blinding laser weapons, depleted uranium, incendiary weapons, and non-detectable fragments), own a controversial weapons company, or are owned by a controversial weapons company, aligning with PAI indicator #14 (Controversial Weapons);

d. Issuers that 'Fail' UNGC and OECD principles based on internal research which seeks to identify gaps in issuers meeting their goals, aligning with PAI indicator #10 (Social and Employee Matters);

As part of the minimum 1% investment in sustainable investments (defined to be green, social, sustainable and sustainability-linked bonds), the Fund had 5.96% invested by market value % as of 28 February 2026.

The Fund met its environmental and/or sustainable guidelines as highlighted below:

A. The Fund was rated BBB as per MSCI ESG.

B. The Fund's overall WACI was 77.6% of the Benchmark.

C. The Fund's allocation to issuers and issues aligned with SDGs was 25.2%

D. The Fund did not invest in any issuer that was in breach of SRI guidelines.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF Brandywine Global Fixed Income Fund (the "Fund")

Legal Entity Identifier: 549300TFZOEP7EEQG432

FRANKLIN TEMPLETON

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made **sustainable investments with a social objective:** 0.00%	☐ with a social objective
	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics using several interconnected approaches. Each country was evaluated using the Investment Manager's 60+ input ESG scoring methodology to assess environmental, social, and governance characteristics. These characteristics included assessments on physical and transition climate risks, environmental conservation and waste, labour rights, education, individual and institutional freedom, women and children's rights and protections, crime and corruption and may have included other characteristics from time to time reflecting the unconstrained strategy pursued by the Fund. The Investment Manager's 60+ input ESG scoring methodology was used to create portfolio and investable universe scores and rankings, with the lowest scoring 10% excluded from consideration; these scores also drove material engagement topics to address with issuers in the second lowest decile (80th - 90th percentile scores) which also included GHG emissions, a mandatory sovereign PAI.

Issuers in the lowest scoring 10% (the bottom decile) were excluded from the investable universe during the reporting period.

Issuers in the 10-20% worst scoring (2nd lowest decile) were treated as engagement candidates during the reporting period.

Derivative instruments were not used to attain the environmental / social characteristics promoted by the Fund.

No index has been designated as a reference benchmark for the purpose of attaining the environmental / social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund were:

A. Specific Inputs into the ESG scoring methodology employed by the Investment Manager which aligned with the environmental or social characteristics promoted by the Fund. These inputs derived from:

1. The application of the ESG exclusions.

The Fund commits to excluding issuers in the lowest scoring decile of the investment universe. No divestments were made as no holdings fell into the bottom decile. The bottom decile remained excluded.

2. The Fund treats those issuers scoring in the second lowest decile as engagement candidates. As a result, the following engagements were conducted: N/A.

B. Tracking of the relevant Principal Adverse Impact (PAI) indicators such as PAI #15 (GHG intensity).

		PAI historical comparison							
		2026		2025		2024		2023	
PAI indicators	Unit of measurement	Value	Coverage	Value	Coverage	Value	Coverage	Value	Coverage
GHG Intensity of investee countries USD	tCO2e/M$ revenue	212.63	95.40%	265.31	95.03%	386.70	83.31%	488.87	86.14%
GHG Intensity of investee countries EUR	tCO2e/€M revenue	229.91	95.40%	N/A	N/A	N/A	N/A	N/A	N/A

… And compared to previous periods?

The Fund commits to excluding issuers in the lowest scoring decile of the investment universe. The following divestments were made as a result:

· Previous Period: No divestments were made as no holdings fell into the bottom decile. The bottom decile remained excluded.

· Current Period: No divestments were made as no holdings fell into the bottom decile. The bottom decile remained excluded.

The Fund treats those issuers scoring in the second lowest decile as engagement candidates. As a result, the following engagements were conducted:

· Previous Period: Mexico

· Current Period: N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. The Fund does not commit to have sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. The Fund does not commit to have sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. The Fund does not commit to have sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. The Fund does not commit to have sustainable investments.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Mandatory PAIs for sovereigns were tracked, measured, and reported; the Investment Manager also used changes in PAIs and related KPIs to assess opportunity for and realized improvement, which informed investments and position sizes. The Investment Manager assessed "do not significantly harm" thresholds on fundamental, sector/industry, country, and portfolio levels to make investment decisions. The two sovereign PAIs (PAI #15 (GHG intensity) and PAI #16 (Investee countries subject to social violations)) were included in the Investment Manager’s proprietary ESG scoring methodology.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

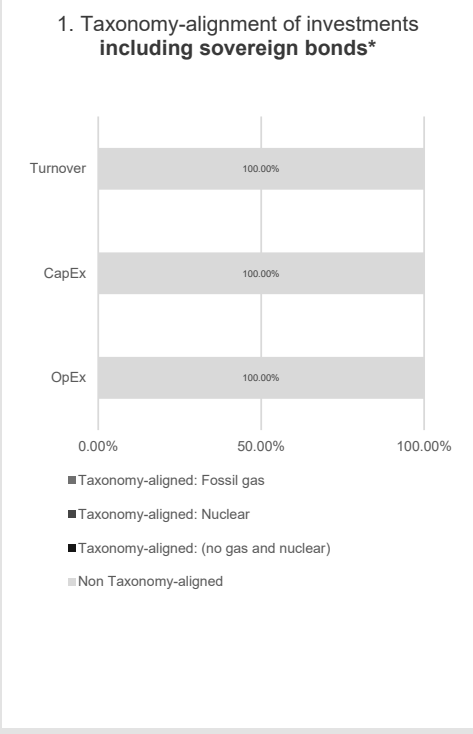
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

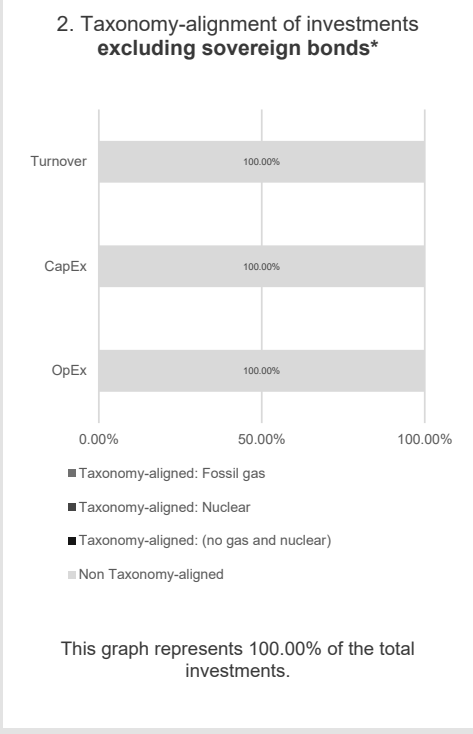
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

0.00% of the Fund's investments were in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

0.00% of the Fund's investments were in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The financial product had 0.47% which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. The Fund commits to excluding issuers in the lowest scoring decile of the investment universe. No divestments were made as no holdings fell into the bottom decile. The bottom decile remained excluded.

2. The Fund treats those issuers scoring in the second lowest decile as engagement candidates. As a result, the following engagements were conducted: N/A

3. Up to 90% of investments were tracked and monitored for environmental and social factor deterioration or improvements

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF Brandywine Global Income Optimiser Fund (the "Fund")

Legal Entity Identifier: 549300373IZ316KVU890

FRANKLIN TEMPLETON

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 2.93% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics using several interconnected approaches. Each country was evaluated using the Investment Manager's 60+ input ESG scoring methodology to assess environmental, social, and governance characteristics. These characteristics included assessments on physical and transition climate risks, environmental conservation and waste, labour rights, education, individual and institutional freedom, women and children's rights and protections, crime and corruption and may have included other characteristics from time to time reflecting the unconstrained strategy pursued by the Fund. The Investment Manager's 60+ input ESG scoring methodology was used to create portfolio and investable universe scores and rankings, with the lowest scoring 10% excluded from consideration; these scores also drove material engagement topics to address with issuers in the second lowest decile (80th - 90th percentile scores) which also included GHG emissions, a mandatory sovereign PAI.

For corporate issuers, the Investment Manager used thirdparty data as part of its proprietary ESG scoring process, with ESG pillars weighted according to the issuer's GICS sector. These factors were based on considerations including emissions, waste, renewable energy production and usage, labour rights and protections, inclusion, and the overall effectiveness and transparency of the senior management team during the reporting period.

Issuers in the lowest scoring 10% (the bottom decile) were excluded from the investable universe during the reporting period.

Issuers in 10-20% worst scoring (2nd lowest decile) were treated as engagement candidates during the reporting period.

Derivative instruments were not used to attain the environmental / social characteristics promoted by the Fund.

No index has been designated as a reference benchmark for the purpose of attaining the environmental / social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund were:

A. Specific Inputs into the ESG scoring methodology employed by the Investment Manager which aligned with the environmental or social characteristics by the Fund. These inputs derived from:

1. The application of the ESG exclusions.

The Fund commits to excluding issuers in the lowest scoring decile of the investment universe. Minerva Luxembourg SA, Mohegan Tribal Gaming, FTAI Aviation Investors LLC, Taseko Mines Ltd fell into the bottom decile and were divested from the portfolio. The bottom decile remained excluded.

1. The Fund treats those issuers scoring in the second lowest decile as engagement candidates. As a result, the following engagements were conducted: Government of Egypt, Government of Brazil, Ero Copper Corp, Cleveland-Cliffs Inc.

B. Tracking of the relevant Principal Adverse Impact (PAI) indicators such as PAI #15 (GHG intensity).

C. The use of bond proceeds by issuers, specifically the use of proceeds of green, social, sustainable and transition bonds that meet the Fund's sustainable investments as a percentage of net assets commitment. The Fund invested 2.93% of its net assets in green and/or social bonds which are sustainable investments.

		PAI historical comparison							
		2026		2025		2024		2023	
PAI indicators	Unit of measurement	Value	Coverage	Value	Coverage	Value	Coverage	Value	Coverage
GHG Intensity of investee countries USD	tCO2e/M$ revenue	475.37	23.54%	444.89	18.71%	437.25	24.40%	481.49	10.54%
GHG Intensity of investee countries EUR	tCO2e/€M revenue	514.02	23.54%	N/A	N/A	N/A	N/A	N/A	N/A

… And compared to previous periods?

The Fund commits to excluding issuers in the lowest scoring decile of the investment universe. The following divestments were made as a result:

· Previous Period: No divestments were made as no holdings fell into the bottom decile. The bottom decile remained excluded.

· Current Period: BEEFBZ 8 7/8 09/13/33 144A, MOHEGN 8 1/4 04/15/30 REGS, MOHEGN 11 7/8 04/15/31 REGS, FTAI 5 1/2 05/01/28 144A, TKOCN 8 1/4 05/01/30 144A. The bottom decile remained excluded.

The Fund treats those issuers scoring in the second lowest decile as engagement candidates. As a result, the following engagements were conducted:

· Previous Period: Allegiant Travel Co, Arab Republic of Egypt, Civitas Resources Inc, Codelco Inc, Ero Copper Corp, Minerva Luxembourg SA, Mohegan Tribal Gaming AU, Nota do Tesouro Nacional, RenaissanceRe Holdings Ltd

· Current Period: Republic of South Africa

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund invested 2.93% of its net assets in green and/or social bonds which are sustainable investments. The Fund made such investments only where the use of the proceeds of such bonds were specified by the issuer (and verified by a third party or the Investment Manager) and benefited underlying environmental or social projects such as, but not limited to:

· Clean and affordable energy (solar and biofuels)

· Clean transportation

· Decent work and economic growth

· Green buildings

· Sustainable cities and communities

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

When evaluating the DNSH principle, the Investment Manager relied on a combination of internal fundamental research, sell-side research, news, PAIs, and ESG data from third party providers.

The Investment Manager reviewed any public sanctions flagged up via screens provided by a third-party provider, related to UN Global Compact (UNGC) failures, as well as measurements and KPIs related to the mandatory PAIs for both corporates and sovereigns. For sustainable investments in securities issued by governments or supranational organisations (which such supranational organisation does not have a specific mission statement that indicates that all the activities/projects being financed are sustainable), the Investment Manager evaluated the DNSH principle at use-of-proceeds level.

The Fund tracked mandatory PAIs to identify adverse impact exposures.

How were the indicators for adverse impacts on sustainability factors taken into account?

Mandatory PAIs for corporates and sovereigns were tracked, measured, and reported. The Investment Manager assessed DNSH thresholds on a fundamental, sector/industry, country, and portfolio levels to make investment decisions. The Investment Manager's policy is to engage with issuers and then divest as a last resort. The Investment Manager divested immediately if a material short-term risk was uncovered.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager tracked OECD/UNGC violations (sourced from a third party on an automated basis from January 2022) and failures; companies that failed were excluded from the portfolio/investment universe.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Mandatory PAIs for corporates and sovereigns were tracked, measured, and reported. The Investment Manager also used changes in PAIs and related KPIs to assess opportunity for and realized improvement, which informed investments and position sizes.

The Investment Manager assessed "do not significantly harm" thresholds on fundamental, sector/industry, country, and portfolio levels to make investment decisions.

The mandatory PAIs were not all inherently included in the proprietary ESG scoring for this Fund. However, the Investment Manager tracked and monitored the PAIs.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

What was the proportion of sustainability-related investments?

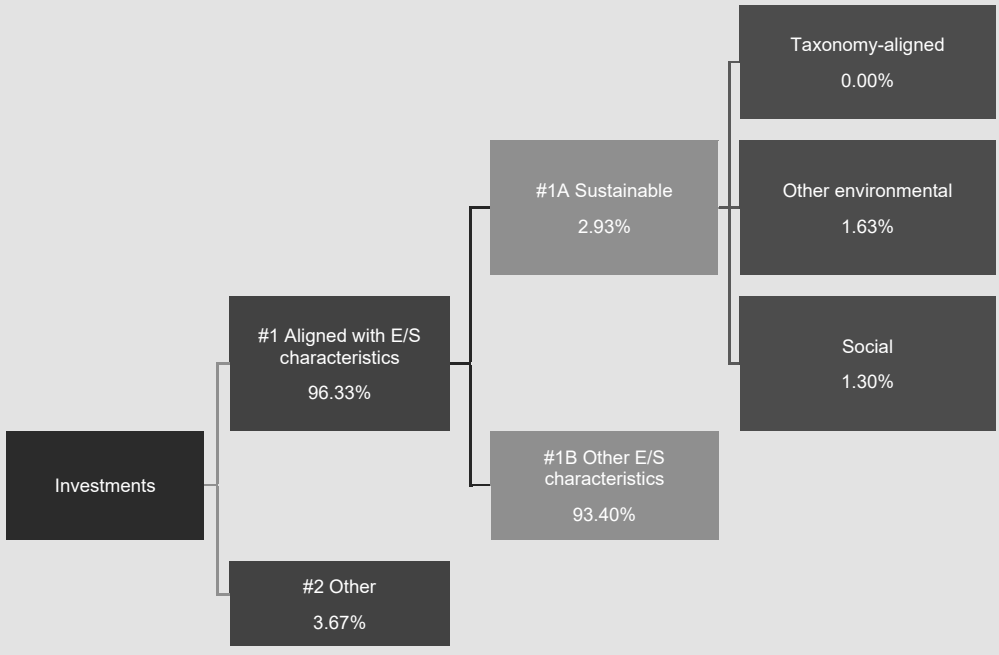
The proportion of sustainability-related investments was 2.93%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

A portion of 96.33% of the portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (3.67%) was not aligned with the promoted characteristics and primarily consisted of liquid assets.

Out of the Fund's portfolio segment, which is aligned with the promoted environmental and/or social characteristics, the Fund invested 2.93% of its portfolio to sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

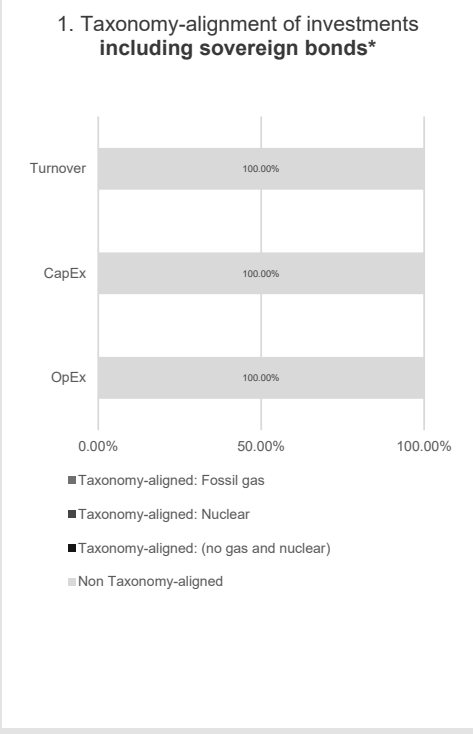
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

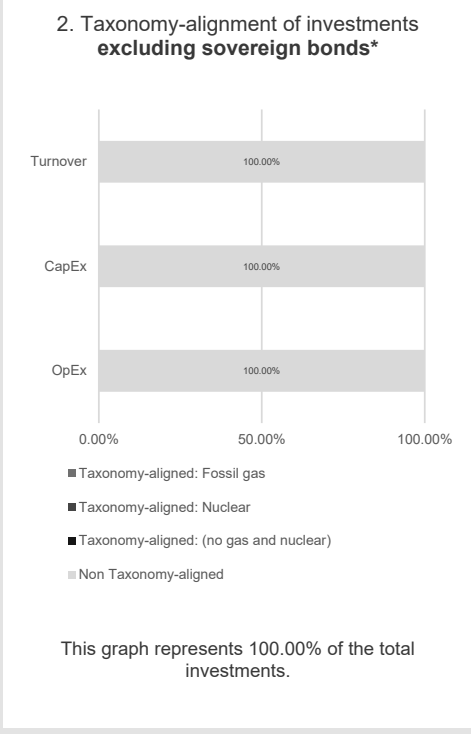
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 1.63%.

What was the share of socially sustainable investments?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

environmentally sustainable economic activities under Regulation (EU) 2020/852.

The financial product had a share of investments with a social objective of 1.30%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 3.67% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. The Fund commits to excluding issuers in the lowest scoring decile of the investment universe. The fund excluded investments in the lowest decile and no issuers fell into the lowest decile over the reporting period.

2. The Fund treats those issuers scoring in the second lowest decile as engagement candidates. As a result, the following engagements were conducted: Egypt, Ero Copper Corp, Celeveland-Cliffs Inc, Brazil

3. Up to 90% of investments were tracked and monitored for environmental and/or social factor deterioration or improvements.

4. The Fund invested at least 1% of its net assets in sustainable investments with environmental/social objectives, as outlined above.

5. The Fund did not invest in its set revenue thresholds, as outlined in the prospectus, for the following industries:

· Tobacco

· Thermal coal

· Controversial weapons including nuclear weapons

· Adult entertainment

The Fund did not invest in issuers that are assessed as 'fail' under the United Nations Global Compact nor in sovereign issuers identified as high-risk jurisdictions or in the UN Security Council Sanctions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF ClearBridge US Value Fund (the "Fund")

Legal Entity Identifier: 549300OZGGIQZ97B7W66

FRANKLIN TEMPLETON

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.61% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In selecting securities during the reporting period, the Investment Manager used an established proprietary research and engagement process to determine a company's profile on environmental, social and governance ("ESG") issues. This proprietary process generated an ESG ratings system that utilized a materiality map to identify specific ESG characteristics that pertained to the investment.

The environmental and/or social characteristics promoted by the Fund were:

· investment in companies with greenhouse gas (GHG) intensity and emissions reduction targets;

· engagement with companies to encourage them to align their business models, set emission reduction targets and disclose their climate change strategies; and

· key Environmental, Social and Governance (ESG) characteristics deemed material to the specific company and the industry in which the company operates which include, but are not limited to, health and safety, gender diversity and climate risk

Amongst its investments, the Fund maintained its committed 10% percent "sustainable investment" minimum.

Derivative instruments have not been used to attain the environmental / social characteristics promoted by the Fund.

No index has been designated as a reference benchmark for the purpose of attaining the environmental /social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund were:

· 34.6% of the Fund held in sustainable investments as defined under the Investment Manager's proprietary sustainable investments methodology which includes product and/or service alignment with the United Nations Sustainable Development Goals ("SDG") and consideration of Do No Significant Harm (DNSH);

· all Principal Adverse Impact (PAI) indicators which were material to the company being rated, specifically PAI #1 (GHG Emissions), PAI #2 (Carbon Footprint), PAI #3 (GHG Intensity), PAI #10 (Violations of UN Global Compact (UNGC) and OECD Guidelines), PAI #13 (Board Gender Diversity) and PAI #14 (Exposure to Controversial Weapons). Please refer to the values disclosed in the section "How did this financial product consider principal adverse impacts on sustainability factors?";

· voted on 914 agenda items, which support proposals around good governance and improving sustainability practices

· the percentage of the portfolio rated B under the Investment Manager's proprietary ESG rating that was equal to 0.0%

· proprietary methodologies to assess the progress of the Investment Manager's ESG engagement meetings; ClearBridge conducted periodic ESG engagements with its portfolio companies. Investment team's views of progress discussed during these meetings were reflected in their proprietary ESG ratings, proxy voting decisions, and investments decisions.

… And compared to previous periods?

The general sustainability indicators are in line with those in the previous period.

Note: In prior reporting periods, certain PAIs were labelled with USD in the unit of measure. This reflected the currency used in underlying financial data and did not affect the calculation methodology or results. For consistency with RTS Annex I, currency references have been removed from the unit labels as of 2026. Prioryear figures have not been restated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund were in equity securities issued by companies which contributed to one or both of the following:

· through their products and services, to any one or more of the environmental or social objectives of the UN Sustainable Development Goals (SDGs) and their underlying targets and indicators determined through the Investment Manager's assessment for contribution;

· GHG intensity and emissions reduction targets across a firm's economic activities determined through a third party verified decarbonization target aligned to the Paris Agreement or is a climate solutions provider. Issuers were monitored for progress against targets through our engagement process;

In addition to contributing to one of the environmental or social objectives listed above, companies were evaluated by the Investment Manager's proprietary good governance screen and passed the Do No Significant Harm (DNSH) criteria as further detailed below.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager used a combination of third party severe risk controversy scores, third-party global norms-based screening including UN Global Compact (UNGC) compliance, PAI consideration* and other material environmental, social, and governance factors, which were embedded in the Investment Manager's fundamental research and proprietary ESG ratings process, which included a good governance evaluation, to review if investments caused significant harm to any sustainable investment objective.

Additionally, the Investment Manager used its engagement process to identify best in class securities.

*The PAIs taken into consideration were dependent on the Investment Manager's proprietary ESG materiality assessment by sub-sector which was applied during its ESG rating process or on data availability.

How were the indicators for adverse impacts on sustainability factors taken into account?

All PAIs which were material to the company being rated were considered as part of the Investment Manager's ESG rating which was applied as part of the security selection process.

The manner in which PAIs were considered and taken into account is set out in further detail below.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager supports the principles of the UNGC. Therefore, the Fund did not invest in companies that violated any of the ten principles in each of the four areas (human rights, labour, environment, and anti-corruption) of the UNGC.

The Investment Manager used a third-party data provider who monitored compliance with UNGC principles. In instances where there were discrepancies or disagreements between the Investment Manager's research and the provider's assessment of a specific controversy, the Investment Manager, along with the compliance team and members of the ESG team engaged the company on the issue. Where the Investment Manager reached a consensus that the company had taken the necessary steps to address the controversy, or had effectively remediated the issue, the Investment Manager provided a detailed explanation for why the company continued to be invested in.

To ensure sustainable investments were aligned with the OECD guidelines, the Investment Manager used a third-party provider as a best effort to monitor compliance and potential violations.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

All PAIs which were material to the company being rated were considered as part of the Investment Manager's ESG rating which was applied as part of the security selection process, specifically:

PAI #1 (GHG Emissions), PAI #2 (Carbon Footprint), PAI #3 (GHG Intensity)

The Investment Manager assessed the specific climate-related risks and opportunities faced by individual companies as part of its stock selection process, which integrated these considerations, among other environmental, social and governance considerations;

While the Investment Manager assessed each sector on a specific set of criteria that was pertinent to its business operations, the assessment generally included careful consideration of climate-related factors such as: the regulatory/policy environment; the geographic location of assets and operations; the ability to pass on costs to customers; technology alternatives and advancements; changing customer preferences; commodity prices; future capital expenditure and R&D plans; long-term business strategy; overall quality of the management team; and other factors; and

The Investment Manager used MSCI Carbon Portfolio Analytics to assess exposure to companies with fossil fuel reserves. The Investment Manager conducted carbon intensity analysis on the firm's investments in aggregate to understand the carbon intensity of the firm's total assets relative to the global equity markets. The Investment Manager also conducted analysis on carbon intensity at the portfolio level.

PAI #10 (Violation of UNGC / OECD Guidelines)

Please refer to "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?"

PAI #13 (Board gender diversity)

The Investment Manager uses third-party data for board gender diversity monitoring. Further, on a case-by-case basis, the Investment Manager has a provision in its Proxy Voting Policy to vote with respect to the nominating committee members and chair if the company does not have at least one female board director. The Investment Manager considered Diversity as a component of its ESG analysis and rating, as well as a firm-wide theme for company engagement.

PAI #14 (Exposure to controversial weapons)

The Fund did not invest in companies that generate any turnover from (a) banned weapons according to (i) The Convention of the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on their Destruction and (ii) The Convention on the Prohibition of Cluster Munitions and (b) weapons classed as either B- or C- weapons pursuant to the United Nations Biological Weapons Convention and the United Nations Chemical Weapons Convention respectively.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

Largest investments	Sector	% of Assets	Country

What was the proportion of sustainability-related investments?

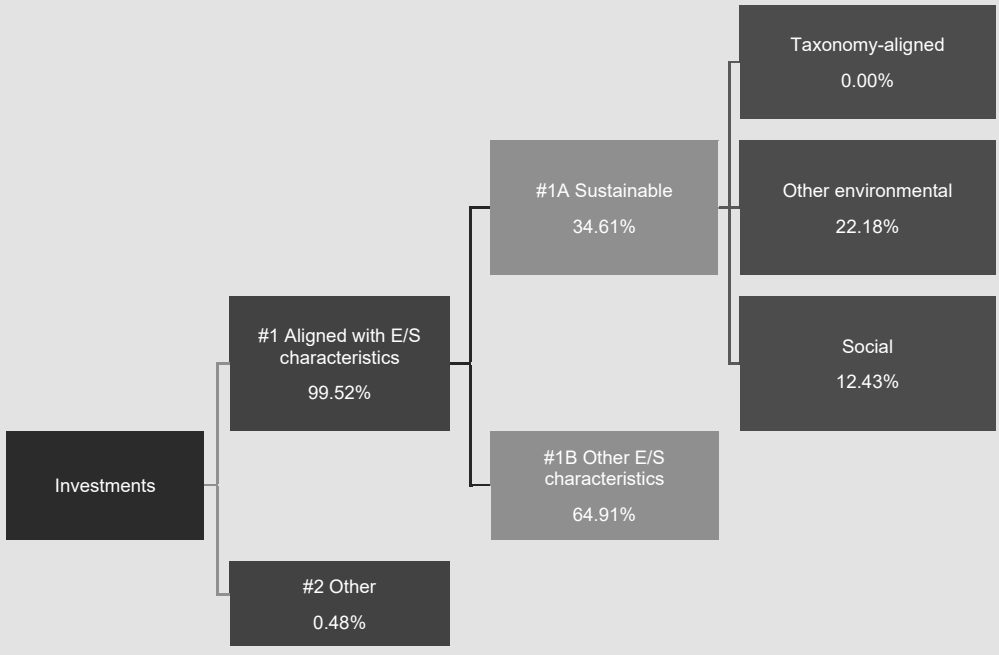
The proportion of sustainability-related investments was 34.61%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

A portion of 99.52% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (0.48%) was not aligned with the promoted characteristics and consisted primarily of liquid assets.

Out of the Fund's portfolio segment which is aligned with the promoted environmental and/or social characteristics, the Fund invested 34.61% of its portfolio in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

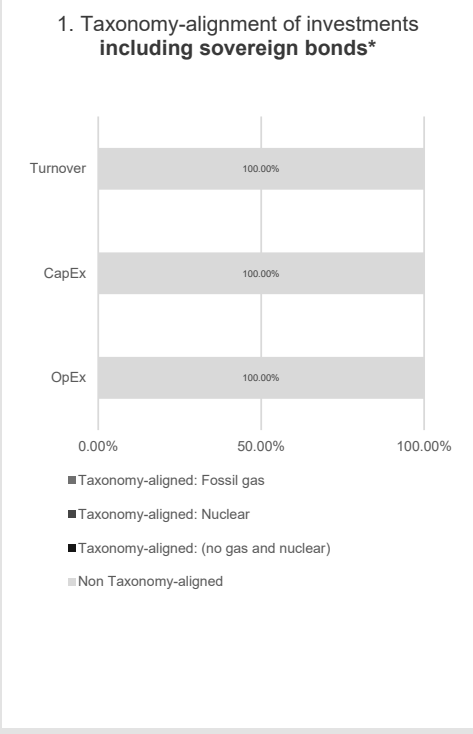
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

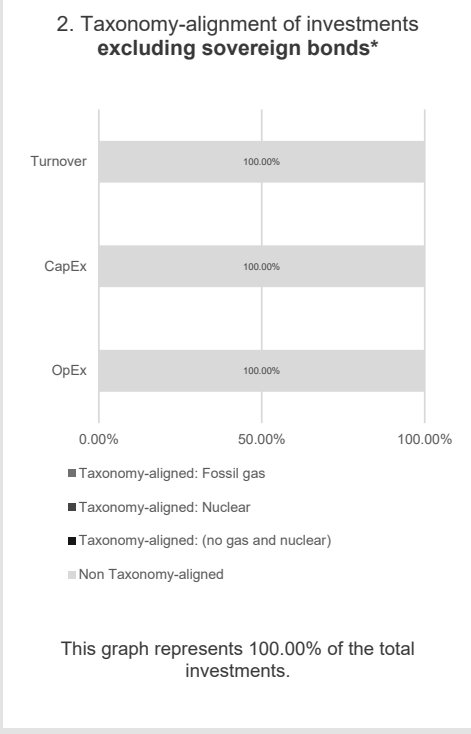
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

As a result of the investment strategy of the Fund, the Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy and, accordingly, as of 28-02-2026, 22.18% of the portfolio of the Fund was comprised of investments with an environmental objective not aligned with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 12.43%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under "#2 Other" was 0.48% and comprised of cash held on deposit and derivative instruments used for hedging and derivatives for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. The Investment Manager utilized its proprietary rating system and fundamental research to assess how a company managed its ESG risks and opportunities, including a good governance screen. The rating system consisted of four rating levels: AAA, AA, A and B, which were assigned to companies based on their sustainability strategy and performance key ESG issues. All companies in the Fund were rated. The rating distribution for this Fund as of 28 February 2026 was:

AAA: 11%

AA: 69%

A: 20%

B: 0%

1. The Investment Manager continuously engaged with its portfolio companies. ESG engagement at ClearBridge generally had two overlapping objectives:

· Research: Gaining a better understanding of ESG issues that could impact our investment thesis

· Impact: Encouraging specific changes at the company that could lead to positive real-world impact

Additionally, the Investment Manager engaged directly with the "B" rated companies held by the Fund on a regular basis, with the goal of improving on the material environmental and/or social attributes of those companies.

For more details on our engagement approach, please refer to our Engagement and Stewardship policy found here: https://franklintempletonprod.widen.net/content/qz5ty08kfn/original/engagementstewardshippolicy.pdf

2. The Fund did not invest in its set revenue thresholds, as outlined in the prospectus, for the following industries:

· Companies that generate 10% or more of their turnover directly from conventional weapons.

· Controversial weapons

· Tobacco

· Companies that generate more than 30% of their revenues from coal-based power generation, or

· the mining or distribution of thermal coal or metallurgical coal.

3. The Fund did not invest in companies that violate one or several of the ten principles under the four areas covered by UNGC (human rights, labour, environment and anti-corruption).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF Putnam US Research Fund (the "Fund")

Legal Entity Identifier: 549300SQ18HYQNQ20536

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made **sustainable investments with a social objective:** 0.00%	☐ with a social objective
	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager integrated ESG analysis into fundamental research and portfolio construction during the reporting period and used active engagement with senior management and proxy voting to discuss and address risks that were material and financially relevant and encourage transparency for investors.

The environmental and/or social characteristics promoted by the Fund are key Environmental, Social and Governance (ESG) issues deemed material to the specific company and the sector in which the company operates which include, but are not limited to, health and safety, gender diversity, climate risk, corporate governance risk and data security.

Derivative instruments have not been used to attain the environmental and/or social characteristics promoted by the Fund. No index reference benchmark has been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund were:

· The Fund maintained a lower carbon intensity than the benchmark during the reporting period. The Fund's weighted average carbon intensity (inclusive of Scope 1 and Scope 2) was 81.1 (tCO2e/M$ revenue) and fell 14% below the benchmark's weighted average carbon intensity (Scope 1 and Scope 2) of 94.30 (tCO2e/M$ revenue).

· The Fund's exposure to issuers that were rated by Sustainalytics as Negligible, Low or Medium ESG risk was 89.83% for the period, which exceeded the Fund's minimum target of 60%.

· 100% of investments were compliant with the 10 Principles of the UN Global Compact.

· 100% of investments were compliant with business involvement exclusionary screens relating to controversial weapons; conventional weapons; adult entertainment; tobacco and related products; and thermal coal.

· Specific Principal Adverse Impact (PAI) indicators, namely: PAI #3 (GHG Intensity), PAI #10 (Violations of UN Global Compact and OECD Guidelines) and PAI #14 (Exposure to controversial weapons) were calculated. Please refer to the values disclosed in the section "How did this financial product consider principal adverse impacts on sustainability factors?";

· Periodic ESG engagements were conducted during the reporting period to assess issuer plans to manage material ESG risks and progress against such plans. The investment team's views of issuer ESG risk management discussed during these meetings was reflected in proxy voting and investment decisions. For more details on our engagement approach, please refer to our Stewardship policy found here: https://www.franklintempleton.com/forms-literature/download/ESPOL-B.

· The Investment Manager voted on proxy proposals supporting good governance and improving sustainability practices.

… And compared to previous periods?

Effective 28 April 2025, the Investment Manager for the Fund changed to The Putnam Advisory Company, LLC and the name of the Fund changed to its current name FTGF Putnam US Research Fund (previously named FTGF ClearBridge US Appreciation Fund). This change reflects a shift in the investment strategy. Accordingly, comparisons to previous years may not be meaningful or comparable.

Note: In prior reporting periods, when the fund was managed by ClearBridge, PAI 3 (GHG Intensity) was labelled with USD in the unit of measure. As of the change in the fund, this figure began reporting in Euros. Prior reported values in USD are not displayed as they are not comparable.

For PAI #10, "Violations of UNGC principles and OECD Guidelines," a value of 0.16% was reported for 2024 based on data provided by MSCI. The reported exposure reflects third-party data inputs, which may be subject to timing or data availability considerations. The position was held for a limited period within the year and subsequently divested. Compliance monitoring is in place for such matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

· PAI #3 (GHG Intensity) - The Investment Manager assessed specific climate-related risks and opportunities faced by individual companies as part of its stock selection process, which integrates these considerations, among other environmental, social and governance considerations. The Fund maintained a lower Carbon Intensity metric (inclusive of Scope 1 and Scope 2 emissions) for the Fund’s portfolio when compared to its benchmark. Carbon Intensity is the amount (in tons) of total emissions attributable to a portfolio, per million dollars (USD) invested. Scope 1 emissions are direct emissions from an issuer's own operations while Scope 2 emissions are indirect emissions from electricity purchased and used by an issuer. The Fund's aggregate portfolio carbon intensity metric is apportioned by the Fund's ownership share of issuers in the portfolio, i.e. owned emissions divided by owned revenues. The benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Fund. The Investment Manager used a third-party provider to monitor the Fund’s Carbon Intensity metrics in comparison to the benchmark.

· PAI #10 (Violations of UN Global Compact and OECD Guidelines) - The Fund did not invest in companies that were assessed as non-compliant with UN Global Compact and OECD Guidelines.

· PAI #14 (Exposure to controversial weapons) - The Fund did not invest in companies that generated any of their turnover from the production and/or distribution of controversial weapons (i.e., antipersonnel mines, nuclear weaponry, biological & chemical weaponry, and cluster munitions).

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 0.00%.

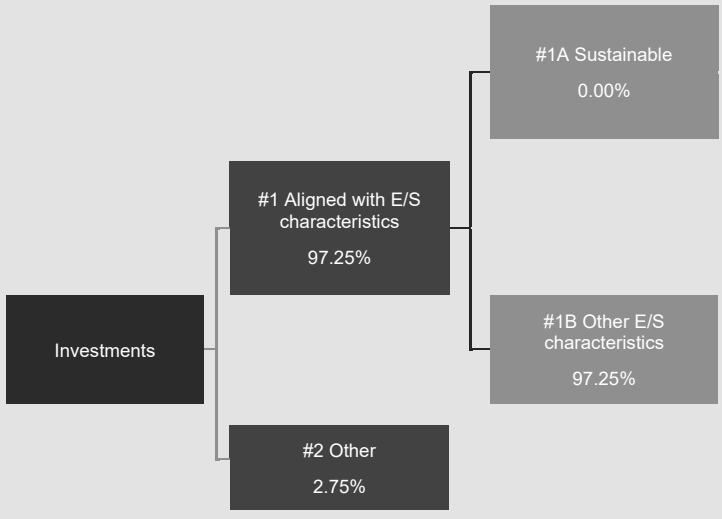
Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

97.25% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (2.75%) was not aligned with the promoted characteristics and consisted primarily of liquid assets.

Out of the Fund's portfolio segment which is aligned with the promoted environmental and/or social characteristics, the Fund invested 0.00% of its portfolio in sustainable investments.

Note that the asset allocation in prior years was applicable to the previous investment strategy, which had minimum requirements for social and environmental sustainable investments of the fund.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

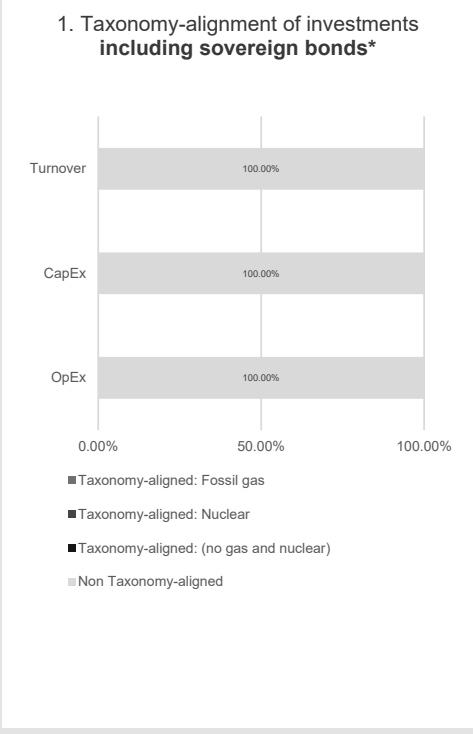
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

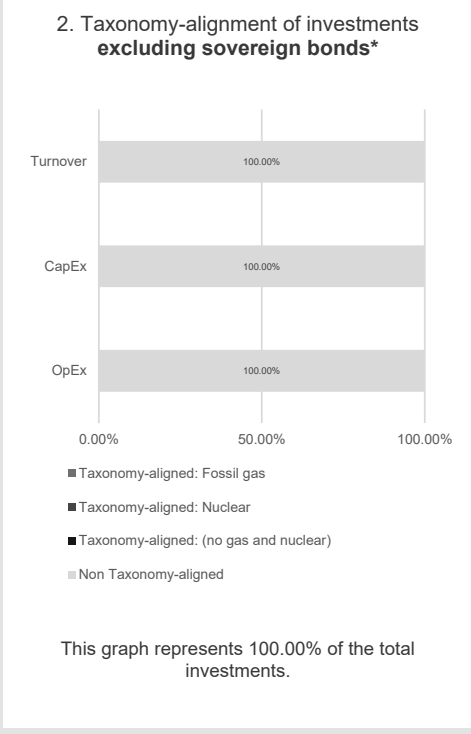
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

What was the share of socially sustainable investments?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

environmentally sustainable economic activities under Regulation (EU) 2020/852.

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under "#2 Other" was 2.75% and were cash, cash equivalents and derivatives.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager integrated ESG analysis into fundamental research and portfolio construction during the reporting period and used active engagement with senior management and proxy voting to discuss and address risks that were material and financially relevant and encourage transparency for investors.

The following actions were taken:

· Promoted effective management of climate risk and energy efficiency by Investing in issuers with lower carbon intensity;

· Promoted better or improved corporate behaviours which includes positive labour relations and /or having a long term business strategy by investing at least 60% of portfolio holdings in issuers with Medium, Low or Negligible ESG risk ratings;

· Promoted compliance with international norms by restricting investments in issuers that are in violation of the United Nations Global Compact

· Promoted social well-being by restricting investments in issuers involved in the production and/ or distribution of conventional weapons, the production and/ or distribution of controversial weapons as described in the Franklin Templeton EU Funds Policy; and the production and/ or distribution adult entertainment;

· Promoted public health through restricting investments in issuers involved in the tobacco business

· Promoted environmentally friendly corporate practices by restricting investments in issuers involved in the thermal coal business

Periodic ESG engagements with portfolio companies were conducted during the reporting period to assess issuer plans to manage material ESG risks and progress against such plans. The investment team’s views of issuer ESG risk management discussed during these meetings was reflected in proxy voting and investment decisions. For more details on our engagement approach, please refer to our Stewardship policy found here: https://www.franklintempleton.com/forms-literature/download/ESPOL-B. During the period, the Fund voted on proxy proposals supporting good governance and improving sustainability practices.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF ClearBridge US Large Cap Growth Fund (the "Fund")

Legal Entity Identifier: 5493003YRBLHS9UVBW79

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.93% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In selecting securities during the reporting period, the Investment Manager used an established proprietary research and engagement process to determine a company's profile on environmental, social and governance ("ESG") issues. This proprietary process generated an ESG ratings system that utilized a materiality map to identify specific ESG characteristics that pertained to the investment. The environmental and/or social characteristics promoted by the Fund were key (ESG) issues deemed material to the specific company and the sector in which the company operates which included, but were not limited to, health and safety, gender diversity, climate risk, corporate governance risk and data security.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund were:

· 51.9% of the Fund held in sustainable investments as defined under the Investment Manager's proprietary sustainable investments methodology which includes product and/or service alignment with the United Nations Sustainable Development Goals ("SDG") and consideration of Do No Significant Harm (DNSH);

· specific Principal Adverse Impact (PAI) indicators, namely PAI #1 (GHG Emissions), PAI #2 (Carbon Footprint), PAI #3 (GHG Intensity), PAI #10 (Violations of UN Global Compact and OECD Guidelines), PAI #13 (Board Gender Diversity) and PAI #14 (Exposure to controversial weapons). Please refer to the values disclosed in the section "How did this financial product consider principal adverse impacts on sustainability factors?";

· proprietary methodologies to assess the progress of the Investment Manager's ESG engagement meetings. ClearBridge conducted periodic ESG engagements with its portfolio companies. Investment team's views of progress discussed during these meetings were reflected in their proprietary ESG ratings, proxy voting decisions, and investments decisions.

· voted on 588 agenda items which support proposals around good governance and improving sustainability practices;

· portfolio exposure to best-in-class companies as determined by the Investment Manager's proprietary ESG rating. The rating distribution for this Fund as of 28 February 2025 was:

· AAA: 42%

· AA: 41%

· A: 17%

· B: 0%

The Fund measures the proportion of companies that have set, and have committed to set science-based targets for greenhouse gas reductions or are climate solutions providers; 76%

… And compared to previous periods?

The general sustainability indicators are in line with those in the previous period.

Note: In prior reporting periods, certain PAIs were labelled with USD in the unit of measure. This reflected the currency used in underlying financial data and did not affect the calculation methodology or results. For consistency with RTS Annex I, currency references have been removed from the unit labels as of 2026. Prioryear figures have not been restated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund were in equity securities issued by companies which contributed to at least one of the following:

· through their products and services, to any one or more of the environmental or social objectives of the SDGs and their underlying targets and indicators determined through the Investment Manager's assessment for contribution;

· GHG intensity and emissions reduction targets across a firm's economic activities determined through a third party verified decarbonization target aligned to the Paris Agreement or is a climate solutions provider. Issuers were monitored for progress against targets through our engagement process;

In addition to contributing to one of the environmental or social objectives listed above, companies were evaluated by the Investment Manager's proprietary good governance screen and passed the Do No Significant Harm (DNSH) criteria as further detailed below.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager used a combination of third party severe risk controversy scores, third-party global norms-based screening including UN Global Compact (UNGC) compliance, PAI consideration* and other material environmental, social, and governance factors, which were embedded in the Investment Manager's fundamental research and proprietary ESG ratings process, which included a governance evaluation, to review if investments cause significant harm to any sustainable investment objective.

Additionally, the Investment Manager used its engagement process to identify best in class securities.

*The PAIs taken into consideration were dependent on the Investment Manager's proprietary ESG materiality assessment by sub-sector which was applied during its ESG rating process or on data availability.

How were the indicators for adverse impacts on sustainability factors taken into account?

All PAIs which were material to the company being rated were considered as part of the Investment Manager's ESG rating which was applied as part of the security selection process.

The manner in which PAIs were considered and taken into account is set out in further detail below.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager supports the principles of the UNGC. Therefore, the Fund did not invest in companies that violated any of the ten principles in each of the four areas (human rights, labour, environment, and anti-corruption) of the UNGC.

The Investment Manager used a third-party data provider who monitored compliance with UNGC principles. In instances where there were discrepancies or disagreements between the Investment Manager's research and the provider's assessment of a specific controversy, the Investment Manager, along with the compliance team and members of the ESG team engaged the company on the issue. Where the Investment Manager reached a consensus that the company had taken the necessary steps to address the controversy, or had effectively remediated the issue, the Investment Manager provided a detailed explanation for why the company continued to be invested in.

To ensure sustainable investments were aligned with the OECD guidelines, the Investment Manager used a third-party provider as a best effort to monitor compliance and potential violations.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

All PAIs which were material to the company being rated were considered as part of the Investment Manager's ESG rating which was applied as part of the security selection process, specifically:

PAI #1 (GHG Emissions), PAI #2 (Carbon Footprint), PAI #3 (GHG Intensity)

The Investment Manager assessed the specific climate-related risks and opportunities faced by individual companies as part of its stock selection process, which integrated these considerations, among other environmental, social and governance considerations;

While the Investment Manager assessed each sector on a specific set of criteria that was pertinent to its business operations, the assessment generally includes careful consideration of climate-related factors such as: the regulatory/policy environment; the geographic location of assets and operations; the ability to pass on costs to customers; technology alternatives and advancements; changing customer preferences; commodity prices; future capital expenditure and R&D plans; long-term business strategy; overall quality of the management team; and other factors; and

The Investment Manager used MSCI Carbon Portfolio Analytics to assess exposure to companies with fossil fuel reserves. The Investment Manager conducted carbon intensity analysis on the firm's investments in aggregate to understand the carbon intensity of the firm's total assets relative to the global equity markets. The Investment Manager also conducted analysis on carbon intensity at the portfolio level.

PAI #10 (Violation of UNGC / OECD Guidelines)

Please refer to "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?"

PAI #13 (Board gender diversity)

The Investment Manager uses third-party data for board gender diversity monitoring. Further, on a case-by-case basis, the Investment Manager has a provision in its Proxy Voting Policy to vote with respect to the nominating committee members and chair if the company does not have at least one female or ethnically/racially diverse board director. The Investment Manager considered Diversity as a component of its ESG analysis and rating, as well as a firm-wide theme for company engagement.

PAI #14 (Exposure to controversial weapons)

The Fund did not invest in companies that generate any of their turnover from the production and/or distribution of controversial weapons (i.e., antipersonnel mines, nuclear weaponry, biological & chemical weaponry, and cluster munitions).

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

Largest investments	Sector	% of Assets	Country
NVIDIA CORP	Information Technology	9.30%	United States

What was the proportion of sustainability-related investments?

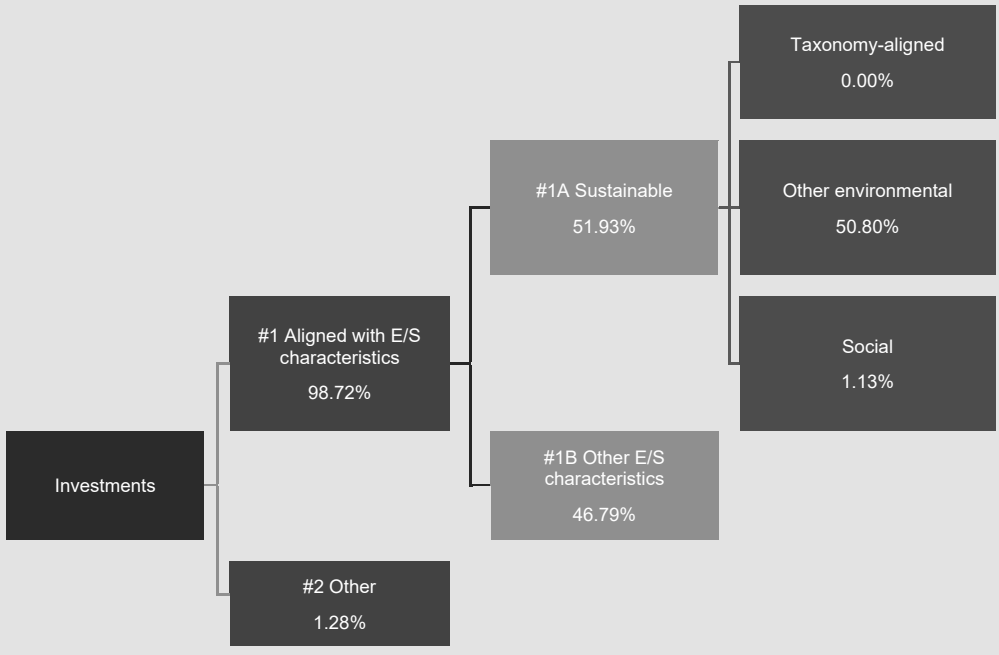
The proportion of sustainability-related investments was 51.93%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

A portion of 98.72% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (1.28%) was not aligned with the promoted characteristics and consisted primarily of liquid assets.

Out of the Fund's portfolio segment which is aligned with the promoted environmental and/or social characteristics, the Fund invested 51.93% of its portfolio in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

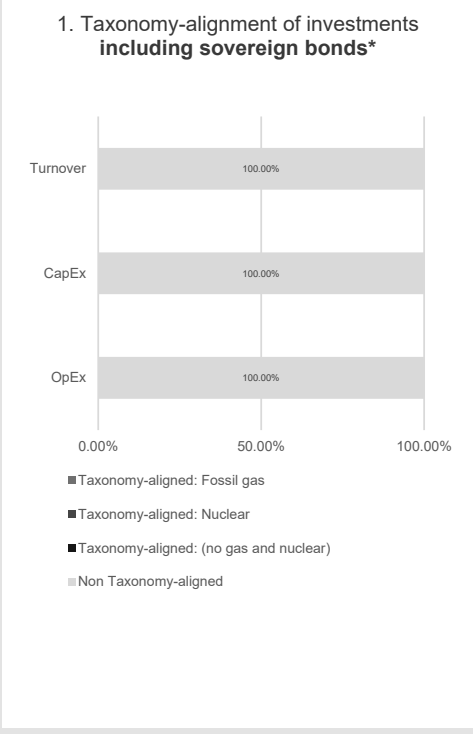
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

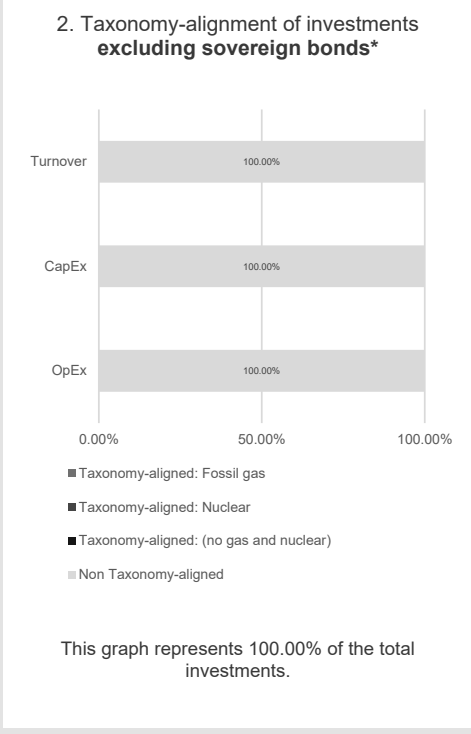
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

As a result of the investment strategy of the Fund, the Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy and, accordingly as of 28-02-2026, 50.80% of the portfolio of the Fund was comprised of investments with an environmental objective not aligned with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 1.13%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under "#2 Other" was 1.28% and comprised of cash held on deposit and derivative instruments used for hedging and derivatives for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. The Investment Manager utilized its proprietary rating system and fundamental research to assess how a company managed its ESG risks and opportunities, including a good governance screen. The rating system consisted of four rating levels: AAA, AA, A and B, which were assigned to companies based on their sustainability strategy and performance key ESG issues. All companies in the Fund were rated. The rating distribution for this Fund as of 28 February 2025 was:

AAA: 42%

AA: 41%

A: 17%

B: 0%

1. The Investment Manager continuously engaged with its portfolio companies. ESG engagement at ClearBridge generally had two overlapping objectives:

· Research: Gaining a better understanding of ESG issues that could impact our investment thesis

· Impact: Encouraging specific changes at the company that could lead to positive real-world impact

For more details on our engagement approach, please refer to our Engagement and Stewardship policy found here: https://franklintempletonprod.widen.net/content/qz5ty08kfn/original/engagementstewardshippolicy.pdf

2. As outlined in the prospectus, the Fund did not invest in:

· Companies that generated 10% or more of their turnover directly from conventional weapons;

· Companies that generated any of their turnover from the production and/or distribution of controversial weapons

· Controversial weapons

· Tobacco

· Adult entertainment

· Companies that generate more than 30% of their revenues from coal-based power generation, or the mining or distribution of thermal coal or metallurgical coal

3. The Fund did not invest in companies that violate one or several of the ten principles under the four areas covered by UNGC (human rights, labour, environment and anti-corruption).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF ClearBridge US Equity Sustainability Leaders Fund (the "Fund")

Legal Entity Identifier: 549300RLIXEW79ZFOB12

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 90.64% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reporting period, as part of its investment policy, the Investment Manager invested in companies across market capitalizations promoting strong or improving environmental, social and governance ("ESG") characteristics. The Fund used an established proprietary research and engagement process to determine whether a company is a Sustainability Leader. This proprietary process includes generating an ESG ratings system that utilized a materiality map to identify specific ESG characteristics that pertained to the investment. These characteristics included, but were not limited to:

· Energy efficiency;

· Clean power;

· Carbon mitigating enabling technologies;

· Water efficiency;

· Material waste reduction processes;

· Workforce diversity;

· Health and wellness;

· Fair wages;

· Supply chain monitoring; and

· Community involvement.

Additionally, the Fund has maintained its committed 50% "sustainable investment" minimum.

Derivative instruments have not been used to attain the environmental / social characteristics promoted by the Fund.

No index has been designated as a reference benchmark for the purpose of attaining the environmental / social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund were:

· 90.6% of the Fund held in sustainable investments as defined under the Investment Manager's proprietary sustainable investments methodology which includes product and/or service alignment with the United Nations Sustainable Development Goals ("SDG") and consideration of Do No Significant Harm (DNSH);

· specific principal adverse impact ("PAI") indicators, specifically PAI #1 (GHG Emissions), PAI #2 (Carbon Footprint), PAI #3 (GHG Intensity), PAI #4 (Exposure to companies active in the fossil fuel sector), PAI #7 (Activities negatively affecting biodiversity-sensitive areas), PAI #10 (Violations of the UN Global Compact and OECD Guidelines), PAI #13 (Board Gender Diversity), and PAI #14 (Exposure to controversial weapons) were calculated. Please refer to the values disclosed in the section "How did this financial product consider principal adverse impacts on sustainability factors?";

· proprietary methodologies to assess the progress of the Investment Manager's ESG engagement meetings; ClearBridge conducted periodic ESG engagements with its portfolio companies. Investment team's views of progress discussed during these meetings were reflected in their proprietary ESG ratings, proxy voting decisions, and investments decisions.

· voted on 789 agenda items which support proposals around good governance and improving sustainability practices;

· portfolio exposure to best-in-class issuers, as defined by proprietary ESG ratings; The rating distribution for this Fund as of 28 February 2025 is:

· AAA:43%

· AA: 51%

· A: 6%

· B: 0%

· The Fund measures the proportion of companies that have set, and have committed to set, science-based targets for greenhouse gas emissions reductions or are climate solutions providers; 66.48%

… And compared to previous periods?

The general sustainability indicators are in line with those in the previous period.

Note: In prior reporting periods, certain PAIs were labelled with USD in the unit of measure. This reflected the currency used in underlying financial data and did not affect the calculation methodology or results. For consistency with RTS Annex I, currency references have been removed from the unit labels as of 2026. Prioryear figures have not been restated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund were in equity securities issued by companies which contributed to one of the following:

· through their products and services, to any one or more of the environmental or social objectives of the SDGs and their underlying targets and indicators determined through the Investment Manager's assessment for contribution;

· GHG intensity and emissions reduction targets across a firm's economic activities determined through a third party verified decarbonization target aligned to the Paris Agreement or is a climate solutions provider. Issuers are monitored for progress against targets through our engagement process;

In addition to contributing to one of the environmental or social objectives listed above, companies must go through a proprietary good governance evaluation and must pass the Do No Significant Harm (DNSH) criteria as further detailed below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used a combination of third party severe risk controversy scores, third-party global norms-based screening including UN Global Compact (UNGC) compliance, PAI consideration* and other material environmental, social, and governance factors, which were embedded in the Investment Manager's fundamental research and proprietary ESG ratings process, which included a governance evaluation, to review if investments cause significant harm to any sustainable investment objective.

Additionally, the Investment Manager used its engagement process to identify best in class securities.

*The PAIs taken into consideration were dependent on the Investment Manager's proprietary ESG materiality assessment by sub-sector which was applied during its ESG rating process or on data availability.

How were the indicators for adverse impacts on sustainability factors taken into account?

All PAIs which were material to the company being rated were considered as part of the Investment Manager's ESG rating which was applied as part of the security selection process.

The manner in which PAIs were considered and taken into account is set out in further detail below.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager supports the principles of the UNGC. Therefore, the Fund did not invest in companies that violated any of the ten principles in each of the four areas (human rights, labour, environment, and anti-corruption) of the UNGC.

The Investment Manager used a third-party data provider who monitored compliance with UNGC principles. In instances where there were discrepancies or disagreements between the Investment Manager's research and the provider's assessment of a specific controversy, the Investment Manager, along with the compliance team and members of the ESG team engaged the company on the issue. Where the Investment Manager reached a consensus that the company had taken the necessary steps to address the controversy, or had effectively remediated the issue, the Investment Manager provided a detailed explanation for why the company continued to be invested in.

To ensure sustainable investments were aligned with the OECD guidelines, the Investment Manager used a third-party provider as a best effort to monitor compliance and potential violations.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

All PAIs which were material to the company being rated were considered as part of the Investment Manager's ESG rating which was applied as part of the security selection process, specifically:

PAI #1 (GHG Emissions), PAI #2 (Carbon Footprint), PAI #3 (GHG Intensity)

The Investment Manager assessed the specific climate-related risks and opportunities faced by individual companies as part of its stock selection process, which integrated these considerations, among other environmental, social and governance considerations;

While the Investment Manager assesses each sector on a specific set of criteria that was pertinent to its business operations, the assessment generally included careful consideration of climate-related factors such as: the regulatory/policy environment; the geographic location of assets and operations; the ability to pass on costs to customers; technology alternatives and advancements; changing customer preferences; commodity prices; future capital expenditure and R&D plans; long-term business strategy; overall quality of the management team; and other factors; and

The Investment Manager used MSCI Carbon Portfolio Analytics to assess exposure to companies with fossil fuel reserves. The Investment Manager conducted carbon intensity analysis on the firm's investments in aggregate to understand the carbon intensity of the firm's total assets relative to the global equity markets. The Investment Manager also conducted analysis on carbon intensity at the portfolio level.

PAI #4 (Exposure to companies active in the fossil fuel sector)

The Fund did not invest in a company whose primary business involved the extraction of fossil fuels.

PAI #7 (Activities negatively affecting biodiversity-sensitive areas)

While the Fund does not currently have formal thresholds on exclusions related to biodiversity issues, it was taken into consideration among the broader environmental and climate impact assessment for investments and potential investments of the Fund. The Fund expects all companies invested in to have a positive biodiversity profile and any transgressions could result in exclusion from investment.

PAI #10 (Violation of UNGC / OECD Guidelines)

Please refer to "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?"

PAI #13 (Board gender diversity)

The Investment Manager uses third-party data for board gender diversity monitoring. Further, the Investment Manager has a provision in its Proxy Voting Policy to vote against the nominating committee members and chair if the company does not have at least one female board director. The Investment Manager considered Diversity, Equality and Inclusion as a component of its ESG analysis and rating, as well as a firm-wide theme for company engagement.

PAI #14 (Exposure to controversial weapons)

The Fund did not invest in companies that generate any of their turnover from the production and/or distribution of controversial weapons (i.e., antipersonnel mines, nuclear weaponry, biological & chemical weaponry, cluster munitions, white phosphorus).

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

What was the proportion of sustainability-related investments?

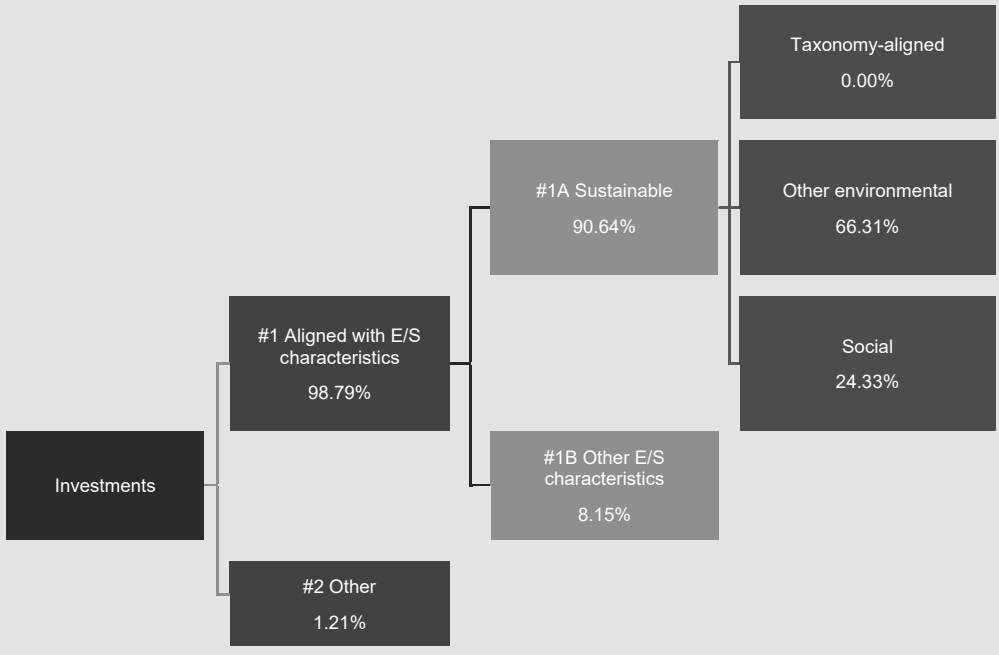
The proportion of sustainability-related investments was 90.64%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

A portion of 98.79% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (1.21%) was not aligned with the promoted characteristics and consisted primarily of liquid assets.

Out of the Fund's portfolio segment which is aligned with the promoted environmental and/or social characteristics, the Fund invested 90.64% of its portfolio in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

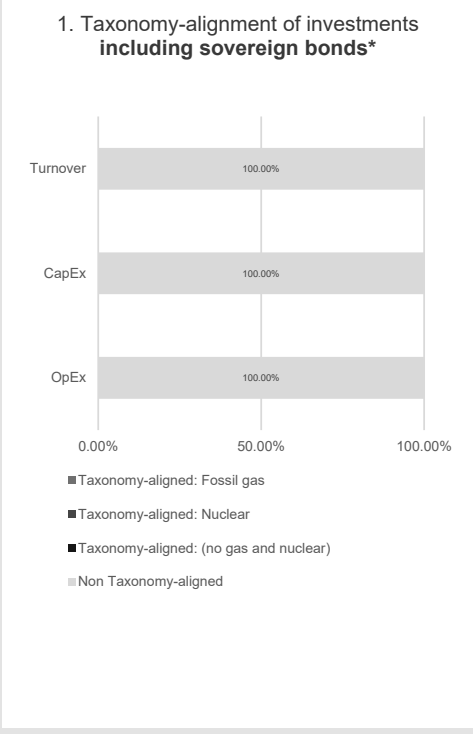
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

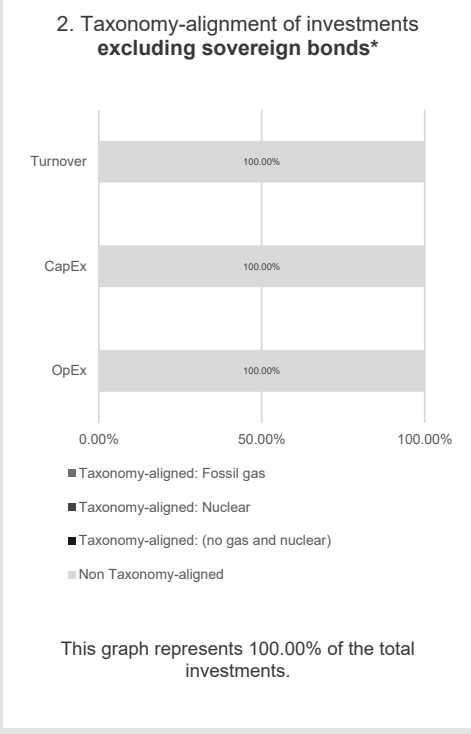
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

As a result of the investment strategy of the Fund, the Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy and, accordingly as of 28-02-2026, 66.31% of the portfolio of the Fund was comprised of investments with an environmental objective not aligned with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 24.33%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under "#2 Other" was 1.21% and comprised of cash held on deposit and derivative instruments used for hedging and derivatives for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. The Investment Manager utilized its proprietary rating system and fundamental research to identify Sustainability Leaders, including a good governance screen. The rating system consisted of four rating levels: AAA, AA, A and B, which were assigned to companies based on their sustainability strategy and performance key ESG issues. All companies in the Fund have been rated. The Investment Manager considers AAA and AA to be "best-in-class". The rating distribution for this Fund as of 28 February 2026 was:

· AAA: 43%

· AA: 51%

· A: 6%

· B: 0%

1. The Investment Manager continuously engaged with its portfolio companies. ESG engagement at ClearBridge generally had two overlapping objectives:

· Research: Gaining a better understanding of ESG issues that could impact our investment thesis

· Impact: Encouraging specific changes at the company that could lead to positive real-world impact

For more details on our engagement approach, please refer to our Engagement and Stewardship policy found here: https://franklintempletonprod.widen.net/content/qz5ty08kfn/original/engagementstewardshippolicy.pdf

2. The Fund did not invest in its set revenue thresholds, as outlined in the prospectus, for the following industries:

· Fossil fuels

· Tobacco

· Controversial weapons

· Conventional weapons

· Nuclear Power

· Gambling

· Adult entertainment

3. The Fund did not invest in companies that violate one or several of the ten principles under the four areas covered by UNGC (human rights, labour, environment and anti-corruption).

4. The Investment Manager maintained a portfolio ESG rating higher than that of the Fund’s investment universe.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF ClearBridge Global Growth Leaders Fund (the "Fund")

Legal Entity Identifier: 549300S2ND6DHQ60NF78

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 56.08% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In selecting securities during the reporting period, the Investment Manager used an established proprietary research and engagement process to determine a company's profile on environmental, social and governance ("ESG") issues. This proprietary process generated an ESG ratings system that utilized a materiality map to identify specific ESG characteristics that pertained to the investment. The environmental and/or social characteristics promoted by the Fund were key (ESG) issues deemed material to the specific company and the sector in which the company operates which included, but were not limited to, health and safety, gender diversity, climate risk, corporate governance risk and data security.

Additionally, the Fund has maintained its committed 50% percent "sustainable investment" minimum.

Derivative instruments have not been used to attain the environmental / social characteristics promoted by the Fund.

No index has been designated as a reference benchmark for the purpose of attaining the environmental /social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund were:

· 56.08% of the Fund held in sustainable investments as defined under the Investment Manager's proprietary sustainable investments methodology which includes product and/or service alignment with the United Nations Sustainable Development Goals ("SDG") and consideration of Do No Significant Harm (DNSH);

· specific Principal Adverse Impact (PAI) indicators, namely: PAI #1 (GHG Emissions), PAI #2 (Carbon Footprint), PAI #3 (GHG Intensity), PAI #10 (Violations of UN Global Compact and OECD Guidelines), PAI #13 (Board Gender Diversity) and PAI #14 (Exposure to controversial weapons) were calculated. Please refer to the values disclosed in the section "How did this financial product consider principal adverse impacts on sustainability factors?";

· proprietary methodologies to assess the progress of the Investment Manager's ESG engagement meetings; ClearBridge conducted periodic ESG engagements with its portfolio companies. Investment team's views of progress discussed during these meetings were reflected in their proprietary ESG ratings, proxy voting decisions, and investments decisions

· voted on 1235 agenda items which support proposals around good governance and improving sustainability practices;

· portfolio exposure to best-in-class companies as determined by the Investment Manager's proprietary ESG rating. The rating distribution for this Fund as of 28 February 2026 is:

AAA: 19%

AA: 65%

A: 15%

B: 0%

		PAI historical comparison

… And compared to previous periods?

The general sustainability indicators are in line with those in the previous period.

Note: In prior reporting periods, certain PAIs were labelled with USD in the unit of measure. This reflected the currency used in underlying financial data and did not affect the calculation methodology or results. For consistency with RTS Annex I, currency references have been removed from the unit labels as of 2026. Prioryear figures have not been restated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund are in equity securities issued by companies which contribute to one of the following:

· through their products and services, to any one or more of the environmental or social objectives of the SDGs and their underlying targets and indicators determined through the Investment Manager's assessment for contribution;

· GHG intensity and emissions reduction targets across a firm's economic activities determined through a third party verified decarbonization target aligned to the Paris Agreement;

In addition to contributing to one of the environmental or social objectives listed above, companies must go through a proprietary good governance evaluation and must pass the Do No Significant Harm (DNSH) criteria as further detailed below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used a combination of third party severe risk controversy scores, third-party global norms-based screening including UN Global Compact (UNGC) compliance, PAI consideration* and other material environmental, social, and governance factors, which were embedded in the Investment Manager's fundamental research and proprietary ESG ratings process, which included a governance evaluation, to review if investments cause significant harm to any sustainable investment objective.

Additionally, the Investment Manager used its engagement process to identify best in class securities.

*The PAIs taken into consideration were dependent on the Investment Manager's proprietary ESG materiality assessment by sub-sector which was applied during its ESG rating process or on data availability.

How were the indicators for adverse impacts on sustainability factors taken into account?

All PAIs which were material to the company being rated were considered as part of the Investment Manager's ESG rating which was applied as part of the security selection process.

The manner in which PAIs were considered and taken into account is set out in further detail below.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager supports the principles of the UNGC. Therefore, the Fund did not invest in companies that violated any of the ten principles in each of the four areas (human rights, labour, environment, and anti-corruption) of the UNGC.

The Investment Manager used a third-party data provider who monitored compliance with UNGC principles. In instances where there were discrepancies or disagreements between the Investment Manager's research and the provider's assessment of a specific controversy, the Investment Manager, along with the compliance team and members of the ESG team engaged the company on the issue. Where the Investment Manager reached a consensus that the company had taken the necessary steps to address the controversy, or had effectively remediated the issue, the Investment Manager provided a detailed explanation for why the company continued to be invested in.

To ensure sustainable investments were aligned with the OECD guidelines, the Investment Manager used a third-party provider as a best effort to monitor compliance and potential violations.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

All PAIs which were material to the company being rated were considered as part of the Investment Manager's ESG rating which was applied as part of the security selection process, specifically:

PAI #1 (GHG Emissions), PAI #2 (Carbon Footprint), PAI #3 (GHG Intensity)

The Investment Manager assessed the specific climate-related risks and opportunities faced by individual companies as part of its stock selection process, which integrated these considerations, among other environmental, social and governance considerations;

While the Investment Manager assessed each sector on a specific set of criteria that was pertinent to its business operations, the assessment generally included careful consideration of climate-related factors such as: the regulatory/policy environment; the geographic location of assets and operations; the ability to pass on costs to customers; technology alternatives and advancements; changing customer preferences; commodity prices; future capital expenditure and R&D plans; long-term business strategy; overall quality of the management team; and other factors; and

The Investment Manager used MSCI Carbon Portfolio Analytics to assess exposure to companies with fossil fuel reserves. The Investment Manager conducted carbon intensity analysis on the firm's investments in aggregate to understand the carbon intensity of the firm's total assets relative to the global equity markets. The Investment Manager can also conduct analysis on carbon intensity at the portfolio level.

PAI #4 (Exposure to companies active in the fossil fuel sector)

The Fund did not invest in companies whose primary business involves the extraction of fossil fuels, in line with the binding elements. The Fund may hold limited exposure to companies active in other segments of the fossil fuel value chain, as reflected in PAI #4.

PAI #10 (Violation of UNGC / OECD Guidelines)

Please refer to "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?".

PAI #13 (Board gender diversity)

The Investment Manager uses third-party data for board gender diversity monitoring. Further, on a case-by-case basis, the Investment Manager has a provision in its Proxy Voting Policy to vote with respect to the nominating committee members and chair if the company does not have at least one female or ethnically/racially diverse board director. The Investment Manager considered Diversity as a component of its ESG analysis and rating, as well as a firm-wide theme for company engagement.

PAI #14 (Exposure to controversial weapons)

The Fund did not invest in companies that generate any of their turnover from the production and/or distribution of controversial weapons (i.e., antipersonnel mines, nuclear weaponry, biological & chemical weaponry, and cluster munitions).

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

Largest investments	Sector	% of Assets	Country

What was the proportion of sustainability-related investments?

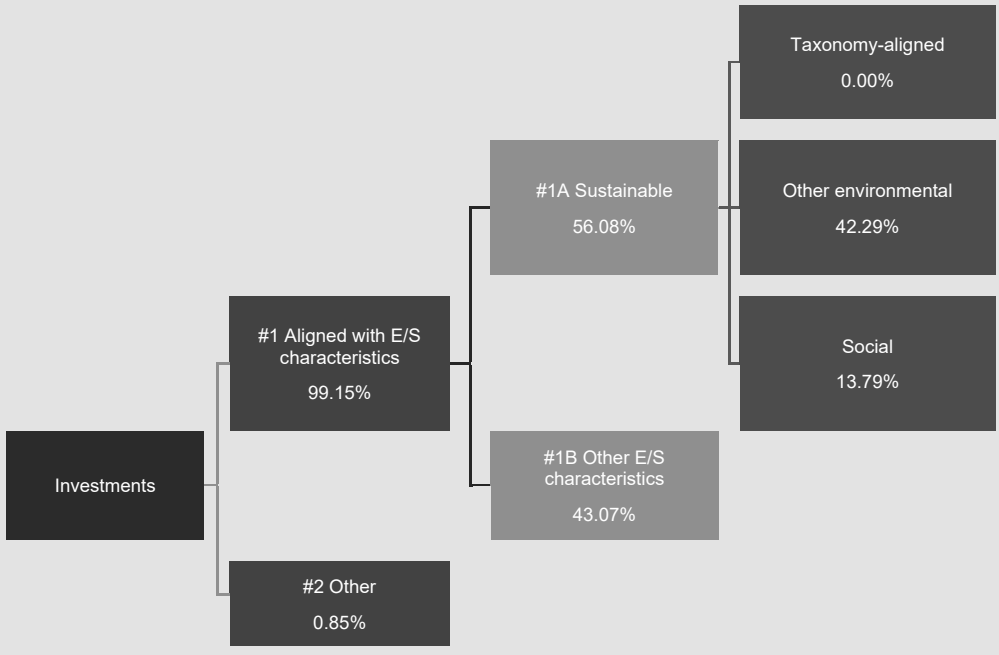
The proportion of sustainability-related investments was 56.08%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

A portion of 99.15% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (0.85%) was not aligned with the promoted characteristics and consisted primarily of liquid assets.

Out of the Fund's portfolio segment which is aligned with the promoted environmental and/or social characteristics, the Fund invested 56.08% of its portfolio in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

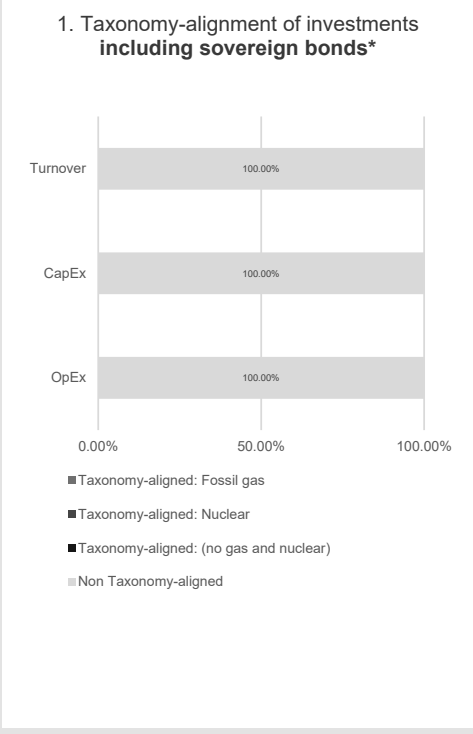
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

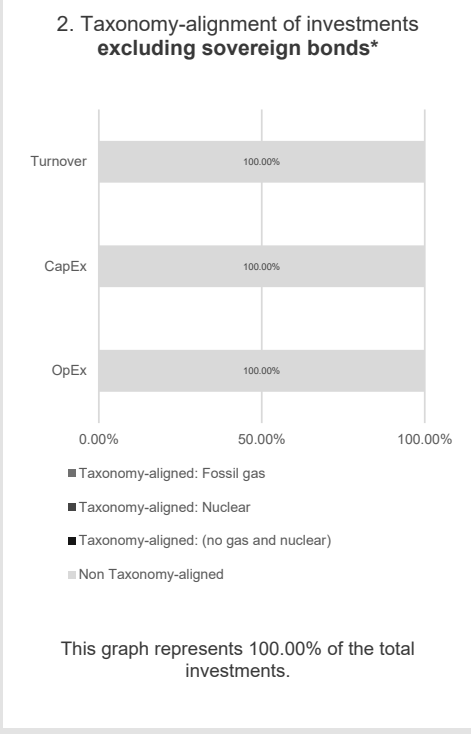
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

As a result of the investment strategy of the Fund, the Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy and, accordingly, 42.29% of the portfolio of the Fund was comprised of investments with an environmental objective not aligned with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 13.79%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under "#2 Other" was 0.85% and comprised of cash held on deposit and derivative instruments used for hedging and derivatives for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. The Investment Manager utilized its proprietary rating system and fundamental research to assess how a company manages its ESG risks and opportunities, including good governance screen. The rating system consisted of four rating levels: AAA, AA, A and B, which were assigned to companies based on their sustainability strategy and performance key ESG issues. All companies in the Fund were rated. The rating distribution for this Fund as of 28 February 2026 was:

AAA: 19%

AA: 65%

A: 15%

B: 0%

1. The Investment Manager continuously engaged with its portfolio companies including engaging with the bottom 10% (in terms of AUM and number of issuers) of the portfolio per the Investment Manager’s proprietary ESG rating system. ESG engagement at ClearBridge generally had two overlapping objectives:

· Research: Gaining a better understanding of ESG issues that could impact our investment thesis

· Impact: Encouraging specific changes at the company that could lead to positive real-world impact

For more details on our engagement approach, please refer to our Engagement and Stewardship policy found here: https://franklintempletonprod.widen.net/content/qz5ty08kfn/original/engagementstewardshippolicy.pdf

2. The Fund did not invest in or its set revenue thresholds, as outlined in the prospectus, for the following industries:

· Tobacco

· Controversial weapons

· Companies with significant involvement in the extraction and/or production of fossil fuels and mining.

3. The Fund did not invest in companies that violate one or several of the ten principles under the four areas covered by UNGC (human rights, labour, environment and anti-corruption).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF ClearBridge Infrastructure Value Fund (the "Fund")

Legal Entity Identifier: 549300C63RJNQRH38W57

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.96% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted a positive impact with respect to:

· Climate change mitigation;

· Climate change adaptation; and/or

· Social impact.

The promotion of a positive impact in the above areas resulted in the Fund promoting the following environmental and/or social characteristics during the reference period:

· investments that support the transition to a low carbon economy, either through direct reduction in emissions, enabling of lower emission alternatives or the provision of lower emissions substitute products or services such as rail transport versus air or road alternatives;

· infrastructure investments supporting adaptation to climate change;

· infrastructure that supports social impact, such as provision of fair access to essential services, for example access to water, energy and communications; and

· compliance with the UN Global Compact (UNGC) principles.

In selecting securities during the reporting period, the Investment Manager used an established proprietary research and engagement process to determine a company's profile on environmental, social and governance ("ESG") issues. This proprietary process includes an ESG ratings system that utilizes a materiality map to identify specific ESG characteristics that pertain to the investment.

The Investment Manager applied its ESG process to all investments during the period. In addition, the Fund met its committed 15% percent "sustainable investment" minimum.

Derivative instruments have not been used to attain the environmental / social characteristics promoted by the Fund.

No index has been designated as a reference benchmark for the purpose of attaining the environmental /social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund were:

· the proportion of the Fund held in sustainable investments as defined by the Investment Manager's proprietary sustainable investments methodology was 57.96%; and

· the Fund's portfolio ESG rating (7.38) compared to the ESG rating of the investment universe (6.72), as seen in the table below;

Where the ESG scores are based on MSCI data, equal weighted for the "Investable universe ESG rating" and portfolio weighted for the "Fund ESG rating". Additionally, we note, the Fund performance exceeds the Investable universe rating utilising other external ESG rating providers. The Fund's "investable universe" includes 200 infrastructure stocks collectively called the RARE200, reviewed quarterly as part of the investment process.

… And compared to previous periods?

The general sustainability indicators are in line with those in the previous period.

Note: In prior reporting periods, certain PAIs were labelled with USD in the unit of measure. This reflected the currency used in underlying financial data and did not affect the calculation methodology or results. For consistency with RTS Annex I, currency references have been removed from the unit labels as of 2025. Prioryear figures have not been restated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Given the Fund's infrastructure mandate to invest in core infrastructure assets and the important role infrastructure plays in both the provision of essential services and energy transition, the Fund held investments that contributed to the sustainable objectives relating to climate change mitigation and/or adaptation objectives, and/or made a positive social contribution.

Of the Sustainable Investments the key contributions to the objectives included:

· Electric utility and Renewables companies supporting the transition to a low carbon economy and thus climate change mitigation

· Lower emission mobility infrastructure supporting the transition to a lower carbon economy and thus climate change mitigation

· Water utilities that support adaptation to climate change and social impact by providing access to essential clean reliable water

· Communications infrastructure that may provide an alternative to transport as well as social impact by providing access to essential services

The above was initially assessed by considering the contributions to one or both of the following:

· SDG alignment of products and services

· GHG intensity and emissions reduction targets across a firm's economics activities determined through a third party verified decarbonization target aligned to the Paris Agreement

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used a combination of third party severe risk controversy scores, third-party global norms-based screening including UN Global Compact (UNGC) compliance, PAI consideration* and other material environmental, social, and governance factors, which were embedded in the Investment Manager's fundamental research and proprietary ESG ratings process, which included a good governance evaluation, to review if investments caused significant harm to any sustainable investment objective.

Additionally, the Investment Manager used its engagement process to identify best in class securities.

*The PAIs taken into consideration were dependent on the Investment Manager's proprietary ESG materiality assessment by sub-sector which was applied during its ESG rating process or on data availability.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager's investment process integrated ESG via a bottom-up research-driven approach that utilised many data sources, including PAIs. PAI's were considered in the context of the relevant infrastructure sub-sector.

The manner in which PAIs were considered and taken into account is set out in further detail below.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager supports the principles of the UNGC. Therefore, the Fund did not invest in companies that violated any of the ten principles in each of the four areas (human rights, labour, environment, and anti-corruption) of the UNGC.

The Investment Manager used a third-party data provider who monitored compliance with UNGC principles. In instances where there were discrepancies or disagreements between the Investment Manager's research and the provider's assessment of a specific controversy, the Investment Manager, along with the compliance team and members of the ESG team engaged the company on the issue. Where the Investment Manager reached a consensus that the company had taken the necessary steps to address the controversy, or had effectively remediated the issue, the Investment Manager provided a detailed explanation for why the company continued to be invested in.

To ensure sustainable investments were aligned with the OECD guidelines, the Investment Manager used a third-party provider as a best effort to monitor compliance and potential violations.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAIs were considered as part of the Investment Manager's broad ESG process as well as the consideration of the do no significant harm (DNSH) principle. The ESG processes where PAIs were considered were: (i) the proprietary ESG score; (ii) controversy monitoring and ongoing engagement; and (iii) qualitative ESG considerations.

The following PAIs were considered:

PAI #1 (GHG Emissions), PAI #2 (Carbon Footprint), PAI #3 (GHG Intensity)

The Investment Manager assessed the specific climate-related risks and opportunities faced by individual companies as part of its bottom-up stock selection process, which integrated GHG data, among other environmental, social and governance considerations. Each infrastructure sub-sector was assessed against a weighting of factors relevant to its business operations. Company management of GHG emissions, including credible reduction plans, is also considered as part of this process.

PAI #5 (Share of non-renewable energy production)

The Investment Manager assessed energy generation mix as part of its bottom-up research assessment, particularly as it pertains to climate change and Net Zero goals. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria. The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

PAI #10 (Violations of UNGC / OECD Guidelines)

The fund did not invest in companies that violated any of the ten principles in each of the four areas (human rights, labour, environment, and anti-corruption) of the UNGC. To ensure sustainable investments were aligned with the OECD guidelines, the Investment Manager used a third-party provider as a best effort to monitor compliance and potential violations.

PAI #14 (Exposure to controversial weapons)

The Fund does not, and did not, invest in companies that generate any turnover from (a) banned weapons according to (i) The Convention of the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on their Destruction and (ii) The Convention on the Prohibition of Cluster Munitions and (b) weapons classed as either B- or C- weapons pursuant to the United Nations Biological Weapons Convention and the United Nations Chemical Weapons Convention respectively.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

Largest investments	Sector	% of Assets	Country
SEVERN TRENT PLC	Utilities	4.96%	United Kingdom
Ferrovial SE	Industrials	4.76%	Netherlands

What was the proportion of sustainability-related investments?

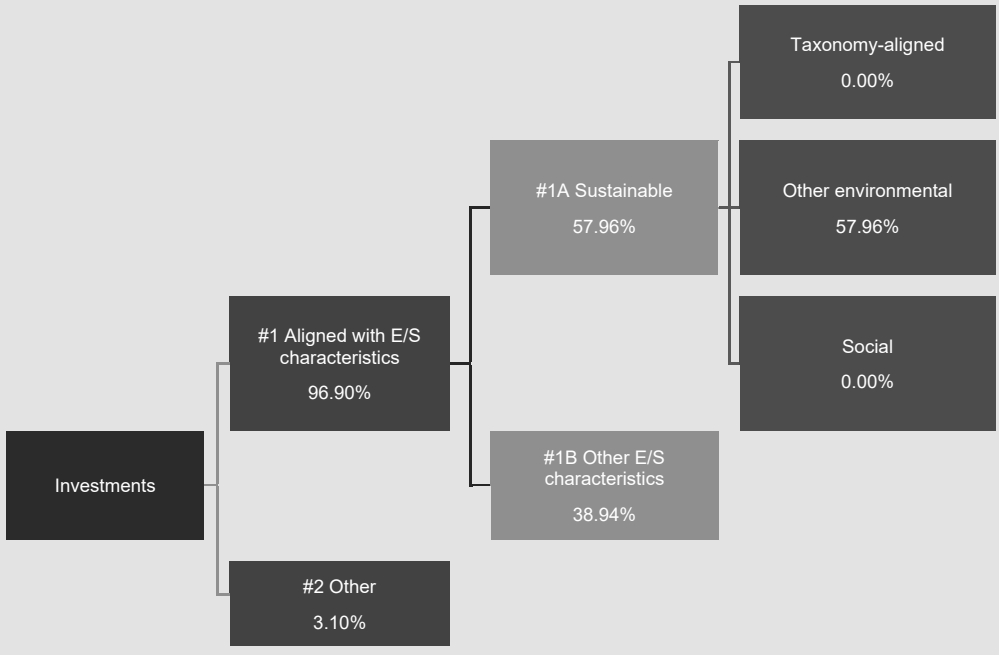
The proportion of sustainability-related investments was 57.96%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

A portion of 96.90% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (3.10%) was not aligned with the promoted characteristics and consisted primarily of liquid assets.

Out of the Fund's portfolio segment which is aligned with the promoted environmental and/or social characteristics, the Fund invested 57.96% of its portfolio in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison

Social	N/A	N/A	N/A	N/A

In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Utilities	57.18%
Industrials	29.26%
Energy	10.46%
Top sub-sector	**% of Assets**
Electric Utilities	32.42%
Multi-Utilities	14.37%
Transportation Infrastructure	12.88%
Oil, Gas & Consumable Fuels	10.46%
Construction & Engineering	8.96%
Ground Transportation	7.42%
Water Utilities	5.68%
Gas Utilities	2.48%
Independent Power & Renewable Electricity Producers	2.24%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

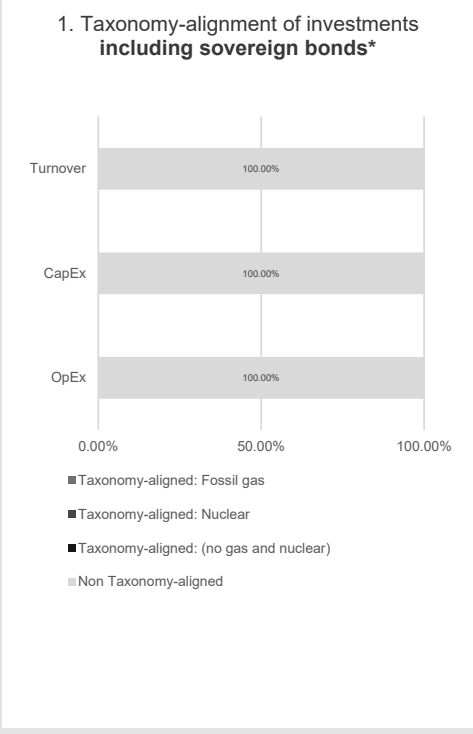
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

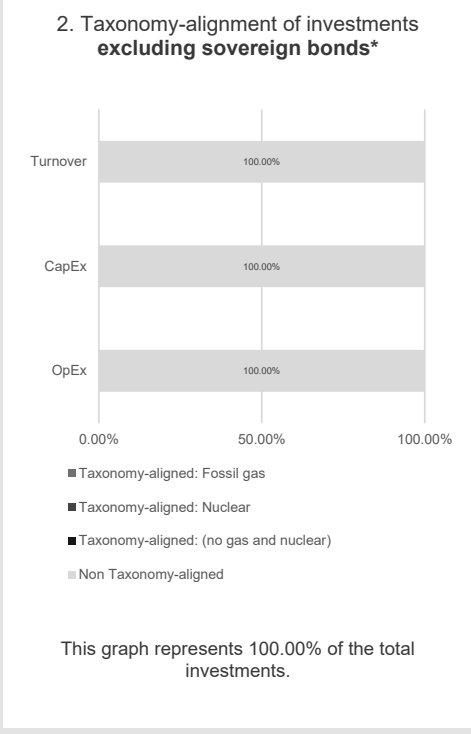
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

As a result of the investment strategy of the Fund, the Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy and, accordingly as of 28-02-2026, 57.96% of the portfolio of the Fund was comprised of investments with an environmental objective not aligned with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 0.00%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under "#2 Other" was 3.10% and comprised of cash held on deposit and derivative instruments used for hedging and derivatives for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. The Investment Manager consistently applied its ESG process, that is integrated and considered in all key elements of the investments process.

This included:

· Negative screens at investable universe construction to respect limits for extraction and productions of fossil fuels, tobacco, weapons and UNGC failures

· Applied its Three Pillar process for ESG integration, namely:

· Forecasted cashflow adjustments based on ESG factors

· Required return adjustment based on ESG risk as assessed by the Managers proprietary scorecard (see below)

· Engagement, including controversy monitoring

· Other ESG analysis and processes including, but not limited to, Sustainability Reviews of company ESG scorecards, energy mix analysis and decarbonisation plans, PAI consideration and so on.

Some of the above actions are further described with outcomes below.

1. The Investment Manager utilized its proprietary rating system and fundamental research to assess how a company manages its ESG risks and opportunities. The rating system consisted of four rating levels: AAA, AA, A and B, which are assigned to companies based on their sustainability strategy and performance key ESG issues. All companies in the Fund have been rated. The rating distribution for this Fund as of 28 February 2025 is:

· AAA: 13%

· AA: 87%

· A: 0%

· B:0%

2. The Investment Manager engaged with its portfolio companies on an ongoing basis. ESG engagement at ClearBridge generally had two overlapping objectives:

· Research: Gaining a better understanding of ESG issues that could impact our investment thesis

· Impact: Encouraging specific changes at the company that could lead to positive real-world impact

The Fund's engagements over the reporting were as follows:

· Environmental: 67%

· Social: 60%

· Governance: 80%

3. The result was the Fund respected the binding elements of its investment strategy.

4. The Fund maintained a portfolio ESG rating higher than that of the Fund’s investment universe.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF ClearBridge Global Infrastructure Income Fund (the "Fund")

Legal Entity Identifier: 54930016JDVIT9OWQK33

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 53.68% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted a positive impact with respect to:

· Climate change mitigation;

· Climate change adaptation; and/or

· Social impact.

The promotion of a positive impact in the above areas resulted in the Fund promoting the following environmental and/or social characteristics during the reference period:

· investments that support the transition to a low carbon economy, either through direct reduction in emissions, enabling of lower emission alternatives or the provision of lower emissions substitute products or services such as rail transport versus air or road alternatives;

· infrastructure investments supporting adaptation to climate change;

· infrastructure that supports social impact, such as provision of fair access to essential services, for example access to water, energy and communications; and

· compliance with the UN Global Compact (UNGC) principles.

In selecting securities during the reporting period, the Investment Manager used an established proprietary research and engagement process to determine a company's profile on environmental, social and governance ("ESG") issues. This proprietary process includes an ESG ratings system that utilizes a materiality map to identify specific ESG characteristics that pertain to the investment.

The Investment Manager applied its ESG process to all investments during the period. In addition, the Fund met its committed 15% percent "sustainable investment" minimum.

Derivative instruments have not been used to attain the environmental / social characteristics promoted by the Fund.

No index has been designated as a reference benchmark for the purpose of attaining the environmental /social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund were:

· the proportion of the Fund held in sustainable investments as defined by the Investment Manager's proprietary sustainable investments methodology was 53.68%; and

· the Fund's portfolio ESG rating (7.16) compared to the ESG rating of the investment universe (6.87, as seen in the table below;

Where the ESG scores are based on MSCI data, equal weighted for the "Investable universe ESG rating" and portfolio weighted for the "Fund ESG rating". Additionally, we note the Fund performance exceeds the Investable universe rating utilising other external ESG rating providers.

… And compared to previous periods?

The general sustainability indicators are largely in line with those in the previous period.

Note: In prior reporting periods, certain PAIs were labelled with USD in the unit of measure. This reflected the currency used in underlying financial data and did not affect the calculation methodology or results. For consistency with RTS Annex I, currency references have been removed from the unit labels as of 2026. Prioryear figures have not been restated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Given the Fund's infrastructure mandate to invest in core infrastructure assets and the important role infrastructure plays in both the provision of essential services and energy transition, the Fund held investments that contributed to sustainable objectives relating to climate change mitigation and/or adaptation objectives, as well as made a positive social contribution.

Of the Sustainable Investments the key contributions to the objectives included:

· Electric utilities and renewables companies supporting the transition to a low carbon economy and thus climate change mitigation

· Lower emission mobility infrastructure supporting the transition to a lower carbon economy and thus climate change mitigation

· Water utilities that support adaptation to climate change and social impact by providing access to essential clean reliable water

· Communications infrastructure that may provide an alternative to transport as well as social impact by providing access to essential services

The above was initially assessed by considering the contributions to one or both of the following:

· SDG alignment of products and services

· GHG intensity and emissions reduction targets across a firm's economics activities determined through a third party verified decarbonization target aligned to the Paris Agreement

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used a combination of third party severe risk controversy scores, third-party global norms-based screening including UN Global Compact (UNGC) compliance, PAI consideration* and other material environmental, social, and governance factors, which were embedded in the Investment Manager's fundamental research and proprietary ESG ratings process, which included a good governance evaluation, to review if investments caused significant harm to any sustainable investment objective.

Additionally, the Investment Manager used its engagement process to identify best in class securities.

*The PAIs taken into consideration were dependent on the Investment Manager's proprietary ESG materiality assessment by sub-sector which was applied during its ESG rating process or on data availability.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager's investment process integrated ESG via a bottom-up research-driven approach that utilised many data sources, including PAIs. PAI's were considered in the context of the relevant infrastructure sub-sector.

The manner in which PAIs were considered and taken into account is set out in further detail below.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager supports the principles of the UNGC. Therefore, the Fund did not invest in companies that violated any of the ten principles in each of the four areas (human rights, labour, environment, and anti-corruption) of the UNGC.

The Investment Manager used a third-party data provider who monitored compliance with UNGC principles. In instances where there were discrepancies or disagreements between the Investment Manager's research and the provider's assessment of a specific controversy, the Investment Manager, along with the compliance team and members of the ESG team engaged the company on the issue. Where the Investment Manager reached a consensus that the company had taken the necessary steps to address the controversy, or had effectively remediated the issue, the Investment Manager provided a detailed explanation for why the company continued to be invested in.

To ensure sustainable investments were aligned with the OECD guidelines, the Investment Manager used a third-party provider as a best effort to monitor compliance and potential violations.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAIs were considered as part of the Investment Manager's broad ESG process as well as the consideration of the do no significant harm (DNSH) principle. The ESG processes where PAIs were considered were: (i) the proprietary ESG score; (ii) controversy monitoring and ongoing engagement; and (iii) qualitative ESG considerations.

The following PAIs were considered:

PAI #1 (GHG Emissions), PAI #2 (Carbon Footprint), PAI #3 (GHG Intensity)

The Investment Manager assessed the specific climate-related risks and opportunities faced by individual companies as part of its bottom-up stock selection process, which integrated GHG data, among other environmental, social and governance considerations. Each infrastructure sub-sector was assessed against a weighting of factors relevant to its business operations. Company management of GHG emissions, including credible reduction plans, were also considered as part of this process.

PAI #5 (Share of non-renewable energy production)

The Investment Manager assessed energy generation mix as part of its bottom-up research assessment, particularly as it pertains to climate change and Net Zero goals.

PAI #10 (Violations of UNGC / OECD Guidelines)

The fund did not invest in companies that violated any of the ten principles in each of the four areas (human rights, labour, environment, and anti-corruption) of the UNGC. To ensure sustainable investments were aligned with the OECD guidelines, the Investment Manager used a third-party provider as a best effort to monitor compliance and potential violations.

PAI #14 (Exposure to controversial weapons)

The Fund does not, and did not, invest in companies that generate any turnover from (a) banned weapons according to (i) The Convention of the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on their Destruction and (ii) The Convention on the Prohibition of Cluster Munitions and (b) weapons classed as either B- or C- weapons pursuant to the United Nations Biological Weapons Convention and the United Nations Chemical Weapons Convention respectively.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

Largest investments	Sector	% of Assets	Country

What was the proportion of sustainability-related investments?

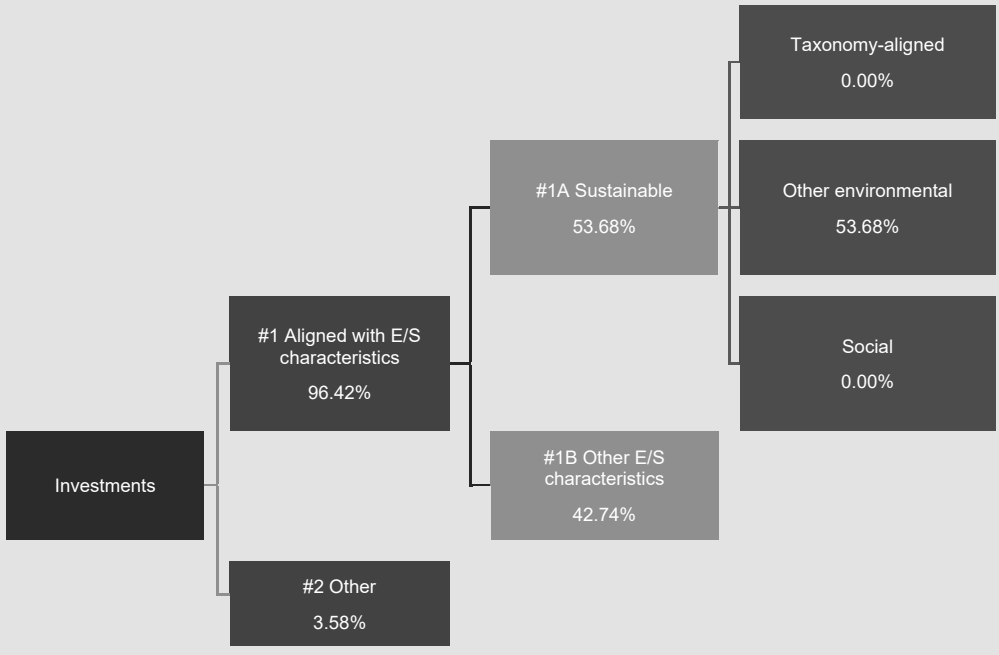
The proportion of sustainability-related investments was 53.68%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

A portion of 96.42% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (3.58%) was not aligned with the promoted characteristics and consisted primarily of liquid assets.

Out of the Fund's portfolio segment which is aligned with the promoted environmental and/or social characteristics, the Fund invested 53.68% of its portfolio in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Construction & Engineering	3.58%
Specialized REITs	1.59%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

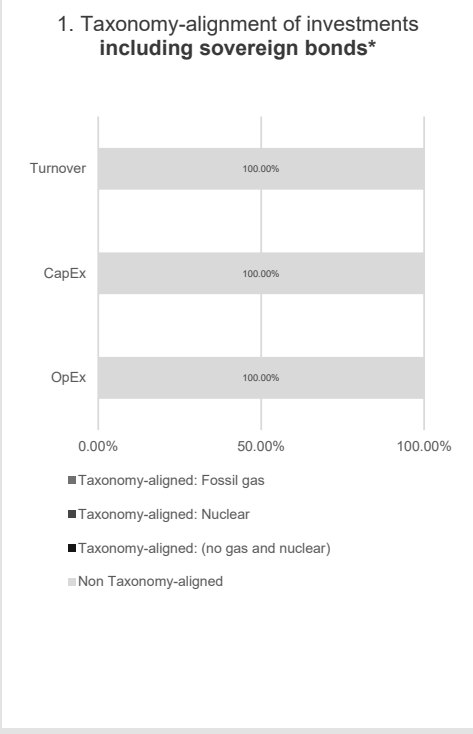
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

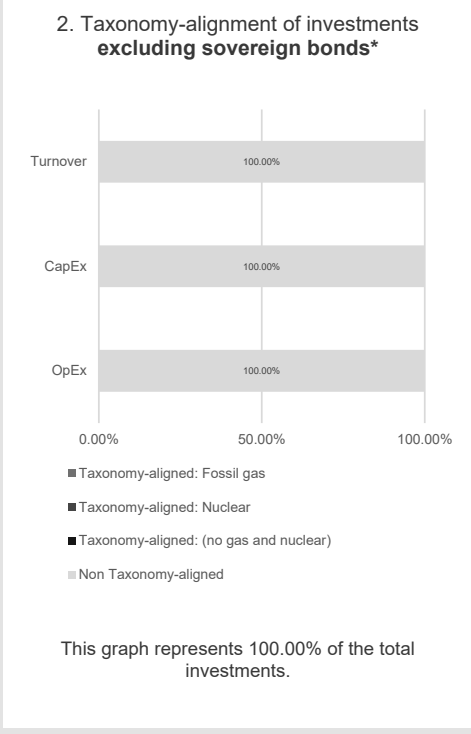
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

As a result of the investment strategy of the Fund, the Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy and, accordingly, 53.68% of the portfolio of the Fund was comprised of investments with an environmental objective not aligned with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 0.00%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under "#2 Other" was 3.58% and comprised of cash held on deposit and derivative instruments used for hedging and derivatives for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. The Investment Manager consistently applied its ESG process, that is integrated and considered in all key elements of the investments process.

This included:

· Negative screens at investable universe construction to respect limits for extraction and productions of fossil fuels, tobacco, weapons and UNGC failures

· The application of its Three Pillar process for ESG integration, namely:

· Forecasted cashflow adjustments based on ESG factors

· Required return adjustment based on ESG risk as assessed by the Managers proprietary scorecard (see below)

· Engagement, including controversy monitoring

· Other ESG analysis and processes including, but not limited to, Sustainability Reviews of company ESG scorecards, energy mix analysis and decarbonisation plans, PAI consideration and so on.

Some of the above actions are further described with outcomes below.

1. The Investment Manager utilized its proprietary rating system and fundamental research to assess how a company manages its ESG risks and opportunities. The rating system consisted of four rating levels: AAA, AA, A and B, which are assigned to companies based on their sustainability strategy and performance key ESG issues. All companies in the Fund have been rated. The rating distribution for this Fund as of 28 February 2026 is:

· AAA: 13%

· AA: 81%

· A: 6%

· B: 0%

2. The Investment Manager engaged with its portfolio companies on an ongoing basis. ESG engagement by the Investment Manager generally had two overlapping objectives:

· Research: Gaining a better understanding of ESG issues that could impact our investment thesis

· Impact: Encouraging specific changes at the company that could lead to positive real-world impact

The Fund's engagements over the reference period were as follows:

· Environmental: 59%

· Social:51%

· Governance: 86%

3. The result was the Fund respected the binding elements of its investment strategy.

4. The Fund maintained a portfolio ESG rating higher than that of the Fund’s investment universe.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF ClearBridge Global Value Improvers Fund (the "Fund")

FRANKLIN TEMPLETON

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60.34% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reporting period, the Fund promoted a range of environmental and social characteristics that the Investment Manager considered to be material to the specific company and the industry in which the company operated. These characteristics included, but were not limited to:

Environmental:

· Climate change mitigation

· Climate change adaptation

· Water

· Biodiversity

Social:

· Health & safety

· Gender diversity

· Financial inclusion

· Food security

· Clean water

Additionally, the Fund has maintained its committed 10% percent "sustainable investment" minimum.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund were:

· 60.3% of the Fund held in sustainable investments as defined under the Investment Manager's proprietary sustainable investments methodology which includes product and/or service alignment with the United Nations Sustainable Development Goals ("SDG") and consideration of Do No Significant Harm (DNSH);

· specific principal adverse impact ("PAI") indicators, specifically PAI #1 (GHG Emissions), PAI #2 (Carbon Footprint), PAI #3 (GHG Intensity), PAI #4 (Exposure to companies active in the fossil fuel sector), PAI #6 ((Water Usage and Recycling), PAI #7 (Activities negatively affecting biodiversity-sensitive areas), PAI #10 (Violations of the UN Global Compact and OECD Guidelines), PAI #13 (Board Gender Diversity), and PAI #14 (Exposure to controversial weapons) were calculated. Please refer to the values disclosed in the section "How did this financial product consider principal adverse impacts on sustainability factors?";

· voted on 623 agenda items which support proposals around good governance and improving sustainability practices;

· Portfolio exposure to companies that have set and committed to set, science-based greenhouse gas emissions reduction targets; 61.87%

		PAI historical comparison					
		2026		2025		2024

… And compared to previous periods?

The general sustainability indicators are in line with those in the previous period.

Note: In prior reporting periods, certain PAIs were labelled with USD in the unit of measure. This reflected the currency used in underlying financial data and did not affect the calculation methodology or results. For consistency with RTS Annex I, currency references have been removed from the unit labels as of 2026. Prioryear figures have not been restated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund were in equity securities issued by companies which contributed to at least one of the following:

· through their products and services, to any one or more of the environmental or social objectives of the SDGs and their underlying targets and indicators determined through the Investment Manager's assessment for contribution;

· GHG intensity and emissions reduction targets across a firm's economic activities determined through a third party verified decarbonization target aligned to the Paris Agreement or is a climate solutions provider;

In addition to contributing to one of the environmental or social objectives listed above, companies were evaluated by the Investment Manager's proprietary good governance screen and passed the Do No Significant Harm (DNSH) criteria as further detailed below.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager used a combination of third party severe risk controversy scores, third-party global norms-based screening including UN Global Compact (UNGC) compliance, PAI consideration* and other material environmental, social, and governance factors, which were embedded in the Investment Manager's fundamental research and proprietary ESG ratings process, which included a governance evaluation, to review if investments cause significant harm to any sustainable investment objective.

Additionally, the Investment Manager used its engagement process to identify best in class securities.

*The PAIs taken into consideration were dependent on the Investment Manager's proprietary ESG materiality assessment by sub-sector which was applied during its ESG rating process or on data availability.

How were the indicators for adverse impacts on sustainability factors taken into account?

All PAIs which were material to the company being rated were considered as part of the Investment Manager's ESG rating which was applied as part of the security selection process.

The manner in which PAIs were considered and taken into account is set out in further detail below.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager supports the principles of the UNGC. Therefore, the Fund did not invest in companies that violated any of the ten principles in each of the four areas (human rights, labour, environment, and anti-corruption) of the UNGC.

The Investment Manager used a third-party data provider who monitored compliance with UNGC principles. In instances where there were discrepancies or disagreements between the Investment Manager's research and the provider's assessment of a specific controversy, the Investment Manager, along with the compliance team and members of the ESG team engaged the company on the issue. Where the Investment Manager reached a consensus that the company had taken the necessary steps to address the controversy, or had effectively remediated the issue, the Investment Manager provided a detailed explanation for why the company continued to be invested in.

To ensure sustainable investments were aligned with the OECD guidelines, the Investment Manager used a third-party provider as a best effort to monitor compliance and potential violations.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

All PAIs which were material to the company being rated were considered as part of the Investment Manager's ESG rating which was applied as part of the security selection process, specifically:

PAI #1 (GHG Emissions), PAI #2 (Carbon Footprint), PAI #3 (GHG Intensity)

The Investment Manager assessed the specific climate-related risks and opportunities faced by individual companies as part of its stock selection process, which integrated these considerations, among other environmental, social and governance considerations.

While the Investment Manager assessed each sector on a specific set of criteria that was pertinent to its business operations, the assessment generally included careful consideration of climate-related factors such as: the regulatory/policy environment; the geographic location of assets and operations; the ability to pass on costs to customers; technology alternatives and advancements; changing customer preferences; commodity prices; future capital expenditure and R&D plans; long-term business strategy; overall quality of the management team; and other factors.

The Investment Manager used MSCI Carbon Portfolio Analytics to assess exposure to companies with fossil fuel reserves. The Investment Manager conducted carbon intensity analysis on the firm's investments in aggregate to understand the carbon intensity of the firm's total assets relative to the global equity markets. The Investment Manager was also able to conduct analysis on carbon intensity at the portfolio level.

PAI #10 (Violation of UNGC / OECD Guidelines)

Please refer to "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?".

PAI #13 (Board gender diversity)

The Investment Manager uses third-party data for board gender diversity monitoring. Further, on a case-by-case basis, the Investment Manager has a provision in its Proxy Voting Policy to vote with respect to the nominating committee members and chair if the company does not have at least one female or ethnically/racially diverse board director. The Investment Manager considered Diversity as a component of its ESG analysis and rating, as well as a firm-wide theme for company engagement.

PAI #14 (Exposure to controversial weapons)

The Fund did not invest in companies that generate any of their turnover from the production and/or distribution of controversial weapons (i.e., antipersonnel mines, nuclear weaponry, biological & chemical weaponry, and cluster munitions).

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

Largest investments	Sector	% of Assets	Country
BANCO BILBAO VIZCAYA ARGENTARIA SA	Financials	4.75%	Spain

What was the proportion of sustainability-related investments?

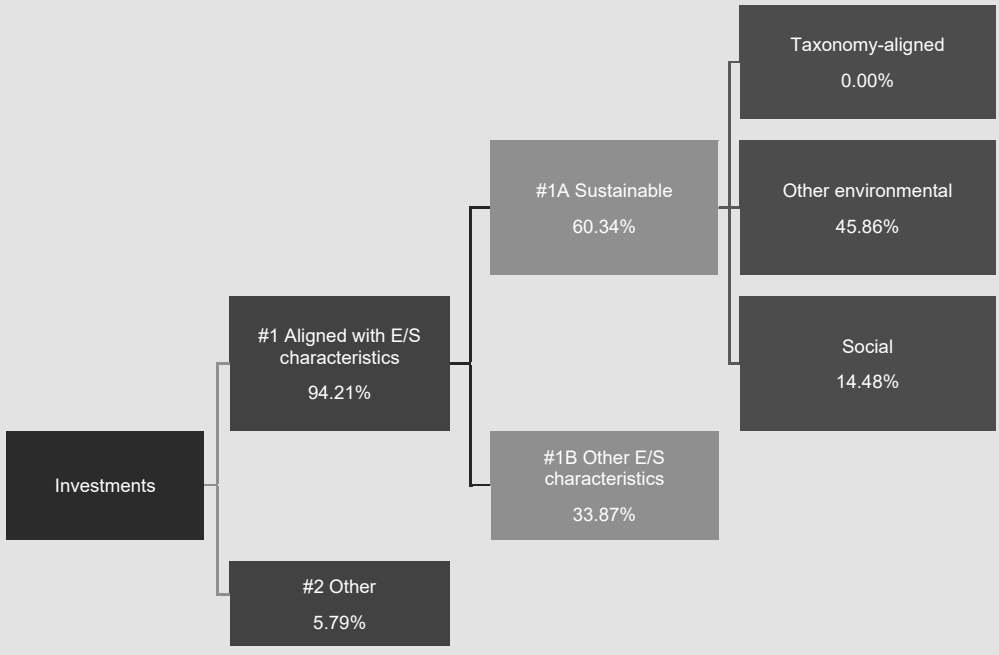
The proportion of sustainability-related investments was 60.34%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

A portion of 94.21% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (5.79%) was not aligned with the promoted characteristics and consisted primarily of liquid assets.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 60.34% of its portfolio in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

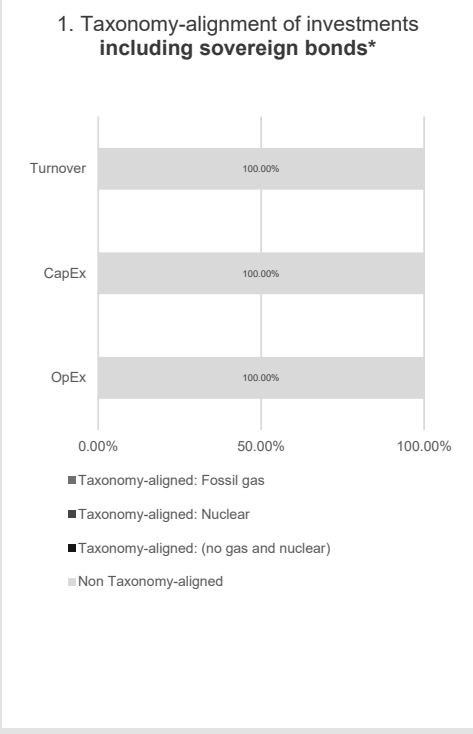
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

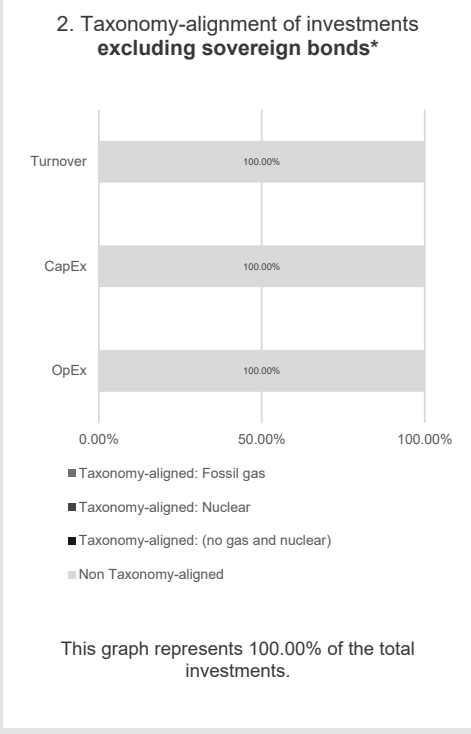
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

As a result of the investment strategy of the Fund, the Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy and, accordingly, as of 28-02-2026, 45.86% of the portfolio of the Fund was comprised of investments with an environmental objective not aligned with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 14.48%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under "#2 Other" was 5.79% and comprised of cash held on deposit and derivative instruments used for hedging and derivatives for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. The Fund did not invest in its set revenue thresholds, as outlined in the prospectus, for the following industries:

· Conventional and controversial weapons

· Tobacco

· Gambling

· Adult entertainment

1. The Investment Manager utilized its proprietary rating system and fundamental research to assess how a company manages its ESG risks and opportunities, including good governance. The rating system consisted of four rating levels: AAA, AA, A and B, which were assigned to companies based on their sustainability strategy and performance key ESG issues. All companies in the Fund were rated. The rating distribution for this Fund as of 28 February 2026 was:

AAA: 28%

AA: 51%

A: 21%

B: 0%

2. The Investment Manager continuously engaged with its portfolio companies. ESG engagement at ClearBridge generally had two overlapping objectives:

· Research: Gaining a better understanding of ESG issues that could impact our investment thesis

· Impact: Encouraging specific changes at the company that could lead to positive real-world impact

The Investment Manager engaged with at least 50% of the portfolio of the Fund’s assets under management and number of issuers during the calendar year.

3. The Fund did not invest in companies that violate one or several of the ten principles under the four areas covered by UNGC (human rights, labour, environment and anti-corruption).

4. The Fund’s assets were tracked and monitored for environmental and social factor deterioration or improvement.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF ClearBridge Emerging Markets Fund (the "Fund")

Legal Entity Identifier: 549300Y8TPNIB3NAMF62

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 68.10% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

To meet the environmental and/or social characteristics promoted by the financial product, the Fund included investments in companies:

· which are reducing and managing their carbon emissions;

· with limited to no exposure to the fossil fuel industry;

· with a focus on the efficient use of energy and water;

· which are limiting pollution and managing biodiversity risk;

· with good track-records on human rights and employee matters; and

· with no exposure to controversial weapons.

Not all holdings in the Fund necessarily promoted all characteristics. These factors were considered as part of the analysis of each company and where material incorporated into the investment analysis.

Derivative instruments have not been used to attain the environmental / social characteristics promoted by the Fund.

No index has been designated as a reference benchmark for the purpose of attaining the environmental /social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

On average during the reference period, 68.1% of the Fund was held in sustainable investments, as defined by the Investment Manager's proprietary framework based on United Nations Sustainable Development Goals (SDG).

All the 14 PAI mandatory indicators and two additional indicators were taken into account and measured. Please refer to the values disclosed in the section "How did this financial product consider principal adverse impacts on sustainability factors?".

At the end of the period, approximately 28% of the portfolio's Net Asset Value (NAV) was invested in companies that had approved science-based targets under the Science-Based Targets Initiative, with 0% invested in companies committed to setting targets within the next two years.

Over the period the Fund's management team conducted 50 engagements on Environmental, Social and Governance (ESG) topics with the aim of influencing behaviour, covering topics including board independence, companies' net zero carbon transition plans, and data security. As at the end of the year the engagements were at the stages of completion as shown below.

Furthermore, the Investment Manager relied on external Data Metrics (e.g. MSCI), including Carbon Footprint and ESG scoring, its internal research (including carbon cost analysis and modern slavery risk factors), as inputs to inform its analysis and internal proprietary governance and sustainability risk ratings, which were used as a basis for security selection, exclusions and engagement process.

We have categorised companies into our internal Net Zero Alignment categorisation This considers whether companies have set, or committed to set science-based targets for greenhouse gas emission reductions or are climate solution providers. For this Fund, the portfolio distribution across those categories is below:

	Sustainability KPI historical comparison
	2026

… And compared to previous periods?

Effective 30 September 2025, the Investment Manager for the Fund changed to ClearBridge Investment Management Limited ("CIML") and the name of the Fund changed to its current name FTGF ClearBridge Emerging Markets Fund (previously named FTGF Martin Currie Global Emerging Markets Fund). Accordingly, comparisons to previous years may not be meaningful or comparable, therefore they are not displayed. There have been no material changes to the investment strategy, however how sustainability indicators are measured has been aligned with ClearBridge's approach.

Compared to the previous period, we have seen an increase in the proportion of the Fund's NAV invested in companies with a science-based target to 28% as at 28 February 2026 from 20% as at 28 February 2025, and a decrease in the proportion in companies that have committed to set science-based targets to 0% from 8%. This is due to companies that were previously committed to setting targets taking the final step and formalising these commitments, as well as portfolio changes.

On engagements we have seen an increase in early-stage engagements and a decrease in late-stage engagements, as we continue to engage with portfolio companies on material matters with some reaching their conclusion.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to the environmental or social objectives of a relevant subset of targets underlying the 17 Sustainable Development Goals (SDGs).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In addition to identifying potential sustainable investments by mapping companies to a specific subset of targets of the SDGs as detailed above, potential investee companies were subject to the Investment Manager's assessment of the DNSH principle which was conducted in two ways:

1. an assessment of compliance with global norms, based on the United Nations Global Compact (UNGC) principles, and controversies related to the other environmental aspects of the PAI indicators.

2. an assessment of DNSH in relation to climate change-related factors highlighted by the PAI indicators, including areas such as business exposure to fossil fuel extraction and a high and unmanaged carbon footprint in a high-emitting industry.

When assessing climate change-related DNSH, the Investment Manager also considered the nature of a company's operations as well as the presence of controversies or signals from the PAI indicators. For each grouping of PAI indicators, the Investment Manager assessed the materiality of each PAI indicator and the presence of potential significant harm, which assessment was conducted using proprietary analysis. The findings from the DNSH assessment may have influenced the Governance and Sustainability risk ratings assigned by the Investment Manager, however the DNSH assessment is designed to operate as a parallel process to the risk ratings in order to meet the commitment to make 'sustainable investments' under SFDR. The key output of the DNSH assessment is to determine whether any evidence of significant harm existed that would exclude an investment from being considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager took into account all 14 PAI mandatory indicators and two additional indicators in its management of the Fund. The two additional indicators were:

· Environmental: Investments in companies without carbon emission reduction initiatives; and

· Social: Lack of a human rights policy.

The Investment Manager's analysis of companies took these factors into account and where the Investment Manager identified potential material adverse impacts, it engaged with the companies. Under the specific requirements of SFDR, the Investment Manager also reported on the PAI indicators using company sourced data or looked for proxies where these were not available.

For further information on how the Investment Manager's analysis of companies took these factors into account, please refer to the section below titled "How did this financial product consider principal adverse impacts on sustainability factors?".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any potential sustainable investments that were identified were subject to the Investment Manager's broader ESG analysis that looked at management, culture, social and environmental risk. This analysis was framed around the OECD Guidelines for Multinational Enterprises and the Investment Manager had a specific additional focus on social exploitation risk framed around the UN Guiding Principles on Business and Human Rights.

The UNGC (on which the Fund has binding criteria) sets out 10 principles that set out minimum responsibilities in the areas of human rights, labour, environment and anti-corruption as derived from established conventions.

There is significant overlap between the principles of the UNGC and the OECD Guidelines that are effectively captured by the Investment Manager's UNGC screen. Material other multilateral instruments cited in the guidelines are also building blocks of the OECD guidelines, namely the ILO (International Labour Organisation) Fundamental Principles and the Universal Declaration of Human Rights. These effectively cover potential controversies related to the OECD's key pillars of human rights, labour, environment, anticorruption & consumer protection.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Sustainability factors can have an impact on the companies in which the Fund invests, and the Investment Manager also recognises that companies themselves can have an adverse impact on, for example, the environment, their employees or the communities in which they operate. These adverse impacts include, but are not limited to, the generation of greenhouse gas (GHG) emissions and other forms of pollution or potential violations of the UNGC. The Investment Manager's analysis of companies took these factors into account and where it identified potential material adverse impacts, the Investment Manager engaged with the companies concerned as set out in more detail in the Investment Manager's Stewardship and Engagement Policy. Under the specific requirements of SFDR, the Investment Manager also reported on the PAI indicators using company sourced data or proxies where these were not available.

Analysis of the PAIs was incorporated in the Investment Manager's due diligence on each company. The assessment of the 14 mandatory PAIs and two additional PAIs are grouped into six key areas for assessing materiality. Not all PAIs were material for every company. The Investment Manager assessed whether any of the six areas were material for the investee company and, where material, incorporated these areas into its risk ratings, investment thesis and, if relevant, planned engagement activity.

The six key groupings of the PAIs are as follows:

· Carbon Emissions and Management (PAIs #1 (GHG emissions), #2 (Carbon footprint) & #3 (GHG intensity of investee companies) as well as optional PAI on companies without carbon emissions reduction initiatives);

· Exposure to companies in the fossil fuel industry (PAI #4 (Exposure to companies active in the fossil fuel sector));

· Energy & Water Efficiency (PAIs #5 (Share of non-renewable energy consumption and production) & #6 (Energy consumption intensity per high impact sector));

· Pollution & Biodiversity (PAIs #7 (Activities negatively affecting biodiversity-sensitive areas), #8 (Emissions to water) & #9 (Hazardous waste ratio));

· Human Rights and Employee Matters (PAIs #10-13 (Violations of UNGC and OECD Guidelines; Lack of processes and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines; Unadjusted pay gap; and Board diversity) as well as an additional PAI focused on companies that lack a human rights policy); and

· Exposure to controversial weapons (PAI #14 (Exposure to controversial weapons)).

In some instances, such as PAI #10 (Violations of UNGC and OECD Guidelines), the Fund has binding criteria and will not invest in companies that are assessed as 'fail' under the UNGC. In line with the Investment Manager's Controversial Weapons Policy, the Fund will not hold companies with exposure to controversial weapons.

Information on PAIs on sustainability factors can be found in the manager's Responsible Investment Policy.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

Largest investments	Sector	% of Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING CO LTD	Information Technology	9.63%	Taiwan, Province Of China
TENCENT HOLDINGS LTD	Communication Services	7.81%	China
SAMSUNG ELECTRONICS CO LTD	Information Technology	6.45%	South Korea
SK Hynix Inc	Information Technology	4.40%	South Korea
ALIBABA GROUP HOLDING LTD	Consumer Discretionary	4.04%	Hong Kong

QUANTA COMPUTER INC	Information Technology	2.40%	Taiwan, Province Of China
RELIANCE INDUSTRIES LTD	Energy	2.31%	India

What was the proportion of sustainability-related investments?

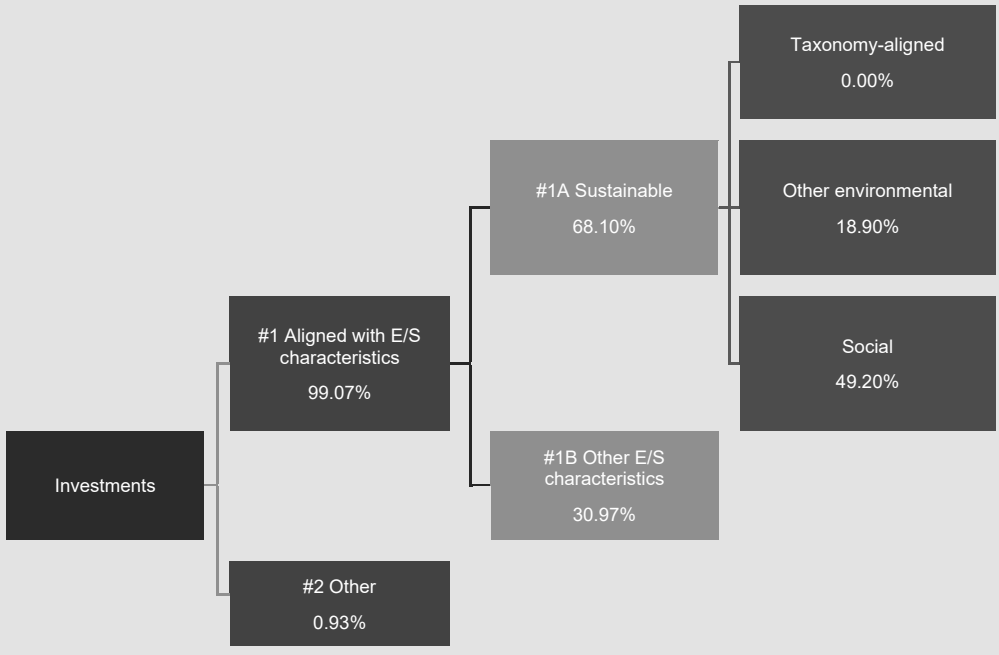
The proportion of sustainability-related investments was 68.10%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

A portion of 99.07% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (0.93%) was not aligned with the promoted characteristics and consisted primarily of liquid assets.

Out of the Fund's portfolio segment which is aligned with the promoted environmental and/or social characteristics, the Fund invested 68.10% of its portfolio in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison

Hotels, Restaurants & Leisure	2.32%
Oil, Gas & Consumable Fuels	2.31%
Textiles, Apparel & Luxury Goods	2.18%
IT Services	1.76%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

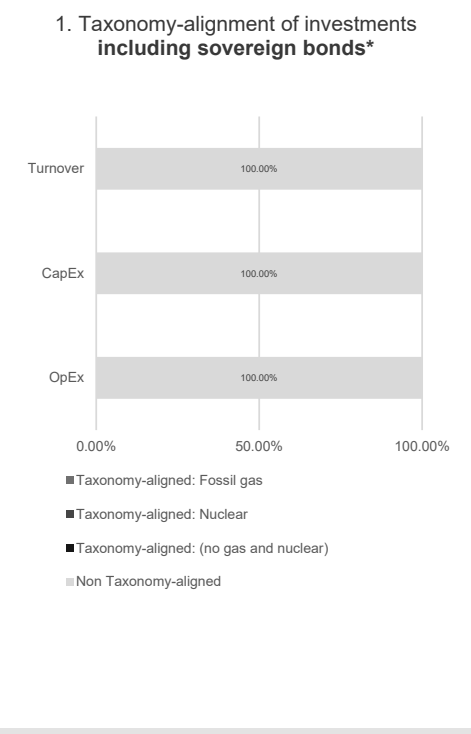
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

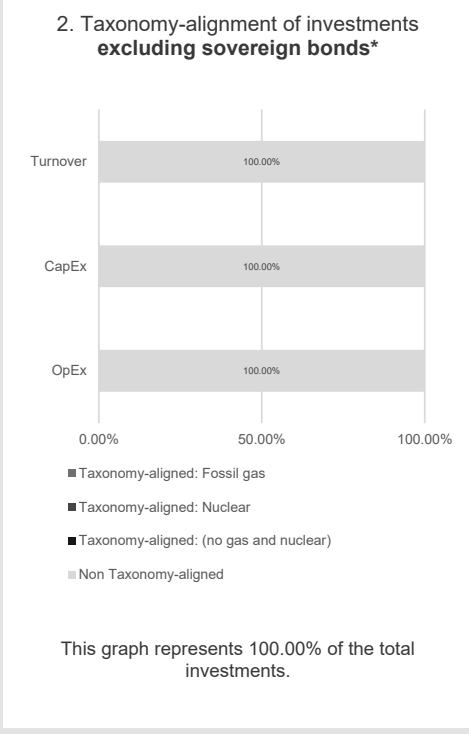
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

As a result of the investment strategy of the Fund, the Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy and, accordingly, 18.90% of the portfolio of the Fund was comprised of investments with an environmental objective not aligned with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 49.20%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portion of investments under ‘#2 Other’ was 0.93% and included cash for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

· Engaged with portfolio companies on topics including board independence, companies’ net zero carbon transition plans, and data security.

· Adhered to the exclusions as set out in the prospectus regarding proprietary governance and sustainability risk ratings, UN Global Compact violations, controversial weapons, and other business activities for which exclusions are in place.

· Considered all 14 mandatory PAIs, and two additional PAIs as part of investment analysis which includes indicators on energy and water efficiency, pollution and biodiversity risk.

· Companies that have a sustainability or governance risk rating of 4 or higher, the rating scale ranging from 1 (low risk) to 5 (high risk), were not included in the Fund.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Responsible Income 2028 Fund (the "Fund")

Legal Entity Identifier: 254900FTK4TK4QA6CU84

FRANKLIN TEMPLETON

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 18.66% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In order to promote the transition to a low-carbon economy, the portfolio management team avoided exposure to what they termed Climate Laggards. Sovereign issuers that were ranked within the bottom 20% of their peer group, based on environmental factors including, but not limited to, GHG emissions, energy intensity, protection of biodiversity, air pollution, and renewable energy mix, were labelled Climate Laggards. For corporate issuers, it was companies that were ranked within the top 20% of their peer industry group based on their GHG intensity. At the end of the reporting period, the Fund's allocation to Climate Laggards stood at 0% during the reference period.

In addition to this, the Fund also refrained from investing in issuers involved in controversial business behaviours or adverse economic activities (as further described in the Precontractual Disclosure), including but not limited to, where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the investment team's acceptable limit (e.g., any company, which derives more than 5% of its revenues from thermal coal extraction is deemed not investable), an issuer was involved in production of weapons of mass destruction or a corporation seriously and repeatedly breached United Nations Global Compact. In addition to the listed exclusions, the Fund also refrained from investing in sovereign issuers listed with a "Not Free" status according to the Freedom House Index.

The Fund committed to allocate a minimum of 11% of its assets to sustainable investments in economic activities with at least 10% contributing to environmental objectives and at least 1% to social objectives.

Over the reporting period from 03 March 2025 to 27 February 2026, the Fund exceeded these commitments, with a weighted average over the four quarters of 18.65% in sustainable investments. This includes 14.36% in activities contributing to environmental objectives and 4.30% in those supporting social objectives. These allocations were primarily achieved through investments in green, social, and/or sustainability use-of-proceeds bonds, which were explicitly issued to finance eligible environmental and/or social projects.

An example of this is the Fund's investment in a use-of-proceeds bonds issued by CaixaBank SA to support social projects. The bank supports social and economic development through its financing activities, particularly by backing projects that contribute to the advancement of SDGs. CaixaBank's social investments have delivered a meaningful impact, benefiting a total of 10,341,912 people, including 9,400,000 individuals receiving improved healthcare services, 24,492 benefiting from education services, 49,699 jobs supported, and 22,517 women specifically supported.

In this regard, over the reference period mentioned above, the weighted average across the four quarters resulted in 99.44% of the Fund's assets being aligned with the environmental and social (E/S) characteristics. The remaining 0.56%, also based on the weighted average, consisted of cash and derivatives, which were not aligned with these characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators were used to measure the attainment of environmental or social characteristics promoted by the Fund:

Exposure to Green, Social and Sustainability (GSS) Bonds and those issued by the Environmental Champions.

- 14.36% of investments in green bonds;

- 4.30% of investments in social bonds;

- 0.00% of investments in sustainability bonds;

- 43.43% of investments in bonds issued by best-in-class issuers ("Environmental Champions");

The percentage of investment in issuers having exposure to or tying with excluded sectors and additional exclusions further described in the investment strategy section of this annex was 00.00%

- Exposure to the Principal Adverse Impact (PAI) indicators (see table below).

The list of issuers, with which the Investment Manager engaged between 03 March 2025 and 27 February 2026:

1. AIB GROUP PLC

… And compared to previous periods?

Until 2025, the share of non-renewable energy consumption and production was presented as a combined metric. Beginning in 2026, this metric has been split into 'Share of non-renewable energy consumption' and 'Share of non-renewable energy production'.

Please note that changes in methodology affect the comparability of KPIs across reporting periods. In 2023 and 2024, the engagement KPI reflected the existence of a single engagement list (reported as "1"), whereas from 2025 onwards it reflects the total number of individual engagements undertaken. As such, the figures are not directly comparable.

In addition, from 2024 onwards, sustainability indicators (Environmental Champions, percentage of investment in green, social and sustainable bonds, and PAIs) are based on average values at the end of each quarter. By contrast, the data for 2023 presented in the above tables reflects values at a single point in time, namely at the Fund's fiscal year-end. As a result, these methodological differences further limit meaningful comparison between periods.

The number of engagements decreased from 93 to 22. The reduction in the number of issuers engaged during the period is primarily attributable to a shift towards more in-depth and direct engagement formats, such as one-to-one meetings and dedicated roadshows, aimed at enhancing the quality and effectiveness of our interactions.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments were, amongst others, to fund and promote:

a) the efficient use of energy, raw materials, water, and land;

b) the production of renewable energy;

c) the reduction of waste, and greenhouse gas (GHG) emissions, and lower impact of economic activities on biodiversity;

d) the development of a circular economy;

e) tackling inequalities and fostering social cohesion;

f) social integration;

g) good labour relations; or

h) investments in human capital, including disadvantaged communities.

The Fund's sustainable investments included a minimum allocation of 10% of its portfolio to sustainable investments in economic activities that contribute to environmental objectives.

This was achieved by investing in bonds labelled as "green" or in any other securities whose:

A) proceeds were used on eligible environmental projects;

B) framework adheres to international standards (including but not limited to, the International Capital Market Association (the "ICMA") Green Bond Principles, future European Union Green Bond Standard (the "EU GBS")); and

C) issuers do not significantly harm other environmental and social objectives while demonstrating good governance practices.

The use of proceeds for these bonds was clearly defined and aligned with the objectives above.

Additionally, the Fund committed to include a minimum allocation of 1% of its portfolio to sustainable social activities. This was achieved by investing in bonds labelled as "social" or in any other securities, whose:

A) proceeds were used on eligible social projects;

B) framework adheres to international standards (including but not limited to, ICMA Social Bond Principles); and

C) issuers do not significantly harm other environmental and social objectives while demonstrating good governance practices.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (DNSH) principle across the portfolio.

Corporate issuers were monitored using the Principle Adverse Impact Risk App ("PAI Risk App"). The PAI Risk App used data from MSCI to identify issuers involved in harmful economic activities and/or controversies. Issuers deemed to violate PAI #7 (activities negatively affecting biodiversity-sensitive areas), #10 (violation of the UN Global Compact principles and the principles of the OECD Guidelines for Multinational Enterprises), and #14 (exposure to controversial weapons) were excluded from the Fund's investment universe.

The Investment Manager also used the Energy and Environmental Transition Index ("EETI") which ranks the remaining issuers in the Fund's investment universe according to their GHG emissions and intensity. Issuers falling within the bottom 20% of their peer groups with respect to PAI #1 (GHG emissions) and #3 (carbon footprint) (for corporates) and PAI #15 (GHG intensity) (for sovereigns) were excluded from the investment universe.

Additionally, sovereign issuers were subjected to tests based on their political liberties (PAI #16) and/or corruption.

When deploying funds to sustainable investments, especially with regards to the commitment to invest 18.76% of the Net Asset Value (NAV) in keeping with environmental and social objectives, the Investment Manager applied additional qualitative assessment (based on internal research or on external second party opinion) of the issuer's and of the projects' DNSH eligibility.

How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators, including PAIs and other data points deemed by the Investment Manager as proxies for adverse impact, were used to:

a. remove issuers that were considered to do significant harm from the portfolio; and

b. inform the Investment Manager about the risk associated with adverse impact and take appropriate action – that included due diligence, qualitative scrutiny and/or engagement (for details of an engagement see sections "Principal Adverse Impact" and "Investment Strategy" of the Fund of this annex).

While assessing eligible green and social bonds, the Investment Manager reviewed and documented the materiality of relevant PAIs for the project as well as how the project's implementation affects the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targets development of renewable energy sources, (e.g. solar/PV panels), the Investment Manager ascertained that financed projects score well on PAIs linked to GHG emissions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For bonds issued by sovereign countries, the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable to such investments. For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from MSCI. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Manager.

Where due diligence proved that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

(i) identifying issuers deemed to be "Best-in-class";

(ii) restricting the Fund’s investment universe; and

(iii) guiding thematic engagement.

Identifying Best-in-class issuers

The Fund invested in bonds issued by corporates and sovereigns deemed by the Investment Manager to be "Environmental Champions". "Environmental Champions" were identified using two proprietary ESG rankings:

· The EETI ranks sovereign issuers energy efficiency, natural capital conservation, renewable energy performance, using various data points, including GHG Intensity (emissions normalized by gross domestic product, CO2e/GDP).

· The ESG Credit App ranks corporate issuers by their GHG emissions and GHG intensity using various data points such as scope 1 and 2 GHG emissions, emitters’ historic trajectories.

Restricting Fund’s investible universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI and corporate issuers falling within the bottom 20% (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Guiding thematic engagement

The Investment Manager committed to engage with 5% of active holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAI metrics.

More information on how the Fund considered its PAIs may be found in the section "How did the sustainability indicators perform?".

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

What was the proportion of sustainability-related investments?

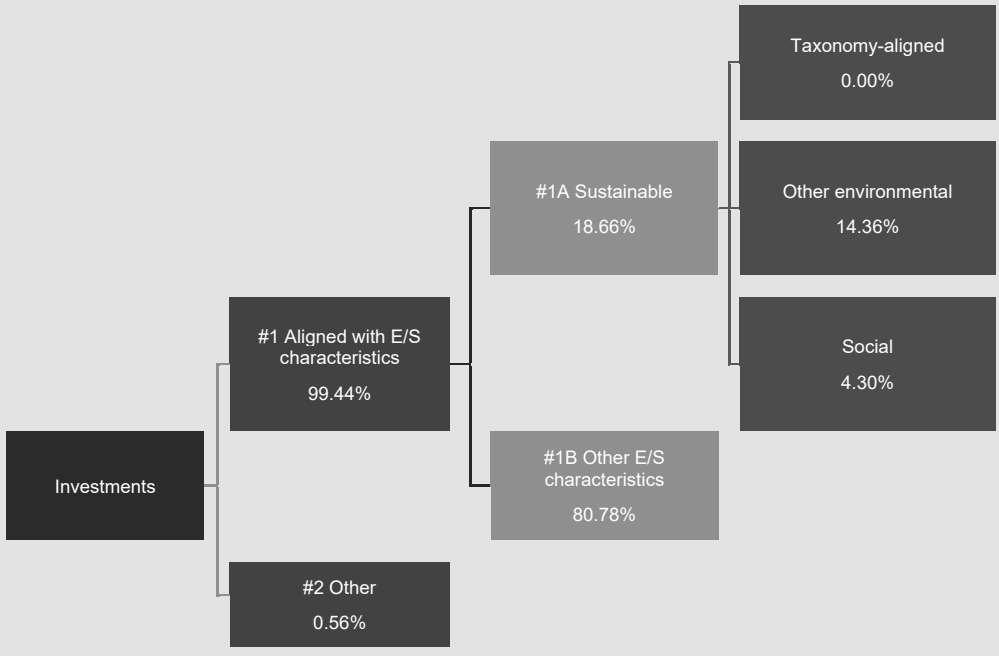
The portion of sustainability-related investments was 18.66%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.44% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund (if not stated otherwise, all values shown are based on weighted average over 4 quarters during the reporting reference period). The remaining portion (0.56%) was not aligned with the promoted characteristics and consisted primarily of liquid assets.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and social characteristics, the Fund invested 18.66% of its portfolio in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison			
	2026	2025	2024	2023

Broadline Retail	1.58%
Life Sciences Tools & Services	1.56%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

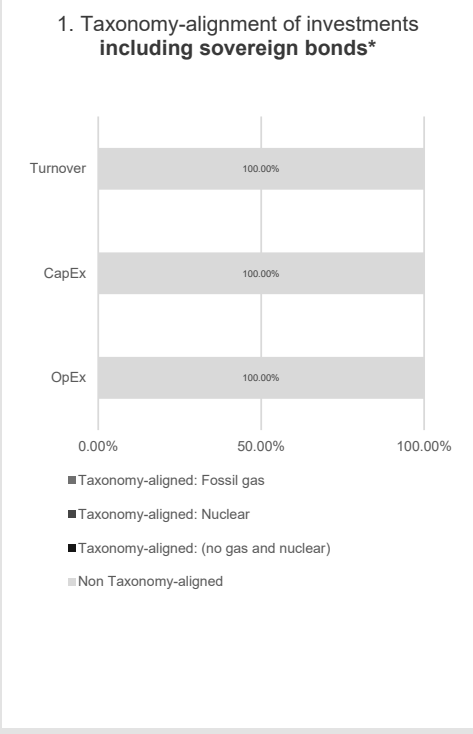
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

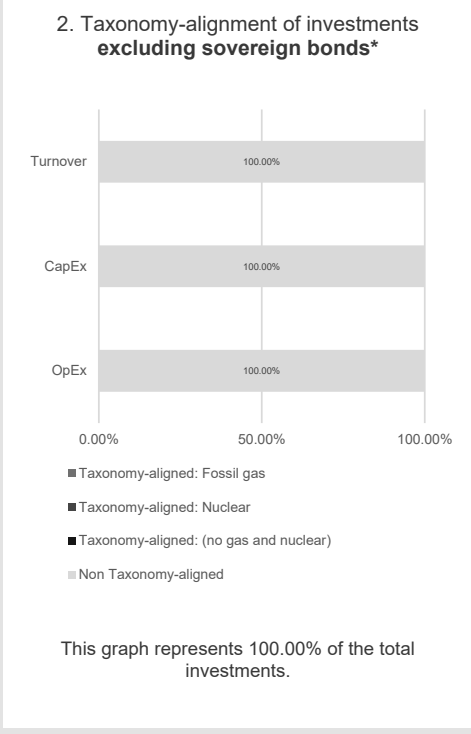
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

14.36% of the portfolio of the Fund was comprised of investments with an environmental objective not aligned with the EU Taxonomy.

As a result of the investment strategy of the Fund, the Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 4.30%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portion of investments under "#2 Other" was 0.56% and comprised of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund.

No minimum environmental and/or social safeguards were put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager utilised numerous IT tools in order to determine a portfolio's composition so that it is aligned with the promoted environmental and social characteristics. Those characteristics were promoting the transition to a low-carbon economy by avoiding investments in issuers that are lagging in the transition and implementing negative screens as part of its investment process. Using internal and external inputs (e.g., MSCI datasets), the Investment Manager assessed which issuers were eligible (or not) to be held in the portfolio.

For example, the Fund employed a proprietary ESG rating methodology with the aim to avoid investment in issuers that are lagging in the transition to support a low-carbon economy. The Fund used a selectivity approach in order to exclude from its portfolio issuers (corporates and sovereigns) that scored in the bottom 20% of its investment universe based on a set of characteristics. For corporates, the Investment Manager looks at their GHG emissions and intensity, while for sovereigns, has a list of 16 environmental metrics such as energy efficiency, biodiversity protection, and responsible waste management. A sophisticated IT tools (Energy and Environmental Transition Index [EETI] for sovereigns and ESG Credit App for corporates) assigns a rank to issuers based on these characteristics and reduces the investable universe by the aforementioned 20%.

The Fund has proprietary exclusion list, in that sense, the Investment Manager did not invest in issuers that:

- Repeatedly and seriously violate the United Nations Global Compact principles, the UN Guiding Principles on Business and Human Rights, and the OECD Guidelines for Multinational Enterprises;

- Have "Not Free" status according to the Freedom House Index for sovereign issuers;

- Manufacture controversial weapons such as those that are defined as being indiscriminate; or those that manufacture components intended for use in such weapons;

- derive more than 5% of their revenue from production of conventional weapons;

- Manufacture tobacco or tobacco products; or those that derive revenue from such products that exceeds the Investment Manager’s 5% threshold;

- derive more than 5% of their revenue from gambling or adult entertainment;

- derive more than 5% of their revenue from the mining of thermal coal and its sale to external parties;

- derive more than 5% of their revenue from the most polluting fossil fuels;

- Exceed the Investment Manager’s 30% tolerance level of fossil fuels or 5% tolerance level of thermal coal used to generate electricity or lack ambitions regarding decarbonization targets for electricity generation;

- Negatively affect biodiversity-sensitive areas; and

– Score an ESG rating of CCC according to MSCI.

If a security held by the Fund fell under at least one of the above exclusions, the Investment Manager divested from such security as soon as practicable and at the latest within a period of six months.

Further, the issuers were monitored using the Principal Adverse Impact Risk App (PAI Risk App). The app analyses corporate and sovereign issuers performance based on the 14 mandatory Principal Adverse Indicators (PAI) metrics. The PAI app preliminary identified and excluded from investment universe the issuers that:

- repeatedly and seriously violate the United Nations Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI 10)

- have exposure to controversial weapons (PAI 14)

- have operations located in biodiversity sensitive areas and are involved in controversies with severe impact on the environment (PAI 7)

- are countries subject to social violations as referred in international treaties and conventions (PAI 16)

When deploying funds to sustainable investments, especially with regards to the commitment to invest at least 11% in keeping with environmental and social objectives, the Investment Manager applied additional qualitative assessment (i.e., the Sustainable Investment Evaluation Form – based on internal research or on external second party opinion) of the issuer’s and of the projects’ DNSH eligibility.

In line with Investment Manager's ambition to achieve a positive impact on the environment and social aspects, as well as to satisfy the regulatory requirements, the Investment Manager first checks that all the eligible expenditures for a bond that is being considered for purchase are in fact sustainable and positively contribute to environmental and/or social goals. Then, the Investment Manager ensures that neither the issuer nor the project that is funded via the bond issue causes any significant harm to other environmental or social objectives. At the same time, the Investment Manager checks the overall impact of an issuer on the environment. Social aspects are equally important, and the Investment Manager refrains from investing in green or social projects if there is evidence of any severe employee—and/or local community-related controversies. While assessing those parameters, the Investment Manager looks through a prism of sixteen mandatory principal adverse impact (PAI) indicators.

Engagement was an integral part of the Fund's sustainability approach and ESG management During the reference period, the Investment Manager engaged with numerous issuers. The Investment Manager has done this via email, direct video calls, by attending roadshows or in-person meetings, and through cross-sectional engagement by sending out surveys on a specific topic. The engagement consisted of both voluntarily engagement to promote the Fund's environmental and social characteristics and obtain data for the best-informed investments decision as well as obligatory engagement with 5% issuers underperforming their peers in regard to PAIs exposure.

While all engagements are listed above, in the "How did the sustainability indicators perform?" section, the following example helps to highlight the portfolio managers' approach:

· The engagement took place during a dedicated one-on-one meeting with Swedbank in November 2025. During this discussion, we reviewed the bank's climate strategy and its continued commitment to achieving net zero emissions by 2050, despite the dissolution of the Net Zero Banking Alliance. Swedbank has set sector-specific 2030 targets across key industries and is progressively embedding these objectives into its internal steering and portfolio monitoring frameworks. A particular focus was placed on the real estate portfolio, which represents a significant share of the bank's exposures. Swedbank indicated that data availability—particularly regarding Energy Performance Certificates—remains a key challenge, largely due to regulatory constraints, and that efforts are ongoing to improve data granularity and coverage. The bank also shared that preliminary assessments suggest a limited portion of the portfolio is exposed to elevated physical climate risks, while further work is underway to refine methodologies and enhance the accuracy of these analyses.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Responsible Income 2029 Fund (the "Fund")

Legal Entity Identifier: 254900HN2FBZVQ2RSC08

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 24.17% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In order to promote the transition to a low-carbon economy, the portfolio management team avoided exposure to what they termed Climate Laggards. Sovereign issuers that were ranked within the bottom 20% of their peer group, based on environmental factors including, but not limited to, GHG emissions, energy intensity, protection of biodiversity, air pollution, and renewable energy mix, were labelled Climate Laggards. For corporate issuers, it was companies that were ranked within the top 20% of their peer industry group based on their GHG intensity. At the end of the reporting period, the Fund's allocation to Climate Laggards stood at 0% during the reference period.

In addition to this, the Fund also refrained from investing in issuers involved in controversial business behaviours or adverse economic activities (as further described in the Precontractual Disclosure), including but not limited to, where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the investment team's acceptable limit (e.g., any company, which derives more than 5% of its revenues from thermal coal extraction is deemed not investable), an issuer was involved in production of weapons of mass destruction or a corporation seriously and repeatedly breached United Nations Global Compact. In addition to the listed exclusions, the Fund also refrained from investing in sovereign issuers listed with a "Not Free" status according to the Freedom House Index.

The Fund committed to allocate a minimum of 11% of its assets to sustainable investments in economic activities with at least 10% contributing to environmental objectives and at least 1% in those to social objectives.

Over the reporting period, from 03 March 2025 to 27 February 2026, the Fund exceeded these commitments, with a weighted average over the four quarters of 24.17% invested in sustainable investments. This included 22.91% in economic activities contributing to environmental objectives and 1.26% in those supporting social objectives. These allocations were primarily achieved through investments in green, social, and/or sustainability use-of-proceeds bonds, which were explicitly issued to finance specific eligible environmental and/or social projects.

An example of this commitment is the Fund's investment in a use-of-proceeds bond issued by AIB Group PLC, aimed at supporting environmental projects. Recognizing that the global shift to a low-carbon economy demands immense investment, AIB channels capital towards environmentally beneficial projects. The issuer's green bond framework focuses on key sectors such as renewable energy, clean transportation, and green buildings. During the reporting period 2025, AIB fully allocated its funds. The total amount of eligible green loans was approximately EUR 6.9 billion, allocated as follows: 43% to green buildings, 55% to renewable energy, less than 1% to clean transportation, and 1% to circular economy and waste management.

In this regard, over the reference period mentioned above, the weighted average across the four quarters resulted in 95.26% of the Fund's assets being aligned with the environmental and social (E/S) characteristics. The remaining 4.74%, also based on the weighted average, consisted of cash and derivatives, which were not aligned with these characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators were used to measure the attainment of environmental or social characteristics promoted by the Fund:

Exposure to Green, Social and Sustainability (GSS) Bonds and those issued by the Environmental Champions.

- 20.88% of investments in green bonds;

- 1.26% of investments in social bonds;

- 2.03% of investments in sustainability bonds;

- 31.04% of investments in bonds issued by best-in-class issuers ("Environmental Champions");

The percentage of investment in issuers having exposure to or tying with excluded sectors and additional exclusions further described in the investment strategy section of this annex was 0.00%

- Exposure to the Principal Adverse Impact (PAI) indicators (see table below).

The list of issuers, with which the Investment Manager engaged between 03 March 2025 and 27 February 2026:

… And compared to previous periods?

Until 2025, Share of non-renewable energy consumption and production were portrayed as a combined metric. Beginning in 2026, this metric has been divided into "Share of non-renewable energy consumption" and "Share of non-renewable energy production". All other metrics remain comparable year on year, aside from the split of the non-renewable energy metric.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments were, amongst others, to fund and promote:

a) the efficient use of energy, raw materials, water, and land;

b) the production of renewable energy;

c) the reduction of waste, and greenhouse gas (GHG) emissions, and lower impact of economic activities on biodiversity;

d) the development of a circular economy;

e) tackling inequalities and fostering social cohesion;

f) social integration;

g) good labour relations; or

h) investments in human capital, including disadvantaged communities.

The Fund’s sustainable investments included a minimum allocation of 10% of its portfolio to sustainable investments in economic activities that contribute to environmental objectives.

This was achieved by investing in bonds labelled as "green" or in any other securities whose:

A) proceeds were used on eligible environmental projects;

B) framework adheres to international standards (including but not limited to, the International Capital Market Association (the "ICMA") Green Bond Principles, future European Union Green Bond Standard (the "EU GBS")); and

C) issuers do not significantly harm other environmental and social objectives while demonstrating good governance practices.

The use of proceeds for these bonds was clearly defined and aligned with the objectives above.

Additionally, the Fund committed to include a minimum allocation of 1% of its portfolio to sustainable social activities with a social objective. This was achieved by investing in bonds labelled as "social" or in any other securities, whose:

A) proceeds were used on eligible social projects;

B) framework adheres to international standards (including but not limited to, ICMA Social Bond Principles); and

C) issuers do not significantly harm other environmental and social objectives while demonstrating good governance practices.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (DNSH) principle across the portfolio.

Corporate issuers were monitored using the Principle Adverse Impact Risk App ("PAI Risk App"). The PAI Risk App used data from MSCI to identify issuers involved in harmful economic activities and/or controversies. Issuers deemed to violate PAI #7 (activities negatively affecting biodiversity-sensitive areas), #10 (violation of the UN Global Compact principles and the principles of the OECD Guidelines for Multinational Enterprises), and #14 (exposure to controversial weapons) were excluded from the Fund's investment universe.

The Investment Manager also used the Energy and Environmental Transition Index ("EETI") which ranks the remaining issuers in the Fund's investment universe according to their GHG emissions and intensity. Issuers falling within the bottom 20% of their peer groups with respect to PAI #1 (GHG emissions) and #3 (carbon footprint) (for corporates) and PAI #15 (GHG intensity) (for sovereigns) were excluded from the investment universe.

Additionally, sovereign issuers were subjected to tests based on their political liberties (PAI #16) and/or corruption.

When deploying funds to sustainable investments, especially with regards to the commitment to invest at least 11% of the Net Asset Value (NAV) in keeping with environmental and social objectives, the Investment Manager applied additional qualitative assessment (based on internal research or on external second party opinion) of the issuer's and of the projects' DNSH eligibility.

How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators, including PAIs and other data points deemed by the Investment Manager as proxies for adverse impact, were used to:

a. remove issuers that were considered to do significant harm from the portfolio; and

b. inform the Investment Manager about the risk associated with adverse impact and take appropriate action – that included due diligence, qualitative scrutiny and/or engagement (for details of an engagement see sections "Principal Adverse Impact" and "Investment Strategy" of the Fund of this annex).

While assessing eligible green and social bonds, the Investment Manager reviewed and documented the materiality of relevant PAIs for the project as well as how the project's implementation affects the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targets development of renewable energy sources, (e.g. solar/PV panels), the Investment Manager ascertained that financed projects score well on PAIs linked to GHG emissions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For bonds issued by sovereign countries, the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable to such investments. For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from MSCI. Breaches identified by this data provider were flagged in the investment compliance system for subsequent investigation by the Investment Manager.

Where due diligence proved that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

(i) identifying issuers deemed to be "Best-in-class";

(ii) restricting the Fund's investment universe; and

(iii) guiding thematic engagement.

Identifying Best-in-class issuers

The Fund invested in bonds issued by corporates and sovereigns deemed by the Investment Manager to be "Environmental Champions". "Environmental Champions" were identified using two proprietary ESG rankings:

· The EETI ranks sovereign issuers energy efficiency, natural capital conservation, renewable energy performance, using various data points, including GHG Intensity (emissions normalized by gross domestic product, CO2e/GDP).

· The ESG Credit App ranks corporate issuers by their GHG emissions and GHG intensity using various data points such as scope 1 and 2 GHG emissions, emitters' historic trajectories.

Restricting Fund's investible universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI and corporate issuers falling within the bottom 20% (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Guiding thematic engagement

The Investment Manager committed to engage with 5% of active holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAI metrics.

More information on how the Fund considered its PAIs may be found in the periodic reporting of the Fund.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-03-01 - 2026-02-28.

What was the proportion of sustainability-related investments?

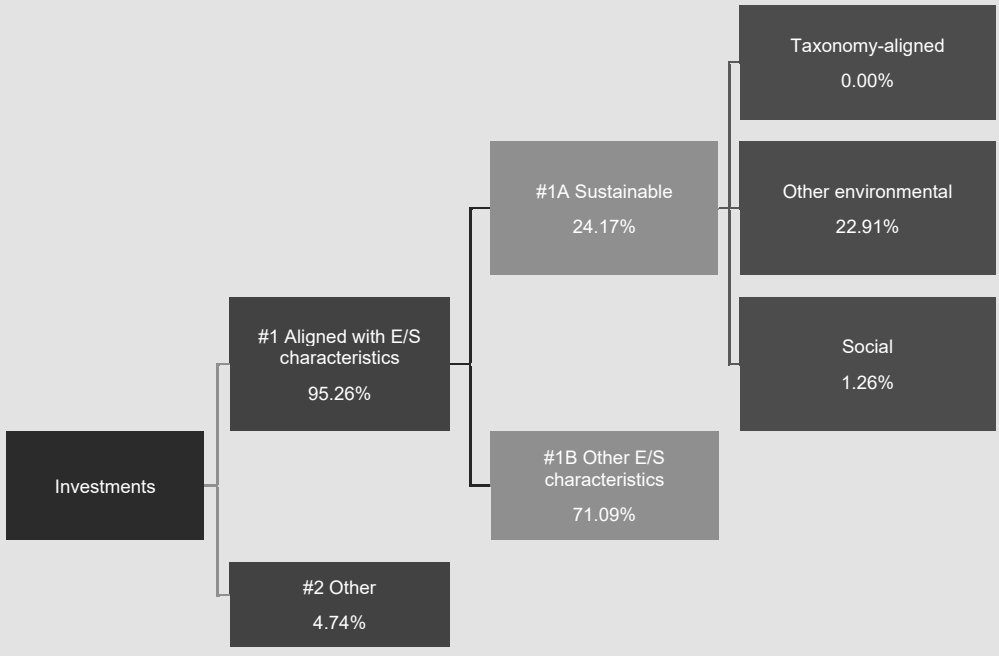
The portion of sustainability-related investments is 24.17%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

95.26% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund (if not stated otherwise, all values shown are based on weighted average over 4 quarters during the reporting reference period). The remaining portion (4.74%) was not aligned with the promoted characteristics and consisted primarily of liquid assets.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and social characteristics, the Fund invested 24.17% of its portfolio in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison	
	2026	**2025**

Wireless Telecommunication Services	1.59%
Water Utilities	1.41%
Household Products	1.39%
Automobile Components	1.38%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

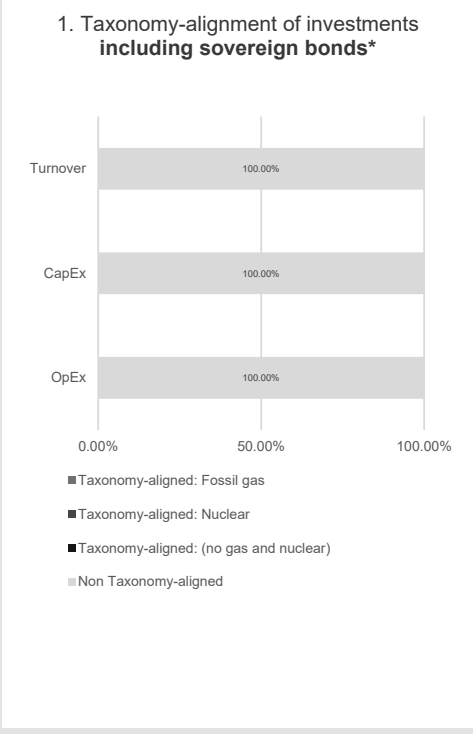
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

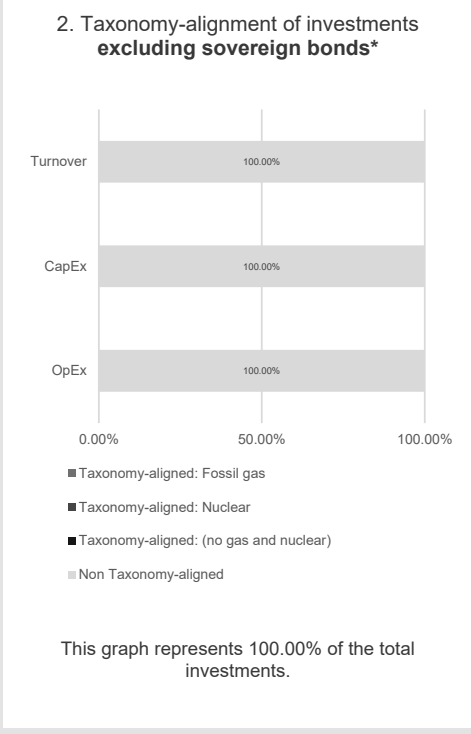
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

22.91% of the portfolio of the Fund was comprised of investments with an environmental objective not aligned with the EU Taxonomy.

As a result of the investment strategy of the Fund, the Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 1.26%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portion of investments under "#2 Other" was 4.74% and comprised of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund.

No minimum environmental and/or social safeguards were put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. The Investment Manager utilised numerous IT tools in order to determine a portfolio's composition so that it is aligned with the promoted environmental and social characteristics. Those characteristics were promoting the transition to a low-carbon economy by avoiding investments in issuers that are lagging in the transition and implementing negative screens as part of its investment process. Using internal and external inputs (e.g., MSCI datasets), the investment manager assessed which issuers were eligible (or not) to be held in the portfolio.

For example, the Fund employed a proprietary ESG rating methodology with the aim to avoid investment in issuers that are lagging in the transition to support a low-carbon economy. The Fund used a selectivity approach in order to exclude from its portfolio issuers (corporates and sovereigns) that scored in the bottom 20% of its investment universe based on a set of characteristics. For corporates, the Investment Manager look at their GHG emissions and intensity, while for sovereigns, have a list of 16 environmental metrics such as energy efficiency, biodiversity protection, and responsible waste management. A sophisticated IT tools (Energy and Environmental Transition Index [EETI] for sovereigns and ESG Credit App for corporates) assigns a rank to issuers based on these characteristics and reduces the investable universe by the aforementioned 20%.

The Fund has proprietary exclusion list, in that sense, the Investment Manager did not invest in issuers that:

- repeatedly and seriously violate the United Nations Global Compact principles, the UN Guiding Principles on Business and Human Rights, and the OECD Guidelines for Multinational Enterprises;

- Have "Not Free" status according to the Freedom House Index for sovereign issuers;

- Manufacture controversial weapons such as those that are defined as being indiscriminate; or those that manufacture components intended for use in such weapons;

- Derive more than 5% of their revenue from production of conventional weapons;

- Manufacture tobacco or tobacco products; or those that derive revenue from such products that exceeds the Investment Manager’s 5% threshold;

- Derive more than 5% of their revenue from gambling or adult entertainment;

- Derive more than 5% of their revenue from the mining of thermal coal and its sale to external parties;

- Derive more than 5% of their revenue from the most polluting fossil fuels;

- Exceed the Investment Manager’s 30% tolerance level of fossil fuels or 5% tolerance level of thermal coal used to generate electricity or lack ambitions regarding decarbonization targets for electricity generation;

- Negatively affect biodiversity-sensitive areas; and

– Score an ESG rating of CCC according to MSCI.

If a security held by the Fund fell under at least one of the above exclusions, the Investment Manager divested from such security as soon as practicable and at the latest within a period of six months.

Further, the issuers were monitored using the Principal Adverse Impact Risk App (PAI Risk App). The app analyses corporate and sovereign issuers performance based on the 14 mandatory Principal Adverse Indicators (PAI) metrics. The PAI app preliminary identified and excluded from investment universe the issuers that:

- repeatedly and seriously violate the United Nations Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI 10)

- have exposure to controversial weapons (PAI 14)

- have operations located in biodiversity sensitive areas and are involved in controversies with severe impact on the environment (PAI 7)

- are countries subject to social violations as referred in international treaties and conventions (PAI 16)

1. When deploying funds to sustainable investments, especially with regards to the commitment to invest at least 11% of the portfolio in keeping with environmental and social objectives, the Investment Manager applied additional qualitative assessment (i.e., the Sustainable Investment Evaluation Form – based on internal research or on external second party opinion) of the issuer’s and of the projects’ DNSH eligibility.

In line with Investment Manager's ambition to achieve a positive impact on the environment and social aspects, as well as to satisfy the regulatory requirements, the Investment Manager first checks that all the eligible expenditures for a bond that is being considered for purchase are in fact sustainable and positively contribute to environmental and/or social goals. Then, the Investment Manager ensures that neither the issuer nor the project that is funded via the bond issue causes any significant harm to other environmental or social objectives. At the same time, the Investment Manager checks the overall impact of an issuer on the environment. Social aspects are equally important, and the Investment Manager refrains from investing in green or social projects if there is evidence of any severe employee—and/or local community-related controversies. While assessing those parameters, the Investment Manager looks through a prism of sixteen mandatory principal adverse impact (PAI) indicators.

2. Engagement was an integral part of the Fund's sustainability approach and ESG management During the reference period, the Investment Manager engaged with numerous issuers. The Investment Manager has done this via email, direct video calls, by attending roadshows or in-person meetings, and through cross-sectional engagement by sending out surveys on a specific topic. The engagement consisted of both voluntarily engagement to promote the Fund's environmental and social characteristics and obtain data for the best-informed investments decision as well as obligatory engagement with 5% issuers underperforming their peers in regard to PAIs exposure.

While all engagements are listed above, in the "How did the sustainability indicators perform?" section, the following example helps to highlight the portfolio managers' approach:

· The engagement took place during a dedicated one-on-one meeting with Swedbank in November 2025. During this discussion, we reviewed the bank's climate strategy and its continued commitment to achieving net zero emissions by 2050, despite the dissolution of the Net Zero Banking Alliance. Swedbank has set sector-specific 2030 targets across key industries and is progressively embedding these objectives into its internal steering and portfolio monitoring frameworks. A particular focus was placed on the real estate portfolio, which represents a significant share of the bank's exposures. Swedbank indicated that data availability—particularly regarding Energy Performance Certificates—remains a key challenge, largely due to regulatory constraints, and that efforts are ongoing to improve data granularity and coverage. The bank also shared that preliminary assessments suggest a limited portion of the portfolio is exposed to elevated physical climate risks, while further work is underway to refine methodologies and enhance the accuracy of these analyses.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF Franklin Responsible Income 2031 Fund (the "Fund")

Legal Entity Identifier: 254900RI2TI89U0AX557

FRANKLIN TEMPLETON

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 22.01% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Provided that the fund was launched on 17 February 2026 and is still in a process of raising funds and deploying capital, the intended portfolio composition has not been completed yet (and this initial stage can take up to 6 months). Yet, since the launch, the Fund promoted environmental and social characteristics in accordance with Article 8 of the Sustainable Finance Disclosure Regulation (the "SFDR").

The Fund committed to allocate a minimum of 11% of its assets to sustainable investments in economic activities with at least 10% contributing to environmental objectives and at least 1% in those to social objectives.

Over the reporting period from 17 February 2026 to 27 February 2026, the Fund was on track to meet its sustainability commitments, taking into account its initial ramp-up phase. In this regard, at the end of the reference period mentioned above, 99.76% of the Fund's assets were aligned with the environmental and social (E/S) characteristics. The remaining 0.24% consisted of cash and derivatives, which were not aligned with these characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators were used to measure the attainment of environmental or social characteristics promoted by the Fund:

As of February 27, 2026, exposure to Green, Social and Sustainability (GSS) Bonds and those issued by the Environmental Champions.

- 22.01% of investments in green bonds;
- 0.00% of investments in social bonds;
- 0.00% of investments in sustainability bonds;
- 36.66% of investments in bonds issued by best-in-class issuers ("Environmental Champions");
- Exposure to the Principal Adverse Impact (PAI) indicators (see table below);

Regarding the list of issuers, this is not applicable, as the fund was launched on February 17, 2026. In addition, the percentage of investment in issuers having exposure to or tying with excluded sectors and additional exclusions further described in the investment strategy section of this annex was 0%

Sustainability KPI Name	Value

… And compared to previous periods?

Not applicable. The Fund was launched on 17 February 2026.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments were, amongst others, to fund and promote:

a) the efficient use of energy, raw materials, water, and land;

b) the production of renewable energy;

c) the reduction of waste, and greenhouse gas (GHG) emissions, and lower impact of economic activities on biodiversity;

d) the development of a circular economy;

e) tackling inequalities and fostering social cohesion;

f) social integration;

g) good labour relations; or

h) investments in human capital, including disadvantaged communities.

The Fund's sustainable investments included a minimum allocation of 10% of its portfolio to sustainable investments in economic activities that contribute to environmental objectives.

This was achieved by investing in bonds labelled as "green" or in any other securities whose:

A) proceeds were used on eligible environmental projects;

B) framework adheres to international standards (including but not limited to, the International Capital Market Association (the "ICMA") Green Bond Principles, future European Union Green Bond Standard (the "EU GBS")); and

C) issuers do not significantly harm other environmental and social objectives while demonstrating good governance practices.

The use of proceeds for these bonds was clearly defined and aligned with the objectives above.

Additionally, the Fund committed to include a minimum allocation of 1% of its portfolio to sustainable social activities with a social objective. This was achieved by investing in bonds labelled as "social" or in any other securities, whose:

A) proceeds were used on eligible social projects;

B) framework adheres to international standards (including but not limited to, ICMA Social Bond Principles); and

C) issuers do not significantly harm other environmental and social objectives while demonstrating good governance practices.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (DNSH) principle across the portfolio.

Corporate issuers were monitored using the Principle Adverse Impact Risk App ("PAI Risk App"). The PAI Risk App used data from MSCI to identify issuers involved in harmful economic activities and/or controversies. Issuers deemed to violate PAI #7 (activities negatively affecting biodiversity-sensitive areas), #10 (violation of the UN Global Compact principles and the principles of the OECD Guidelines for Multinational Enterprises), and #14 (exposure to controversial weapons) were excluded from the Fund's investment universe.

The Investment Manager also used the Energy and Environmental Transition Index ("EETI") which ranks the remaining issuers in the Fund's investment universe according to their GHG emissions and intensity. Issuers falling within the bottom 20% of their peer groups with respect to PAI #1 (GHG emissions) and #3 (carbon footprint) (for corporates) and PAI #15 (GHG intensity) (for sovereigns) were excluded from the investment universe.

Additionally, sovereign issuers were subjected to tests based on their political liberties (PAI #16) and/or corruption.

When deploying funds to sustainable investments, especially with regards to the commitment to invest at least 11% of the Net Asset Value (NAV) in keeping with environmental and social objectives, the Investment Manager applied additional qualitative assessment (based on internal research or on external second party opinion) of the issuer's and of the projects' DNSH eligibility.

How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators, including PAIs and other data points deemed by the Investment Manager as proxies for adverse impact, were used to:

a. remove issuers that were considered to do significant harm from the portfolio; and

b. inform the Investment Manager about the risk associated with adverse impact and take appropriate action – that included due diligence, qualitative scrutiny and/or engagement (for details of an engagement see sections "Principal Adverse Impact" and "Investment Strategy" of the Fund of this annex).

While assessing eligible green and social bonds, the Investment Manager reviewed and documented the materiality of relevant PAIs for the project as well as how the project's implementation affects the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targets development of renewable energy sources, (e.g. solar/PV panels), the Investment Manager ascertained that financed projects score well on PAIs linked to GHG emissions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For bonds issued by sovereign countries, the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable to such investments. For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from MSCI. Breaches identified by this data provider were flagged in the investment compliance system for subsequent investigation by the Investment Manager.

Where due diligence proved that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

(i) identifying issuers deemed to be "Best-in-class";

(ii) restricting the Fund's investment universe; and

(iii) guiding thematic engagement.

Identifying Best-in-class issuers

The Fund invested in bonds issued by corporates and sovereigns deemed by the Investment Manager to be "Environmental Champions". "Environmental Champions" were identified using two proprietary ESG rankings:

· The EETI ranks sovereign issuers energy efficiency, natural capital conservation, renewable energy performance, using various data points, including GHG Intensity (emissions normalized by gross domestic product, CO2e/GDP).

· The ESG Credit App ranks corporate issuers by their GHG emissions and GHG intensity using various data points such as scope 1 and 2 GHG emissions, emitters' historic trajectories.

Restricting Fund's investible universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI and corporate issuers falling within the bottom 20% (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Guiding thematic engagement

The Investment Manager committed to engage with 5% of active holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAI metrics.

More information on how the Fund considered its PAIs may be found in the periodic reporting of the Fund.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2026-02-17 - 2026-02-28.

What was the proportion of sustainability-related investments?

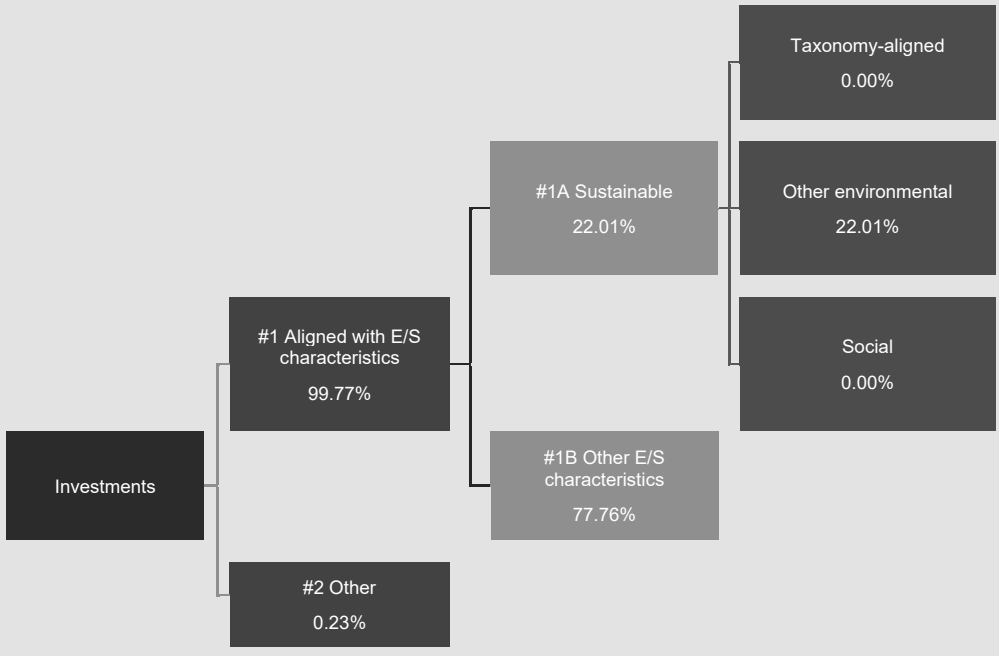
The portion of sustainability-related investments is 22.01%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

At the end of the stated reference period, 99.77% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (0.23%) was not aligned with the promoted characteristics and consisted primarily of liquid assets.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and social characteristics, the Fund invested 22.01% of its portfolio in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Financials	26.71%
Industrials	16.76%
Utilities	14.16%
Communication Services	10.01%
Government Bonds	8.06%
Real Estate	7.77%
Consumer Discretionary	6.14%
Consumer Staples	4.19%
Health Care	2.02%
Materials	2.01%
Information Technology	1.94%
Top sub-sector	**% of Assets**
Banks	16.67%
Financial Services	8.19%
Electric Utilities	8.18%
Government Bonds	8.06%
Electrical Equipment	4.21%
Commercial Services & Supplies	4.16%
Transportation Infrastructure	4.13%
Multi-Utilities	3.94%
Media	3.84%
Real Estate Management & Development	3.54%
Diversified Telecommunication Services	2.19%
Office REITs	2.19%
Air Freight & Logistics	2.18%
Food Products	2.11%
Hotels, Restaurants & Leisure	2.09%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

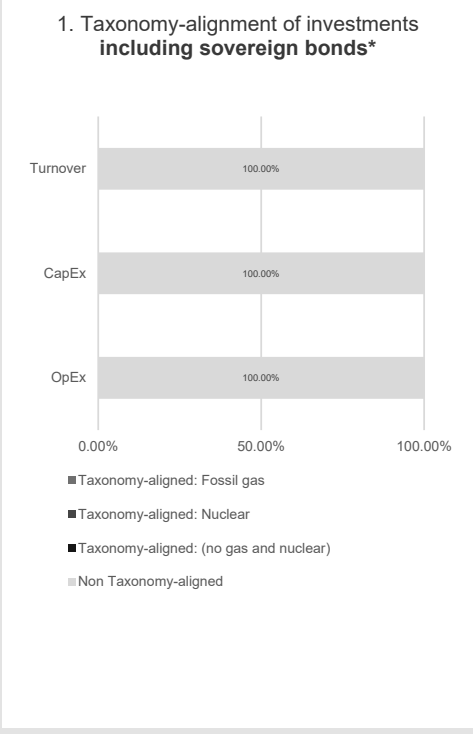
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

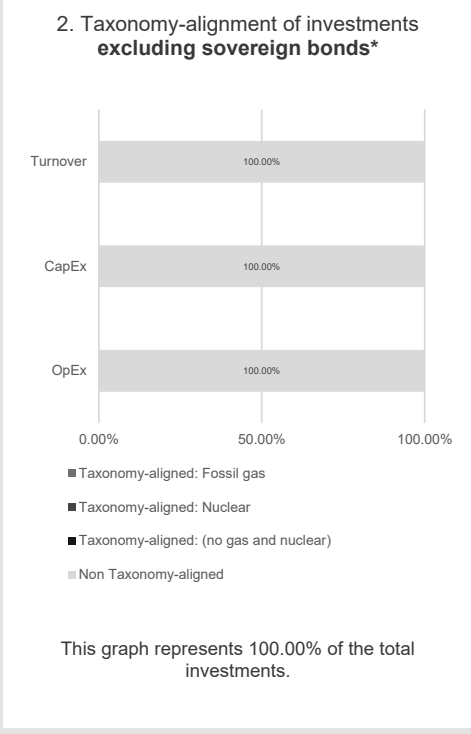
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

22.01% of the portfolio of the Fund was comprised of investments with an environmental objective not aligned with the EU Taxonomy.

As a result of the investment strategy of the Fund, the Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 0.00%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portion of investments under "#2 Other" was 0.23% and comprised of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund.

No minimum environmental and/or social safeguards were put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. The Investment Manager utilised numerous IT tools in order to determine a portfolio's composition so that it is aligned with the promoted environmental and social characteristics. Those characteristics were promoting the transition to a low-carbon economy by avoiding investments in issuers that are lagging in the transition and implementing negative screens as part of its investment process. Using internal and external inputs (e.g., MSCI datasets), the investment manager assessed which issuers were eligible (or not) to be held in the portfolio.

For example, the Fund employed a proprietary ESG rating methodology with the aim to avoid investment in issuers that are lagging in the transition to support a low-carbon economy. The Fund used a selectivity approach in order to exclude from its portfolio issuers (corporates and sovereigns) that scored in the bottom 20% of its investment universe based on a set of characteristics. For corporates, the Investment Manager looks at their GHG emissions and intensity, while for sovereigns, have a list of 16 environmental metrics such as energy efficiency, biodiversity protection, and responsible waste management. A sophisticated IT tools (Energy and Environmental Transition Index [EETI] for sovereigns and ESG Credit App for corporates) assigns a rank to issuers based on these characteristics and reduces the investable universe by the aforementioned 20%.

The Fund has a proprietary exclusion list, in that sense, the Investment Manager did not invest in issuers that:

- Violate the United Nations Global Compact principles, the UN Guiding Principles on Business and Human Rights, and the OECD Guidelines for Multinational Enterprises;
- Have "Not Free" status according to the Freedom House Index 1 sovereign issuers (PAI #16);
- Manufacture or distribute controversial weapons such as those that are defined as being indiscriminate, or those that manufacture components intended for use in such weapons (PAI #14 (exposure to controversial weapons));
- Derive more than 5% of their revenue from production of conventional weapons;
- Are involved in the cultivation and production of tobacco or those that derive revenue from such products that exceeds the Investment Manager’s thresholds (5%)
- Derive more than 5% of their revenue from gambling or adult entertainment;
- Derive 1 % or more of their revenues from exploration, mining, extraction, distribution or refining of hard coal and lignite;
- Derive more than 5% of their revenue from the most polluting fossil fuels;
- Derive 50 % or more of their revenues from the exploration, extraction, manufacturing or distribution of gaseous fuels;
- Derive 10 % or more of their revenues from the exploration, extraction, distribution or refining of oil fuels;
- Derive 50 % or more of their revenues from electricity generation with a GHG intensity of more than 100 g CO2 e/kWh;
- Negatively affect biodiversity-sensitive areas (PAI #7 (activities negatively affecting biodiversity-sensitive areas);
- Exceed the Investment Manager’s 30% revenue tolerance level from fossil fuels or 5% revenue tolerance level from thermal coal us ed to generate electricity, without having ambitious decarbonization targets for electricity generation; and
- Score an ESG rating of CCC according to MSCI. Exceptions can only be made after the Investment Manager conducts a formal review and provides sufficient evidence that the CCC ESG rating cannot be justified.

If a security held by the Fund fell under at least one of the above exclusions, the Investment Manager divested from such security as soon as practicable and at the latest within a period of six month.

1. When deploying funds to sustainable investments, especially with regards to the commitment to invest at least 11% of the portfolio in keeping with environmental and social objectives, the Investment Manager applied additional qualitative assessment (i.e., the Sustainable Investment Evaluation Form – based on internal research or on external second party opinion) of the issuer’s and of the projects’ DNSH eligibility.

In line with Investment Manager’s ambition to achieve a positive impact on the environment and social aspects, as well as to satisfy the regulatory requirements, the Investment Manager first checks that all the eligible expenditures for a bond that is being considered for purchase are in fact sustainable and positively contribute to environmental and/or social goals. Then, the Investment Manager ensures that neither the issuer nor the project that is funded via the bond issue causes any significant harm to other environmental or social objectives. At the same time, the Investment Manager checks the overall impact of an issuer on the environment. Social aspects are equally important, and Investment Manager refrains from investing in green or social projects if there is evidence of any severe employee—and/or local community-related controversies. While assessing those parameters, Investment Manager looks through a prism of sixteen mandatory principal adverse impact (PAI) indicators

2. As the fund was launched on 17 February 2026, leaving less than two weeks before the close of the reporting period, the Investment Manager did not have sufficient time to undertake engagement activities. These activities are expected to be carried out in the next financial year

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF Putnam US Large Cap Growth Fund (the "Fund")

Legal Entity Identifier: 254900IM839YXZB4N283

FRANKLIN TEMPLETON

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made **sustainable investments with a social objective:** 0.00%	☐ with a social objective
	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager integrated ESG analysis into fundamental research and portfolio construction during the reporting period and used active engagement and proxy voting to discuss and address ESG risks that were material and financially relevant to issuers and encourage transparency for investors.

The environmental and/or social characteristics promoted by the Fund were key Environmental, Social and Governance (ESG) issues deemed material to the specific company and the sector in which the company operates: climate risk, greenhouse gas ("GHG") emissions, workforce engagement, diversity, equality and inclusion, employee well-being and development, board structure and composition, and systemic risk management and leadership.

Derivative instruments have not been used to attain the environmental / social characteristics promoted by the Fund. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund during the reporting period were:

· The Fund maintained a lower carbon intensity than the benchmark during the reporting period. The Fund's weighted average carbon intensity (Scope 1 and Scope 2) was 31.24 (tCO2e/M$ revenue) and fell 11.58% below the benchmark's weighted average carbon intensity (Scope 1 and Scope 2) of 35.33 (tCO2e/M$ revenue).

· The Fund's exposure to issuers that were rated by Sustainalytics as Negligible, Low or Medium was 90.59% for the period, which exceeded the Fund's minimum target of 60%.

· 100% of investments were compliant with the 10 Principles of the UN Global Compact.

· 100% of investments were compliant with business involvement exclusionary screens relating to controversial weapons; conventional weapons; adult entertainment; tobacco and related products; and thermal coal.

Sustainability KPI Name	Value
% difference in portfolio carbon intensity and benchmark carbon intensity, inclusive of scope 1 and scope 2 (tCO2e/M$ revenue)	-11.58%
% of investments in issuers assessed as Medium or Negligible/Low ESG risk	90.59%
% of investments in compliance with UN Global Compact	100.00%
% of investments in compliance with the Fund's business involvement exclusionary screens	100.00%

PAI indicators	Unit of measurement	Value	Coverage
GHG Intensity (Scope 1 & 2)	tCO2e/M€ revenue	32.92	94.50%
Violations of UNGC principles and OECD Guidelines	Percentage of Fund invested	0.00%	94.50%
Exposure to controversial weapons	Percentage of Fund invested	0.00%	94.50%

… And compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAI) as part of the investment decision making process and sought to minimize three PAIs by monitoring the portfolio's carbon intensity metric against benchmark and through application of the Fund's Exclusion Policy . Third party data provided by Morningstar Sustainalytics was used to monitor associated metrics during the reporting period.

· PAI #3 (GHG Intensity) - The Investment Manager assessed specific climate-related risks and opportunities faced by individual companies as part of the stock selection process, which integrates these considerations, among other environmental, social and governance considerations. The Fund maintained a lower Carbon Intensity metric (inclusive of Scope 1 and Scope 2 emissions) for the Fund's portfolio when compared to its benchmark. Carbon Intensity is the amount (in tons) of total emissions attributable to a portfolio, per million dollars (USD) invested. Scope 1 emissions are direct emissions from an issuer's own operations while Scope 2 emissions are indirect emissions from electricity purchased and used by an issuer. The Fund's aggregate portfolio carbon intensity metric is apportioned by the Fund's ownership share of issuers in the portfolio, i.e. owned emissions divided by owned revenues. The benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Fund. The Investment Manager used a third-party provider to monitor the Fund's Carbon Intensity metrics in comparison to the benchmark.

· PAI #10 (Violations of UN Global Compact and OECD Guidelines) - The Fund did not invest in companies that were assessed as non-compliant with UN Global Compact and OECD Guidelines.

· PAI #14 (Exposure to controversial weapons) - The Fund did not invest in companies that generated any of their turnover from the production and/or distribution of controversial weapons (i.e., antipersonnel mines, nuclear weaponry, biological & chemical weaponry, and cluster munitions).

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-04-04 - 2026-02-28.

Largest investments	Sector	% of Assets	Country

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

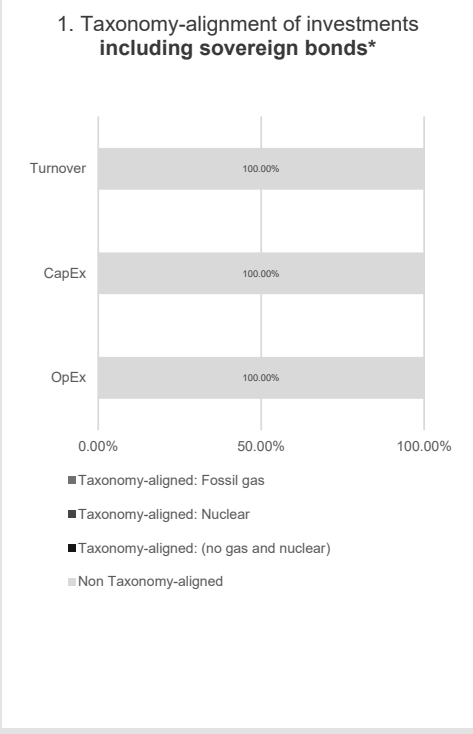
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

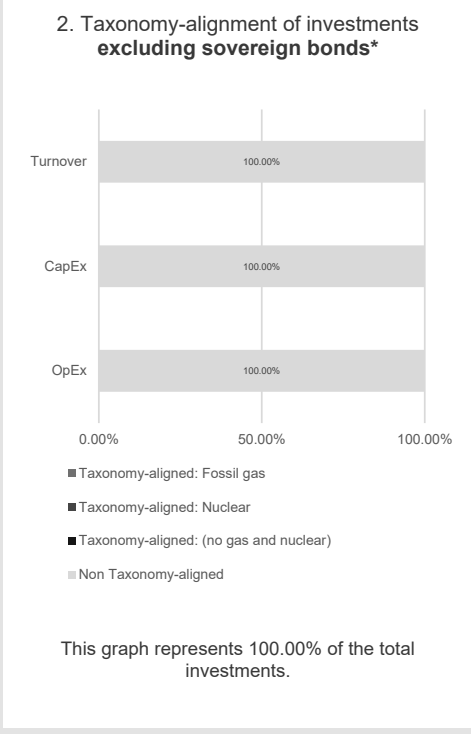
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

As a result of the investment strategy of the Fund, the Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy and, accordingly, 0.00% of the portfolio of the Fund was composed of investments with an environmental objective not aligned with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 0.00%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under "#2 Other" was 2.93%. "#2 Other" comprises cash held on deposit, cash equivalents and derivative instruments (used for investment, efficient portfolio management and/or hedging purposes) and derivatives (used for hedging purposes) for which there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager integrated ESG analysis into fundamental research and portfolio construction during the reporting period and used active engagement with senior management and proxy voting to manage ESG risks that were material and financially relevant to issuers and encourage transparency for investors.

The following actions were taken:

· Promoted effective management of climate risk and energy efficiency by Investing in issuers with lower carbon intensity;

· Promoted better or improved corporate behaviours which includes positive labour relations and /or having a long term business strategy by investing at least 60% of portfolio holdings in issuers with Medium, Low or Negligible ESG risk ratings;

· Promoted compliance with international norms by restricting investments in issuers that are in violation of the United Nations Global Compact

· Promoted social well-being by restricting investments in issuers involved in the production and/ or distribution of conventional weapons, the production and/ or distribution of controversial weapons as described in the Franklin Templeton EU Funds Policy; and the production and/ or distribution of adult entertainment;

· Promoted public health through the exclusion of tobacco business involvement

· Promoted environmentally friendly corporate practices with the exclusion of thermal coal business involvement

Periodic ESG engagements with portfolio companies were conducted during the reporting period to assess issuer plans to manage material ESG risks and progress against such plans. The investment team’s views of issuer ESG risk management discussed during these meetings was reflected in proxy voting and investment decisions. For more details on our engagement approach, please refer to our Stewardship policy found here: https://www.franklintempleton.com/forms-literature/download/ESPOL-B. During the period, the Fund voted on 304 proxy proposals supporting good governance and improving sustainability practices.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FTGF Putnam Global Healthcare Fund (the "Fund")

FRANKLIN TEMPLETON

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** 0.00%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made **sustainable investments with a social objective:** 0.00%	☐ with a social objective
	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager integrated ESG analysis into fundamental research and portfolio construction during the reporting period and used active engagement with senior management and proxy voting to discuss and address risks that were material and financially relevant and encourage transparency for investors.

The Fund promoted the following environmental and/or social characteristics:

(a) Compliance with international norms by excluding investments in violation of the United Nations Global Compact;

(b) Better or improved corporate behaviours which includes positive labour relations and /or having a long term business strategy by investing in issuers with the ESG Risk Ratings as described below;

(c) (i) Social wellbeing which is achieved through the exclusion of the production and/ or distribution of conventional weapons, the production and/ or distribution of controversial weapons as described in the Franklin Templeton EU Funds Policy; and the production and/ or distribution of adult entertainment; (ii) public health which is achieved through the exclusion of tobacco; (iii) environmentally friendly corporate practices achieved through the exclusions of thermal coal.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure attainment of each of the environmental or social characteristics of the Fund are

· 100% of investments were compliant with the 10 Principles of the UN Global Compact;

· 100% of investments were compliant with business involvement exclusionary screens relating to controversial weapons; conventional weapons; adult entertainment; tobacco and related products; and thermal coal;

Sustainability KPI Name	Value
% of investments in issuers assessed as Medium or Negligible/Low ESG risk	90.22%

Sustainability KPI Name	Value
% of investments in compliance with UN Global Compact	100.00%
% of investments in compliance with the Fund's business involvement exclusionary screens	100.00%

PAI indicators	Unit of measurement	Value	Coverage
Violations of UNGC principles and OECD Guidelines	Percentage of Fund invested	0.00%	94.53%
Exposure to controversial weapons	Percentage of Fund invested	0.00%	94.78%

… And compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAI) as part of the investment decision making process and sought to minimise two PAIs through application of the Fund's Exclusion Policy. Third-party data provided by Morningstar Sustainalytics was used to monitor associated metrics during the reporting period.

- PAI #10 (Violations of UN Global Compact and OECD Guidelines) - The Fund did not invest in companies that were assessed as non-compliant with UN Global Compact and OECD Guidelines.
- PAI #14 (Exposure to controversial weapons) - The Fund did not invest in companies that generated any of their turnover from the production and/or distribution of controversial weapons (i.e., antipersonnel mines, nuclear weaponry, biological & chemical weaponry, and cluster munitions).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-05-30 - 2026-02-28.

The largest investments of this Fund during the reference period, excluding cash, were:

Largest investments	Sector	% of Assets	Country
Eli Lilly & Co	Health Care	9.55%	United States
JOHNSON & JOHNSON	Health Care	6.63%	United States
Abbvie Inc	Health Care	6.59%	United States
UNITEDHEALTH GROUP INC	Health Care	5.47%	United States
ASTRAZENECA PLC	Health Care	5.26%	United Kingdom
NOVARTIS AG	Health Care	4.51%	Switzerland
THERMO FISHER SCIENTIFIC INC	Health Care	4.47%	United States
INTUITIVE SURGICAL INC	Health Care	3.86%	United States
BOSTON SCIENTIFIC CORP	Health Care	3.80%	United States

What was the proportion of sustainability-related investments?

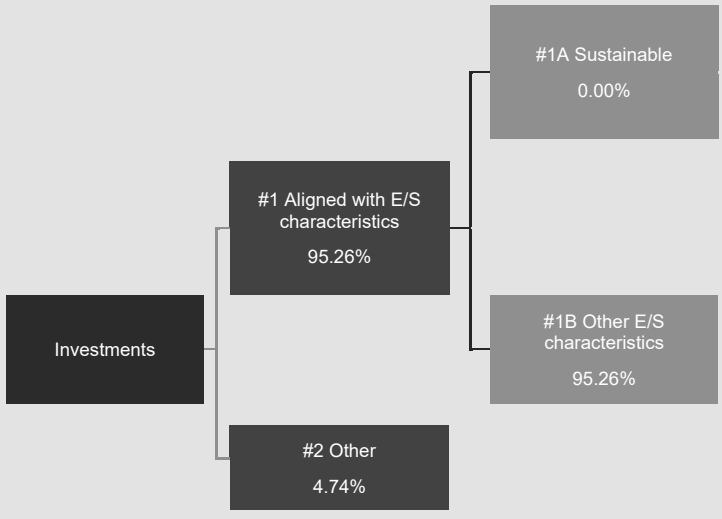
The proportion of sustainability-related investments was 0.00%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

A portion of 95.26% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (4.74%) was not aligned with the promoted characteristics and consisted primarily of liquid assets.

Out of the Fund's portfolio segment which is aligned with the promoted environmental and/or social characteristics, the Fund invested 0.00% of its portfolio in sustainable investments.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Health Care	95.26%
Top sub-sector	**% of Assets**
Pharmaceuticals	40.04%
Biotechnology	19.34%
Health Care Providers & Services	15.20%
Health Care Equipment & Supplies	14.99%
Life Sciences Tools & Services	5.68%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

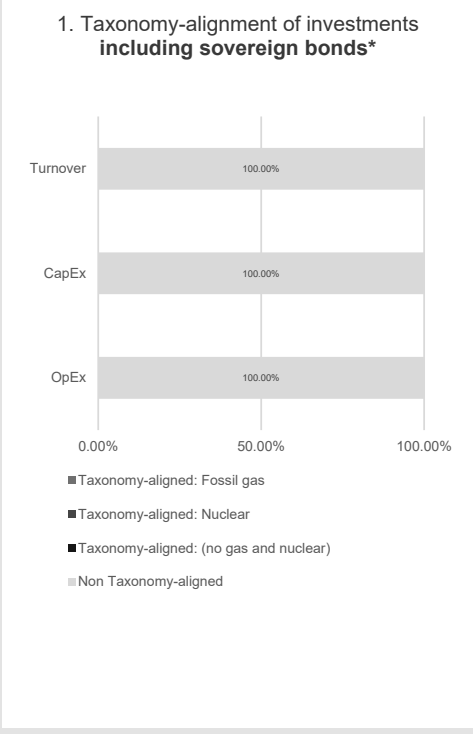
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?[1]

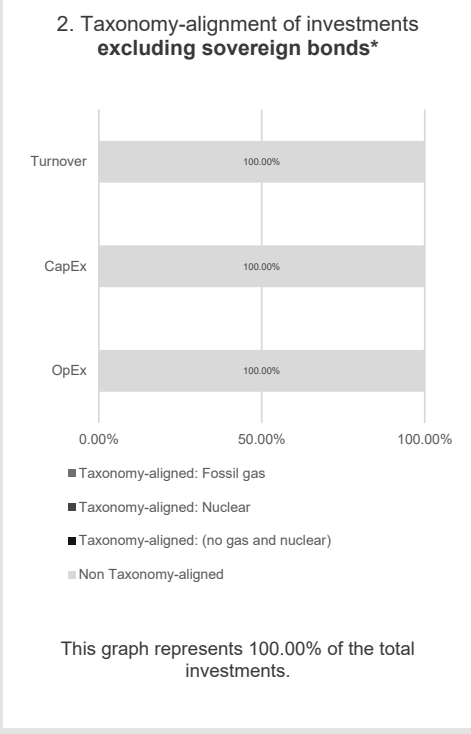
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

As a result of the investment strategy of the Fund, the Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy and, accordingly, 0.00% of the portfolio of the Fund was composed of investments with an environmental objective not aligned with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 0.00%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under "#2 Other" was 4.74% and were cash, cash equivalents and derivatives.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager integrated ESG analysis into fundamental research and portfolio construction during the reporting period and used active engagement with senior management and proxy voting to manage ESG risks that were material and financially relevant to issuers and encourage transparency for investors.

The following actions were taken:

· Promoted better or improved corporate behaviours which includes positive labour relations and /or having a long term business strategy by investing at least 60% of portfolio holdings in issuers with Medium, Low or Negligible ESG risk ratings;

· Promoted compliance with international norms by restricting investments in issuers that are in violation of the United Nations Global Compact

· Promoted social well-being by restricting investments in issuers involved in the production and/ or distribution of conventional weapons, the production and/ or distribution of controversial weapons as described in the Franklin Templeton EU Funds Policy; and the production and/ or distribution adult entertainment promotes social wellbeing;

· Promoted public health through the exclusion of tobacco business involvement

· Promoted environmentally friendly corporate practices with the exclusion of thermal coal business involvement

Periodic ESG engagements with portfolio companies were conducted during the reporting period to assess issuer plans to manage material ESG risks and progress against such plans. The investment team’s views of issuer management of ESG risks discussed during these meetings was reflected in proxy voting and investment decisions. For more details on our engagement approach, please refer to our Stewardship policy found here: 2025 Whitepaper-EngagementandStewardshipPolicy-en-US.indd. During the period, the Fund voted on 51 proxy proposals supporting good governance and improving sustainability practices.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.
