Directors

Bertrand Reimmel – member of the board of directors since August 2012

Mr. Reimmel, Senior Vice President, joined AllianceBernstein (Luxembourg) S.à r.l. in August 2005 as the Head of the Legal & Compliance Department and, since 2012, he also assumes the role of Managing Director of AllianceBernstein (Luxembourg) S.à r.l. As Managing Director, Mr. Reimmel oversees the Legal, Investment Compliance, Fund and Discretionary Portfolio Management, Product Development and Management, Internal Audit and Corporate Accounting functions. Mr. Reimmel became a member of the Luxembourg Bar in 1998 and, before joining AllianceBernstein (Luxembourg) S.à r.l., worked for more than eight years at Elvinger Hoss Prussen, one of the leading Luxembourg law firm, where he already covered AllianceBernstein files. Mr. Reimmel is also a key element in the launch and restructuring of each AllianceBernstein European UCITS and AIF. Furthermore, Mr. Reimmel is an active member of various ALFI working groups and peer groups and a former member of the CSSF GFI Committee. His 20 years of experience in the Luxembourg and European fund industry and his significant technical expertise to UCITS and Alternative Investment Funds make him one of the most-senior lawyers within the AllianceBernstein International Legal Group.

Olivia Moessner – member of the board of directors since October 2019

Ms. Moessner is a partner of the law firm Elvinger Hoss Prussen, *société anonyme*. Ms. Moessner's practice concentrates on collective asset management and investment funds. Ms. Moessner advises a number of investment fund promoters and other financial institutions in relation to the set-up and structuring of their Luxembourg investment fund operations. Her practice encompasses a broad range of investment funds (UCITS, UCIs, SIFs and RAIFs) implementing various investments strategies including hedge fund strategies.

Ms. Moessner is a member of the Luxembourg Bar since 2001 and member of numerous working groups of ALFI (Association of the Luxembourg Fund Industry) on various key European topics such as UCITS eligible assets, SFTR, ETFs, MIFID, PRIIPs, ELTIFs, money market funds and pension funds.

Susanne van Doothingh – member of the board of directors since January 2020

Ms. van Doothingh is an independent non-executive director of several Luxembourg domiciled investment funds and management companies. Prior to becoming an iNED she was at State Street Global Advisors from 2002 to 2017 with her final position being Senior Managing Director, Head of European Governance and Regulatory Strategy EMEA. Prior to this she held various senior positions within State Street Global Advisors in Global Product and Fixed Income Product Engineering. Before joining SSGA in 2002 she worked at Fortis Investment Management, Barclays Global Investors, and ABN AMRO Asset Management. She graduated from the Vrije Universiteit Amsterdam with a Master of Arts in Financial Sector Management.

Vincent Noto – member of the board of directors since October 2023

Mr. Noto is a Senior Vice President and Director of Fund Compliance within the Legal and Compliance department of AllianceBernstein L.P. ("AB LP"). Mr. Noto has over 35 years of experience with AB LP, which includes senior roles within Global Fund Administration and Legal and Compliance. He served as the Controller for AB LP's 1940 Act Funds from 1998-2007 and as the Chief Compliance Officer for AB's 1940 Act Funds during the period 2015-2022. Since 2011, he provides training to Portfolio Management regarding UCITS rules/guidelines and 1940 Act rules. Mr. Noto has overseen investment compliance for AB LP's co-mingled vehicles since 2011, which includes European UCITS. Mr. Noto has extensive experience in reporting to fund boards on the following topics: fund administration, compliance matters, valuation, portfolio trading matters, new or amended policies, new fund launches, fund mergers, and new security types. He has garnered extensive experience in areas that include investment compliance, fund administration/accounting, transfer agency, and product development during the course of his career. Mr. Noto holds a BS in Accounting from St. Peters College and an MBA with a concentration in Finance from Fairleigh Dickinson University.

Structure of the Fund

AB SICAV I (the "Fund") is an open-ended investment company with variable capital (*société d'investissement à capital variable*) incorporated with limited liability under the laws of the Grand Duchy of Luxembourg on June 8, 2006 and registered under Part I of the law of December 17, 2010 on undertakings for collective investment (as amended) (the "Law of 2010"). The Fund qualifies as an Undertaking for Collective Investments in Transferable Securities ("UCITS") within the meaning of Article 1(2) of the EC Directive 2009/65 of July 13, 2009 (as amended).

June 20, 2025

Dear Shareholder,

This report provides an update for AB SICAV I (the "Fund") for the annual reporting period ended May 31, 2025.

US, international and emerging-market stocks increased during the 12-month period ended May 31, 2025. Global equity markets rallied early in the period following a series of cooler inflation readings in the US and rising expectations for monetary policy easing from the Federal Reserve, which were confirmed by the Fed's 0.50% rate reduction in September. Global equities rose following US election results and a second Fed rate cut in November, then fell in December as investor sentiment shifted following more hawkish-than-expected US Federal Reserve commentary at its meeting during the month. The declines continued in early 2025 amid impending tariffs by the Trump administration, escalating geopolitical tensions, softening economic data and persistent inflation. Market volatility reached extreme levels in April as President Trump's back-and-forth announcements to set then pause "reciprocal" tariffs on specific trading partners increased investor uncertainty.

While US markets declined in the aftermath, positive returns in Europe helped buffer some of the losses for global equity investors. Efforts by President Trump and other administration officials to de-escalate the trade war and engage in talks with major trading partners helped lessen the volatility in May, and global equities rallied through the month. Within large-cap markets, both growth- and value-oriented stocks rose, but growth outperformed value on a relative basis. Large- and small-cap stocks both increased in absolute terms during the period, but large caps outperformed small caps on a relative basis.

Fixed-income government bond market yields were volatile as investors adjusted their expectations for US tariffs, inflation, economic growth, deficits and central bank decisions. Global developed-market yields initially fell as central banks began to ease monetary policy, then rose as inflation remained too high in most countries before falling in mid-January on growth concerns because of potential US tariffs. In early April, yields rose after the US announced reciprocal tariffs, then rallied after US reciprocal tariffs were paused, only to move higher on deficit concerns. Government bond returns rose solidly in aggregate in most developed countries. They rose the highest in Switzerland, Italy and New Zealand, and rose the least in the UK and Japan.

Overall, developed-market investment-grade corporate bonds rose and outperformed government bonds, as corporates outperformed treasuries in the eurozone and the US. Developed-market high-yield corporate bonds advanced and significantly outperformed treasury markets, particularly in the US and eurozone. Emerging-market hard-currency sovereign bonds outperformed developed-market treasuries, mainly due to the strong performance of high-yield sovereigns.

Emerging-market hard-currency corporate bonds overall also had solid results, again driven somewhat by high-yield corporates. Emerging-market local-currency bonds led other credit risk sectors in a period when the US dollar fell against most developed-market currencies and was mixed against emerging-market currencies.

We appreciate your investment in the Fund.

Sincerely,

AllianceBernstein L.P., the Investment Manager of the Fund

The share class performance of each Portfolio is based on the net asset value incorporating the impact of expenses reimbursed or waived by the Management Company as of May 31, 2025. No adjustment has been made for sales charges that may apply when shares are purchased or redeemed. Performance for distributing share classes includes the reinvestment of distributions paid during the year. Past performance is no guarantee of future results. Investment return and principal value may fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.

* 6 months period ending May 31, 2025.

NOTE B: Significant Accounting Policies

The Financial Statements have been prepared in accordance with Luxembourg legal and regulatory requirements and on a going concern basis. The following is a summary of significant accounting policies followed by the Portfolios.

1. Valuation

1.1 Investments in Securities

Securities listed on a stock exchange or traded on any other regulated market are valued at the last sale price on such exchange or market or, if there has been no sale on such day, at the mean of the closing bid and asked price quoted on such day. If a security is listed on several stock exchanges or markets, the last sale price on the stock exchange or market which constitutes the principal market for such security is used.

Securities traded in the over-the-counter market, including securities listed on an exchange whose primary market is believed to be over-the-counter (but excluding securities traded on The Nasdaq Stock Market, Inc. (“NASDAQ”)) are valued at the mean of the current bid and asked prices. Securities traded on NASDAQ are valued in accordance with the NASDAQ Official Closing Price.

Securities are valued at their current market value determined on the basis of market quotations or, if market quotations are not readily available or are deemed unreliable, at “fair value” as

determined in accordance with procedures established by, and under the general supervision of, the Management Company’s Board of Managers (the “Board of Managers”) and the Board of Directors.

Fair valuation procedures are designed to adjust closing market prices of securities to reflect what is believed to be the fair value of those securities at the Portfolio’s Valuation Point.

When fair valuation procedures are employed with respect to a particular security, various objective and subjective factors may be considered, including, among other things, developments affecting the security or involving an entire market since the security’s latest reported price, current valuations of relevant stock indices or pronouncements of certain governmental authorities. Fair value prices based on third party vendor modeling tools may be utilized to the extent available. Therefore, when fair valuation procedures are employed, the prices of individual securities utilized to calculate the Portfolio’s Net Asset Value (“NAV”) may differ from quoted or published prices for the same securities.

Currently, fair value adjustments are only applicable to certain equity securities and futures contracts.

Accordingly, as may also be the case with a previously reported stock exchange price, the price of any portfolio security determined utilizing fair value pricing procedures may be

materially different from the price to be realized upon the sale of such security.

For portfolio securities primarily traded on U.S. and Indian exchanges, it is expected that fair value pricing procedures are employed only under very limited circumstances such as, for example, the early closing of an exchange on which a particular security is traded or the suspension of trading in particular security. However, it is anticipated that fair value pricing procedures will be utilized frequently for securities traded on non-U.S. exchanges or other markets, particularly European and Asian markets, excluding India, because, among other reasons, these markets close well before the Portfolio's Valuation Point. Between the close of these markets and the relevant Portfolio's Valuation Point, significant events including broad market moves may occur. In particular, events in the U.S. market on a trading day after the close of these other markets may affect the value of the Portfolio's securities.

Fixed income securities (i), securities not listed on any stock exchange, or traded on any regulated market (ii), and securities, trading of which on a stock exchange or a regulated market is thin (iii), are valued at the most recent bid price provided by the principal market makers. If there is no such market price, or if such market price is not representative of a security's fair market value, then the security is valued in a manner determined to reflect its fair value in accordance with procedures established by, and under the general supervision of, the Board of Managers and the Board of Directors.

U.S. Government securities and any other debt instruments having 60 days or less remaining until maturity are generally valued at market price by an independent pricing vendor, if a market price is available. If a market price is not available, the securities are valued at amortized cost. This methodology is commonly used for short-term securities that have an original maturity of 60 days or less, as well as short-term securities that had an original term to maturity that exceeded

60 days. In instances when amortized cost is utilized, the valuation committee (the "Committee") must reasonably conclude that the utilization of amortized cost is approximately the same as the fair value of the security. Such factors the Committee will consider include, but are not limited to, an impairment of the creditworthiness of the issuer or material changes in interest rates.

Over-the-counter ("OTC") swaps and other derivatives are valued daily, primarily using independent pricing services, independent pricing models using market inputs, as well as third party broker-dealers or counterparties.

1.2 Warrant Valuation

A listed warrant is valued at the last traded price provided by approved vendors. If there has been no sale on the relevant business day, the warrant is valued at the last traded price from the previous day. On the following days, the security is valued in good faith at fair value. All unlisted warrants are valued in good faith at fair value. Once a warrant has expired, it will no longer be valued.

1.3 Financial Futures Contracts

Initial margin deposits are made upon entering into futures contracts. During the period the futures contract is open, changes in the value of the contract are recognized as unrealized gains or losses by "marking-to-market" on a daily basis to reflect the market value of the contract at the end of

each day's trading. Variation margin payments are made or received, depending upon whether unrealized losses or gains are incurred. When the contract is closed, a realized gain or loss is recorded. This realized gain or loss is equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund's basis in the contract. Open futures contracts are valued using the closing settlement price or, in the absence of such a price, the most recent quoted bid price. If there are no quotations available for the day of valuation, the last available closing settlement price is used.

1.4 Forward Foreign Currency Contracts

The unrealized gain or loss on open forward foreign currency contracts is calculated as the difference between the contracted rate and the rate to close out the contract. Realized profit or loss includes net gains or losses on forward foreign currency contracts which have been settled or offset by other contracts with the same counterparty.

1.5 Options Purchased and Options Written

When an option is purchased, an amount equal to the premium paid is recorded as an investment and is subsequently adjusted to the current market value of the option purchased. Premiums paid for the purchase of options which expire unexercised are treated on the expiration date as realized losses. If a purchased put option is exercised, the premium is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining whether the relevant Portfolio has realized a gain or loss. If a purchased call option is exercised, the premium increases the cost basis of the security or foreign currency purchased by the relevant Portfolio. When an option is written, an amount equal to the premium received by the relevant Portfolio is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are treated by the relevant Portfolio on the expiration date as realized gains. If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security or foreign currency in determining whether the relevant Portfolio has realized a gain or a loss. If a written put option is exercised, the premium reduces the cost basis of the security or foreign currency purchased by the relevant Portfolio. Listed put or call options purchased by a Portfolio are valued at the last sale price. If there has been no sale on that day, such securities are valued at the closing bid prices on that day.

1.6 Investments in other Undertakings for Collective Investment ("UCIs")

Investments in other UCIs are valued at the last available NAV for the UCI in question.

1.7 Swap Agreements

The Portfolios accrue for interim payments on swap contracts on a daily basis, within income and expenses. Swap contracts are marked to market on a daily basis with fluctuations in value recorded in "Unrealized appreciation (depreciation) on swaps" in the Statement of Assets and Liabilities and "Changes in unrealized gains and (losses) on swaps" in the Statement of Operations and Changes in Net Assets. Once a swap contract has matured or is sold, the net amount is recorded as "Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency" in the Statement of Operations and Changes in Net Assets. The upfront premiums paid or received are recognized as cost or proceeds in the Statement of Assets and Liabilities and

are amortized in a straight line basis over the life of the contract. Accruals of amortized upfront premiums on credit default swaps are included in “Swap income” until the position is sold, thereafter the amortized upfront premiums are included within “Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency”. On all other swap types the amortized upfront premiums are included within “Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency”. Fluctuations in the value of swap contracts are recorded as a component of “Changes in unrealized gains and (losses) on swaps” in the Statement of Operations and Changes in Net Assets.

“Upfront premiums paid/(received) on swap contracts” disclosed in the Statement of Assets and Liabilities include premiums paid (received) on the OTC credit default swaps and a margin that is yet to be settled on the centrally cleared credit default swaps.

2. Organization Expenses

The organization expenses for the following Portfolios are being amortized on a straight-line basis through the following dates:

AB SICAV I–	Dates
Sustainable Income Portfolio	June 2026
Security of the Future Portfolio	December 2028
Global Growth Portfolio	February 2029
US Value Portfolio	April 2029
USD Corporate Bond Portfolio	July 2029
Euro Corporate Bond Portfolio	July 2029
Global Equity Income and Growth Portfolio	December 2029

The organization expenses of other existing Portfolios have been fully amortized in prior years.

3. Allocation Method

Income and expenses (except for class-specific management and distribution fees) for the “fixed income” and “balanced” Portfolios are allocated on a daily basis utilizing a hybrid allocation model. This model allocates based upon each class’ proportionate percentage of the combined value of settled shares for those classes which accrue a daily dividend and the value of the shares outstanding for those classes which accrue a monthly dividend or no dividend at all.

Income and expenses for the “equity” Portfolios are allocated on a daily basis by each class’ value of their proportionate shares outstanding.

For all of the Portfolios, realized and unrealized gains and losses are allocated on a daily basis by each class’ value of their proportionate shares outstanding.

Class specific management, management company, distribution fees and realized and unrealized gains and losses on forward foreign currency contracts related to the Currency Hedged Share Classes are charged/allocated directly to the respective class.

Due to the distinct institutional nature of all types of Class S shares of the Portfolios, certain fund expenses, where applicable, are allocated to the Class S shares based upon minimum shareholder activity and account level requirements.

4. Currency Translation

Values expressed in a currency, other than the currency in which a Portfolio is denominated, are translated at the average of the last available buying and selling price. Transactions in foreign currencies are translated into the currency of each Portfolio at the exchange rate ruling at the date of the transactions.

The Combined Statement of Assets and Liabilities is presented in U.S. Dollars at the exchange rates ruling at the date of the Combined Statement of Assets and Liabilities, while the Combined Statement of Operations and Changes in Net Assets is presented in U.S. Dollars at the average exchange rates ruling during the year. Exchange rates applied in the financial statements are: spot rate 1.1355 and average rate 1.0819 for EUR to USD, spot rate 0.1389 and average rate 0.1383 for CNH to USD and spot rate 1.3474 and average rate 1.2875 for GBP to USD.

The “Currency translation adjustment” presented in the Statement of Operations and Changes in Net Assets is the result of the difference in exchange rates used to translate combined net assets at the beginning of the year, the Statement of Assets and Liabilities and the Statement of Operations and Changes in Net Assets.

5. Investment Income and Investment Transactions

Dividend income is recorded on the ex-dividend date. Interest income is accrued daily. Investment gains and losses for the Portfolios are determined on an average cost basis. The Fund accretes discounts and amortizes premiums as adjustments, if applicable, to interest income. Investment transactions are recorded on trade date plus one day.

6. Estimates

The preparation of the Financial Statements in conformity with accounting principles generally accepted in Luxembourg requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Financial Statements and the reported amounts of income and expenses during the reporting year. Actual results may differ from those estimates.

7. Swing Pricing Adjustment

(The following applies to all Portfolios except Sustainable Global Thematic Portfolio and Global Value Portfolio)

The Fund implemented a NAV Adjustment Policy, also known as “swing pricing” policy, effective from November 2, 2015. Under this policy, a Portfolio’s NAV may be adjusted to reflect the impact of estimated transaction costs, deal spreads and charges generated by shareholders’ purchase and redemption activity.

Swing pricing is automatically applied when daily net subscriptions or redemptions exceed a threshold specified by the Swing Pricing Committee under the supervision of the Board of Directors.

When swing pricing is applied, the NAV of the relevant Portfolio's shares will be adjusted up or down, in an amount generally not to exceed 2% of the relevant NAV, so that the transaction costs incurred due to the purchase and redemption activity are borne by the investors transacting in the Portfolio's shares, rather than the Portfolio itself. This adjustment is intended to minimize dilution of the value of shareholders' investment in shares of a Portfolio brought on by transactions in the Portfolio's shares.

The NAV per Share and the total net assets as disclosed in the Statistical Information are the published NAV per Share and

the total net assets, whereas the total net assets disclosed in the Statement of Assets and Liabilities and Statement of Operations and Changes in Net Assets is the total NAV excluding any period end swing adjustments.

All Portfolios subject to swing pricing except Sustainable Euro High Yield Portfolio, Flexible Income Portfolio, Event Driven Portfolio, China Multi-Asset Portfolio, Sustainable Climate Solutions Portfolio, Global Climate Transition Equity Portfolio and Global Equity Income and Growth Portfolio swung their NAVs during the reporting year and as of May 31, 2025, none of such Portfolios swung their NAVs.

NOTE C: Taxes

As a Luxembourg *société d'investissement à capital variable* ("SICAV"), the Fund is not subject, under present tax laws, to income, withholding or capital gains taxes in Luxembourg.

The Fund is subject to the Luxembourg *taxe d'abonnement* at the rate of 0.05% per annum calculated and payable quarterly, on the aggregate total net assets on the last day of each calendar quarter. The rate is 0.01% for share classes reserved to institutional investors within the meaning of Article 174 of the Law of 2010. Dividends, interest and capital gains on Portfolio securities issued in certain countries may be subject to withholding or capital gains taxes imposed by such countries.

India

Capital gains realized on the disposal of Indian listed stocks within 12 months after purchase (short term gains) are subject to a 20% Indian capital gains tax (15% prior to 23 July 2024). The disposal of Indian listed stocks after 12 months after purchase (long term gains) are subject to a 12.5% Indian capital gain tax (10% prior to 23 July 2024). The capital gains taxes are accrued in the net asset value and included in the Statement of Assets and Liabilities under the heading 'Accrued expenses and other liabilities' or 'Other receivables' and included in the Statement of Operations and Changes in Net Assets under 'Capital withholding tax' for the year ended May 31, 2025.

People's Republic of China (PRC)

Corporate Income Tax ("CIT")

By investing in shares of PRC resident enterprises (including China A-, B- and H-Shares), RMB denominated corporate and government bonds, securities investment funds and warrants listed on the PRC stock exchanges or PRC inter-bank bond markets, a Portfolio may be subject to withholding income tax ("WIT") and other taxes imposed in the PRC.

Lacking specific guidance, it is uncertain whether the RQFII or the relevant investing Portfolios would be considered the taxpayer with respect to the PRC-sourced income derived from the investment in bonds, shares and other securities in the PRC. In the event the RQFII were considered to be the taxpayer, any PRC taxes levied against the RQFII would be reimbursed and ultimately borne by the relevant Portfolios of the Fund.

If the relevant Portfolios are deemed to be the taxpayer, then such Portfolios will be subject to PRC CIT at 25% on its worldwide taxable income if it is considered to be a tax resident enterprise of the PRC. If the Portfolio is considered to be a nontax resident enterprise with an establishment or place of business ("PE") in

the PRC, the PRC sourced profits attributable to that PE would be subject to CIT at 25%.

Under the PRC CIT Law effective from 1 January 2008, a foreign enterprise without a PE in the PRC will generally be subject to a WIT at the current rate of 10% on its PRC sourced income, including but not limited to passive income (e.g. dividends, interest, gains arising from transfer of assets, etc.), subject to the application of treaty relief.

The Investment Manager intends to manage and operate the Portfolios in such a manner that the Portfolios and the Fund not be treated as a tax resident enterprise of the PRC or a nontax resident enterprise with a PE in the PRC for CIT purposes, although this cannot be guaranteed. As such, it is expected that the Portfolios should only be subject to WIT at 10% to the extent the Portfolio directly derives PRC sourced income in respect of its investment in bonds, shares and other securities in the PRC.

Equity investments

With the approval from the PRC State Council, the PRC State Administration of Taxation, the PRC Ministry of Finance and the China Securities Regulatory Commission have jointly issued Caishui [2014] 79 ("Circular 79") to clarify the WIT treatment with respect to gains derived by QFIIs and RQFIIs from the disposal of equity investments, including shares in PRC enterprises. According to Circular 79, QFIIs and RQFIIs are temporarily exempt from WIT with respect to gains derived from the disposal of equity investments, including shares in PRC enterprises (e.g. A-Shares and B-Shares), via the QFII or RQFII investment quota, effective from November 17, 2014.

PRC tax disclosure regarding Stock Connect

In addition to investing in A-Shares via the RQFII quota of the RQFII Holder, the Fund may gain exposure to A-Shares through Stock Connect, which has commenced trading as of November 17, 2014.

With the approval from the PRC State Council, the PRC State Administration of Taxation, the PRC Ministry of Finance and the CSRC have jointly issued Caishui [2014] 81 ("Circular 81") to clarify the PRC tax treatment regarding China Connect Securities. Circular 81 is effective on November 17, 2014.

According to Circular 81, the Fund is subject to the following PRC income tax treatment with respect to the Northbound Trading under Stock Connect (i.e. trading of certain A-Shares on the SSE):

- Temporarily exempt from PRC WIT with respect to gains derived from the disposal of A-Shares.
- Subject to PRC WIT at 10% with respect to dividends received from A-Shares.
- Subject to PRC SD at 0.1% with respect to the sale of A-Shares (i.e. the purchase of A-Shares is not subject to PRC SD).

Investors should note that Stock Connect has limited or no history, and, accordingly, the taxation rules applicable to China Connect Securities traded on Stock Connect are not long established and subject to change in the future. Investors should seek advice from their professional tax advisors with any questions regarding China Connect Securities.

The PRC Ministry of Finance (“MOF”) and PRC State Taxation Administration (“STA”) have jointly issued Caishui [2018] 108 (“Circular 108”) to clarify the 3-year PRC tax exemption treatment of bond interest derived by foreign institutional investors on 22 November 2018. According to Circular 108 and Announcement [2021] No. 34 (“Announcement 34”), foreign institutional investors are temporarily exempt from WIT and PRC Value-Added Tax with respect to bond interest income derived in the domestic bond market for the period from 7 November 2018 to 31 December 2025.

Neither Circular 108 nor Announcement 34 mentions the retroactive tax collection on bond interest derived prior to 7 November 2018.

NOTE D: Distributions

The following tables describe the frequency and nature of distributions, if applicable, for Base Currency Share Classes and suffixes as well as the meaning of other suffixes used by the Fund. Note that the distribution policy of a suffix supersedes the distribution policy of the base Share Class listed below.

Base Share Class	Distribution Policy Details	
	Fixed Income Portfolios	All Other Portfolios
A, B, C, E, I, IX, L, N, RX, XX, Z	Declares distributions daily and pays them monthly	Does not make distributions*
AB, F, S, SU, S1, W, 1, 2	Does not make distributions unless a suffix is used, as per below.	

Suffix	Distribution Policy Details
A <i>Example: AA</i>	Declares and pays distributions monthly, based on gross income and may pay out of capital

M <i>Example: AM</i>	Declares and pays distributions monthly at a fixed rate and may pay out of capital

Suffix	Distribution Policy Details
QD <i>Example: SQD, SIQD</i>	Declares and pays distributions quarterly, based on net income, and may pay out of capital
MG <i>Example: AMG</i>	Declares and pays distribution monthly, based on gross income, and may pay out of capital
QG <i>Example: AQG</i>	Declares and pays distribution quarterly, based on gross income, and may pay out of capital
N <i>Example: AN, IN</i>	Does not intend to make distributions ³
NN <i>Example: ANN, INN</i>	Annual distribution based on net income and will not pay out of capital
K <i>Example: AK, IK</i>	Distributions to be declared and payable bi-annually, based on net income, and may pay out of capital ⁴
R <i>Example: AR</i>	Declares and pays distributions annually, based on gross income and may pay out of capital
L <i>Example: IL</i>	Monthly distributions based on net income and will not pay out of capital
P ⁵ <i>Example: AP, SP</i>	Declares and pays distributions monthly at a predominantly stable rate based on historical investment results and is expected to pay significantly out of capital.

Suffix	Additional information
X <i>Example: A2X</i>	Designates share classes no longer offered for new investors ⁶ and may be used in addition to other suffixes relating to distribution.

* All Market Income Portfolio Shares: AX, BX, and CX pay distributions quarterly based on net income and may pay out of capital.

¹ Global Real Estate Securities Portfolio: Share Class 1D pays distributions annually based on net income.

² If the NAV per share of the Share Class falls below USD 1 or AUD 1, the Board may either liquidate the Share Class or merge it with another Share Class that has similar features.

³ Eurozone Equity Portfolio: may declare and pay distributions annually based on net income and may pay out of capital.

⁴ American Growth Portfolio: does not intend to make distributions.

⁵ Distributions based on gross total return are largely derived from historical investment results including realized and unrealized capital gains. Gross total return means the capital and income return before the deduction of fees and expenses. Distributions are expected to exceed the increase in the NAV per Share from the net income and realized/unrealized capital gains of the Share Class resulting in erosion of capital.

If the NAV per share of the Share Class falls below USD 10 (or relevant currency equivalent), the Board may either liquidate the Share Class or merge it with another Share Class that has similar features.

⁶ Except for Share Classes IX, XX, RX offered in Global Core Equity Portfolio.

There is no guarantee that distributions will be made. A high distribution yield does not necessarily imply a positive or high return. Gross income means income before the deduction of fees and expenses.

All Shares that declare distributions must do so at least once a year (unless there is nothing to distribute or if making distributions is at the discretion of the Board or the Management Company) and must pay them within one month of declaration. When a dividend is declared, the NAV of the relevant Share Class is reduced by the amount of the dividend.

Distributions are paid only on Shares that were owned as of the record date (the date on which distributions are assigned to Shares). For each Share Class, distributions are paid in the currency of that Share Class including the currency offered Share Class.

Unless otherwise specified above, all distributions indicated may consist of net income, gross income (interest and dividends before fees and expenses), realized and unrealized gains from Portfolio investments and/or capital invested in the Portfolio.

Distributions based on net income typically represent net income (gross income less fees and expenses). These distributions are based on actual investment results, do not target or project any particular rate or amount and may vary from one distribution period to another. Distributions in excess of net income may represent a return of the investor's original investment amount and as such may result in a decrease in the NAV per Share for the relevant Share Class.

Shareholders may request that their distributions be automatically reinvested. Unless reinvested, any distribution from capital may reduce a portfolio's future growth and increase the chances of capital loss. A high distribution yield does not necessarily imply a positive or high return.

No interest is paid on unclaimed dividend payments, and after 5 years these payments will be returned to the Portfolio.

The Board may offer new and different types of dividend-paying Share Classes for a Portfolio in the future.

The Board intends to maintain a stable distribution rate for the following Share Classes:

The rate of distribution is determined by the Board at its discretion based on Portfolio strategy considerations.

During periods of negative performance, the distribution will normally continue to be paid and the capital value of the investment may fall more rapidly. It may not be possible to maintain the stable rate of distribution payment indefinitely and it may be reduced in part, or to zero.

Please note that in relation to the P suffix share classes only, whilst the monthly distribution rate is intended to be predominantly stable, the rate may be subject to adjustment on at least an annual basis and as otherwise required.

NOTE E: Management Fee and Other Transactions with Affiliates

The Fund pays the Management Company a management fee. Under the terms of the Investment Management Agreement from the management fee earned, the Management Company pays an investment management fee to the Investment Manager.

The Management Company has voluntarily agreed to bear certain expenses to the extent necessary to limit total operating expenses on an annual basis.

These limitations have been set as follows (limitations expressed as a percentage of the average daily net assets):

Expenses borne by the Management Company are included in the Statement of Operations and Changes in Net Assets under “Expense reimbursed or waived”. Reimbursement receivable is included in the Statement of Assets and Liabilities under “Other receivables” or in “Accrued expenses and other liabilities”.

The Fund also pays its Management Company, a Management Company fee. Specific share classes of each Portfolio will pay the Distributor, a distribution fee, which is compensation for providing distribution related services to the Fund with respect to such shares.

All of the aforementioned fees are accrued at an annual rate on the average daily net assets of each Portfolio and paid monthly.

A list of each Portfolio’s annual rate for their applicable fees can be found in Table 1 (Page 444 to 469). Also, Class B, BD and each applicable H shares are subject to a contingent deferred sales charge at rates of between 0.00% and 4.00%. Class BX and each applicable H shares are subject to a contingent deferred sales charge at rates of between 0.00% and 3.00% or between 0.00% and 4.00%. Class B2, B2X, BT, E, EA, ED, EI and each applicable H shares are subject to a contingent deferred sales charge at rates of between 0.00% and 3.00%. Class C, C2, C2X, CD, CT, CX and each applicable H shares are subject to a contingent deferred sales charge at rates between 0.00% and 1.00% which may be waived in certain circumstances by the dealer.

The Fund compensates its registrar and transfer agent, AllianceBernstein Investor Services, a unit of the Management Company, under a Management Fund Services Agreement for providing personnel and facilities to perform registrar and transfer agency services for the Fund. Such compensation amounted to \$13,554,066 for the year ended May 31, 2025.

The Fund compensates the Investment Manager for certain services provided to the Fund in connection with the registration of the Fund for sale in certain jurisdictions outside of Luxembourg, subject to certain conditions. For the year ended May 31, 2025, such compensation amounted to \$635,195 and is included in “Professional fees” in the Statement of Operations and Changes in Net Assets.

The Fund compensates its legal adviser, Elvinger Hoss Prussen, *société anonyme* for legal services rendered to the Fund. Payments of €15,851 were made for the year ended May 31, 2025 and are included in “Professional fees” in the Statement of Operations and Changes in Net Assets.

The Investment Manager has not entered into transactions in relation to a placing and/or a new issue in which a connected person had a material interest as a member of the underwriting syndicate.

All transactions executed on behalf of the Fund were entered into in the ordinary course of business and/or normal commercial terms.

There was no commission paid for the year ended May 31, 2025 on securities transactions utilizing the services of the affiliated firms, Bernstein Institutional Services LLC and Bernstein Autonomous LLP. Several of the Management Company’s managers are employees and/or officers of the Investment Manager and/or its affiliates.

Global Plus Fixed Income Portfolio invests in AB FCP I – Mortgage Income Portfolio, a portfolio which is managed by the Management Company. US High Yield Portfolio invests in AB FCP I – Mortgage Income Portfolio, a portfolio which is managed by the Management Company. American Multi-Asset Portfolio invests in AB FCP I – American Income Portfolio, a portfolio which is managed by the Management Company.

The Fund’s directors are entitled to remuneration for their services. Such accrued compensation amounted to \$144,016 for the year ended May 31, 2025 and is included in “Miscellaneous” in the Statement of Operations and Changes in Net Assets.

NOTE F: Soft Commission Arrangements and Transaction Costs

During the year ended May 31, 2025, where permitted under applicable law, the Investment Manager and any Affiliated Sub-Investment Manager, if applicable, received and entered into soft-dollar commissions/arrangements with brokers relating to Portfolios of the Fund that invest in equity securities, in respect of which certain goods and services used to support the investment decision making process were received. The soft commission arrangements were entered into on the basis that the execution of transactions on behalf of the Fund will be consistent with best execution standard and the Investment Manager considers many factors regarding best execution standards when entering into soft commission arrangements such as the size and nature of brokerage fees.

Additionally, due to the nature of the investment strategy of certain Portfolios, including where the Investment Manager delegates investment management services to AllianceBernstein Limited, AllianceBernstein (Europe) Limited and CPH Capital Fondsmæglerselskab A/S, all costs associated with soft commission arrangements may be “unbundled” and borne by the Investment Manager or its sub-delegates, if required by applicable law.

The goods and services received include specialist industry, company and consumer research, portfolio and market analysis and computer software used for the delivery of such services.

The nature of the goods and services received is such that the benefits provided under the arrangement must be those which assist in the provision of investment services to the Fund and may contribute to an improvement in the Fund’s performance.

For the avoidance of doubt, such goods and services do not include travel, accommodations, entertainment, general administrative goods or services, general office equipment or premises, membership fees, employees’ salaries or direct money payments.

Transaction costs are costs incurred in the acquisition, issue or disposal of transferable securities, money market instruments, derivatives or other eligible assets. They can include bid-ask spread, fees and commissions paid to agents, advisers, brokers and dealers, transaction related taxes and other market charges. They do not include debt premiums or discounts, financing costs or internal administrative or holding costs. Transaction costs are included within the cost of investments in the Portfolio of Investments as well as in the “Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency” and “Changes in unrealized gains and (losses) on investments” in the Statement of Operations and Changes in Net Assets. Transaction costs are excluded from the Total Expense Ratio and/or expense reimbursement calculation.

NOTE G: Forward Foreign Currency Contracts

A forward foreign currency contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contract and the closing of such contract is included in “Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency” in the Statement of Operations and Changes in Net Assets.

Fluctuations in the value of open forward foreign currency contracts are reflected for financial reporting purposes as a component of “Unrealized appreciation/(depreciation) on forward foreign currency contracts” in the Statement of Assets and Liabilities.

One or more of a Portfolio’s share classes offered in a particular currency (each, an “Offered Currency”) may be hedged to such Offered Currency. Any such share class will constitute a “Currency Hedged Share Class”. Currency Hedged Share Classes aim to provide investors a return more closely correlated to the Portfolio’s base currency return by reducing

the effect of exchange rate fluctuations between the portfolio’s base currency and the relevant Offered Currency, taking into account practical considerations such as transaction costs. The hedging strategy employed is designed to reduce, but may not eliminate, currency exposure between the portfolio’s base currency and the Offered Currency. Risks may arise from the potential inability of counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the hedged currency.

Given that there is no segregation of liabilities between the various share classes within a portfolio, there is a remote risk that, under certain circumstances, currency hedging transactions in relation to a Currency Hedged Share Class could result in liabilities which might affect the NAV of the other share classes of the same portfolio, in which case assets of the other share classes of the portfolio may be used to cover the liabilities incurred by such Currency Hedged Share Class. The securities in the Fund are used as collateral for forward foreign currency contracts including those used for share class hedging.

NOTE H: Repurchase Agreements

Repurchase agreements are collateralized by obligations of the United States, its agencies or instrumentalities thereof. The securities underlying the repurchase agreement will be held by the Depositary at all times in an amount at least equal to the repurchase price, including accrued interest.

At May 31, 2025, there were no repurchase agreements.

There was no interest income arising from repurchase agreements during the year ended May 31, 2025.

NOTE I: Reverse Repurchase Agreements

Reverse repurchase agreements are identical to repurchase agreements except that rather than buying securities for cash subject to their repurchase by the seller, a Fund sells portfolio assets concurrently with an agreement by the Fund to repurchase the same assets at a later date at a fixed price slightly higher than the sale price. During the reverse repurchase agreement period, the Fund continues to receive principal and interest payments on these securities. Generally, the effect of a reverse repurchase agreement is that the Fund can recover all or most of the cash invested in the portfolio securities involved during the term of the reverse repurchase agreement, while it will be able to keep the interest income associated with those portfolio securities.

Such transactions are advantageous only if the “interest cost” to the Fund of the reverse repurchase transaction, i.e., the difference between the sale and repurchase price for the securities, is less than the cost of otherwise obtaining the cash invested in portfolio securities.

At May 31, 2025, there were no reverse repurchase agreements.

There was no interest income arising from reverse repurchase agreements during the year ended May 31, 2025.

NOTE J: Financial Futures Contracts

The Fund may buy or sell financial futures contracts. The Fund bears the market risk that arises from changes in the value of these financial instruments. The Fund's activities in financial futures contracts are conducted through regulated exchanges, which do not result in counterparty credit risk.

At the time the Fund enters into a financial futures contract, the Fund deposits and maintains with the broker as collateral an initial margin as required by the exchange on which the transaction is effected.

Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as the variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the time it was closed.

NOTE K: Swap Transactions

A swap is an agreement that obliges two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset or otherwise determined notional amount. Realized gains and (losses) and changes in unrealized gains and (losses) on swaps are included in the Statement of Operations and Changes in Net Assets respectively under "Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency" and as a component of "Change in unrealized gains and (losses) on swaps".

Centrally Cleared Credit Default Swaps

The buyer in a centrally cleared credit default swap agreement is obliged to pay the seller a periodic stream of payments over the term of the contract in return for a contingent payment upon the occurrence of a credit event with respect to an underlying reference obligation.

Centrally Cleared Interest Rate Swaps

A centrally cleared interest rate swap is a bilateral agreement in which each of the parties agree to exchange a series of fixed or floating interest rate payments based on a notional amount that serves as a computation basis.

Total Return Swaps

A total return swap is a bilateral agreement in which each of the parties agree to exchange the total performance of an underlying asset for a series of interest payments based on a notional amount that serves as a computation basis.

Credit Default Swaps

The buyer in a credit default swap agreement is obliged to pay the seller a periodic stream of payments over the term of the contract in return for a contingent payment upon the occurrence of a credit event with respect to an underlying reference obligation.

Interest Rate Swaps

An interest rate swap is a bilateral agreement in which each of the parties agree to exchange a series of fixed or floating interest rate payments based on a notional amount that serves as a computation basis.

Inflation Swaps

An inflation swap is a bilateral agreement in which each of the parties agree to exchange fixed rate payments for floating, inflation index linked payments based on a notional amount that serves as a computation basis.

Variance Swaps

Variance swaps are contracts in which two parties agree to exchange cash payments based on the difference between the stated level of variance and the actual variance realized on underlying asset(s) or index(es). Actual "variance" as used here is defined as the sum of the square of the returns on the reference asset(s) or index(es) (which in effect is a measure of its "volatility") over the length of the contract term. So the parties to a variance swap can be said to exchange actual volatility for a contractually stated rate of volatility.

NOTE L: Loans of Portfolio Securities

A Portfolio may make secured loans of its securities. The risk in lending securities, as with other extensions of credit, consists of possible loss of rights in the collateral should the borrower fail financially. In addition, a Portfolio will be exposed to the risk that the sale of any collateral realized upon the borrower's default will not yield proceeds sufficient to replace the loaned securities.

In determining whether to lend securities to a particular borrower, the Investment Manager will consider all relevant facts and circumstances, including the creditworthiness of the borrower.

While securities are on loan, the borrower may pay a Portfolio concerned any income from the securities. A Portfolio may

invest any cash collateral in money market instruments, thereby earning additional income, or receive an agreed upon amount of income from a borrower who has delivered equivalent collateral.

A Portfolio may have the right to regain record ownership of loaned securities or equivalent securities in order to exercise ownership rights such as voting rights, subscription rights and rights to dividends, interest or distributions. A Portfolio may pay reasonable finders', administrative and other fees in connection with a loan. For making secured loans of its securities, a Portfolio receives gross fee income, of which 20% is paid to securities lending agent for providing securities lending services.

For the year ended May 31, 2025, the Portfolios earned a net fee income, which is presented in Statement of Operations and Changes in Net Assets under “Securities lending income, net”.

For the year ended May 31, 2025 Brown Brothers Harriman & Co. (acting as securities lending agent) earned a fee of \$212,199 for providing securities lending services. This is included in the Statement of Operations and Changes in Net Assets under “Securities lending income, net”.

The value of loaned securities and related collateral outstanding as of May 31, 2025, are as below. The collateral relates to securities held on the Portfolios.

NOTE M: Bank Facility

The Fund has access to an overdraft facility (the “Facility”), established with the Depository, intended to provide for short-term/temporary financing if necessary, subject to certain restrictions, in connection with abnormal redemption activity.

Each Portfolio of the Fund is limited to borrowing 10% of its respective net assets. Borrowings pursuant to the Facility are subject to interest at a mutually agreed upon rate and security by the underlying assets of each Portfolio.

NOTE N: Option Transactions

The Fund may purchase and write (sell) put and call options on securities. The risk associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of the premium and a change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of securities acquired through the exercise of call options is increased by the premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

is added to the proceeds from the sale of the underlying security or currency in determining whether the Fund has realized a gain or loss. If a put option is exercised, the premium received reduces the cost basis of the security or currency purchased by the Fund. In writing an option, the Fund bears the market risk of an unfavorable change in the price of the security or currency underlying the written option.

When the Fund writes an option, the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written.

Exercise of an option written by the Fund could result in the Fund selling or buying a security or currency at a price different from the current market value.

Premiums received from written options which expire unexercised are recorded by the Fund on the expiration date as realized gains from options written. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium received is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium received

The Fund may also invest in options on swap agreements, also called swaptions. A swaption is an option that gives the buyer the right, but not the obligation, to enter into a swap on a future date in exchange for paying a market-based premium.

A receiver swaption gives the owner the right to receive the total return of a specified asset, reference rate, or index. A payer swaption gives the owner the right to pay the total return of a specified asset, reference rate, or index. Swaptions also include options that allow an existing swap to be terminated or extended by one of the counterparties.

NOTE P: Co-Management of Assets

For the purpose of effective management, where the investment policies of a Portfolio so permit, the Management Company may choose to co-manage assets of certain Portfolios within or outside the Fund. In such cases, assets of different Portfolios will be managed in common. The assets which are co-managed shall be referred to as a “pool”. These pooling arrangements are an administrative device designed to reduce operational and other expenses and do not change the legal rights and obligations of Shareholders. The pools do not constitute separate entities and are not directly accessible to investors. Each of the co-managed Portfolios shall remain entitled to its specific assets. Where the assets of more than one Portfolio are pooled, the assets attributable

to each participating Portfolio will initially be determined by reference to its initial allocation of assets to such a pool and will change in the event of additional allocations or withdrawals.

The entitlements of each participating Portfolio to the co-managed assets apply to each and every line of investments of such pool. Additional investments made on behalf of the co-managed Portfolios shall be allotted to such Portfolios in accordance with their respective entitlement, whereas assets sold shall be levied similarly on the assets attributable to each participating Portfolio.

As of May 31, 2025, the Fund co-manages the assets of certain Portfolios within the Fund utilizing the following pool:

Asset Pool	Participating Portfolios
AB – Global Growth Pool	Sustainable Global Thematic Portfolio
AB – Global Value Pool	Global Value Portfolio

NOTE Q: Clearing Reserve Fund

(The following applies to China A Shares Equity Portfolio)
Under the Investment Regulations, the Sub-Custodian is required to deposit a minimum clearing reserve fund as a percentage of the ABL Quota, the percentage amount to be determined from

time to time by the China Securities Depository & Clearing Corporation Limited (“CSDCC”) Shanghai and Shenzhen branches. Currently, the minimum clearing reserve ratio determined by the CSDCC Shanghai and Shenzhen branches is 0.06%.

NOTE R: Incentive Fee

Select Absolute Alpha Portfolio

At the end of each partial financial year/ financial year, the Investment Manager received/will receive an amount equal to 20% (10% for Class F Shares and 15% for S13 Shares) of the amount by which the “Adjusted NAV” (as defined below) of each of the relevant Share Classes exceeds the “High-Water Mark” (as defined below) at the end of the last day of a financial year.

Defined terms:

“Adjusted NAV” means the Net Asset Value per share before the reduction for the current financial year’s incentive fee, if any.¹

“High-Water Mark” or “HWM” means, for a Share Class, the NAV per share at the end of the last day of the most recent financial year in which the last incentive fee was paid or, if no incentive fee has been paid, the initial offering price of such Share Class at issue.

“Current Shares Outstanding” means the total Shares in issue, for each Share Class, on each day of the Portfolio’s financial year.

“Subscription Adjustment” means the prior day unrealized incentive fee divided by the prior day shares outstanding multiplied by the gross subscription shares.

“Cumulative Subscription Adjustment” means the cumulative prior days’ Subscription Adjustment over the reference period plus the current day Subscription Adjustment.

“Reference Period” means the period equal to at least 12 months, which begins either at the issue of the Share Class or at the time the last incentive fee has been paid. The reference period will always end at a financial year end, except in the case of a Share Class liquidation.

If there is a redemption in a Share charging Incentive Fees at any point during the year, other than as of the end of a financial year, an incentive fee with respect to such Share will be determined for such partial financial year and paid as of such date regardless of whether the financial year end Adjusted NAV exceeds the High-Water Mark. The High-Water Mark is not reset on those Business Days at which incentive fees crystallize following the redemption of Shares.

In accordance with ESMA guidelines 34/39/992 on performance fees in UCITS and certain types of AIFs, the Board will reset the High-Water Mark if no incentive fee has been paid during a five year performance reference period.

The following share classes (and corresponding H classes) do not charge an Incentive Fee: S and Z.

As of May 31, 2025 incentive fees payable was \$7,303,849. This is included within the line item “Accrued expenses and other liabilities” in the Statement of Assets and Liabilities.

¹ For the avoidance of doubt, the Adjusted NAV is net of costs

For the year ended May 31, 2025, the following share classes had incentive fees as follows:

NOTE S: Joint Credit Facility

The Fund together with other investment funds (the “participating funds”) participates in a \$400 million (effective from May 6, 2025) revolving credit facility (the “Credit Facility”) intended to provide short-term financing related to redemptions and other short term liquidity requirements, subject to certain restrictions.

Fees related to the Credit Facility are paid by the participating funds and are included in miscellaneous expenses in the combined statement of operations. The Fund did not utilize the Credit Facility during the year ended May 31, 2025.

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of AB SICAV I

Opinion

We have audited the financial statements of AB SICAV I (the "Fund") and of each of its Portfolios, which comprise the statement of assets and liabilities and the portfolio of investments as at May 31, 2025, and the statement of operations and changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its Portfolios as at May 31, 2025, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of July 23, 2016 on the audit profession (the "Law of July 23, 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "*Commission de Surveillance du Secteur Financier*" ("CSSF"). Our responsibilities under the Law of July 23, 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "responsibilities of the *réviseur d'entreprises agréé*" for the audit of the financial statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund (the "Board of Directors") is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "*réviseur d'entreprises agréé*" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors for the financial statements

The Board of Directors is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Fund's and each of its Portfolios' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Fund or any of its Portfolios or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "*réviseur d'entreprises agréé*" for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "*réviseur d'entreprises agréé*" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its Portfolios' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "*réviseur d'entreprises agréé*"

to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the “*réviseur d’entreprises agréé*”. However, future events or conditions may cause the Fund or any of its portfolios to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

Notice to Shareholders

If required by law and applicable regulations, notice to shareholders will be published in the *Recueil Electronique des Sociétés et Associations* (formerly the "Mémorial") and in such other newspaper(s) in such countries as the Management Company may from time to time determine.

Changes in the Investment Portfolio

Changes in the Portfolio of Investments during the reporting year are available free of charge to the Shareholders at the registered office of the Management Company.

Controversial Weapons Policy

The Management Company arranges for the screening of companies globally for their involvement in the production of anti-personnel mines, cluster munitions and/or munitions made with depleted uranium, biological weapons, chemical weapons and/or incendiary weapons. Where such involvement in production has been verified, the Management Company's policy is not to permit the Fund to invest in securities issued by such companies.

Value at Risk

For UCITS the Value at Risk (VaR) can be measured on an absolute or a relative basis. VaR is a widely used risk measure of the risk of loss on a specific portfolio of financial assets. The Investment Manager monitored the total global exposure (market risk) of the equity Portfolios for the year ended May 31, 2025 utilizing the VaR calculated on a relative basis (pursuant

to which the VaR of the relevant Portfolio may not exceed twice the VaR of the relevant reference benchmark). VaR is computed using a 99% confidence interval, a 20 day-holding period and a 3 year lookback. During the aforementioned year the low, high and average VaR of the Portfolios measured on a relative basis were as follows:

Portfolio	Benchmark	Low	High	Average
Emerging Markets Multi-Asset Portfolio	MSCI Emerging Markets	64.85%	82.69%	73.00%
All Market Income Portfolio	50% MSCI World Index / 40% Bloomberg Global High Yield (USD Hedged) / 10% Bloomberg Global Treasuries (USD Hedged)	76.43%	102.10%	89.07%
Sustainable All Market Portfolio	30% MSCI World Index / 30% MSCI World Index (EUR hedged) / 40% Bloomberg Global Aggregate Index (EUR hedged)	66.53%	134.43%	99.41%
American Multi-Asset Portfolio	45% S & P 500 TR Index / 45% Bloomberg US Corporate High Yield Index / 10% Bloomberg US Treasuries Index	94.13%	142.22%	121.47%

For the below listed Portfolios the Investment Manager monitored the global exposure (market risk) utilizing the VaR calculated on an absolute basis (pursuant to which the VaR of the relevant Portfolio may not exceed 20% of its NAV). VaR is computed using a 99% confidence interval, a 20 day-holding period and a 3 year lookback.

During the aforementioned fiscal year, the low, high and average VaR of the Portfolios measured on an absolute basis were as follow:

Portfolio	Low	High	Average
Sustainable Euro High Yield Portfolio	1.17%	1.87%	1.50%
RMB Income Plus Portfolio	1.26%	2.70%	1.64%
Short Duration High Yield Portfolio	0.89%	1.64%	1.28%

Leverage

For the Portfolios listed below, the Investment Manager does not expect to utilize bank borrowing in implementing the Portfolios' investment strategy.

The expected level of leverage is calculated as the sum of the notionals of the financial derivative instruments held by the Portfolio. Pursuant to the CSSF Circular 11/512 dated May 30, 2011, this calculation methodology neither takes into account the fact that a particular financial derivative instrument increases or decreases the Portfolio's investment risks nor permits to net financial derivative instruments with reverse positions.

Shareholders should be aware that (i) a higher level of expected leverage does not automatically imply a higher level of investment risk and (ii) the expected level of leverage disclosed above is mainly generated by the use of derivatives for hedging purposes or for efficient portfolio management. In addition, the actual leverage of the Portfolio may deviate from the below mentioned expected level of leverage:

- Sustainable Euro High Yield Portfolio
20%-250% range of the NAV of the Portfolio
- Emerging Markets Multi-Asset Portfolio
50%-300% range of the NAV of the Portfolio
- RMB Income Plus Portfolio

As a result of using the sum of notionals approach the average leverage of the Portfolios for the year ended May 31, 2025 was:

Portfolio	Leverage
Sustainable Euro High Yield Portfolio	11.70%
Emerging Markets Multi-Asset Portfolio	105.05%
RMB Income Plus Portfolio	248.42%
Short Duration High Yield Portfolio	21.43%

Sustainable All Market Portfolio	96.17%
Sustainable Income Portfolio	93.30%
Asia High Yield Portfolio	15.12%
American Multi-Asset Portfolio	31.56%

For the Portfolios listed below the Investment Manager used the commitment approach pursuant to the CSSF Circular 11/512 dated May 30, 2011 to monitor global exposure (market risk) resulting from the use of financial derivative instruments. Consequently, the net derivatives exposure created by derivative transactions combined with cash and other assets will closely approximate the NAV of the Portfolio.

As a result of using the commitment approach, the average leverage of the Portfolios for the year ended May 31, 2025 was:

During the Reference Period, no remuneration was paid by the Fund and/or the Management Company to the identified staff of the Investment Manager.

During the Reference Period, the total amount of remuneration paid to identified staff, which is composed during the Reference Period, by 7 employees, was EUR 1,758,270 (split as follows: fixed remuneration EUR 1,287,208 and variable remuneration

EUR 471,063)—representing less than 8% of the total remuneration.

Identified staff mentioned above are composed by the following categories of employees: a) senior management (during the Reference Period, five), b) members of staff of the Management Company whose actions may have a material impact on the risk profile of the Management Company or falling within the remuneration bracket of senior management and risk takes (during the Reference Period, none) and c) control functions (during the Reference Period, two).

Detailed information relating to—amongst others—the financial and non-financial criteria of the remuneration policies and practices, on decision-making process used to determine the remuneration policy, and on how pay and performance are linked are available in the Remuneration Statement published on AB Global website at the following address:

www.alliancebernstein.com/go/remuneration_policy

Over the Reference Period, a review of the Remuneration Policy and of its implementation has been carried out and it did not evidence any irregularity. Finally, no material change on the Remuneration Policy as it was initially designed occurred over the Reference Period.

PEA Eligibility (Plan d'Épargne en Actions)

The Plan d'Épargne en Actions ("PEA") is a French tax savings plan that allows French residents to benefit from certain tax exemptions for investing in European equities. A PEA eligible fund must permanently invest at least 75% of its net assets in PEA eligible equity-related securities (excluding convertible bonds) of companies established in a European Union Member State or in Liechtenstein, Iceland and Norway and subject to corporate income, or an equivalent, tax.

Through the year ended May 31, 2025, the following Portfolio invested primarily in PEA eligible equity - related securities, with the daily average percentage of investment in such securities as follows:

Portfolio	Daily Average (%)
Eurozone Equity Portfolio	90.57%

Securities Financing Transaction Regulation

The Securities Financing Transaction Regulation (“the SFTR”) introduces reporting requirements for securities financing transactions (“SFTs”) and total return swaps.

A SFT is defined as per Article 3(11) of the SFTR as:

- a repurchase/reverse repurchase agreement;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction; or
- a margin lending transaction.

During the year ended May 31, 2025, the Fund had entered into securities lending and total return swaps (TRS) as type of instrument in scope of the SFTR.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics (“E/S Characteristics”) promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB’s Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2025, 77% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 44 ESG engagement entries with 35 distinct companies held in the Portfolio. For these engagements, there were 9 discussions of environmental issues, and 40 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Human Capital Development, Product Safety & Quality, Diversity & Inclusion, Opportunities in Healthcare, Insuring Health & Demographic Risk.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2024, 0% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB’s Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 71.2% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

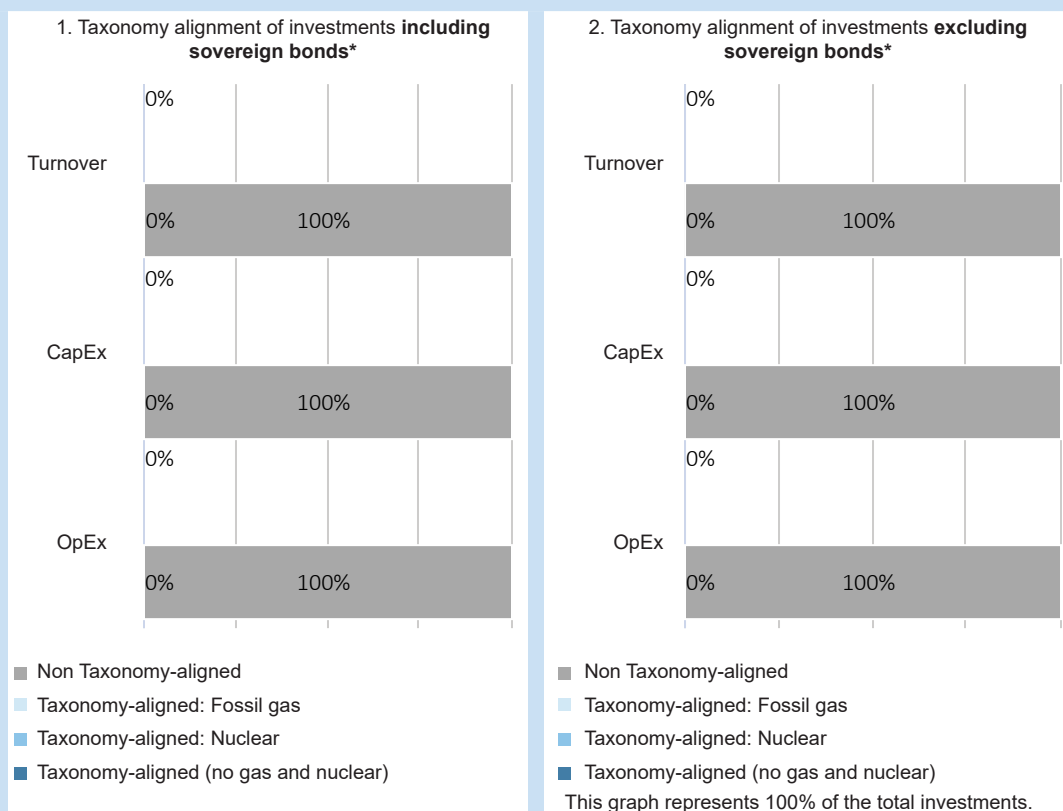

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2024, 21% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 73.9% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The Portfolio invested in issuers that AB believed were positively exposed to environmentally- or socially- oriented sustainable investment themes derived from the UN SDGs, such as Health, Climate, and Empowerment. All issuers contributed directly to the achievement of at least one UN SDG.

More information on the alignment approach can be found in AB’s Sustainability-Related Disclosures : www.alliancebernstein.com/go/EQ9webdisclosures.

● **How did the sustainability indicators perform?**

For the Portfolio, the attainment of the sustainable investment objective was measured through an assessment of alignment with one or more UN SDGs.

As detailed in the Prospectus, to measure alignment, AB analyses the percentage of corporate issuers’ revenues derived from products or services that support the achievement of one or more UN SDGs. As at 31 May 2025, the weighted average UN SDG revenue exposure for the Portfolio, based on AB’s proprietary assessment of aligned products and services, was 82.9%.

As at 31 May 2025, the top 3 UN SDGs by aligned portfolio weight are shown below (weights reflect reweighted portfolio ex-cash and derivatives). Please note that some issuers may align to more than one UN SDG but, for the purposes of this calculation, issuers are mapped according to the primary UN SDG to which they are aligned. As such, issuers are only mapped to one UN SDG:

- SDG 8 “Decent Work & Economic Growth”: 27.9%
- SDG 3 “Good Health & Wellbeing”: 21.3%
- SDG 7 “Affordable & Clean Energy”: 14.6%

AB has monitored the compliance with the exclusions listed in the Portfolio's Exclusion Policy available here: www.alliancebernstein.com/go/EquityExclusionPolicy and confirms they were met.

For EU Taxonomy-eligible activities, the proportion of EU Taxonomy alignment is displayed in the following questions.

● **...and compared to previous periods?**

As at 31 May 2024, the weighted average for SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services was 85.2%.

As at 31 May 2024, the top 3 SDGs aligned by Portfolio weight were:

- SDG 3 "Good Health and Well-Being": 21.6%
- SDG 8 "Decent Work and Economic Growth": 19.9%
- SDG 7 "Affordable and Clean Energy": 14.0%

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

All securities held within the Portfolio satisfied AB's proprietary methodology that uses the principal adverse impact ("PAIs") indicators to determine that a specific security meets the "Do No Significant Harm" principle outlined in SFDR (the "DNSH principle"). This methodology is comprised of a threshold-based scoring system, which uses a combination of internal and external data, alongside exclusion criteria. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy. The relevant data sources may evolve over time as more data becomes available and tools evolve.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

AB's Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB's Do No Significant Harm ("DNSH") Policy. AB's DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB's interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and was ineligible for inclusion in AB's Article 9 products.

During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

For any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB's proprietary methodology to determine that a security meets the DNSH principle.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs, as well as considering the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

AB incorporated the consideration of PAIs on sustainability indicators into various aspects of the Portfolio's investment process. This included:

- The 'Do No Significant Harm Policy' where a threshold-based scoring system, devised by AB, was used to evaluate issuers based on a consideration of the materiality and severity of ESG Factors in relation to PAIs 1-9, 11-13 and the two optional indicators listed above. Issuers scoring in excess of the threshold were made unavailable for investment. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.
- The Portfolio's Exclusion Policy which considers and mitigates the negative impact of certain PAIs by limiting investments in sectors such as, controversial weapons (PAI #14), or issuers violating the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI #10).

- AB’s Policy with respect to engagement on ESG issues, as detailed in the AB Global Stewardship Statement, by which AB encouraged issuers to undertake actions that may promote better outcomes for environmental, and social, objectives, as well as benefits to the financial outcomes of the issuer and/or the Portfolio.
- AB’s Proxy Voting Policy which evaluated whether ESG proposals promotes genuine improvement in the way that the company addresses ESG issues and may support such proposals. AB generally supported proposals in favour of financially material improvements in the management of environmental or social issues.

Below details the Portfolio’s exposure to these PAIs as a weighted average as at 31 May 2025:

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Portfolio invested 8% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31 May 2025. The investments contributed to the environmental objective listed in the EU Taxonomy. The Taxonomy-alignment have not been subject to an assurance provided by an auditor or a third-party.

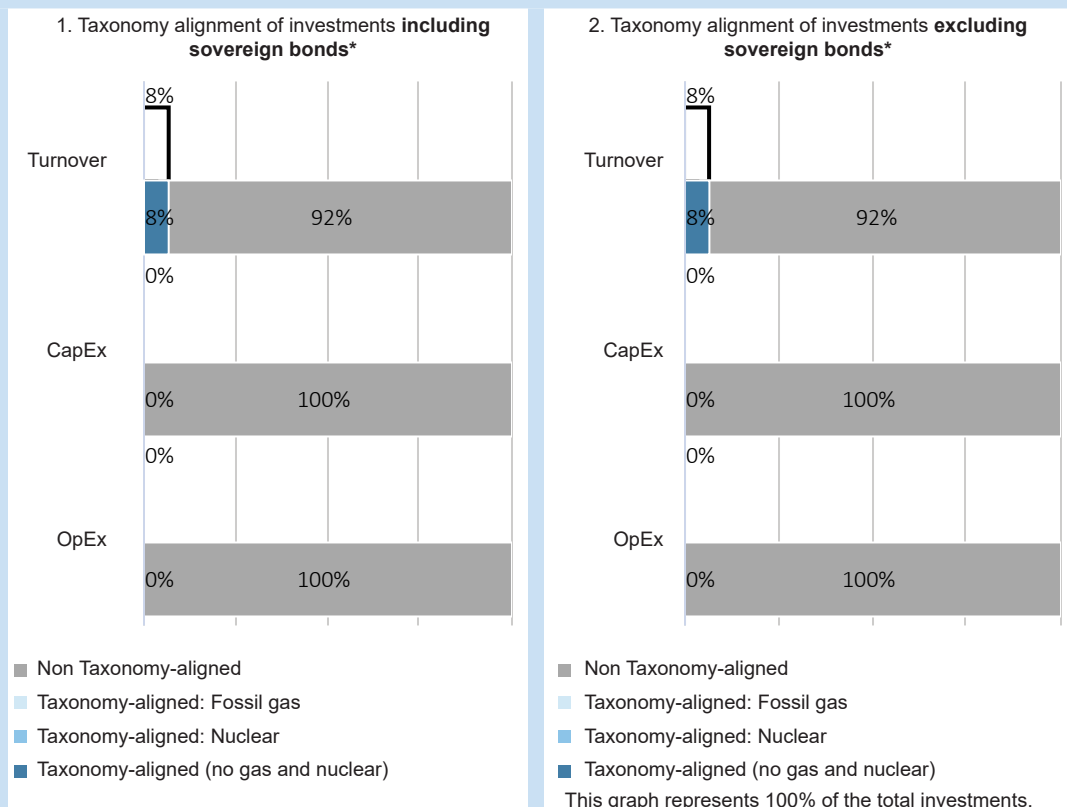

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

For these assets, there were no minimum environmental or social safeguards.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Portfolio achieved its investment objective through investments in securities which are deemed to be sustainable investments.

A security was deemed to be a sustainable investment if the following criteria were satisfied:

- AB believed the security was positively exposed to environmentally- or socially-oriented sustainable investment themes derived from the UN SDGs, as confirmed by compliance with the relevant minimum revenue threshold for UN SDG- aligned products and services (top-down approach).
- AB assessed the issuer on ESG Factors (bottom-up approach).
- During the reference period, as applicable, the security was compliant with AB’s proprietary methodology to determine that a specific security meets the DNSH principle.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions as detailed in the Portfolio’s Exclusion Policy.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2025, 89% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 53 ESG engagement entries with 46 distinct companies held in the Portfolio. For these engagements, there were 34 discussions of environmental issues, and 32 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Human Capital Development, Labor Management, Climate Transition Plans, Employee Health & Safety.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2025-Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

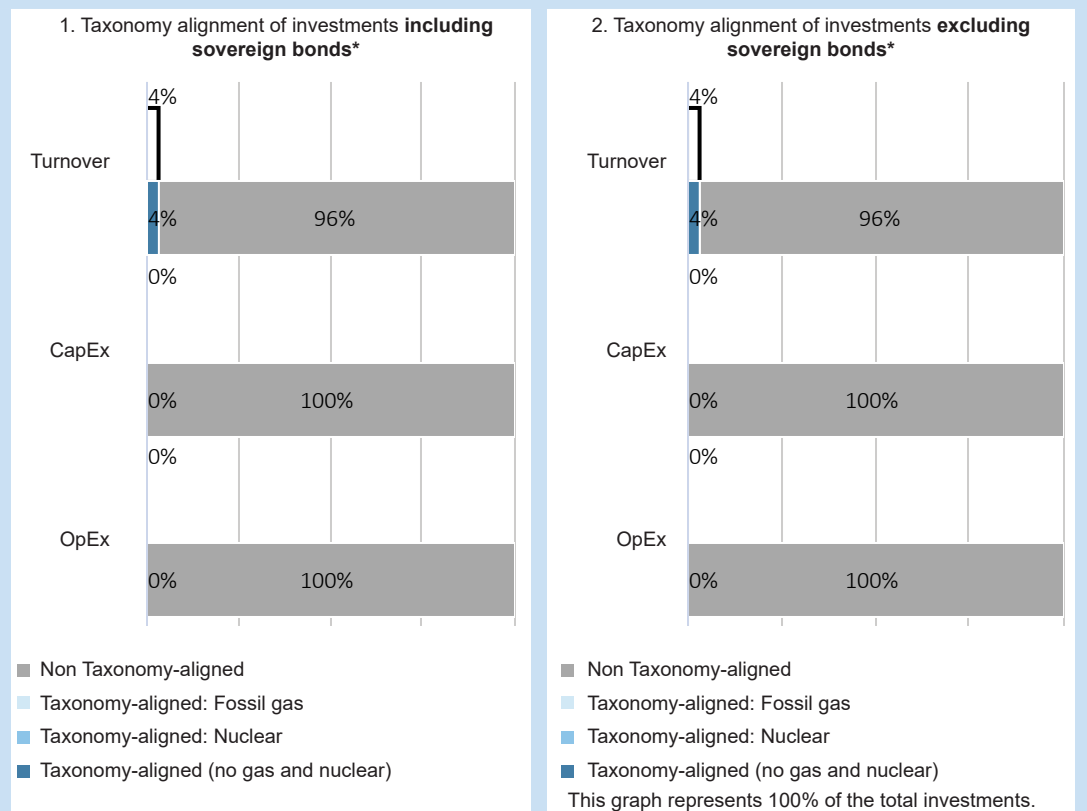

Yes:

In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2024, 2% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB’s Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 31.8% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2025, 84% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 113 ESG engagement entries with 79 distinct companies held in the Portfolio. For these engagements, there were 55 discussions of environmental issues, and 84 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Human Capital Development, Carbon Emissions, Diversity & Inclusion, Product Safety & Quality, Climate Transition Plans.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

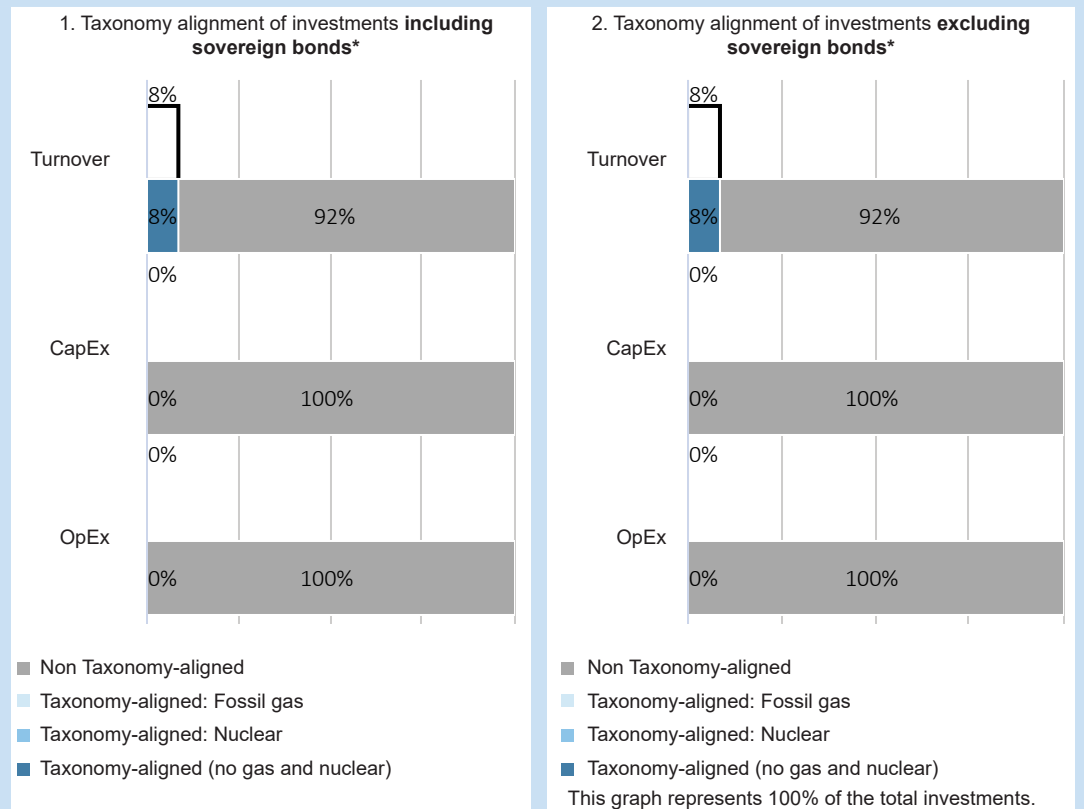

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 - In fossil gas
 - In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2024, 4% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB’s Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 82.1% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics (“E/S Characteristics”) promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB’s Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2025, 83% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 103 ESG engagement entries with 83 distinct companies held in the Portfolio. For these engagements, there were 66 discussions of environmental issues, and 62 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Human Capital Development, Privacy & Data Security, Labor Management, Climate Transition Plans.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2025-Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	7.42%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB’s Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 85.9% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2025, 97% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 40 ESG engagement entries with 26 distinct companies held in the Portfolio. For these engagements, there were 14 discussions of environmental issues, and 31 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Human Capital Development, Carbon Emissions, Diversity & Inclusion, Product Safety & Quality, Labor Management

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics (“E/S Characteristics”) promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB’s Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2025, 94% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 108 ESG engagement entries with 72 distinct companies held in the Portfolio. For these engagements, there were 45 discussions of environmental issues, and 73 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Human Capital Development, Carbon Emissions, Labor Management, Diversity & Inclusion, Privacy & Data Security.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2025-Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	1.67%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 - In fossil gas
 - In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2024, 4% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB’s Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 83.9% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

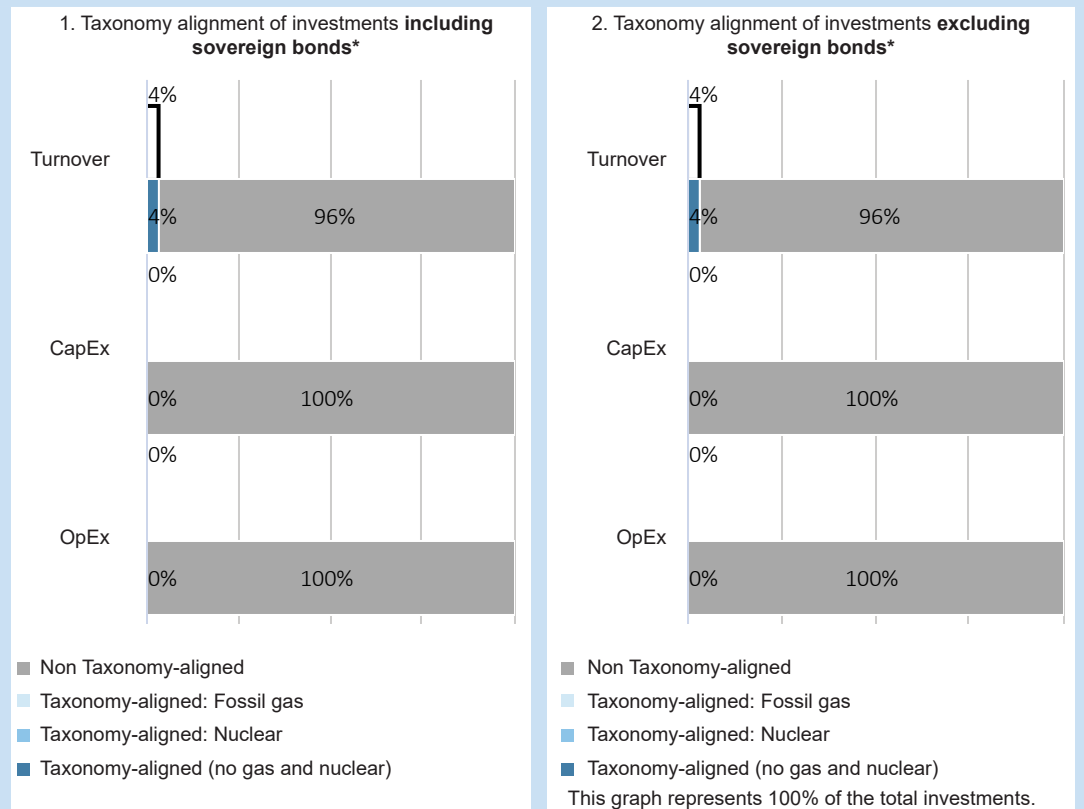

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 - In fossil gas
 - In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2024, 3% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB’s Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 75.6% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2025, 82% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 64 ESG engagement entries with 51 distinct companies held in the Portfolio. For these engagements, there were 52 discussions of environmental issues, and 26 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Opportunities in Clean Tech, Climate Transition Plans, Opportunities in Renewable Energy, Supply Chain - Environmental

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB’s Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 85% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2025, 86% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 98 ESG engagement entries with 87 distinct companies held in the Portfolio. For these engagements, there were 74 discussions of environmental issues, and 57 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Climate Transition Plans, Carbon Emissions, Human Capital Development, Supply Chain - Environmental, Supply Chain - Social.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2025-Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	12.04%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB’s Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 91% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2025, 86% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 161 ESG engagement entries with 103 distinct companies held in the Portfolio. For these engagements, there were 75 discussions of environmental issues, and 110 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Human Capital Development, Diversity & Inclusion, Privacy & Data Security, Climate Transition Plans.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2025-Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

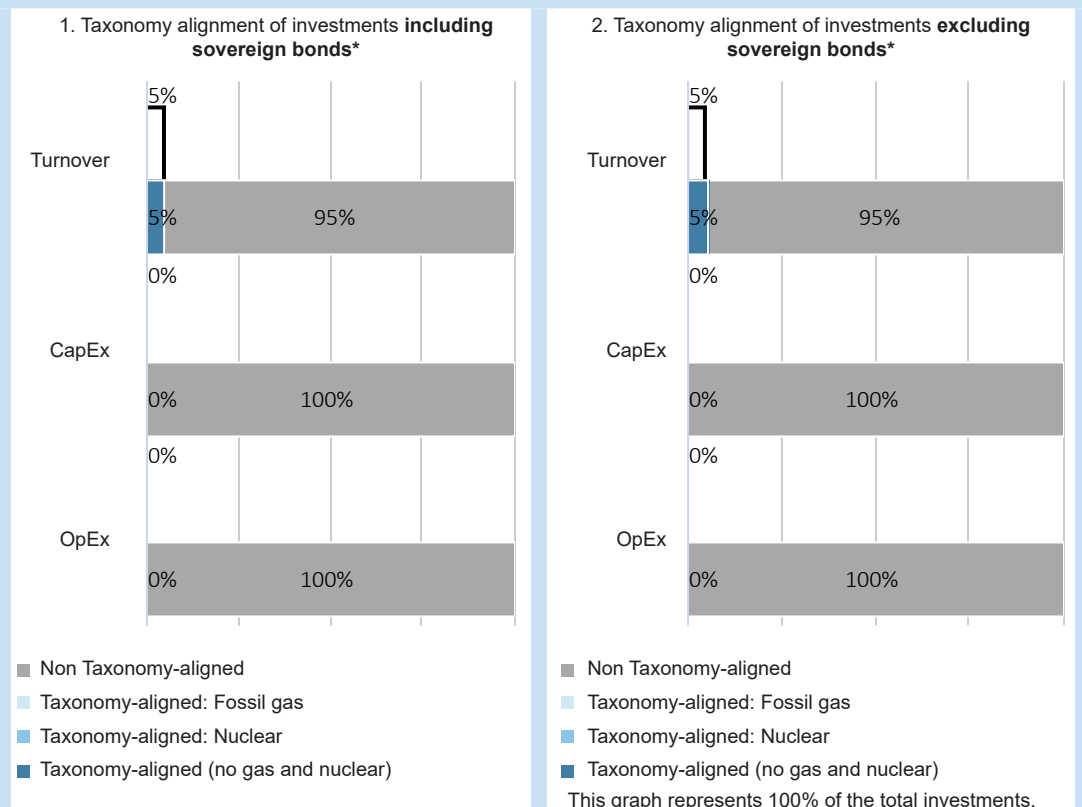

Yes:

In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 – **turnover** reflecting the share of revenue from green activities of investee companies.
 – **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 – **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **What was the share of investments made in transitional and enabling activities?**

As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2024, 4% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB’s Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 82.4% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Portfolio invested in issuers that AB believed were positively exposed to sustainable climate solutions derived from the UN SDGs. Sustainable climate solutions are products or services that seek to address environmental challenges relating to climate change such as clean energy, transportation, recycling, resource efficiency and water. All issuers contributed directly to the achievement of at least one UN SDG.

More information on the alignment approach can be found in AB's Sustainability-Related Disclosures: www.alliancebernstein.com/go/SCSPwebdisclosures

● **How did the sustainability indicators perform?**

For the Portfolio, the attainment of the sustainable investment objective was measured through an assessment of alignment with one or more sustainable climate solutions, derived from the UN SDGs.

As detailed in the Prospectus, to measure alignment, AB analyses the percentage of corporate issuers' revenues derived from products or services identified as sustainable climate solutions that support the achievement of one or more UN SDGs. As at 31 May 2025, the weighted average UN SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services, was 82.1%.

As at 31 May 2025, the top 3 UN SDGs by aligned portfolio weight are shown below (weights reflect reweighted portfolio ex-cash and derivatives). Please note that some issuers may align to more than one UN SDG but, for the purposes of this calculation, issuers are mapped according to the primary UN SDG to which they are aligned. As such, issuers are only mapped to one UN SDG:

- SDG 7 "Affordable & Clean Energy": 36.7%
- SDG 9 "Industry Innovation & Infrastructure": 19.2%
- SDG 6 "Clean Water & Sanitation": 14.7%

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

AB has monitored the compliance with the exclusions listed in the Portfolio's Exclusion Policy available here: www.alliancebernstein.com/go/EquityExclusionPolicy and confirms they were met.

For EU Taxonomy-eligible activities, the proportion of EU Taxonomy alignment is displayed in the following questions.

- **...and compared to previous periods?**

As at 31 May 2024, the weighted average for SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services was 85.3%.

As at 31 May 2024, the top 3 SDGs aligned by Portfolio weight were:

- SDG 7 "Affordable & Clean Energy": 42.4%
- SDG 9 "Industry, Innovation & Infrastructure": 17.2%
- SDG 12 "Responsible Consumption & Production": 15.7%

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

All securities held within the Portfolio satisfied AB's proprietary methodology that uses the principal adverse impact ("PAIs") indicators to determine that a specific security meets the "Do No Significant Harm" principle outlined in SFDR (the "DNSH principle"). This methodology is comprised of a threshold-based scoring system, which uses a combination of internal and external data, alongside exclusion criteria. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy. The relevant data sources may evolve over time as more data becomes available and tools evolve.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

AB's Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB's Do No Significant Harm ("DNSH") Policy. AB's DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB's interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and was ineligible for inclusion in AB's Article 9 products.

During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

For any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB's proprietary methodology to determine that a security meets the DNSH principle.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs, as well as considering the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

AB incorporated the consideration of PAIs on sustainability indicators into various aspects of the Portfolio's investment process. This included:

- The 'Do No Significant Harm Policy' where a threshold-based scoring system, devised by AB, was used to evaluate issuers based on a consideration of the materiality and severity of ESG Factors in relation to PAIs 1-9, 11-13 and the two optional indicators listed above. Issuers scoring in excess of the threshold were made unavailable for investment. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.
- The Portfolio's Exclusion Policy which considers and mitigates the negative impact of certain PAIs by limiting investments in sectors such as, controversial weapons (PAI #14), or issuers violating the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI #10).
- AB's Policy with respect to engagement on ESG issues, as detailed in the AB Global Stewardship Statement, by which AB encouraged issuers to undertake actions that may promote better outcomes for environmental, and social, objectives, as well as benefits to the financial outcomes of the issuer and/or the Portfolio.

- AB's Proxy Voting Policy which evaluated whether ESG proposals promotes genuine improvement in the way that the company addresses ESG issues and may support such proposals. AB generally supported proposals in favour of financially material improvements in the management of environmental or social issues.

Below details the Portfolio's exposure to these PAIs as a weighted average as at 31 May 2025:

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Portfolio invested 11% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31 May 2025. The investments contributed to the environmental objective listed in the EU Taxonomy. The Taxonomy-alignment have not been subject to an assurance provided by an auditor or a third-party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

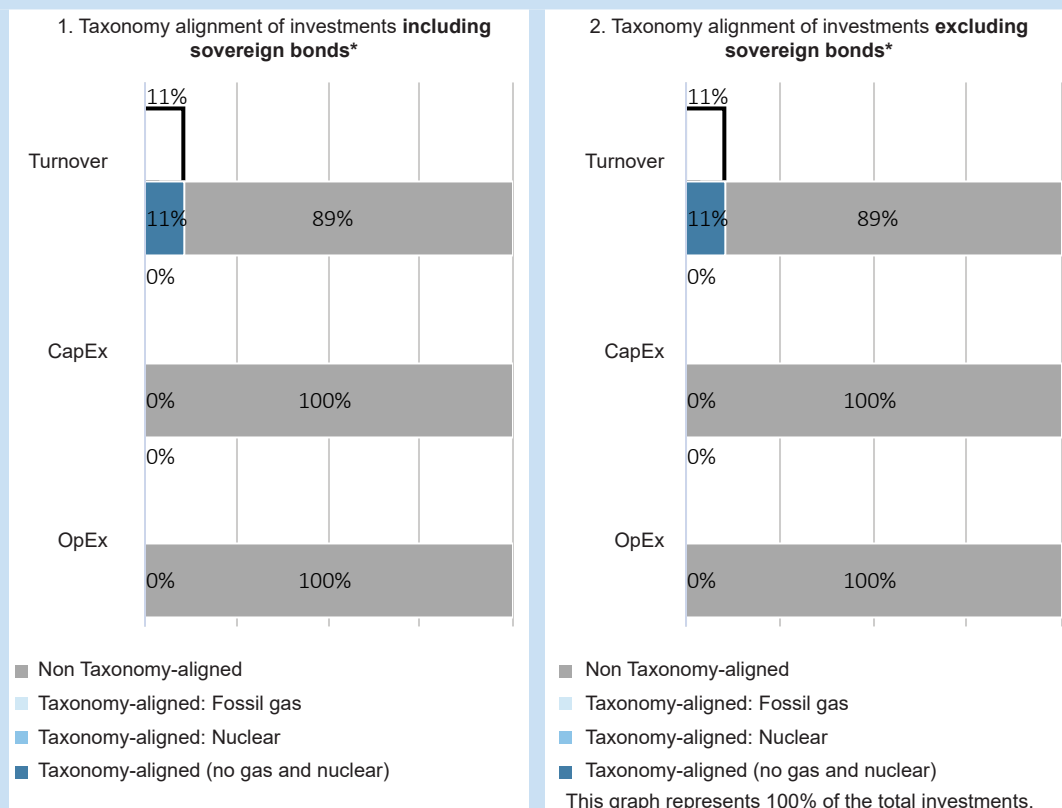

Yes:

In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**
As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.
- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**
As of 31 May 2024, 11% of the Portfolio was deemed to align with the EU Taxonomy.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Cash and cash-equivalents held for liquidity purposes.
- Derivatives used for hedging and efficient portfolio management.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Portfolio achieved its investment objective through investments in securities which are deemed to be sustainable investments.

A security was deemed to be a sustainable investment if the following criteria were satisfied:

- AB believed the security was positively exposed to sustainable climate solutions derived from the UN SDGs, as confirmed by compliance with the relevant minimum revenue threshold for UN SDG-aligned products and services (top-down approach).
- AB assessed the issuer on ESG Factors (bottom-up approach).
- During the reference period, as applicable, the security was compliant with AB’s proprietary methodology to determine that a specific security meets the DNSH principle.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions as detailed in the Portfolio’s Exclusion Policy.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics (“E/S Characteristics”) promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB’s Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2025, 87% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 151 ESG engagement entries with 99 distinct companies held in the Portfolio. For these engagements, there were 65 discussions of environmental issues, and 108 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Human Capital Development, Carbon Emissions, Diversity & Inclusion, Privacy & Data Security, Product Safety & Quality.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **...and compared to previous periods?**
In the year to 31 May 2024, 82% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- GHG emissions (Scope 1, Scope 2, Scope 3) (#1).
- Carbon footprint (#2).
- GHG intensity of investee companies (#3).
- Exposure to companies active in the fossil fuel sector (#4).
- Share of non-renewable energy production (#5).
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).
- Investments in companies without carbon emission reduction initiatives.

PAIs 1, 2, 3, 5, and the PAI on investments in companies without carbon emission reduction initiatives, are considered as part of the Portfolio's fundamental research and engagement activity. The Portfolio is comprised of companies with aggregate carbon exposure that is significantly lower (at least 50%) than the carbon exposure of the MSCI World Index. In constructing this Portfolio, the Investment Manager integrates factors such as companies' current carbon footprint, the overall carbon reduction strategy, including specific climate targets, proven reductions, and green revenues in view of the global efforts to transition to a lower carbon economy. For PAI 4, the Portfolio excludes fossil fuels.

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio. For PAI 14, the Portfolio excluded controversial weapons

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB’s Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 85.6% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics (“E/S Characteristics”) promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB’s Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2025, 84% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 67 ESG engagement entries with 62 distinct companies held in the Portfolio. For these engagements, there were 63 discussions of environmental issues, and 34 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Climate Transition Plans, Supply Chain - Environmental, Human Capital Development, Carbon Emissions, Supply Chain - Social

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- **...and compared to previous periods?**

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2025- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2024, 16% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB’s Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 79.5% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Portfolio invested in issuers that AB believed were positively exposed to environmentally- or socially- oriented sustainable investment themes derived from the UN SDGs, such as Health, Climate, and Empowerment. All issuers contributed directly to the achievement of at least one UN SDG.

More information on the alignment approach can be found in AB's Sustainability-Related Disclosures : www.alliancebernstein.com/go/EQ9webdisclosures

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **How did the sustainability indicators perform?**

For the Portfolio, the attainment of the sustainable investment objective was measured through an assessment of alignment with one or more UN SDGs.

As detailed in the Prospectus, to measure alignment, AB analyses the percentage of corporate issuers' revenues derived from products or services that support the achievement of one or more UN SDGs. As at 31 May 2025, the weighted average UN SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services, was 87.2%.

As at 31 May 2025, the top 3 UN SDGs by aligned portfolio weight are shown below (weights reflect reweighted portfolio ex-cash and derivatives). Please note that some issuers may align to more than one UN SDG but, for the purposes of this calculation, issuers are mapped according to the primary UN SDG to which they are aligned. As such, issuers are only mapped to one UN SDG:

- SDG 8 "Decent Work & Economic Growth": 27.7%
- SDG 3 "Good Health & Wellbeing": 23.7%
- SDG 7 "Affordable & Clean Energy": 17.8%

AB has monitored the compliance with the exclusions listed in the Portfolio's Exclusion Policy available here: www.alliancebernstein.com/go/EquityExclusionPolicy and confirms they were met.

For EU Taxonomy-eligible activities, the proportion of EU Taxonomy alignment is displayed in the following questions.

● **...and compared to previous periods?**

As at 31 May 2024, the weighted average for SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services was 86.2%.

As at 31 May 2024, the top 3 SDGs aligned by Portfolio weight were:

- SDG 3 “Good Health and Well-Being”: 21.1%
- SDG 8 “Decent Work and Economic Growth”: 17.9%
- SDG 7 “Affordable and Clean Energy”: 15.2%

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

All securities held within the Portfolio satisfied AB’s proprietary methodology that uses the principal adverse impact (“PAIs”) indicators to determine that a specific security meets the “Do No Significant Harm” principle outlined in SFDR (the “DNSH principle”). This methodology is comprised of a threshold-based scoring system, which uses a combination of internal and external data, alongside exclusion criteria. During the period, all securities held in the Portfolio were compliant with AB’s DNSH Policy. The relevant data sources may evolve over time as more data becomes available and tools evolve.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

AB’s Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB’s Do No Significant Harm (“DNSH”) Policy. AB’s DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB’s interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and was ineligible for inclusion in AB’s Article 9 products.

During the period, all securities held in the Portfolio were compliant with AB’s DNSH Policy.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

For any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB’s proprietary methodology to determine that a security meets the DNSH principle.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs, as well as considering the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

AB incorporated the consideration of PAIs on sustainability indicators into various aspects of the Portfolio’s investment process. This included:

- The ‘Do No Significant Harm Policy’ where a threshold-based scoring system, devised by AB, was used to evaluate issuers based on a consideration of the materiality and severity of ESG Factors in relation to PAIs 1-9, 11-13 and the two optional indicators listed above. Issuers scoring in excess of the threshold were made unavailable for investment. During the period, all securities held in the Portfolio were compliant with AB’s DNSH Policy.
- The Portfolio’s Exclusion Policy which considers and mitigates the negative impact of certain PAIs by limiting investments in sectors such as, controversial weapons (PAI #14), or issuers violating the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI #10).
- AB’s Policy with respect to engagement on ESG issues, as detailed in the AB Global Stewardship Statement, by which AB encouraged issuers to undertake actions that may promote better outcomes for environmental, and social, objectives, as well as benefits to the financial outcomes of the issuer and/or the Portfolio.
- AB’s Proxy Voting Policy which evaluated whether ESG proposals promotes genuine improvement in the way that the company addresses ESG issues and may support such proposals. AB generally supported proposals in favour of financially material improvements in the management of environmental or social issues.

Below details the Portfolio’s exposure to these PAIs as a weighted average as at 31 May 2025:

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2025- Weighted average

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Portfolio invested 8% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31 May 2025. The investments contributed to the environmental objective listed in the EU Taxonomy. The Taxonomy-alignment have not been subject to an assurance provided by an auditor or a third- party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

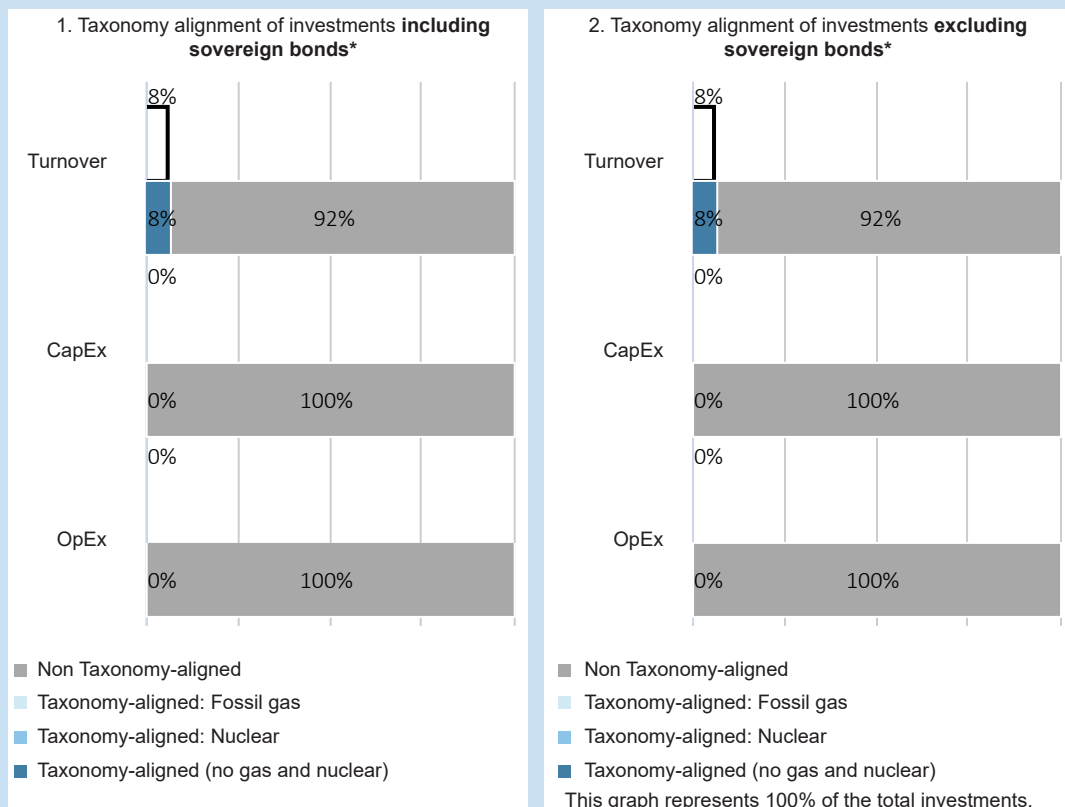

In fossil gas

In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

For these assets, there were no minimum environmental or social safeguards.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Portfolio achieved its investment objective through investments in securities which are deemed to be sustainable investments.

A security was deemed to be a sustainable investment if the following criteria were satisfied:

- AB believed the security was positively exposed to environmentally- or socially-oriented sustainable investment themes derived from the UN SDGs, as confirmed by compliance with the relevant minimum revenue threshold for UN SDG- aligned products and services (top-down approach).
- AB assessed the issuer on ESG Factors (bottom-up approach).
- During the reference period, as applicable, the security was compliant with AB's proprietary methodology to determine that a specific security meets the DNSH principle.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions as detailed in the Portfolio's Exclusion Policy.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The Portfolio invested in issuers that AB believed offered attractive returns because, inter alia, they captured the benefits of Diversity, Equity and Inclusion (“DEI”). These issuers are leaders with respect to DEI policies and practices for attracting and retaining diverse talent and may provide products and/or services that seek to solve social DEI issues (“Diversity Champions”).

● **How did the sustainability indicators perform?**

For the Portfolio, the attainment of the sustainable investment objective was measured through investee company’s alignment with the following UN SDGs with respect to DEI (Gender Equality, Decent Work and Economic Growth, and Reduced Inequalities) as well as through a proprietary DEI scoring system.

The Portfolio was liquidated on 14 June 2024, which was prior to a new month-end being completed in the reporting period. Therefore, the below details UNSDG data is presented as at 31 May 2024 to ensure an accurate representation the sustainable investment objective.

As at 31 May 2024, UN SDGs by aligned portfolio weight are shown below (weights reflect reweighted portfolio excash and derivatives).

- SDG 5 “Gender Equality”: 89%
- SDG 8 “Decent Work and Economic Growth”: 100%
- SDG 10 “Reduced Inequalities”: 97%

AB has monitored the compliance with the exclusions listed in the Portfolio’s Exclusion Policy and confirms they were met.

● **...and compared to previous periods?**

As at 31 May 2024, the top 3 SDGs aligned by Portfolio Weight can be found in the response detailed above.

As at 31 May 2023, the top 3 SDGs aligned by Portfolio weight were the following, please note that issuers may align to more than one SDG:

- SDG 5 “Gender Equality”: 87%
- SDG 8 “Decent Work & Economic Growth”: 98%
- SDG 10 “Reduced Inequalities”: 89%

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

All securities held within the Portfolio satisfied AB’s proprietary methodology that uses the principal adverse impact (“PAIs”) indicators to determine that a specific security meets the “Do No Significant Harm” principle outlined in SFDR (the “DNSH principle”). This methodology is comprised of a threshold-based scoring system, which uses a combination of internal and external data, alongside exclusion criteria. During the period, all securities held in the Portfolio were compliant with AB’s DNSH Policy. The relevant data sources may evolve over time as more data becomes available and tools evolve.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

AB’s Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB’s Do No Significant Harm (“DNSH”) Policy. AB’s DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB’s interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and was ineligible for inclusion in AB’s Article 9 products.

During the period, all securities held in the Portfolio were compliant with AB’s DNSH Policy.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

For any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB’s proprietary methodology to determine that a security meets the DNSH principle.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs, as well as considering the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

AB incorporated the consideration of PAIs on sustainability indicators into various aspects of the Portfolio’s investment process. This included:

- The ‘Do No Significant Harm Policy’ where a threshold-based scoring system, devised by AB, was used to evaluate issuers based on a consideration of the materiality and severity of ESG Factors in relation to PAIs 1-9, 11-13 and the two optional indicators listed above. Issuers scoring in excess of the threshold were made unavailable for investment. During the period, all securities held in the Portfolio were compliant with AB’s DNSH Policy.
- The Portfolio’s Exclusion Policy which considers and mitigates the negative impact of certain PAIs by limiting investments in sectors such as, controversial weapons (PAI #14), or issuers violating the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI #10).
- AB’s Policy with respect to engagement on ESG issues, as detailed in the AB Global Stewardship Statement, by which AB encouraged issuers to undertake actions that may promote better outcomes for environmental, and social, objectives, as well as benefits to the financial outcomes of the issuer and/or the Portfolio.
- AB’s Proxy Voting Policy which evaluated whether ESG proposals promotes genuine improvement in the way that the company addresses ESG issues and may support such proposals. AB generally supported proposals in favour of financially material improvements in the management of environmental or social issues.

Below details the Portfolio's exposure to these PAIs as a weighted average to 31 May 2024:

PAI ID	Adverse sustainability indicator	Metric	PAIs for May 31, 2024 - Weighted average

● In which economic sectors were the investments made?

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy alignment of investments including sovereign bonds*

■ Taxonomy-aligned (no gas and nuclear energy)
■ Non Taxonomy-aligned

2. Taxonomy alignment of investments excluding sovereign bonds*

■ Taxonomy-aligned (no gas and nuclear energy)
■ Non Taxonomy-aligned

This graph represents 100% of the total investments*.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or lowcarbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of: – turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Cash and cash-equivalents held for liquidity purposes.
- Derivatives used for hedging and efficient portfolio management.

For these assets, there were no minimum environmental or social safeguards.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Portfolio achieved its investment objective through investments in securities which are deemed to be sustainable investments. A security was deemed to be a sustainable investment if the following criteria were satisfied:

- AB believed the the issuer of the security aligned with the UN SDGs with respect to DEI (Gender Equality; Decent Work and Economic Growth), through its policies and practices, and it met the minimum scoring threshold on each of the six pillars of AB's proprietary 'Diversity Champions' matrix.
- During the reference period, as applicable, the security was compliant with AB's proprietary methodology to determine that a specific security meets the DNSH principle.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions as detailed in the Portfolio's Exclusion Policy.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics (“E/S Characteristics”) promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB’s Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2025, 100% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 92 ESG engagement entries with 68 distinct companies held in the Portfolio. For these engagements, there were 48 discussions of environmental issues, and 60 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Human Capital Development, Climate Transition Plans, Privacy & Data Security, Product Safety & Quality.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **...and compared to previous periods?**
In the year to 31 May 2024, 89% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2025-Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	1.89%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB’s Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 74.4% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics (“E/S Characteristics”) promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB’s Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measured the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2025, 82% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 41 ESG engagement entries with 31 distinct companies held in the Portfolio. For these engagements, there were 27 discussions of environmental issues, and 27 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Human Capital Development, Climate Transition Plans, Diversity & Inclusion, Employee Health & Safety.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **...and compared to previous periods?**
In the year to 31 May 2024, 78% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2025-Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	3.99%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

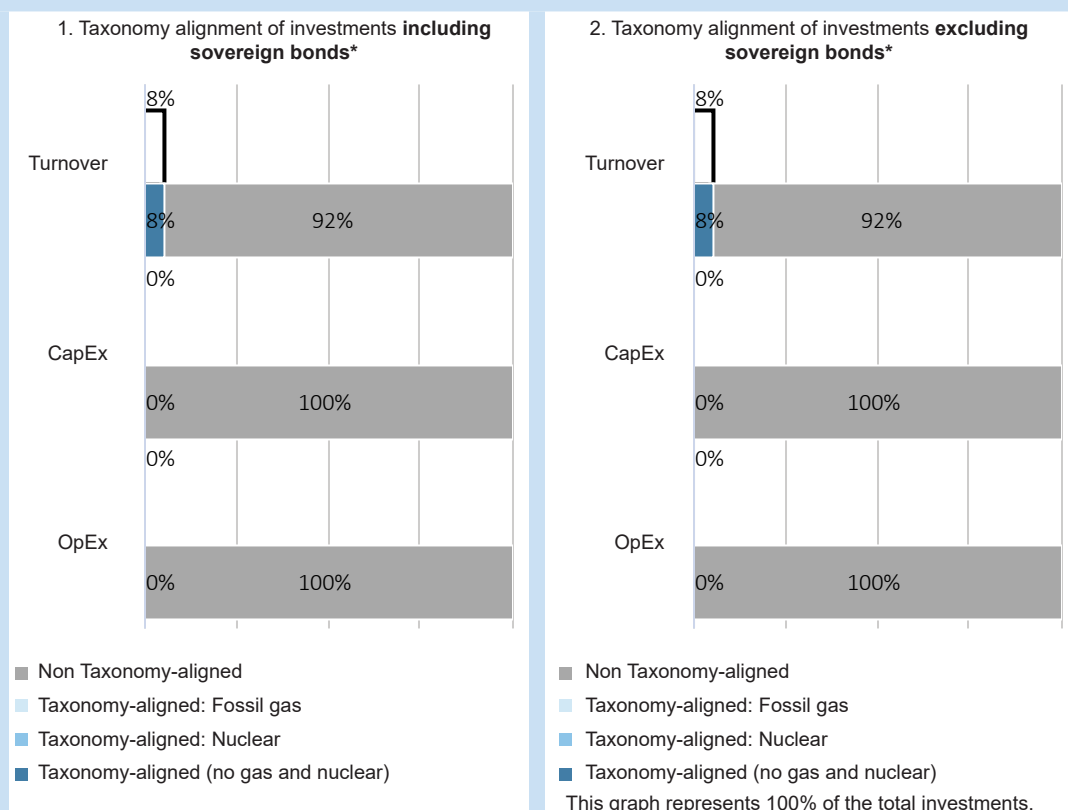

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2024, 6% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research, scoring and Engagements. As of 31 May 2025, 70.7% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2025-Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

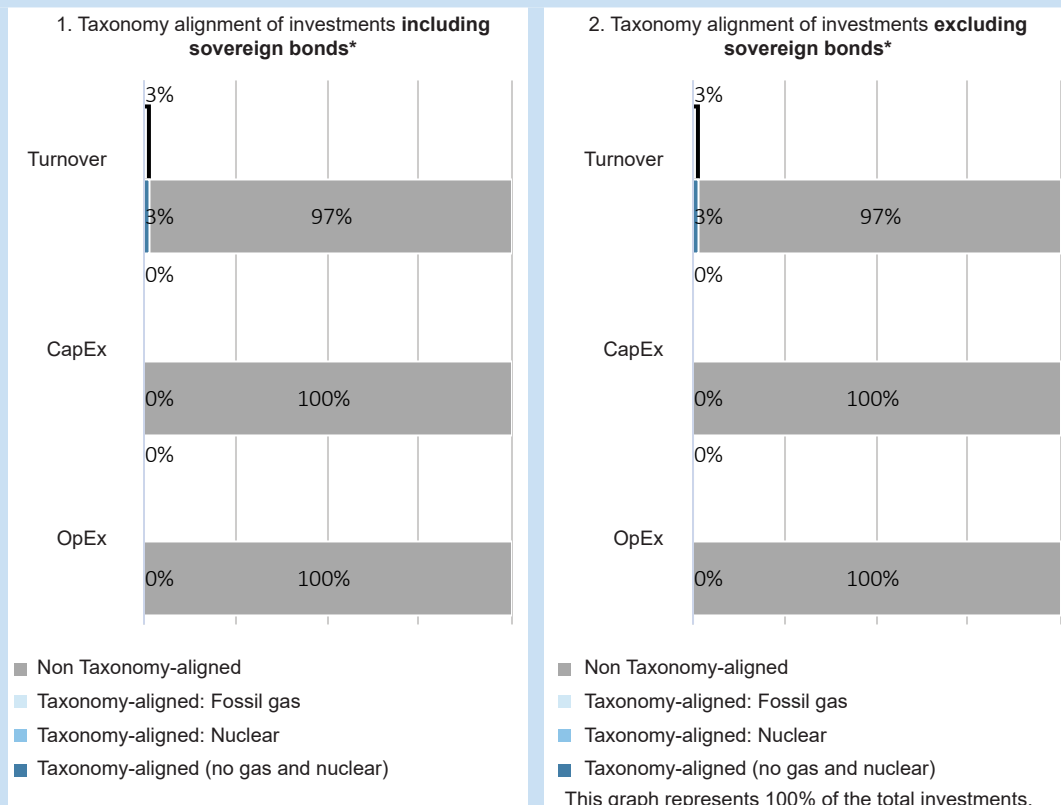

Yes:

In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of CapEx and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2024, 4% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 76.2% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2025, 80% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 75 ESG engagement entries with 55 distinct companies held in the Portfolio. For these engagements, there were 42 discussions of environmental issues, and 52 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Human Capital Development, Carbon Emissions, Climate Transition Plans, Diversity & Inclusion, Labor Management.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of CapEx and OpEx.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A - the Portfolio was designated Article 8 after 31 May 2024.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 83% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the period to 31 May 2025, 80% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the period to 31 May 2025, there were 28 ESG engagement entries with 19 distinct companies held in the Portfolio. For these engagements, there were 12 discussions of environmental issues, and 20 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Human Capital Development, Product Safety & Quality, Privacy & Data Security, Diversity & Inclusion.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **...and compared to previous periods?**
N/A - the Portfolio was designated Article 8 after 31 May 2024.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
N/A
- **How were the indicators for adverse impacts on sustainability factors taken into account?**
N/A
- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2025- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

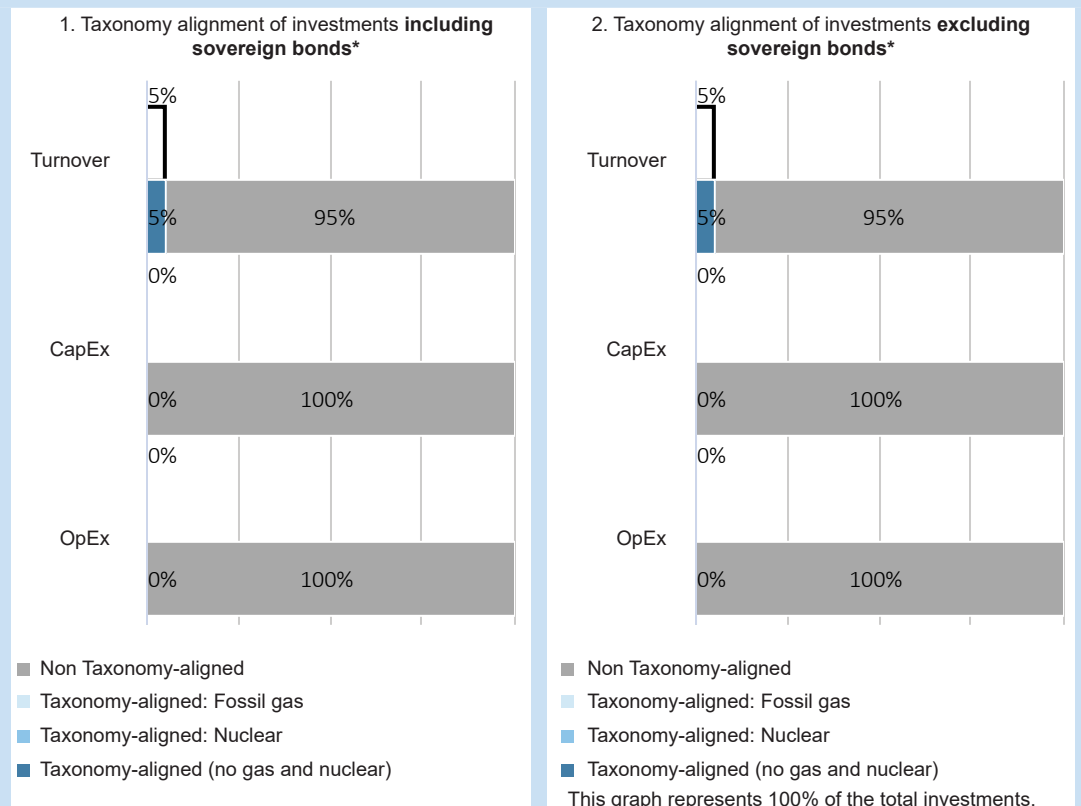

Yes:

In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

For these assets, there were no minimum environmental or social safeguards.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 69% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions.

<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 61.00%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The Portfolio invested in issuers that AB believed were positively exposed to environmentally- or socially- oriented sustainable investment themes derived from the UN SDGs, such as Health, Climate, and Empowerment. All issuers contributed directly to the achievement of at least one UN SDG.

More information on the alignment approach can be found in AB’s Sustainability-Related Disclosures: www.alliancebernstein.com/go/FIMAS9webdisclosures

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

For the Portfolio, the attainment of the sustainable investment objective was measured through an assessment of alignment with one or more UN SDGs.

As detailed in the Prospectus, to measure alignment, AB analyses the percentage of corporate issuers’ revenues derived from products or services that support the achievement of one or more UN SDGs. As at 31 May 2025, the weighted average UN SDG revenue exposure for the Portfolio, based on AB’s proprietary assessment of aligned products and services, was 78.6%.

As at 31 May 2025, the top 3 UN SDGs by aligned portfolio weight are shown below (weights reflect reweighted portfolio ex-cash and derivatives). Please note that some issuers may align to more than one UN SDG but, for the purposes of this calculation, issuers are mapped according to the primary UN SDG to which they are aligned. As such, issuers are only mapped to one UN SDG:

- SDG 3 “Good Health and Well-Being”: 17.6%
- SDG 1 “No Poverty”: 13.0%
- SDG 9 “Industry, Innovation and Infrastructure”: 12.0%

For sovereign & securitised issuers, all issuers met the relevant alignment criteria based on AB’s proprietary methodology for themes derived from the UN SDGs.

AB has monitored the compliance with the exclusions listed in the Portfolio’s Exclusion Policy available here: www.alliancebernstein.com/go/FIExclusionPolicy

For EU Taxonomy-eligible activities, the proportion of EU Taxonomy alignment is displayed in the following questions.

● **...and compared to previous periods?**

As at 31 May 2024, the weighted average for SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services was 86.3%.

As at 31 May 2024, the top 3 SDGs aligned by Portfolio weight were:

- SDG 1 "No Poverty": 17.1%
- SDG 13 "Good Health and Wellbeing": 14.0%
- SDG 9 "Industry, Innovation and Infrastructure": 13.5%

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

All securities held within the Portfolio satisfied AB's proprietary methodology that uses the principal adverse impact ("PAIs") indicators to determine that a specific security meets the "Do No Significant Harm" principle outlined in SFDR (the "DNSH principle"). This methodology is comprised of a threshold-based scoring system, which uses a combination of internal and external data, alongside exclusion criteria. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy. The relevant data sources may evolve over time as more data becomes available and tools evolve.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

AB's Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB's Do No Significant Harm ("DNSH") Policy. AB's DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB's interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and was ineligible for inclusion in AB's Article 9 products.

During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

For any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB's proprietary methodology to determine that a security meets the DNSH principle.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs, as well as considering the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

AB incorporated the consideration of PAIs on sustainability indicators into various aspects of the Portfolio's investment process. This included:

- The 'Do No Significant Harm Policy' where a threshold-based scoring system, devised by AB, was used to evaluate issuers based on a consideration of the materiality and severity of ESG Factors in relation to PAIs 1-9, 11-13, 15, 16 and the two optional indicators listed above. Issuers scoring in excess of the threshold were made unavailable for investment. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.
- The Portfolio's Exclusion Policy which considers and mitigates the negative impact of certain PAIs by limiting investments in sectors such as, controversial weapons (PAI #14), or issuers violating the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI #10).
- AB's Policy with respect to engagement on ESG issues, as detailed in the AB Global Stewardship Statement, by which AB encouraged issuers to undertake actions that may promote better outcomes for environmental, and social, objectives, as well as benefits to the financial outcomes of the issuer and/or the Portfolio.
- AB's Proxy Voting Policy which evaluated whether ESG proposals promotes genuine improvement in the way that the company addresses ESG issues and may support such proposals. AB generally supported proposals in favour of financially material improvements in the management of environmental or social issues.

Below details the Portfolio's exposure to these PAIs as a weighted average as at 31 May 2025:

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

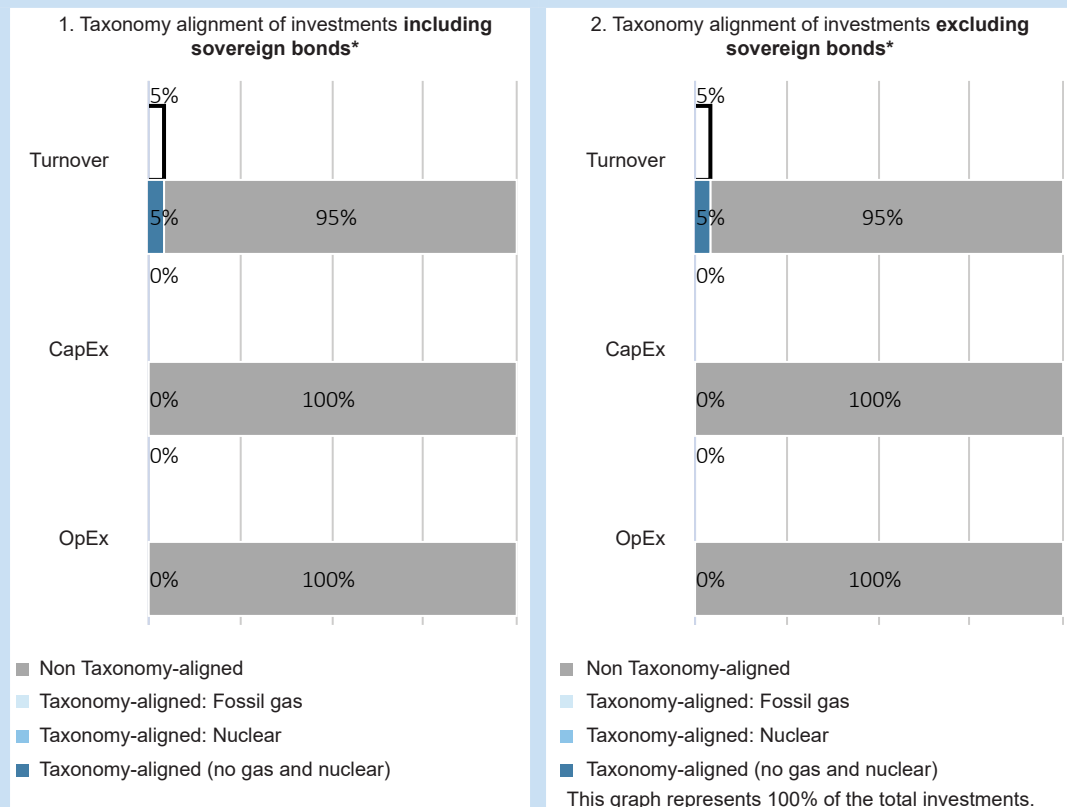

The Portfolio invested 5% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31 May 2025. The investments contributed to the environmental objective listed in the EU Taxonomy. The Taxonomy-alignment have not been subject to an assurance provided by an auditor or a third- party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

- **What was the share of investments made in transitional and enabling activities?**

As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

As of 31 May 2024, 3% of the Portfolio was deemed to align with the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Cash and cash-equivalents held for liquidity purposes.
- Derivatives used for hedging and efficient portfolio management.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Portfolio achieved its investment objective through investments in securities which are deemed to be sustainable investments.

A security was deemed to be a sustainable investment if the following criteria were satisfied:

- AB believed the security was positively exposed to environmentally- or socially-oriented sustainable investment themes derived from the UN SDGs, as confirmed by compliance with the relevant minimum revenue threshold for UN SDG- aligned products and services (top-down approach).
- AB assessed the issuer on ESG Factors (bottom-up approach).
- During the reference period, as applicable, the security was compliant with AB’s proprietary methodology to determine that a specific security meets the DNSH principle.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions as detailed in the Portfolio’s Exclusion Policy.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics (“E/S Characteristics”) promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This includes engagements where AB encouraged issuers to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **ESG Scoring:** AB used its proprietary scoring methodology to score issuers using ESG Factors.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB’s Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FI8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2025, 80% of the Portfolio possessed an ESG score based on AB’s proprietary methodology, and in the year to 31 May 2025, 90% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 63 ESG engagement entries with 50 distinct companies held in the Portfolio. For these engagements, there were 45 discussions of environmental issues, and 33 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Climate Transition Plans, ESG-Labeled Bonds, Biodiversity & Land Use, Opportunities in Financial Inclusion

The Portfolio's ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst's qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

● **...and compared to previous periods?**

As of 31 May 2024, 57.4% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2024, 86% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB's Good Governance Policy.
- Derivatives used for hedging purposes.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2025 80% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 - In fossil gas
 - In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of CapEx and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- Derivatives used for hedging purposes.

For these assets, there were no minimum environmental or social safeguards.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2025 94% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics (“E/S Characteristics”) promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This includes engagements where AB encouraged issuers to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **ESG Scoring:** AB used its proprietary scoring methodology to score issuers using ESG Factors.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB’s Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FI8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2025, 100% of the Portfolio possessed an ESG score based on AB’s proprietary methodology, and in the year to 31 May 2025, 95% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 114 ESG engagement entries with 92 distinct companies held in the Portfolio. For these engagements, there were 79 discussions of environmental issues, and 54 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Climate Transition Plans, ESG-Labeled Bonds, Human Capital Development, Opportunities in Renewable Energy.

The Portfolio's ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst's qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

● **...and compared to previous periods?**

As of 31 May 2024, 100% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2024, 95% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of CapEx and OpEx.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2024, 3% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB's Good Governance Policy.
- Derivatives used for hedging purposes.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2025 94% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics (“E/S Characteristics”) promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This includes engagements where AB encouraged issuers to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **ESG Scoring:** AB used its proprietary scoring methodology to score issuers using ESG Factors.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB’s Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FI8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2025, 94% of the Portfolio possessed an ESG score based on AB’s proprietary methodology, and in the year to 31 May 2025, 85% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 111 ESG engagement entries with 97 distinct companies held in the Portfolio. For these engagements, there were 74 discussions of environmental issues, and 49 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Climate Transition Plans, Diversity & Inclusion, ESG-Labeled Bonds, Human Capital Development.

The Portfolio’s ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst’s qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

● **...and compared to previous periods?**

As of 31 May 2024, 97.4% of the Portfolio possessed an ESG score based on AB’s proprietary methodology, and in the year to 31 May 2024, 89% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 - In fossil gas
 - In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**
As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2024, 3% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB’s Good Governance Policy.
- Derivatives used for hedging purposes.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2025 97% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics (“E/S Characteristics”) promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB’s Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FI8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2025, 93% of the Portfolio possessed an ESG score based on AB’s proprietary methodology, and in the year to 31 May 2025, 82% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 66 ESG engagement entries with 55 distinct companies held in the Portfolio. For these engagements, there were 41 discussions of environmental issues, and 40 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Climate Transition Plans, Privacy & Data Security, Opportunities in Financial Inclusion, Labor Management.

The Portfolio’s ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst’s qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

● **...and compared to previous periods?**

As of 31 May 2024, 95.3% of the Portfolio possessed an ESG score based on AB’s proprietary methodology, and in the year to 31 May 2024, 78% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

- In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2024, 1% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB’s Good Governance Policy.
- Derivatives used for hedging purposes.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2025 100% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The Portfolio invested in issuers that AB believed were positively exposed to environmentally- or socially- oriented sustainable investment themes derived from the UN SDGs, such as Health, Climate, and Empowerment. All issuers contributed directly to the achievement of at least one UN SDG.

More information on the alignment approach can be found in AB’s Sustainability-Related Disclosures: www.alliancebernstein.com/go/FIMAS9webdisclosures.

● **How did the sustainability indicators perform?**

For the Portfolio, the attainment of the sustainable investment objective was measured through an assessment of alignment with one or more UN SDGs.

As detailed in the Prospectus, to measure alignment, AB analyses the percentage of corporate issuers’ revenues derived from products or services that support the achievement of one or more UN SDGs. As at 31 May 2025, the weighted average UN SDG revenue exposure for the Portfolio, based on AB’s proprietary assessment of aligned products and services, was 78.1%.

As at 31 May 2025, the top 3 UN SDGs by aligned portfolio weight are shown below (weights reflect reweighted portfolio ex-cash and derivatives). Please note that some issuers may align to more than one UN SDG but, for the purposes of this calculation, issuers are mapped according to the primary UN SDG to which they are aligned. As such, issuers are only mapped to one UN SDG:

- SDG 1 “No Poverty”: 33.6%
- SDG 3 “Good Health and Wellbeing”: 8.6%
- SDG 7 “Affordable and Clean Energy”: 8.3%

For sovereign & securitised issuers, all issuers met the relevant alignment criteria based on AB's proprietary methodology for themes derived from the UN SDGs.

AB has monitored the compliance with the exclusions listed in the Portfolio's Exclusion Policy available here: www.alliancebernstein.com/go/FlExclusionPolicy

For EU Taxonomy-eligible activities, the proportion of EU Taxonomy alignment is displayed in the following questions.

● **...and compared to previous periods?**

As at 31 May 2024, the weighted average for SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services was 86.3%.

As at 31 May 2024, the top 3 SDGs aligned by Portfolio weight were:

- SDG 1 "No Poverty": 40.4%
- SDG 13 "Climate Action": 13.1%
- SDG 3 "Good Health and Wellbeing": 10.2%

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

All securities held within the Portfolio satisfied AB's proprietary methodology that uses the principal adverse impact ("PAIs") indicators to determine that a specific security meets the "Do No Significant Harm" principle outlined in SFDR (the "DNSH principle"). This methodology is comprised of a threshold-based scoring system, which uses a combination of internal and external data, alongside exclusion criteria. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy. The relevant data sources may evolve over time as more data becomes available and tools evolve.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

AB's Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB's Do No Significant Harm ("DNSH") Policy. AB's DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB's interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and was ineligible for inclusion in AB's Article 9 products.

During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

For any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB's proprietary methodology to determine that a security meets the DNSH principle.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs, as well as considering the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

AB incorporated the consideration of PAIs on sustainability indicators into various aspects of the Portfolio's investment process. This included:

- The 'Do No Significant Harm Policy' where a threshold-based scoring system, devised by AB, was used to evaluate issuers based on a consideration of the materiality and severity of ESG Factors in relation to PAIs 1-9, 11-13, 15, 16 and the two optional indicators listed above. Issuers scoring in excess of the threshold were made unavailable for investment. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.
- The Portfolio's Exclusion Policy which considers and mitigates the negative impact of certain PAIs by limiting investments in sectors such as, controversial weapons (PAI #14), or issuers violating the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI #10).

- AB's Policy with respect to engagement on ESG issues, as detailed in the AB Global Stewardship Statement, by which AB encouraged issuers to undertake actions that may promote better outcomes for environmental, and social, objectives, as well as benefits to the financial outcomes of the issuer and/or the Portfolio.
- AB's Proxy Voting Policy which evaluated whether ESG proposals promotes genuine improvement in the way that the company addresses ESG issues and may support such proposals. AB generally supported proposals in favour of financially material improvements in the management of environmental or social issues.

Below details the Portfolio's exposure to these PAIs as a weighted average as at 31 May 2025:

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2025- Weighted Average

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Portfolio achieved its investment objective through investments in securities which are deemed to be sustainable investments. A security was deemed to be a sustainable investment if the following criteria were satisfied:

- AB believed the security was positively exposed to environmentally- or socially-oriented sustainable investment themes derived from the UN SDGs, as confirmed by compliance with the relevant minimum revenue threshold for UN SDG- aligned products and services (top-down approach).
- AB assessed the issuer on ESG Factors (bottom-up approach).
- During the reference period, as applicable, the security was compliant with AB’s proprietary methodology to determine that a specific security meets the DNSH principle.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions as detailed in the Portfolio’s Exclusion Policy.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The Portfolio invested in issuers that AB believed were positively exposed to environmentally- or socially- oriented sustainable investment themes derived from the UN SDGs, such as Health, Climate, and Empowerment. All issuers contributed directly to the achievement of at least one UN SDG.

More information on the alignment approach can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FIMAS9webdisclosures

● **How did the sustainability indicators perform?**

For the Portfolio, the attainment of the sustainable investment objective was measured through an assessment of alignment with one or more UN SDGs.

As detailed in the Prospectus, to measure alignment, AB analyses the percentage of corporate issuers' revenues derived from products or services that support the achievement of one or more UN SDGs. As at 31 May 2025, the weighted average UN SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services, was 74.1%.

As at 31 May 2025, the top 3 UN SDGs by aligned portfolio weight are shown below (weights reflect reweighted portfolio ex-cash and derivatives). Please note that some issuers may align to more than one UN SDG but, for the purposes of this calculation, issuers are mapped according to the primary UN SDG to which they are aligned. As such, issuers are only mapped to one UN SDG:

- SDG 1 "No Poverty": 21.5%
- SDG 15 "Life on Land": 14.8%
- SDG 3 "Good Health and Well-Being": 10.3%

For sovereign & securitised issuers, all issuers met the relevant alignment criteria based on AB's proprietary methodology for themes derived from the UN SDGs.

AB has monitored the compliance with the exclusions listed in the Portfolio's Exclusion Policy available here:

www.alliancebernstein.com/go/FIExclusionPolicy

For EU Taxonomy-eligible activities, the proportion of EU Taxonomy alignment is displayed in the following questions.

- **...and compared to previous periods?**

As at 31 May 2024, the weighted average for SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services was 86.3%.

As at 31 May 2024, the top 3 SDGs aligned by Portfolio weight were:

- SDG 16 "Peace, Justice and Strong Institutions": 33.5%
- SDG 1 "No Poverty": 20.3%
- SDG 13 "Climate Action": 11.4%

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

All securities held within the Portfolio satisfied AB's proprietary methodology that uses the principal adverse impact ("PAIs") indicators to determine that a specific security meets the "Do No Significant Harm" principle outlined in SFDR (the "DNSH principle"). This methodology is comprised of a threshold-based scoring system, which uses a combination of internal and external data, alongside exclusion criteria. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy. The relevant data sources may evolve over time as more data becomes available and tools evolve.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

AB's Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB's Do No Significant Harm ("DNSH") Policy. AB's DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB's interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and was ineligible for inclusion in AB's Article 9 products.

During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

For any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB's proprietary methodology to determine that a security meets the DNSH principle.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs, as well as considering the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

AB incorporated the consideration of PAIs on sustainability indicators into various aspects of the Portfolio's investment process. This included:

- The 'Do No Significant Harm Policy' where a threshold-based scoring system, devised by AB, was used to evaluate issuers based on a consideration of the materiality and severity of ESG Factors in relation to PAIs 1-9, 11-13, 15, 16 and the two optional indicators listed above. Issuers scoring in excess of the threshold were made unavailable for investment. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.

- The Portfolio's Exclusion Policy which considers and mitigates the negative impact of certain PAIs by limiting investments in sectors such as, controversial weapons (PAI #14), or issuers violating the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI #10).
- AB's Policy with respect to engagement on ESG issues, as detailed in the AB Global Stewardship Statement, by which AB encouraged issuers to undertake actions that may promote better outcomes for environmental, and social, objectives, as well as benefits to the financial outcomes of the issuer and/or the Portfolio.
- AB's Proxy Voting Policy which evaluated whether ESG proposals promotes genuine improvement in the way that the company addresses ESG issues and may support such proposals. AB generally supported proposals in favour of financially material improvements in the management of environmental or social issues.

Below details the Portfolio's exposure to these PAIs as a weighted average as at 31 May 2025:

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Portfolio invested 4% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31 May 2025. The investments contributed to the environmental objective listed in the EU Taxonomy. The Taxonomy-alignment have not been subject to an assurance provided by an auditor or a third-party.

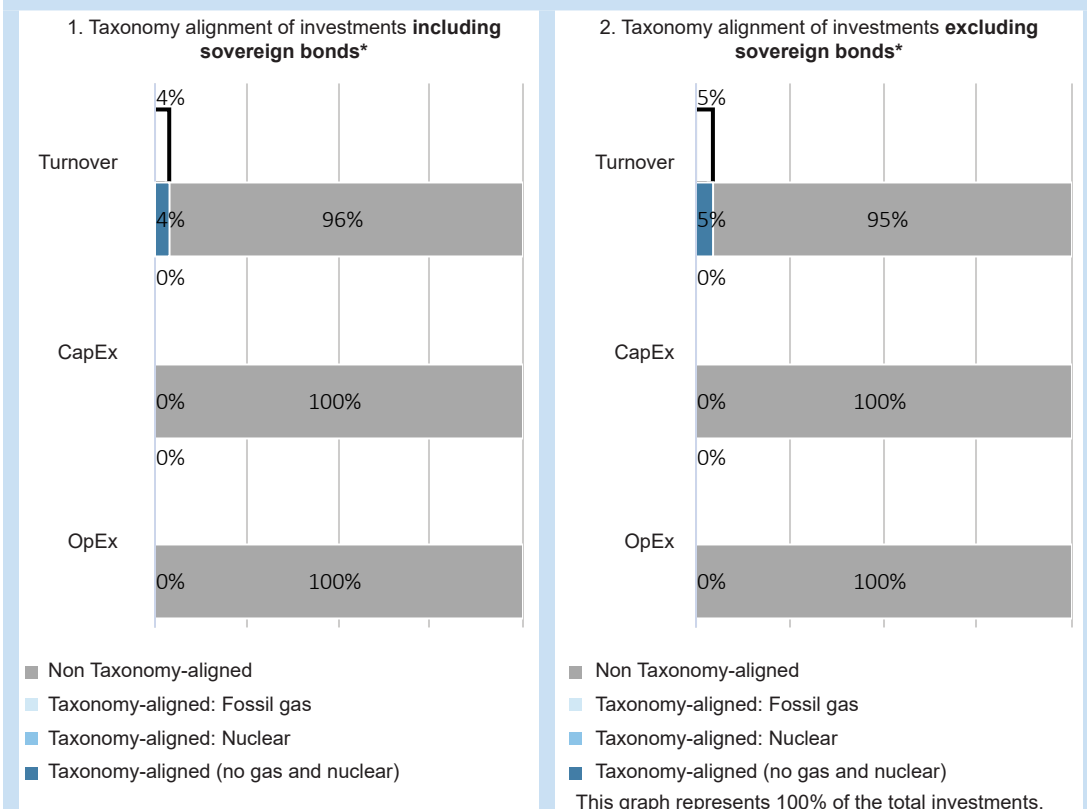

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 - In fossil gas
 - In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.6

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Cash and cash-equivalents held for liquidity purposes.
- Derivatives used for hedging and efficient portfolio management.

For these assets, there were no minimum environmental or social safeguards.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Portfolio achieved its investment objective through investments in securities which are deemed to be sustainable investments. A security was deemed to be a sustainable investment if the following criteria were satisfied:

- AB believed the security was positively exposed to environmentally- or socially-oriented sustainable investment themes derived from the UN SDGs, as confirmed by compliance with the relevant minimum revenue threshold for UN SDG- aligned products and services (top-down approach).
- AB assessed the issuer on ESG Factors (bottom-up approach).
- During the reference period, as applicable, the security was compliant with AB’s proprietary methodology to determine that a specific security meets the DNSH principle.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions as detailed in the Portfolio’s Exclusion Policy.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics (“E/S Characteristics”) promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB’s Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FI8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2025, 95% of the Portfolio possessed an ESG score based on AB’s proprietary methodology, and in the year to 31 May 2025, 78% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 35 ESG engagement entries with 29 distinct companies held in the Portfolio. For these engagements, there were 23 discussions of environmental issues, and 19 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions , Climate Transition Plans, Opportunities in Financial Inclusion, Privacy & Data Security, Labor Management.

The Portfolio's ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst's qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

● **...and compared to previous periods?**

As of 31 May 2024, 97.7% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2024, 78% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

N/A

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB’s Good Governance Policy.
- Derivatives used for hedging purposes.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2025, 95% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics (“E/S Characteristics”) promoted by the Portfolio included:

- Systematic ESG Integration: When making investment decisions, including the ongoing assessment and monitoring of the Portfolio, quantitative research was used to identify and assess material ESG Factors that may mitigate risk or offer opportunities in relation to bond returns and systematic signals are developed to exploit market inefficiencies.

As part of the systematic ESG integration approach the fund utilised the below exclusions:

- MSCI ESG Rating - CCC rated
- UN Global Compact Compliance - All Non-Compliant
- Controversial Weapons - AB Controversial Weapons Policy
- Tobacco / E-cigarette Producers - more than 10% revenue
- Firearms - more than 10% revenue

● **How did the sustainability indicators perform?**

AB measured the attainment of E/S Characteristics promoted by systematically ensuring pre-trade compliance with ESG-related exclusions, as well as the ongoing monitoring of the quantitative ESG factors. Quantitative ESG Factor(s) were used to optimise the Portfolio and may have been used to compare the Portfolio's promotion of E/S characteristics with that of its benchmark. The quantitative ESG Factor(s) utilized may vary over time and will depend on the quantitative research team's determination of factors that are statistically significant to risk-adjusted returns.

More information on these indicators can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FISY8webdisclosures

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

In the period to 31 May 2025, 95% of the Portfolio was deemed to promote E/S Characteristics on the basis of compliance with the exclusions applied.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

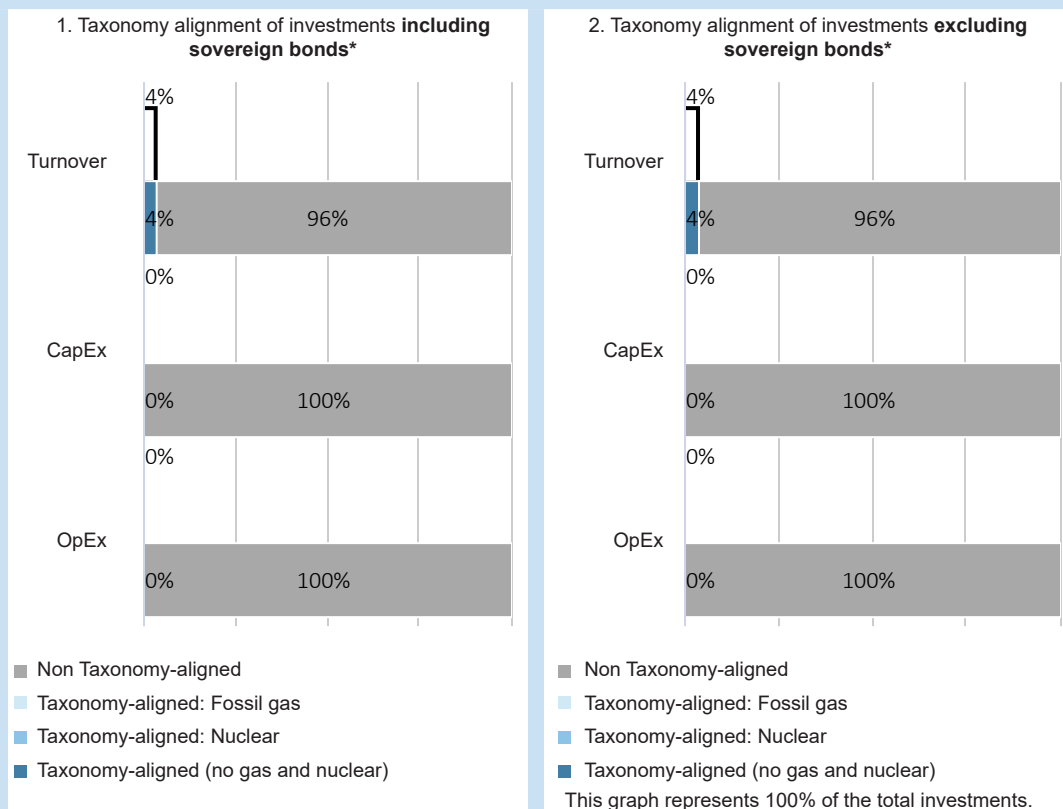

Yes:

In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.4%

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.
The Portfolio promoted E/S Characteristics by systematic ESG integration and by employing ESG-related screens and exclusions.
A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- The security was compliant with the Portfolio's ESG-related screens and exclusions.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics (“E/S Characteristics”) promoted by the Portfolio included:

- Systematic ESG Integration: When making investment decisions, including the ongoing assessment and monitoring of the Portfolio, quantitative research was used to identify and assess material ESG Factors that may mitigate risk or offer opportunities in relation to bond returns and systematic signals are developed to exploit market inefficiencies.

As part of the systematic ESG integration approach the fund utilised the below exclusions:

- MSCI ESG Rating - CCC rated
- UN Global Compact Compliance - All Non-Compliant
- Controversial Weapons - AB Controversial Weapons Policy
- Tobacco / E-cigarette Producers - more than 10% revenue
- Firearms - more than 10% revenue
- Nuclear Weapons - more than 10% (except where permitted under the UN Treaty on the Non Proliferation on Nuclear Wepons)
- Private Prisons - more than 20% revenue
- Oil Sands - more than 10% revenue
- Shale Oil/Gas - more than 10% revenue
- Arctic Gas - more than 10% revenue
- Unconventional Oil & Gas - more than 10% revenue

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics (“E/S Characteristics”) promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **ESG Scoring:** AB used a variety of proprietary scoring methodologies to score issuers using ESG Factors.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB’s Sustainability-Related Disclosures:

www.alliancebernstein.com/go/MAS8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

- **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2025, 92% of the Portfolio possessed an ESG score based on AB’s proprietary methodology, and in the year to 31 May 2025, 69% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 178 ESG engagement entries with 150 distinct companies held in the Portfolio. For these engagements, there were 121 discussions of environmental issues, and 95 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Climate Transition Plans, ESG-Labeled Bonds, Privacy & Data Security, Human Capital Development

The Portfolio's ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst's qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

● **...and compared to previous periods?**

As of 31 May 2024, 81.3% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2024, 71% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

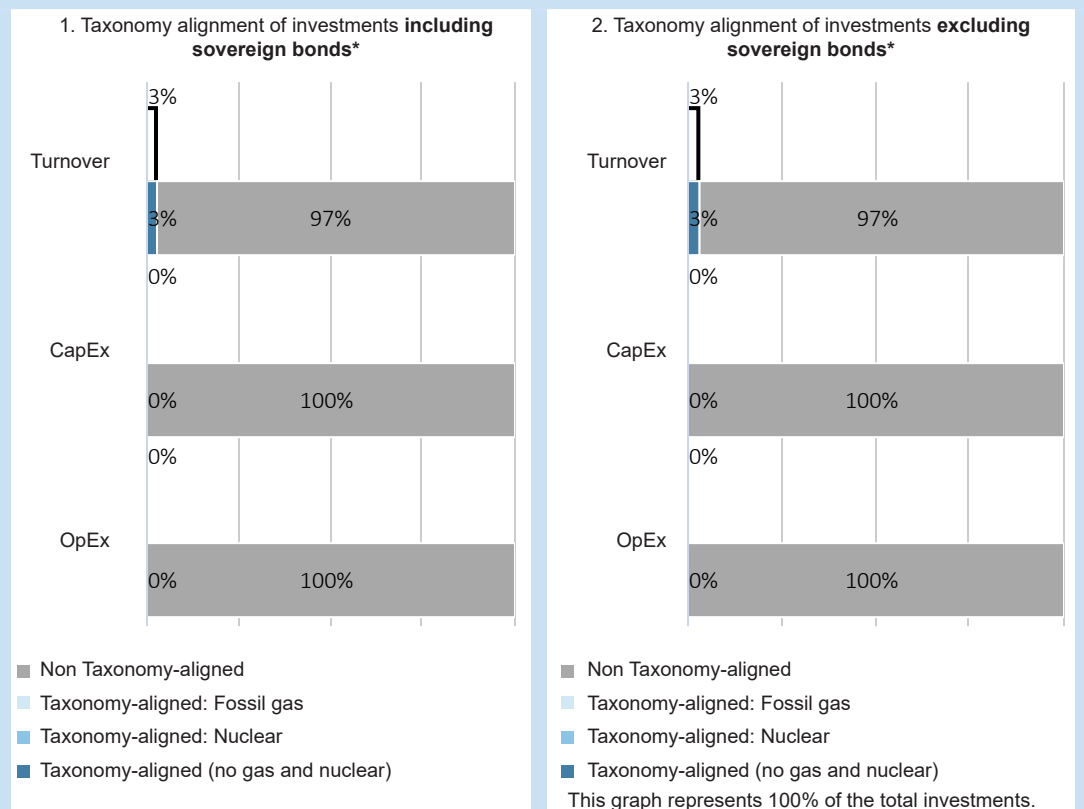

Yes:

In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2024, 2% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB’s Good Governance Policy.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2025 92% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- ESG Scoring: AB used a variety of proprietary scoring methodologies to score issuers using ESG Factors.

Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus. These included the below ESG-related exclusions applied to the Portfolio's assets managed through the proprietary quantitative approach:

- MSCI ESG Rating - CCC rated
- UN Global Compact Compliance - All Non-Compliant
- Controversial Weapons
- Tobacco / E-cigarette Producers
- Firearms
- Nuclear Weapons (except where permitted under the UN Treaty on the Non Proliferation on Nuclear Weapons)
- Private Prisons
- Oil Sands
- Shale Oil/Gas
- Arctic Gas
- Unconventional Oil & Gas
- Thermal Coal
- Cannabis

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/MAS8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

- **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2025, 90% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2025, 70% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 553 ESG engagement entries with 406 distinct companies held in the Portfolio. For these engagements, there were 317 discussions of environmental issues, and 337 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Human Capital Development, Diversity & Inclusion, Climate Transition Plans, Labor Management. The Portfolio's ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst's qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology. Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

For the Portfolio's assets managed through the proprietary quantitative approach, AB measured the attainment of E/S Characteristics promoted by utilising ESG-related screens and exclusions. These exclusions include, among others, controversial weapons, cannabis, private prisons, tobacco, and nuclear weapons. Please refer to the full list of exclusions and screens detailed in the Sustainability Related Disclosures for more information:

www.alliancebernstein.com/go/MAS8webdisclosures

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **...and compared to previous periods?**

As of 31 May 2024, 93.5% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2024, 51% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

N/A

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

N/A

The EU Taxonomy sets out a «do not significant harm» principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The «do no significant harm» principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2025-Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.57%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

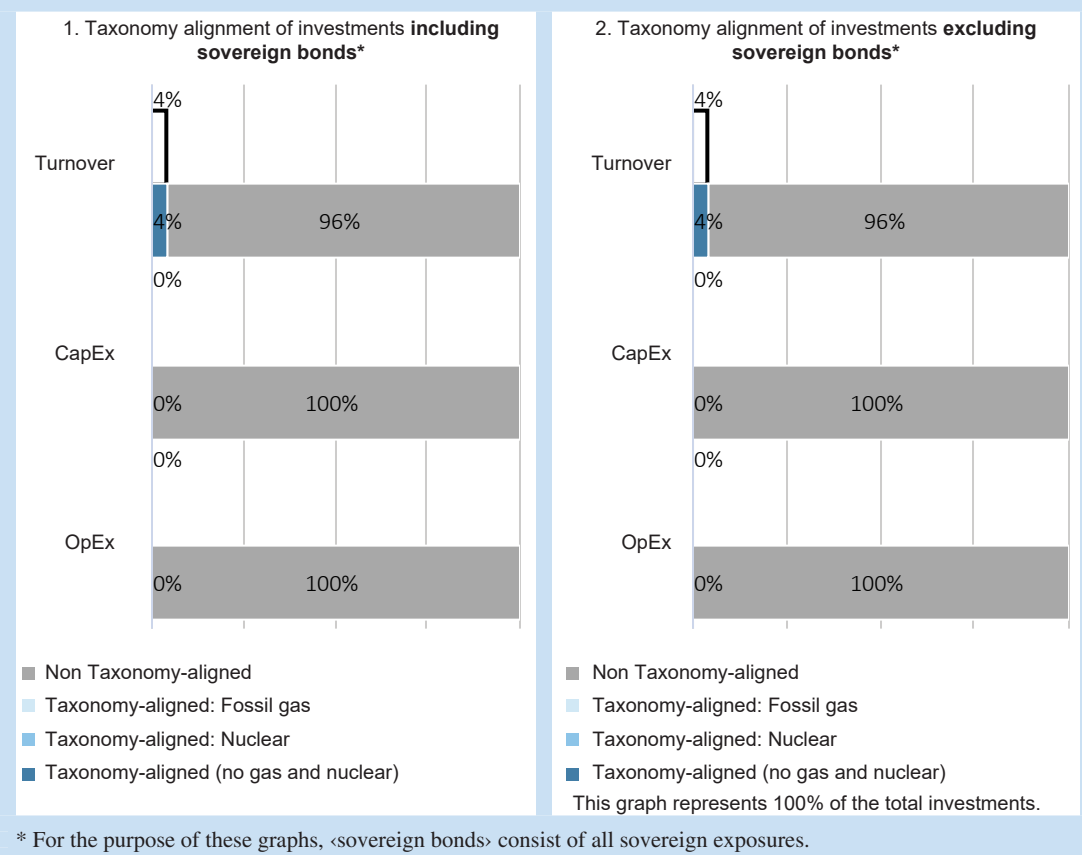

Yes:

In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change («climate change mitigation») and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB’s Good Governance Policy.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2025 90% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions.

For the Portfolio’s assets managed through the proprietary quantitative approach, the Portfolio promoted E/S Characteristics by employing ESG-related screens and exclusions. A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- The security was compliant with the Portfolio’s ESG-related screens and exclusions.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics (“E/S Characteristics”) promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **ESG Scoring:** AB used its proprietary scoring methodology to score issuers using ESG Factors.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB’s Sustainability-Related Disclosures:

<https://www.alliancebernstein.com/content/dam/alliancebernstein/literature/abii/regulatory/sustainability-related-disclosuresdocument/en/MASArticle8Sustainability-relatedDisclosures.pdf> and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the period to the fund closure (liquidation date 25 November 2024), 72% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the period to the Portfolio closure, there were 49 ESG engagement entries with 46 distinct companies held in the Portfolio. For these engagements, there were 64 discussions of environmental issues, and 41 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Climate Transition Plans, Carbon Emissions, Supply Chain - Environmental, Human Capital Management, Supply Chain - Social

The Portfolio's ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst's qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **...and compared to previous periods?**

As of 31 May 2024, 76.6% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2024, 80% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

N/A

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10)
- Exposure to controversial weapons (#14)

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio

For PAI 14, the Portfolio excluded controversial weapons.

Below details the Portfolio's exposure to these PAIs as a weighted average to the fund closure:

For PAI 10, 1.00%

For PAI 14, 0.00%

What was the proportion of sustainability-related investments?

N/A

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

- #1 Aligned with E/S: 72%
- #2 Other: 28%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy alignment of investments including sovereign bonds*

■ Taxonomy-aligned (no gas and nuclear energy)
■ Non Taxonomy-aligned

2. Taxonomy alignment of investments excluding sovereign bonds*

■ Taxonomy-aligned (no gas and nuclear energy)
■ Non Taxonomy-aligned

This graph represents 100% of the total investments*.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2024, 2% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB’s Good Governance Policy.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/S Characteristics will be captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As at the point of the fund closure, 21.6% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.
- The security was compliant with the Portfolio’s investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

- **How did the reference benchmark differ from a broad market index?**

N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A

- **How did this financial product perform compared with the reference benchmark?**

N/A

- **How did this financial product perform compared with the broad market index?**

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 67.00%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The Portfolio invested in issuers that AB believed were positively exposed to environmentally- or socially- oriented sustainable investment themes derived from the UN SDGs, such as Health, Climate, and Empowerment. All issuers contributed directly to the achievement of at least one UN SDG.

More information on the alignment approach can be found in AB's Sustainability-Related Disclosures: www.alliancebernstein.com/go/FIMAS9webdisclosures

● **How did the sustainability indicators perform?**

For the Portfolio, the attainment of the sustainable investment objective was measured through an assessment of alignment with one or more UN SDGs.

As detailed in the Prospectus, to measure alignment, AB analyses the percentage of corporate issuers' revenues derived from products or services that support the achievement of one or more UN SDGs. As at 31 May 2025, the weighted average UN SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services, was 89.4%.

As at 31 May 2025, the top 3 UN SDGs by aligned portfolio weight are shown below (weights reflect reweighted portfolio ex-cash and derivatives). Please note that some issuers may align to more than one UN SDG but, for the purposes of this calculation, issuers are mapped according to the primary UN SDG to which they are aligned. As such, issuers are only mapped to one UN SDG:

- SDG 8 "Decent Work and Economic Growth": 15.8%
- SDG 3 "Good Health and Well-Being": 12.6%
- SDG 1 "No Poverty": 11.7%

For sovereign & securitised issuers, all issuers met the relevant alignment criteria based on AB's proprietary methodology for themes derived from the UN SDGs.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

AB has monitored the compliance with the exclusions listed in the Portfolio's Exclusion Policy available here: www.alliancebernstein.com/go/SAMExclusionPolicy

For EU Taxonomy-eligible activities, the proportion of EU Taxonomy alignment is displayed in the following questions.

- **...and compared to previous periods?**

As at 31 May 2024, the weighted average for SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services was 88.8%.

As at 31 May 2024, the top 3 SDGs aligned by Portfolio weight were:

- SDG 13 "Climate Action": 18.4%
- SDG 8 "Decent Work and Economic Growth": 13.7%
- SDG 3 "Good Health and Wellbeing": 13.4%

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

All securities held within the Portfolio satisfied AB's proprietary methodology that uses the principal adverse impact ("PAIs") indicators to determine that a specific security meets the "Do No Significant Harm" principle outlined in SFDR (the "DNSH principle"). This methodology is comprised of a threshold-based scoring system, which uses a combination of internal and external data, alongside exclusion criteria. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy. The relevant data sources may evolve over time as more data becomes available and tools evolve.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

AB's Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB's Do No Significant Harm ("DNSH") Policy. AB's DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB's interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and was ineligible for inclusion in AB's Article 9 products.

During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

For any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB's proprietary methodology to determine that a security meets the DNSH principle.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs, as well as considering the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

AB incorporated the consideration of PAIs on sustainability indicators into various aspects of the Portfolio's investment process. This included:

- The 'Do No Significant Harm Policy' where a threshold-based scoring system, devised by AB, was used to evaluate issuers based on a consideration of the materiality and severity of ESG Factors in relation to PAIs 1-9, 11-13, 15, 16 and the two optional indicators listed above. Issuers scoring in excess of the threshold were made unavailable for investment. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.
- The Portfolio's Exclusion Policy which considers and mitigates the negative impact of certain PAIs by limiting investments in sectors such as, controversial weapons (PAI #14), or issuers violating the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI #10).
- AB's Policy with respect to engagement on ESG issues, as detailed in the AB Global Stewardship Statement, by which AB encouraged issuers to undertake actions that may promote better outcomes for environmental, and social, objectives, as well as benefits to the financial outcomes of the issuer and/or the Portfolio.
- AB's Proxy Voting Policy which evaluated whether ESG proposals promotes genuine improvement in the way that the company addresses ESG issues and may support such proposals. AB generally supported proposals in favour of financially material improvements in the management of environmental or social issues.

Below details the Portfolio's exposure to these PAIs as a weighted average as at 31 May 2025:

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Portfolio invested 4% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31 May 2025. The investments contributed to the environmental objective listed in the EU Taxonomy. The Taxonomy-alignment have not been subject to an assurance provided by an auditor or a third-party.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Cash and cash-equivalents held for liquidity purposes.
- Derivatives used for hedging and efficient portfolio management.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Portfolio achieved its investment objective through investments in securities which are deemed to be sustainable investments.

A security was deemed to be a sustainable investment if the following criteria were satisfied:

- AB believed the security was positively exposed to environmentally- or socially-oriented sustainable investment themes derived from the UN SDGs, as confirmed by compliance with the relevant minimum revenue threshold for UN SDG- aligned products and services (top-down approach).
- AB assessed the issuer on ESG Factors (bottom-up approach).
- During the reference period, as applicable, the security was compliant with AB's proprietary methodology to determine that a specific security meets the DNSH principle.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions as detailed in the Portfolio's Exclusion Policy.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics (“E/S Characteristics”) promoted by the Portfolio included:

- **ESG Integration:** AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- **Engagement:** AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- **ESG Scoring:** AB used a variety of proprietary scoring methodologies to score issuers using ESG Factors.
- **Exclusions:** The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB’s Sustainability-Related Disclosures:

www.alliancebernstein.com/go/MAS8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

● **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2025, 53% of the Portfolio possessed an ESG score based on AB’s proprietary methodology, and in the year to 31 May 2025, 67% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2025, there were 174 ESG engagement entries with 105 distinct companies held in the Portfolio. For these engagements, there were 64 discussions of environmental issues, and 142 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Human Capital Development, Diversity & Inclusion, Product Safety & Quality, Carbon Emissions , Privacy & Data Security

The Portfolio’s ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst’s qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

● **...and compared to previous periods?**

As of 31 May 2024, 60.2% of the Portfolio possessed an ESG score based on AB’s proprietary methodology, and in the year to 31 May 2024, 66% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

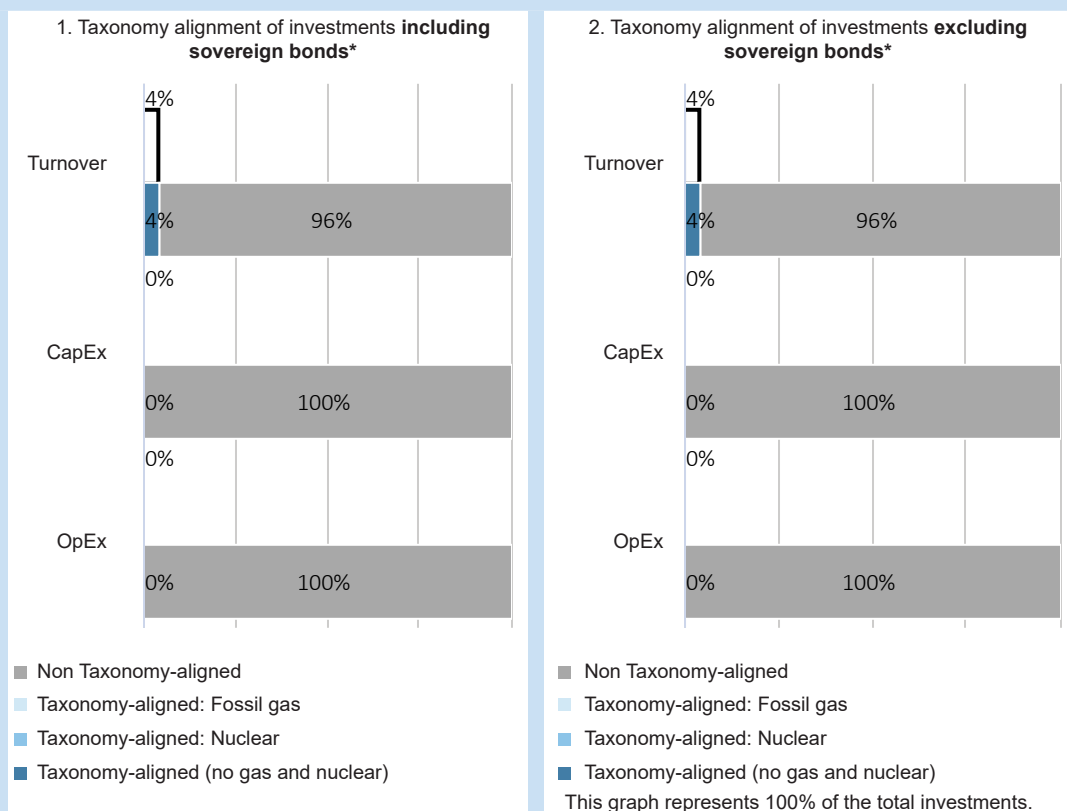

In fossil gas

In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB's Good Governance Policy.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2025 53% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Environmental and/or social characteristics (“E/S Characteristics”) were promoted by the Portfolio through ESG- related screens and exclusions.

The Portfolio utilised the below investment exclusions on both the long and the short positions:

- MSCI ESG Rating - CCC rated
- UN Global Compact Compliance - All Non-Compliant
- Controversial Weapons
- Tobacco / E-cigarette Producers
- Firearms
- Nuclear Weapons (except where permitted under the UN Treaty on the Non Proliferation on Nuclear Weapons)
- Private Prisons
- Oil Sands
- Shale Oil/Gas
- Arctic Gas
- Unconventional Oil & Gas
- Thermal Coal
- Cannabis

More information on these characteristics can be found in AB’s Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EVPwebdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

AB measured the attainment of E/S Characteristics promoted by utilising ESG-related screens and exclusions. These exclusions include, among others, controversial weapons, cannabis, private prisons, tobacco, and nuclear weapons. Please refer to the full list of exclusions and screens detailed in the Sustainability Related Disclosures for more information: www.alliancebernstein.com/go/EVPwebdisclosures

All securities are monitored to ensure that they comply with the Portfolio's investment exclusion criteria. Only issuers that do not breach the exclusion criteria are eligible for investment. AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

In the year to 31 May 2025, 82% of the Portfolio was deemed to promote E/S Characteristics on the basis of compliance with the exclusions applied.

● **...and compared to previous periods?**

In the period to 31 May 2024, 89% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Exposure to controversial weapons (#14).

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2025- Weighted average
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

No:

As of the date of this report, there is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

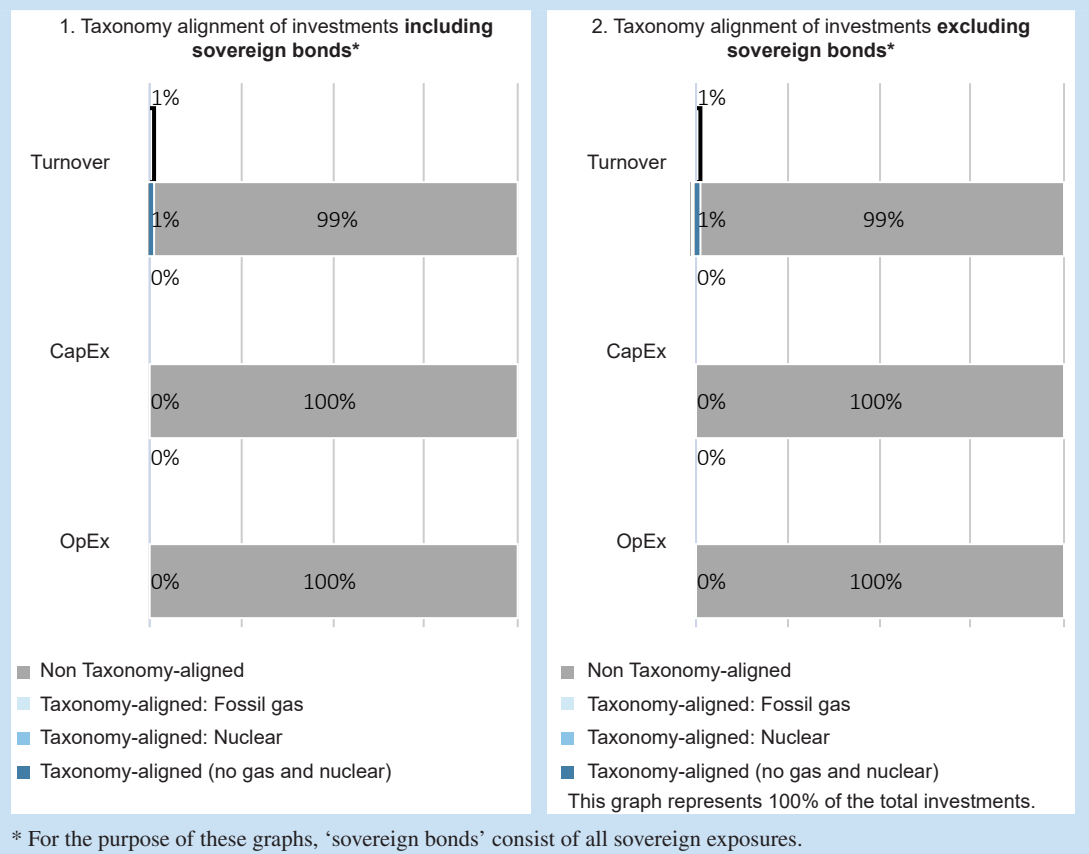

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

While the Portfolio does not intend to make EU Taxonomy-aligned investments, a percentage of actual investments of the Portfolio was reported as EU Taxonomy-aligned during the reference period, as required by ESAs. As of the date of this report, AB does not have access to suitable data to accurately report on EU Taxonomy alignment on the basis of Capex and Opex.

- What was the share of investments made in transitional and enabling activities?**

As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2024, 1% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Any securities or derivatives that did not satisfy all ESG-related screens and exclusions.
- Cash held for liquidity, risk management purposes, or collateral management purposes.

For these assets, there were no minimum environmental or social safeguards.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- The security was compliant with the Portfolio’s ESG-related screens and exclusions.
- During the reference period, as applicable, the issuer of the security was compliant with AB’s Good Governance Policy.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
